EM–77 is not known to exist in the United States at the present time. Therefore, in order to protect the livestock of the United States against the introduction and dissemination of EM–77, the importation of all horses, except geldings, from England, Ireland, or France, and the importation of all horses, except geldings, which have been in any such country during the 60 days immediately preceding their export to the United States is prohibited until further notice. Geldings are excluded from this restriction since they do not pose a threat of spreading this disease.

Accordingly, Part 92, Title 9, Code of Federal Regulations, is amended in the following respects:

In § 92.2, a new paragraph (i) is added to read:

§ 92.2 General prohibitions; exceptions.

* * * * *

(i) Notwithstanding the other provisions of this part concerning the importation of horses into the United States, the importation of all horses, except gelding, from the following listed countries and the importation of all horses, except geldings, which have been in any such country within the 60 days immediately preceding their export to the United States is prohibited because of the existence of EM–77 in such countries: England, Ireland, and France.

(Sec. 2, 32 Stat. 792, as amended; secs. 4 and 11, 76 Stat. 130, 132 (21 U.S.C. 111, 134c, and 134f); 37 FR 28464, 28477; 38 FR 19141.)

This amendment imposes additional restrictions on the importation of certain horses into the United States. The amendment is of an emergency nature and should be placed in effect immediately in order to protect the livestock of the United States from the introduction and dissemination of disease.

Therefore, for such good cause the Department finds that notice and other public procedure regarding this amendment are impracticable, unnecessary and contrary to the public interest and good cause is found for making the amendment effective less than 30 days after publication in the FEDERAL REGISTER.

Done at Washington, D.C., this 9th day of September 1977.

NOTE.—The Animal and Plant Health Inspection Service has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A–107.

PIERRE A. CHALOUX,
Deputy Administrator, Veterinary Services.

Title 12—Banks and Banking

CHAPTER II—FEDERAL RESERVE SYSTEM

SUBCHAPTER A—BOARD OF GOVERNORS OF THE FEDERAL RESERVE SYSTEM

[Reg. Z: FC–0103 through FC–0105]

PART 226—TRUTH IN LENDING

Official Staff Interpretations

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Official staff interpretation(s).

SUMMARY: The Board is publishing the following official staff interpretations of Regulation Z, issued by a duly authorized official of the Division of Consumer Affairs.

EFFECTIVE DATE: September 13, 1977.

FOR FURTHER INFORMATION CONTACT:

Glenn E. Loney, Attorney, Fair Credit Practices Section, Division of Consumer Affairs, Board of Governors of the Federal Reserve System, Washington, D.C. 20551 (202–452–2412).

SUPPLEMENTARY INFORMATION: (1) Identifying details have been deleted to the extent required to prevent a clearly unwarranted invasion of personal privacy. The Board maintains and makes available for public inspection and copying a current index providing identifying information for the public subject to certain limitations stated in 12 CFR Part 261.6.

(2) Official staff interpretations may be reconsidered upon request of interested parties and in accordance with 12 CFR Part 226.1(d)(2). Every request for reconsideration should clearly identify the number of the official staff interpretation in question, and should be addressed to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551.

(3) 15 U.S.C. 1640(f).

[FC–0103]

§ 226.4(a) and § 226.7(a) Charges imposed in connection with checking accounts required to be established as a condition of an extension of open end or other than open end credit need not be included in finance charge (§ 226.4(a)) or disclosed as an "other charge" under § 226.7(a)(6).

§ 226.8(e) Where checking account must be opened as a condition of an extension of credit other than open end, a minimum checking account balance maintained in order to avoid imposition of service charges is not a required deposit balance.

AUGUST 24, 1977.

This is in response to your letter of * * *, in which you request an official staff inter-

V 42 177 SEP 1377 UMI

pretation of Regulation Z. You inquire as to the impact of Regulation Z on certain charges imposed and balances maintained in connection with checking accounts which are required to be established by customers as a condition of an extension of either open end credit or credit other than open end.

You first ask whether the checking account service charges should be included in the finance charge disclosure with regard to an extension of credit. In the case of open end credit, you also ask whether (assuming they are not to be included in the finance charge) the service charges should be identified as an "other charge" in accordance with § 226.7(a)(5). Third, you ask whether any minimum checking account balance required to be maintained in order to avoid the imposition of the checking account service charges is a required deposit balance as defined in § 226.8(e)(2) if the customer is required to establish a checking account as a condition of an extension of credit other than open end.

Section 226.4(a)(2) of Regulation Z requires that service, transaction, activity or carrying charges that are imposed by a creditor as a condition of an extension of credit must be included in the amount of the finance charge. As you indicate, however, footnote 2 to § 226.4(a)(2) provides that these charges include any such charges imposed in connection with a checking account but only "to the extent that such charges exceed any charges the customer is required to pay in connection with such an account when it is not being used to extend credit." Assuming, therefore, that the service charges assessed on a checking account established for the purpose of obtaining an extension of credit are not in excess of the charges normally assessed on a checking account which is not established for that purpose, staff is in agreement with your position that the service charges imposed on such a mandatory checking account need not be included in the amount of the finance charge for the related credit transaction.

Furthermore, in staff's view, the service charges do not come within the definition of an "other charge" to be disclosed in accordance with § 226.7(a)(5). In Public Information Letter 946 (a copy of which is enclosed for your convenient reference), staff concluded that: Where the overdraft is not treated as part of the credit plan and the fee assessed for honoring it is identical to the fee charged on an overdraft of a checking account without a credit feature, the fee would not seem to be an element of the credit plan, but rather would seem to be related to the basic checking account agreement.

Similarly, the service charges imposed on the checking account described herein appear to be assessed regardless of whether credit is extended.

Moreover, in those situations where a checking account must be opened as a condition of an extension of credit other than open end, staff does not consider a minimum checking account balance which is maintained in order to avoid the imposition of the service charges as constituting a required balance. Section 226.8(e)(2) defines a required deposit balance as including "(a)ny deposit balance. Section 226.8(e)(2) defines a required deposit balance as including "(a)ny deposit balance or investment which the creditor requires the customer to make, of credit * * *." Your client does not appear to require the customer to make, maintain, or increase a minimum balance in the checking account established in order to obtain an extension of credit. Rather, the customer is merely being given the option of maintaining a balance sufficient to avoid the imposition of the service charges. Since staff regards the maintenance of such a minimum checking account balance as a condition for obtaining a benefit of the checking account plan, rather than as "a condition to the extension of credit," staff does not consider such a minimum checking account balance to be a required deposit balance as defined by § 226.8(e)(2).

This is an official staff interpretation of Regulation Z, issued in accordance with § 226.1(d)(3) of the regulation. It is limited solely to the facts and issues presented herein. I trust that it is responsive to your inquiry.

Sincerely,

JANET HART,
Director.

[FC-0104]

§ 226.808 Disclosure method set out in § 226.808 may be used where mortgage insurance premiums vary each year and are collected from customer annually rather than monthly.

AUGUST 25, 1977.

This is in reply to your letter of * * *, in which you request an official staff interpretation concerning the proper disclosure of the schedule of payments in a mortgage loan involving mortgage insurance. You inquire about a situation in which the lender pays the mortgage insurance premiums annually. The premiums decrease each year because they are computed on the basis of the unpaid principal balance of the loan. Consequently, the program is similar to the programs discussed in Official Staff Interpretations FC-0003, FC-0025, and FC-0030, except that the mortgage insurance premium is collected from the borrower annually, rather than monthly. All payments are for an equal amount of principal and interest, but the twelfth payment each year is larger than the other eleven by the amount of the annual mortgage insurance premium.

You wish to know whether Board Interpretation § 226.808, which provides a method of disclosing the schedule of payments when the payment amounts vary over the term of a credit transaction, is applicable in this situation. You believe that the disclosure method set out in § 226.808 and explained in the above-cited official staff interpretations is equally as understandable and informative in your program, in which the premiums decline in annual steps and are paid annually, as it is in those programs in which the premiums decline in annual steps but are paid monthly. You propose to disclose the payment schedule by indicating the constant amount of principal and interest which will be due monthly throughout the life of the loan and, further, by explaining that on a certain date of each year an additional amount is to be paid for the mortgage insurance premiums. In addition, you propose to disclose the amounts of the mortgage insurance premiums that would be included in the first and in the last of these varying payments, as well as disclosing the total amount (reflecting principal, interest, and mortgage insurance premiums) of the first and the last of such varying payments.

It is staff's opinion that the principles underlying Board Interpretation § 226.808 are applicable to the program you have described. Staff believes that the above-described method of disclosure sufficiently complies with the regulation, assuming, of course, that the total finance charge and the total of payments are also disclosed as called for in § 226.808. You may be interested to know, however, that the staff is currently considering recommending to the Board a revision of § 226.808 concerning the method of disclosing the payment schedule when the payment amounts vary. If the interpretation should be revised, you will need to reassess your method of disclosure in light of the changes at that time.

This is an official staff interpretation of Regulation Z, issued in accordance with § 226.1(d)(3) of the regulation, and it is limited to the facts as set out herein. I trust that it proves helpful to you.

Sincerely,

JANET HART,
Director.

[FC-0105]

§ 226.4(1), § 167 of Act, § 171 of Act—Discounts limited to only cash-paying customers may qualify for the special treatment afforded by §§ 167 and 171(c) of the Truth in Lending Act and § 226.4(1). of Regulation Z.

AUGUST 26, 1977.

This is in response to your letter of * * *, inquiring about the requirements of § 167 of the Truth in Lending Act. You ask whether a merchant wishing to offer a discount in accordance with that section may restrict the availability of the discount to those customers paying with cash only (i.e., the discount would not be available to customers tendering checks, nor to credit card purchasers). Section 167 is implemented by § 226.4(1) of Regulation Z, which has been recently amended. Enclosed you will find a copy of the amendments.

Staff believes that it is permissible for a merchant to offer discounts to only those customers paying for goods or services by cash, and that such a discount would qualify for the special treatment afforded by §§ 167 and 171(c) of the Act and § 226.4(1) of the regulation. Of course the amount of the discount, and manner in which the discount is offered, must comply with the provisions of § 226.4(1) in order for the discount to be exempted from treatment as a finance charge.

This is an official staff interpretation of Regulation Z, issued in accordance with § 226.1(d)(3) of the regulation, and limited in its application to the facts and issues discussed above. I trust it is responsive to your inquiry.

Sincerely,

JANET HART,
Director.

Board of Governors of the Federal Reserve System, September 7, 1977.

THEODORE E. ALLISON,
Secretary of the Board.

[FR Doc.77-26532 Filed 9-12-77;8:45 am]

[Reg. Z; Docket Nos. R-0093 and R-0087]

PART 226—TRUTH IN LENDING

Descriptions of Transactions

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Final rule.

SUMMARY: This rule postpones the date for full implementation of the regulation regarding descriptive billing of nonsale credit transactions, such as cash advance checks, on open end credit accounts (Reg. Z, § 226.7(k)(3)(ii)) until March 28, 1978. The action is taken in order to permit the full consideration of proposals to amend this section of the regulation, which are designed to facilitate compliance with the regulation by creditors and, at the same time, to retain the essential description requirements of the present regulation for the benefit of consumers.

EFFECTIVE DATE: August 31, 1977.

FOR FURTHER INFORMATION CONTACT:

Glenn E. Loney, Attorney, Division of Consumer Affairs, Board of Governors of the Federal Reserve System, Washington, D.C. 20551 (202-452-2412).

SUPPLEMENTARY INFORMATION: By this document the Board of Governors of the Federal Reserve System ("Board" herein) postpones the date for full implementation of § 226.7(k)(3)(ii) of Regulation Z, which prescribes rules regarding descriptive billing of nonsale credit transactions reflected on open end credit periodic statements. That section of the regulation was scheduled to become fully effective on October 28, 1977. However, because of the pendency of Board consideration of proposals to amend the section, it is necessary to postpone the date until March 28, 1978, in order to have sufficient time to complete the consideration of the proposals and any rulemaking proceedings that become necessary. This postponement is also necessary in order to avoid the commitment of resources by creditors to comply with the requirements of the section as it is currently written until the Board has determined whether or not it should be changed, and to give creditors sufficient time to adjust their systems to comply with the requirements ultimately adopted.

It should be made clear that this suspension relates only to the requirements of § 226.7(k)(3)(ii) of Regulation Z regarding identifications of nonsale credit transactions, such as cash advance checks. The requirements of § 226.7(k) relating to other types of credit transactions are not affected hereby.

Pursuant to 5 U.S.C. 553 (1970) the Board finds that notice and public participation in this rulemaking are impractical and unnecessary since (1) time is of the essence in postponing the date for full implementation of the section, (2) the effective date is merely temporarily postponed, and (3) opportunity will be afforded for public comment on any changes in the substance of the subject regulation proposed by the Board.

In consideration of the foregoing and pursuant to the authority granted in 15 U.S.C. 1604 (1970) the Board hereby postpones the October 28, 1977, date for full implementation of § 226.7(k)(3)(ii) of Regulation Z, as affected in § 226.7(k)(7)(i), until March 28, 1978. During the period of the postponement a creditor may comply with the requirements for identifying nonsale credit transactions on or with open end credit periodic statements either by use of the methods prescribed in § 226.7(k)(3), by use of the alternatives prescribed in § 226.7(k)(4) or § 226.7(k)(7)(i), or by use of a combination of those methods.

By order of the Board of Governors of the Federal Reserve System, August 31, 1977.

THEODORE E. ALLISON,
Secretary of the Board.

Title 20—Employees' Benefits

CHAPTER III—SOCIAL SECURITY ADMINISTRATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

[Regulations No. 5, further amended]

PART 405—FEDERAL HEALTH INSURANCE FOR THE AGED AND DISABLED

Recovery of Excess Cost Resulting From Use of Accelerated Depreciation When Termination of Provider Agreement Results From Transaction Between Related Organizations

AGENCY: Health Care Financing Administration.

ACTION: Final rule.

SUMMARY: Current regulations require that when a provider who has used accelerated depreciation terminates participation in the health insurance program, depreciation claimed by the provider in excess of straight-line depreciation is to be recovered by the health insurance program. This regulation establishes new policy by providing that when the termination of the provider agreement is due to a change in provider ownership resulting from a transaction between related organizations, and certain other conditions are met, this recovery provision will not be applied.

EFFECTIVE DATE: This amendment shall be effective September 13, 1977, and may be applied to all cost reports subject to reopening.

FOR FURTHER INFORMATION CONTACT:

Virginia Gray, Division of Provider Reimbursement and Accounting Policy, Bureau of Health Insurance, 6401 Security Boulevard, Baltimore, Maryland 21235, telephone 301-594-9690.

SUPPLEMENTARY INFORMATION: On October 20, 1976, this regulation was published in the FEDERAL REGISTER (41 FR 46321) with a Notice of Proposed Rulemaking as a proposed amendment to Subpart D of Regulations No. 5 (20 CFR Part 405) regarding recovery of excess cost resulting from the use of accelerated depreciation when termination of the provider results from a transaction between related organizations.

Current regulations require that when a provider who has used accelerated depreciation terminates participation in the health insurance program, depreciation claimed by the provider in excess of straight-line depreciation is to be recovered by the health insurance program. The intention of the current regulation is to insure that the health insurance program pay providers only the reasonable cost of services furnished to Medicare beneficiaries. Without the provision for the recovery of excess depreciation, a provider who had been allowed depreciation at an accelerated rate, and thus received disproportionately high depreciation payments from the health insurance program in its initial years of participation, would avoid rendering services at compensatingly low depreciation allowances in later years, if it terminated participation in the health insurance program.

However, when termination of the provider agreement results from a transaction between related organizations, and the successor provider remains in the health insurance program and its asset bases are the same as those of the terminated providers, health insurance program reimbursement is equitable to all parties. An amendment to the regulations is necessary, therefore, to provide that when termination of the provider agreement results from a transaction between related organizations, and certain other conditions are met, the recovery of accelerated depreciation will not be applied.

Section 5 U.S.C. 553(d) permits an immediate effective date when good cause exists. Because this amendment establishes new policy, which is a liberalization of an existing policy, and may be applicable to cost reports subject to reopening, good cause exists for not having a delayed effective date. Therefore, this amendment shall be effective upon publication in the FEDERAL REGISTER.

Interested parties were given 45 days from the date of publication of the Notice of Proposed Rulemaking in which to submit data, views, or arguments thereon. Only a few comments were received as a result of the Notice of Proposed Rulemaking. These comments essentially agreed with the purpose of the proposed regulation. The proposed amendment has been prepared for final publication with only clarifying editorial changes.

Accordingly, the amendments are adopted as revised and are set forth below.

Part 405 of Chapter III of Title 20 of the Code of Federal Regulations, is amended as follows:

In § 405.415, paragraph (d) is amended by adding headings for paragraphs (d)(1), (d)(2), and (d)(3), redesignating the material in the present paragraph (d)(3) as paragraph (d)(3)(i), adding a heading for such redesignated paragraph, and adding paragraph (d)(3)(ii). The added headings and paragraph (d)(3)(ii) read as follows:

§ 405.415 Depreciation: Allowance for depreciation based on asset costs.

* * * * *

(d) *Depreciation methods.* (1) *General.* * * *

(2) *Change in method.* * * *

(3) *Recovery of accelerated depreciation.* (i) *General.* * * *

(ii) *Transaction between related organizations.* (a) *General.* When the termination of the provider agreement is due to a change in provider ownership, as defined in §§ 405.625 and 405.626, resulting from a transaction between related organizations, as defined in § 405.427, and the criteria in paragraph (b) of this section are met, the excess of reimbursable cost, as determined in paragraph (d)(3)(i) of this section shall not be recovered if there is a continuation of participation by the facility in the health insurance program.

V 42 177 SEP 13 77 UMI

(b) *Criteria.* The following criteria must be met if the recovery of excess reimbursable cost is not to be made:

(1) The termination of the provider agreement is due to a change in ownership of the provider resulting from a transaction between related organizations,

(2) The successor provider continues to participate in the health insurance program,

(3) Control and the extent of the financial interest of the owners of the provider before and after the termination remain the same; that is, the successor owners acquire the same percentage of control or financial investment as the transferors had, and

(4) All assets and liabilities of the terminated provider are transferred to the related successor participating provider.

(c) *Effect of transaction.* In transactions meeting the criteria specified in paragraph (d)(3)(ii)(b) of this section, the provision concerning recovery of excess reimbursable cost (§ 405.415(d)(3)(i)) is not applied, and the transaction is treated as follows:

(1) The successor provider must record the historical cost and accumulated depreciation and the method of depreciation recognized under the health insurance program, and these are considered as incurred by the successor provider for health insurance purposes;

(2) The health insurance program's utilization of the terminated provider is considered as having been incurred by the successor provider for health insurance program purposes; and

(3) The equity capital of the terminated provider as of the closing of its final cost reporting period must be wholly contained in the equity capital of the successor provider as of the beginning of its first cost reporting period.

* * * * *

(Secs. 1102, 1815, 1861(v)(1)(A), and 1871 of the Social Security Act, 49 Stat. 647, as amended, 79 Stat. 297, 79 Stat. 322, as amended, 79 Stat. 331; 42 U.S.C. 1302, 1395g, 1395x(v)(1)(A), and 1395hh.)

CHAPTER V—EMPLOYMENT AND TRAINING ADMINISTRATION

TEMPORARY EMPLOYMENT OF ALIENS ON GUAM

Labor Certification Process

AGENCY: Employment and Training Administration, Labor.

ACTION: Final rule.

SUMMARY: The Employment and Training Administration is publishing rules for the labor certification process governing the temporary employment of aliens on Guam in occupations other than agriculture and logging. The purpose of the regulations is to implement the Department of Labor's new responsibilities under the regulations of the Immigration and Naturalization Service.

DATE: Effective date: September 13, 1977.

FOR FURTHER INFORMATION CONTACT:

Mr. Aaron Bodin, Chief, Division of Labor Certification, United States Employment Service, Room 8410, 601 D Street NW., Washington, D.C. 20213, telephone 202-376-6295.

SUPPLEMENTARY INFORMATION:

IMMIGRATION AND NATURALIZATION SERVICE REGULATIONS

Section 214.2(h)(3)(i) of the Immigration and Naturalization Service Regulations (8 CFR 214.2(h)(3)(i)), issued under the Immigration and Nationality Act, requires, in support of a petition for the admission of an alien into the United States to perform certain temporary labor:

Either a certification from the Secretary of Labor or his designated representative stating that qualified persons in the United States are not available and that the employment of the beneficiary will not adversely affect the wages and working conditions of workers in the United States similarly employed, or a notice that such a certification cannot be made shall be attached to every non-immigrant visa petition to accord an alien a classification under Section 101(a)(15)(H)(ii) of the Act.

Until July of this year, however, the above cited regulation contained an exception whereby the Guam Employment Service, rather than the U.S. Department of Labor, performed the labor certification function for temporary employment of aliens on Guam. On July 25, 1977, however, at 42 FR 37795 the Immigration and Naturalization Service amended its regulations by deleting this exception.

NEED FOR REGULATIONS

The Employment and Training Administration currently has regulations for the temporary labor certification program at 20 CFR 602.10, 10a, 10b, and 10c (for agricultural and logging employment) and at 20 CFR Part 621 (for employment in other than logging and agriculture). The regulations at 20 CFR 602.10, 10a, 10b, and 10c are comprehensive regulations dealing with wages, housing, transportation, workers' compensation, allowable deductions from pay and other relevant matters. Consequently, the Employment and Training Administration will use those regulations for agricultural and any logging employment of aliens on Guam.

The regulations at 20 CFR Part 621, however, consist only of principles and procedures of the most general kind. The Department has concluded, for the reasons set forth below relating to the uniqueness of the Guam alien employment situation, that the general principles and procedures in Part 621 should be elaborated in a set of regulations applicable only to Guam. This document contains the regulations for Guam.

UNIQUENESS OF GUAM AND ITS ALIEN EMPLOYMENT SITUATION

The Territory of Guam is different from most of the United States. It is different in terms of history, culture, and economic and social structure. More specifically, the fact that a very large portion of its labor force is made up of non-immigrant aliens admitted for temporary employment in many different occupations is unique. Non-immigrant aliens comprise about one-fifth of the persons employed in wage and salary jobs on Guam.

Unemployment on Guam is a very serious problem. The unemployment rate of U.S. workers including immigrant aliens is significantly higher than the national average and has been a serious problem for many years. Unemployment is especially high among the native Chamorro population and among teenagers, causing many of the latter to emigrate to the continental United States.

Guam is particularly subject to widespread natural disasters. Typhoons Karen (1962) and Olive (1963) devastated the Island. Typhoon Pamela (1976) damaged up to 80 percent of all the buildings and facilities on the island. Repair work necessitated by Typhoon Pamela is still going on. As a result of these typhoons, because of increased tourism, and because of national defense needs, the construction industry is enormously significant to the Guam economy. There are, however, comparatively few resident Guamanians who have been trained for construction occupations. In most cases, therefore, alien workers have been admitted to perform construction jobs. In March 1975, for example, about 82 percent of construction jobs were held by non-immigrant aliens. The Department believes that the low wage rates paid aliens have adversely affected U.S. workers by discouraging U.S. workers from entering these low wage construction jobs or entering training for such jobs.

The Department has evidence, moreover, that the presence on Guam of so many non-immigrant alien workers has had other adverse effects upon the wages and working conditions of U.S. workers. Despite the high living cost on Guam, and continuing inflation, the wage rates in many occupations have not increased by appreciable amounts in recent years. This is in contrast, for example, with the situation on Hawaii where wage rates show appreciable increases. The Department believes that the presence of so many non-immigrant aliens in Guam on temporary visas, most of whom come from countries where they are accustomed to relatively low wages, contributes significantly to this situation.

It is not the Department's intention, in issuing these regulations, to stop the flow of non-immigrant alien workers into Guam. Such workers have contributed greatly to the growth of Guam's economy. They form an important and vital element in the island's economic structure. The Department, however, under the Immigration and Naturalization Service regulations, must take immediate steps to see that the wages and working conditions of U.S. workers are not adversely affected by the use of such aliens, and to see that qualified U.S. workers are not displaced by such aliens.

ADVERSE EFFECT RATES

The regulations contain adverse effect rates for occupations on Guam. The adverse effect rates are the rates which the Department requires employers to offer and pay so that the wages of similarly employed U.S. workers will not be adversely affected. The adverse effect rate is usually the prevailing wage rate. It may, however, be set at a higher level when the prevailing rates have been artificially depressed by the employment of non-immigrant alien workers.

The Department has concluded, in view of the circumstances set forth above, that the employment of non-immigrant aliens in the Guam construction industry has adversely affected U.S. workers by keeping the wage rates artificially low to the point that nearly all such work is being done by non-immigrant aliens. The Department, therefore, is publishing adverse effect rates for the Guam construction industry which are higher than the rates which are currently being paid to non-immigrant aliens. These adverse effect rates are based on the rates which have been found by a U.S. Navy Wage Board as applicable to construction craft workers on Guam. These rates are those which are prevailing for U.S. workers employed by the U.S. Government in construction trades on Guam and give the best indication as to what the Guam construction wage rates would be if they were not depressed by the use of non-immigrant aliens. The Department believes that it is necessary to use the Navy Wage Board rates to provide the necessary protections for U.S. workers on Guam.

Outside construction, the adverse effect rates are the prevailing rates in Guam paid to U.S. workers. Generally, these will be the rates which are paid by the Guam government or by the U.S. government in its nonappropriated fund activities. Although, on the basis of the situation in other occupations on Guam, the Department may in the future, set higher adverse effect rates for other occupations, the seriousness of the construction wage situation, and the necesssity for immediate rulemaking, mitigated in favor of the Department's decision to publish adverse effect rates at this time only for the construction industry.

Because the adverse effect rates are substantially above the present prevailing construction wage rates on Guam, the Department, in order to avoid disruption of the island's construction economy, has provided for a phasing-in of the higher adverse effect rates over a period of two years. Thus, most construction on Guam is by the U.S. Government and the amounts available annually is relatively fixed by the amount of appropriations by the Congress. Under these circumstances the greater the cost of the construction the less construction which can be performed with a resultant reduction in jobs. The two-year phase-in period is intended to provide a degree of protection for the number of jobs available while increasing the wage rates to their proper level. Starting September 1979, and thereafter it is intended that the construction rates will be based upon the then current wage Board rates.

In similar regard existing contracts on Guam were negotiated taking into consideration the present non-immigrant alien wage rates. In addition, construction home loans have been approved by the Small Business Administration to repair typhoon damage and Public Works Employment Act of 1977 grant funds have been committed for use on Guam for which construction contracts have not yet been executed. In order to prevent undue hardship to contractors with existing contracts, to the recipients of Small Business Administration loans, or to funded Public Works Employment Act of 1977 construction projects, the rates set forth in these regulations are not applicable to certifications for alien workers issued for work under those existing contracts, loans, and grants. This is similar to the practice of the Department of Labor under contracts affected by the Davis-Bacon and related Acts where the wage determination applicable at the time of the execution of the contract remains applicable to that contract until the completion of the contract notwithstanding subsequent determinations made in the same area.

REASON FOR FINAL RULEMAKING

With the change in the Immigration and Naturalization Service regulation at 8 CFR 214.2(h)(3)(i), the responsibility for administering the temporary labor certification process was placed upon the Department. The nature and scope and the seriousness of the temporary alien employment problem, as outlined above, make it clear to the Department that definitive interpretive and procedural guidelines in the form of regulations are an immediate necessity. The use of non-immigrant alien workers, moreover, in large numbers and for an extended period of time, has resulted in a cumulative adverse effect upon U.S. workers which makes definitive action in the form of regulations an immediate necessity. It is also important not to disrupt the Department of Defense's procurement process, the Small Business Administration's loan process, or extant Public Works Employment Act projects by adding the element of uncertainty which proposed rulemaking would entail. Therefore, the Department finds that it is in the public interest, especially in the public interest of U.S. workers on Guam, to publish final rules which are immediately effective. This finding is made pursuant to 5 U.S.C. 553(b).

In keeping with the spirit of the Administrative Procedure Act, and with the Department's general policy as set forth at 29 CFR 2.7, the Department invites comments on these rules until November 15, 1977. Comments should be in writing and should be addressed to: Mr. William B. Lewis, Administrator, United States Employment Service, Room 8000, 601 D Street NW., Washington, D.C. 20213. Copies of all comments should also be sent to: Mr. William Haltigan, Regional Administrator, Employment and Training Administration, Federal Building, P.O. Box 36084, 450 Golden Gate Avenue, San Francisco, Calif. 94102.

Accordingly, 20 CFR Chapter V is amended as follows:

PART 621—CERTIFICATION OF TEMPORARY FOREIGN LABOR FOR INDUSTRIES OTHER THAN AGRICULTURAL OR LOGGING

§ 621.1 [Amended]

1. In § 621.1 *Purpose.*, the following two sentences are added at the end:

* * * The temporary labor certification regulations governing job opportunities (other than in agriculture and logging) on Guam are found at Part 655, Subpart B, of this Chapter. Those regulations supplement this Part.

2. In § 621.11 *Purpose.*, the citation "(8 CFR 214.2(h)(ii))" is changed to "(8 CFR 214.2(h)(3)(i))."

PART 651—GENERAL PROVISIONS GOVERNING THE FEDERAL-STATE EMPLOYMENT SERVICE SYSTEM

§ 651.5 [Amended]

3. In § 651.5 *Format of the regulations for the employment service system.*, paragraph (e), the phrase "when published" is deleted.

§ 651.6 [Amended]

PART 655—LABOR CERTIFICATION PROCESS FOR THE TEMPORARY EMPLOYMENT OF ALIENS IN THE UNITED STATES

4. In § 651.6 *Consolidated table of contents for Parts 651-658.*, the following table of contents for Part 655 is inserted in its proper place:

V 42 177 SEP 13 77 UMI

SUBPART A—TEMPORARY LABOR CERTIFICATION PROCESS FOR OCCUPATIONS OTHER THAN AGRICULTURE AND LOGGING

Sec.
655.1 Location of regulations.

SUBPART B—TEMPORARY LABOR CERTIFICATION PROCESS FOR OCCUPATION OF GUAM OTHER THAN AGRICULTURE AND LOGGING

Sec.
655.100 Scope and purpose of subpart.
655.101 Definitions of terms used in subpart.
655.102 Temporary labor certification applications (general).
655.103 Contents of job offers.
655.104 Assurances.
655.105 Action on temporary labor certification applications by the Guam employment service office.
655.106 Temporary labor certification determinations.
655.107 Adverse effect rates.
655.108 Temporary labor certification applications involving fraud or willful misrepresentation.
655.109 Temporary labor certification related records.
655.110 Nature of employment service job orders.

5. Part 655 is added to read as follows:

Subpart A—Temporary Labor Certification Process for Occupations Other Than Agriculture and Logging

Sec.
655.1 Location of regulations.

Subpart B—Temporary Labor Certification Process for Occupations on Guam Other Than Agriculture and Logging

Sec.
655.100 Scope and purpose of subpart.
655.101 Definitions of terms used in subpart.
655.102 Temporary labor certification applications (general).
655.103 Contents of job offers.
655.104 Assurances.
655.105 Action on temporary labor certifications applications by the Guam employment service office.
655.106 Temporary labor certification determinations.
655.107 Adverse effect rates.
655.108 Temporary labor certification applications involving fraud or willful misrepresentation.
655.109 Temporary labor certification related records.
655.110 Nature of employment service job orders.

Subpart A—Temporary Labor Certification Process for Occupations Other Than Agriculture and Logging

AUTHORITY: 8 CFR 214.2(h)(3)(i); Wagner-Peyser Act of 1933, as amended, 29 U.S.C. 49 et seq.; 5 U.S.C. 301.

§ 655.1 Location of regulations.

(a) The regulations governing the temporary labor certification process for occupations other than agriculture and logging are presently found at Part 621 of this Chapter. They will be codified in this subpart at a later date.

(b) For Guam, the regulations at Part 621 of this Chapter are supplemented by regulations which are found in subpart B of this Part.

Subpart B—Temporary Labor Certification Process for Occupations on Guam Other Than Agriculture and Logging

AUTHORITY: 8 CFR 214.2(h)(3)(i); Wagner-Peyser Act of 1933, as amended, 29 U.S.C. 49 et seq.; 5 U.S.C. 301.

§ 655.100 Scope and purpose of subpart.

(a) This subpart supplements the regulations presently found at Part 621 of this Chapter and provides for the temporary labor certification process on Guam for all occupations except agriculture and logging.

(b) The Immigration and Naturalization Service Regulations at 8 CFR 214.2(h)(3)(i), issued under the Immigration and Nationality Act, requires, in support of a petition for the admission of an alien into the United States to perform certain temporary labor:

Either a certification from the Secretary of Labor or his designated representative stating that qualified persons in the United States are not available and that the employment of the beneficiary will not adversely affect the wages and working conditions of workers in the United States similarly employed, or a notice that such a certification cannot be made shall be attached to every non-immigrant visa petition to accord an alien a classification under Section 101(a)(15)(H)(ii) of the Act.

(c) The temporary labor certification procedure is designed to prevent the use of foreign labor at the expense of the wages and working conditions of United States workers similarly employed. Temporary foreign workers may only be used to perform temporary services to meet shortages which occur in a particular occupation or industry.

§ 655.101 Definitions of terms used in subpart.

For purposes of this subpart:

"Administrator" means the chief official of the United States Employment Service or the Administrator's designee.

"Adverse effect rate" means the wage rate which the Administrator has determined must be offered and paid to foreign and U.S. workers for a particular occupation and/or area so that the wages of similarly employed U.S. workers will not be adversely affected. The prevailing wage rate in the area and/or occupation is the adverse effect rate, unless the Administrator has determined that a higher wage rate is necessary to prevent an adverse effect.

"Certifying Officer" means a U.S. Department of Labor official authorized to grant or deny temporary labor certification applications.

"Employment and Training Administration (ETA)" means the agency within the Department of Labor (DOL) which includes the United States Employment Service (USES).

"Employer" means a person, firm, corporation or other organization which currently has a location within the Territory of Guam to which U.S. workers may be referred for employment, or the authorized representative of such a person, firm, or corporation.

"Guam employment service office" means an office of the Guam Employment Service agency which serves the island of Guam.

"Job opportunity" means a job opening for employment on Guam to which U.S. workers can be referred.

"Offshore U.S. worker" means a United States worker whose domicile is in a State, Commonwealth, or territory of the U.S. other than Guam.

"Notice of Findings" means a notice which sets forth the bases upon which a Regional Administrator intends to deny a temporary labor certification unless the bases are satisfactorily rebutted.

"Regional Administrator, Employment and Training Administration (RA)" means the chief official of the Employment and Training Administration (ETA) in the Department of Labor (DOL) San Francisco regional office.

"Secretary" means the Secretary of Labor, of the U.S. Department of Labor, or the Secretary's designee.

"Temporary labor certification" means the determination by the Secretary of Labor, pursuant to 8 CFR 214.2(h)(3)(i), that (1) there are not sufficient U.S. workers who are qualified and available to perform the work and (2) the employment of the alien will not adversely affect the wages and working conditions of similarly employed U.S. workers.

"United States Employment Service (USES)" means the agency of the U.S. Department of Labor, established under the Wagner-Peyser Act of 1933, which is charged with administering the national system of public employment offices and carrying out the functions of the Secretary under the Immigration and Nationality Act.

"United States worker" means any worker who, whether U.S. citizen, national, or alien, is legally permitted to work permanently within the United States.

§ 655.102 Temporary labor certification applications (general).

(a) An employer which anticipates a labor shortage may request a temporary labor certification for temporary foreign workers by filing, or by having an agent file, a temporary labor certification application, signed by the employer, with the Guam employment service office. However, if the temporary labor certification application is filed by an agent, the agent may sign the application. If be accompanied by a letter from the employer, signed by the employer, which authorizes the agent to ployer, which authorizes the agent to act on the employer's behalf, which states whether, and to what extent the agent is authorized to make changes in the employer's job offer, and which states that the employer assumes full responsibility for the accuracy of the application, for all representations made by the agent on the employer's behalf, and for the fulfillment of all legal requirements arising from the temporary labor certification.

(b) Every temporary labor certification application shall include: (1) A copy of the job offer used by the employer in the recruitment efforts for both U.S. and foreign workers. The job offer shall state the number of workers needed by the employer, and shall be signed by the employer. The job offer shall comply with the requirements of § 655.103 of this subpart;

(2) The assurances required by § 655.104 of this part;

(3) Documentation showing in detail the employer's efforts to recruit U.S. workers; and

(4) Documentation identifying the construction contract or contracts, if any, for which the temporary labor certification is being requested.

(c) A temporary labor certification application shall be filed in sufficient time to allow the Guam employment service office to attempt to recruit local U.S. workers. If local workers are not available, the Guam employment service office shall recruit through the interstate clearance system if current information from the RA indicates that offshore U.S. workers may be available. A minimum of 60 calendar days should be allowed for the Guam employment service local and interstate recruitment process. This 60-day period shall be in addition to the time necessary for the employer to secure foreign workers by the date of need if the temporary labor certification is granted. The Department of Labor, however, may grant or deny the temporary labor certification prior to the end of the 60 calendar days if the Certifying Officer is able to make the necessary determination in a shorter period of time.

§ 655.103 Contents of job offers.

(a) The employer's job offer shall:

(1) Offer to U.S. workers at least the same amount of wages and other benefits and working conditions which the employer is offering to the non-immigrant aliens;

(2) Set forth all the material terms and conditions of the job, including wage rates, working conditions, frequency of pay, hours and days of work, applicable workers' compensation benefits, fringe benefits, proposed deductions from pay, etc;

(3) If housing is offered, contain a detailed description of such housing;

(4) If transportation is offered, describe the transportation benefits in detail;

(5) State that the employer will pay the worker the adverse effect rate pursuant to § 655.107 of this subpart; and

(6) State that the job offer, including all benefits therein, is open to all qualified U.S. workers, including offshore U.S. workers, without regard to race, color, national origin, age, sex, and to U.S. workers with handicaps who are qualified to perform the job.

§ 655.104 Assurances.

As part of the labor certification application the employer shall include assurances signed by the employer, that:

(a) The employer has not within the past year been found by a Court or by a Federal or State enforcement agency to have failed without good cause to comply with applicable Federal, State and local employment-related laws, incuding wage and hour, health and housing laws and temporary labor certification related requirements, or that, if the employer was so found, the employer has produced conclusive, documented evidence that the violation has been remedied, and assures that it will not violate the law or laws in the future;

(b) The job opportunity is not:

(1) Vacant because the former occupant is on strike or is being locked out in the course of a labor dispute, or

(2) At issue in a labor dispute;

(c) During the period in which foreign workers are scheduled to be employed under the terms of the temporary labor certification:

(1) The wages and working conditions which will be offered and afforded by the employer to any foreign worker will be identical to those offered and afforded to U.S. workers; and

(2) The employer will offer and provide employment to any U.S. worker who is qualified and willing to work in the job opportunity and will keep a standing job order on file with the Guam employment service office.

(d) The employer will provide each worker with a copy of the worker's employment contract, and, if the worker is not literate in English, the contract which is provided will be in a language in which the worker is literate;

(e) Reasonable efforts have been and will continue to be made by the employer to obtain U.S. workers at adverse affect rates and working conditions no less favorable than those offered to aliens;

(f) The employer will not reject any qualified U.S. worker on the grounds that the employer's supervisory personnel speak a language other than that of the U.S. worker, and will assure that it has supervisors who speak a language understood by potential U.S. workers;

(g) If a U.S. worker cannot be recruited on Guam, the employer will consider referrals of offshore U.S. workers from Hawaii and the continental United States;

(h) The employer will accept the assistance of the Employment Service system in finding workers and will cooperate with it fully.

§ 655.105 Action on temporary labor certification applications by the Guam employment service office.

(a) When a temporary labor certification application is filed with the Guam employment service office, the Guam employment service office shall make sure that the application is complete. If the application is not complete, or if it is unlawfully discriminatory or otherwise unacceptable under Employment Service regulations for use in preparing a job order, the Guam employment service office shall return it to the employer and shall advise the employer to re-file it when it is completed.

(b) If the application is complete, the Guam employment service office, using the information on the application, shall prepare and process an employment service job order and, if it anticipates a shortage of local workers, an interstate job order.

(c)(1) The Guam employment service office shall then use the job order to recruit U.S. workers locally and, if local U.S. workers are not available, and there is evidence that offshore U.S. workers may be available, through the interstate clearance system. Special efforts shall be made to recruit workers out of Job Corps, CETA, and other DOL funded programs.

(2) As part of this recruitment effort the employer shall pay for an advertisement placed in the newspaper with the largest circulation on Guam for a 5-day period, and, in instances in which the interstate clearance system is used, in the largest circulation newspaper in Hawaii for a 5-day period for specified occupations as determined by the Regional Administrator. The advertisement(s) must specify the wages and other terms of employment. The advertisement(s) shall direct interested applicants to apply at the appropriate employment service office. The Guam and Hawaii Employment Service offices and the employer shall maintain records on the persons who respond and the results of referrals.

(d) The Guam employment service agency, after the recruitment period, shall send the temporary labor certification application to the Certifying Officer of the Employment and Training Administration, together with:

(1) A statement indicating whether the Guam employment service agency believes the employer has met requirements of this subpart;

(2) A report of U.S. workers availability in the area;

(3) A description of the recruitment efforts undertaken by the employer;

(4) Any information which indicates that, during the prior year, the employer did not fulfill the wage or other representations made in connection with any prior temporary labor certifications and whether or not the Guam employment service agency took action against the employer pursuant to Part 658, Subpart F, of this Chapter; and

(5) Any other information requested by the Department of Labor.

§ 655.106 Temporary labor certification determinations.

(a) If the Certifying Officer has reason to believe that the employer's efforts to recruit U.S. workers has not been sufficient, that U.S. workers are available, that the employment of the nonimmigrant aliens will adversely affect the wages and working conditions of U.S. workers, or that the temporary labor certification should not be granted for other reasons, the Certifying Officer shall issue a Notice of Findings, and shall afford the employer a reasonable time to submit evidence to rebut the bases of the Notice of Findings.

V 42 I 177 SEP 13 77 UMI

(b) The Certifying Officer shall then make a determination to grant or deny the temporary labor certification. No temporary labor certification shall be granted, however, if the Certifying Officer determines that the employer, during the prior year, did not fulfill the wage or other representations made in connection with any prior temporary labor certification, or if the Certifying Officer determines that, with respect to the present temporary labor certification application, the employer has not complied with the requirements of §§ 655.103–107 of this part.

(c) After the temporary labor certification determination has been made the Certifying Officer shall notify the employer in writing of the decision. If the temporary labor certification is denied, the notice shall state the reasons therefor and the appeal rights of the employer under the Immigration and Naturalization Service regulations.

(d) The granting or denial of a temporary labor certification application by the Certifying Officer shall be the final decision of the Secretary of Labor. Therefore, the employer may not make use of the complaint procedures set forth at Part 658, subpart E of this Chapter.

§ 655.107 Adverse effect rates.

(a) Except as provided in paragraph (b) of this section, the adverse effect rates for Guam shall be the prevailing rates for the occupations on Guam or, if the occupation is new to Guam, the prevailing rates for the most nearly comparable occupation on Guam.

(b) The following hourly adverse effect wage rates shall be paid to journeymen for jobs in the Guam construction industry. Trainees may be employed in Pay Levels III, IV, and V. Such trainees shall be paid at 80 percent of the journeyman wage rate for the first year and 90 percent for the second year. The construction adverse effect rates shall not be applicable to contracts which were executed prior to the effective date of the regulations in this subpart. Nor shall the construction adverse effect rates be applicable to temporary labor certification applications involving job opportunities which are financed by loans from the Small Business Administration or by funds received from Federal grants made under the Public Works Employment Act of 1977 prior to the effective date of the regulations in this subpart. The rates applicable to such a contract, Small Business Administration loan, or Federal agreement, shall be those which were applicable under the temporary labor certification process at the time of the execution of the contract, loan, or grant.

(1) Pay Level I:	
(i) Effective date of regulations	$3.00
(ii) March 1, 1978	3.65
(iii) September 1, 1978	4.30
(iv) March 1, 1979	5.00
(2) Pay Level II:	
(i) Effective date of regulations	3.25
(ii) March 1, 1978	4.00
(iii) September 1, 1978	4.75
(iv) March 1, 1979	5.50
(3) Pay Level III:	
(i) Effective date of regulations	3.75
(ii) March 1, 1978	4.50
(iii) September 1, 1978	5.25
(iv) March 1, 1979	6.00
(4) Pay Level IV:	
(i) Effective date of regulations	4.00
(ii) March 1, 1978	4.90
(iii) September 1, 1978	5.80
(iv) March 1, 1979	6.75
(5) Pay Level V:	
(i) Effective date of regulations	4.25
(ii) March 1, 1978	5.15
(iii) September 1, 1978	6.05
(iv) March 1, 1979	7.00

(c) Starting September 1, 1979, and thereafter the construction rates will be based upon the then current Wage Board rates.

(d) Pay Level I.—The principal occupations included here are Laborers and Unskilled Workers: Includes all other laborers and unskilled workers involved in the performance of simple duties that may be learned within a short period of time and that require the exercise of little or no independent judgment. Characteristically, such occupations do not require previous experience, although a familiarity with the occupational environment may be necessary or very desirable. The occupations in this group vary from those involving a minimum of physical exertion to those characterized by heavy physical work. Pay Level I shall include occupations such as:

(1) Hod carriers;

(2) Pile drivers; and

(3) All other laborer and unskilled worker occupations.

(e) Pay Level II.—The principal occupations included here are Helpers, Skilled Trades: Includes all helpers who assist one or more workers in the skilled trades, by performing a variety of duties, such as furnishing another worker with materials, tools, and supplies; cleaning work area, machines, and equipment; feeding of offbearing machines; holding materials or tools; and performing other routine duties. Pay Level II shall include occupations such as:

(1) Oilers, such as greaser and oilers, lubricators, and machine hostlers;

(2) Tile setter helpers;

(3) Cement mason helpers;

(4) Asphalt heater tenders;

(5) Asphalt mixing machine tenders;

(6) Asphalt rakers, including black top rakers;

(7) Finegraders, including slopers, etc.;

(8) Carpenter helpers;

(9) Floor sanding machine operators, including floor sanders, floor scrapers, floor finishers, etc.;

(10) Electrician helpers;

(11) Painter helpers;

(12) Paperhanger helpers;

(13) Plasterer helpers;

(14) Plumber and/or pipefitter helpers;

(15) Roofer helpers;

(16) Stone mason helpers;

(17) Terrazzo worker helpers; and

(18) All other helpers in the skilled trades, such as driller helpers and stucco mason helpers.

(f) Pay Level III.—The principal occupations included here are Operatives and Semiskilled Workers: Includes all operatives and semiskilled workers in occupations that are characterized by one, or a combination of the following requirements: The exercise of manipulative ability of a high order but limited to a fairly well-defined work routine; major reliance, not so much upon the worker's judgment or dexterity, but upon vigilance and alertness, in situations in which lapses in performance would cause extensive damage to product or equipment, and the exercise of independent judgment to meet variables in the work situation, which is not based on wide knowledge of work field and with the nature and extent of the judgments limited either (1) by application over a relatively narrow task situation; or (2) by having important decisions made by others. These occupations may require the performance of part of a craft or skilled occupation, but usually to a relatively limited extent. Occupations are considered semiskilled if the specific vocational preparation required to perform them involves training or other preparation of more than 30 days up to and including two years. Pay Level III shall include occupations such as:

(1) Chain surveyor helpers, rod surveyor helpers, and/or triangulation lightkeepers, including surveyor assistants, surveyor helpers, etc.;

(2) Automotive mechanics, including truck mechanics, industrial truck mechanics, etc., but excluding diesel mechanics and engineering equipment mechanics;

(3) Maintenance mechanics, but excluding millwrights;

(4) General utility maintenance workers;

(5) Truck operators, including concrete mixing truck drivers, dump truck drivers, etc. (but excluding delivery and route drivers) and industrial truck drivers, including fork lift operators, etc.;

(6) Concrete mixer operators, including batching and mixing plant operators, mixing machine operators, etc.;

(7) Concrete rubbers, including cement patchers, cement rubbers, concrete polishers, etc.;

(8) Concrete wall grinder operators, including concrete grinder operators, etc.;

(9) Dredge dipper tenders, including bucket operators, etc.;

(10) Dredge pipe installers;

(11) Dope pourers, masticers, etc., but excluding pipe paperhangers;

(12) Pipelaying fitters, including spacers, etc.;

(13) Pipecleaning and priming machine operators;

(14) Air hammer operators, including airbreaker operators, air gun operators, air tool operators, etc.;

(15) Asphalt plant drier operators;

(16) Asphalt plant operators;

(17) Construction blasters, including chargers, firers, powder workers, shooters, shot firers, etc.;

(18) Hook and chainers;

(19) Fence erectors, including ironworkers, wirefence erectors, wirefence builders, etc.;

(20) Form tamper operators and/or tamping machine operators, including road form tamping machine operators, etc.;

(21) Metal road form setters, including metal road form fitters, etc.;

(22) Reinforcing iron workers, including iron workers, reinforcing bar setters, reinforcing steel erectors, reinforcing rod tiers, etc.;

(23) Metal fabricators, including structural metal fabricators, etc., but excluding sheet metal workers;

(24) Structural steel workers, including bridgers, iron erectors, steel erectors, structural steel erectors, etc.;

(25) Millwrights, including machine erectors, etc., but excluding maintenance mechanics;

(26) Carpet cutters and/or carpet layers, but excluding floorlayers;

(27) Lathers, including metal lathers, rockboard lathers, etc., but excluding carpenters;

(28) Dry wall applicators, including dry wall nailers, sheetrockers, etc., but excluding carpenters;

(29) Tapers, including dry wall finishers, wall board and plasterboard finishers, sheetrock tapers, tapers and bedders, tapers and floaters, etc.;

(30) Glaziers, including glass setters, plate glass glaziers, etc.;

(31) Construction and maintenance painters, including structural steel painters, finish painters, etc.;

(32) Paperhangers, excluding pipe paperhangers;

(33) Plasterers, including finish plasterers, spray gun plasterers, etc., but excluding drywall applicators, lathers, stucco masons and tapers;

(34) Oil burner installers and servicers, including oil burner installers, oil burner servicers, etc., but excluding plumbers;

(35) All other operatives and semiskilled workers such as portable pump pumpers, pile driving jetters, steam cleaning machine operators, pipe paperhangers, etc.

(g) Pay Level IV—The occupations included here, and in Pay Level V, are Skilled Craftsmen: Includes all skilled craftsmen and kindred workers in occupations that predominately require a thorough and comprehensive knowledge of processes involved in the work, the exercise of considerable independent judgment, usually a high degree of manual dexterity, and in some instances, extensive responsibility for valuable product or equipment. Workers in these occupations usually become qualified by serving apprenticeships or completing extensive training periods. Occupations are considered skilled if the specific vocational preparation required to perform them involves training or other preparation of more than 2 years. Pay Level IV shall include skilled craft and kindred occupations such as:

(1) All mechanics and repairers not listed on other pay levels, such as dredge mechanics, etc.;

(2) Cement masons, including highway and street cement masons, etc.;

(3) Metal conduit layers, including duct layers, etc.;

(4) Dredge operators, including dredge pumpers, etc.;

(5) Pipelayers, including pipesetters, water pipelayers, cast iron pipelayers, etc.;

(6) Sewer tappers, but excluding plumbers and/or pipefitters;

(7) Fine trench trimmers, including trench trimmers, inverters, fine trimmers, etc.;

(8) Structural steel layout workers, including template layout workers, etc.;

(9) Asbestos and insulation workers, including blanket insulation workers, corkboard insulation workers, etc.;

(10) Bricklayers, including gypsum blo ksetters, cinder block masons, etc.;

(11) Carpenters, including hardwood floor layers, framing carpenters, combination carpenters, window installers, etc., but excluding cabinetmakers, floor layers other than hardwood floor layers, lathers, and drywall applicators;

(12) Ceiling tile installers and/or floor layers, including asphalt tile floor layers, cork tile floor layers, floor coverers, floor covering block layers, etc., but excluding carpenters, terrazzo workers, and carpet cutters or layers;

(13) Line maintainers, including high tension line maintainers, etc., but excluding electricians and wirers;

(14) Plumbers and/or pipefitters, including steamfitters, sprinkler installers, etc., but excluding oil burner installers and servicers, hot air furnace installers and repairers, and pipeline construction workers;

(15) Roofers, including aluminum shingle roofers, composition roofers, etc., but excluding metal roofers;

(16) Stone masons, including alberene stone setters, artificial stone setters, etc.;

(17) Terrazzo workers, including artificial marble workers, etc.;

(18) Tile setters, including tile fitters, tile masons, etc.;

(19) Hot air furnace installers and repairers, including furnace workers, hot air furnace installers, hot air furnace repairers, heating workers, etc., but excluding plumbers;

(20) Sheet metal workers, including coppersmiths, tinsmiths, special item fabricators, metal roofers, etc., but excluding metal fabricators;

(21) Welders and flamecutters, including arc welders, gas welders, spot welders, leadburners, resistance welders, solderers, etc.; and

(22) All other skilled craft and kindred occupations, such as instrument repairers, stucco masons, stationary engineers, etc.

(h) Pay Level V—The occupations included here, and in Pay Level IV, are Skilled Craftsmen: Includes all skilled craftsmen and kindred workers in occupations that predominately require a thorough and comprehensive knowledge of processes involved in the work, the exercise of considerable independent judgment, usually a high degree of manual dexterity, and in some instances, extensive responsibility for valuable product or equipment. Workers in these occupations usually become qualified by serving apprenticeships or completing extensive training periods. Occupations are considered skilled if the specific vocational preparation required to perform them involves training or other preparation of more than 2 years. Pay Level V shall include occupations such as:

(1) Diesel mechanics, excluding automotive mechanics and engineering equipment mechanics;

(2) Engineering equipment mechanics, including heavy equipment mechanics, etc., but excluding automotive mechanics and diesel mechanics;

(3) Refrigeration mechanics, including air conditioning attendants, air conditioning mechanics, refrigeration equipment erectors, etc.;

(4) Crane operators, derrick operators, and hoist operators, excluding heavy equipment operators and dredge operators;

(5) Boilermakers;

(6) Cabinetmakers, excluding carpenters;

(7) Electricians, including wirers, residential wirers, etc., but excluding line maintainers;

(8) Machinists, including maintenance machinists, etc.; and

(9) Heavy equipment operators, excluding dredge operators, crane operators, derrick operators, and hoist operators, but including:

(i) Asphalt paving machine operators;

(ii) Blade grader operators;

(iii) Bulldozer operators;

(iv) Concrete paver operators and/or concrete-paving machine operators;

(v) Dragline operators;

(vi) Drifters;

(vii) Water well drillers;

(viii) Earth boring machine operators;

(ix) Elevating grade operators;

(x) Form grader operators;

(xi) Foundation drill operators;

(xii) Heater planer operators;

(xiii) Horizontal earth boring machine operators;

(xiv) Motor grader operators;

(xv) Mucking machine operators;

(xvi) Pile driver operators;

(xvii) Power shovel operators;

(xviii) Road mixer operators;

(xix) Road roller operators;

(xx) Rock drill operators;

(xxi) Scraper operators;

(xxii) Sheet-pile-hammer operators;

(xxiii) Shield runners;

(xxiv) Subgrader operators;

(xxv) Sweeper operators;

(xxvi) Tower-excavator operators;

(xxvii) Trench-digging machine operators;

(xxviii) Utility tractor operators;

(xxix) Cable tool well-drill operators;

(xxx) Rotary drill well-drill operators;

(xxxi) Well-reactivator operators;

§ 655.108 Temporary labor certification applications involving fraud or willful misrepresentation.

(a) If possible fraud or willful misrepresentation involving a temporary labor certification application is discovered

V 42 177 SEP 13 77 UMI

prior to a final temporary labor certification determination, or if it is learned that an application is the subject of a criminal indictment or information filed in a Court, the Certifying Officer shall refer the matter to the INS for investigation and shall notify the applicant in writing of this referral. The Certifying Officer shall continue to process the application and may issue a qualified temporary labor certification.

(b) If a Court finds an applicant innocent of fraud or willful misrepresentation, or if the Department of Justice decides not to prosecute an applicant, the Certifying Officer shall not deny the temporary labor certification application on the grounds of fraud or willful misrepresentation. The application, of course, may be denied for other reasons pursuant to this subpart.

(c) If a Court or the INS determines that there was fraud or willful misrepresentation involving a temporary labor certification application, the application shall be deemed invalidated, processing shall be terminated, and the application shall be returned to the applicant with the reason therefor stated in writing.

§ 655.109 Temporary labor certification related records.

Employers who have been granted temporary labor certifications shall maintain for at least three years all records, including payroll and other employment records, which are related to the employment of the non-immigrant alien workers. These records shall be made available by the Secretary or the Secretary's representatives.

§ 655.110 Nature of employment service job orders.

In view of the statutorily established basic function of the employment service as a no-fee labor exchange, that is, as a forum for bringing together employers and job seekers, neither the Department of Labor nor the Guam employment service are guarantors of the accuracy or truthfulness of information contained on job orders submitted by employers. Nor do such job orders represent an "offer to contract" to which the Employment Service is in any way a party.

Signed at Washington, D.C., this 6th day of September 1977.

ERNEST G. GREEN,
Assistant Secretary for Employment and Training.

Title 21—Food and Drugs

CHAPTER I—FOOD AND DRUG ADMINISTRATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

[Docket No. 75P-0370]

PART 101—FOOD LABELING

Type-Size Exemption for Certain Small Packaged Food Labels

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: This amendment permits a $\frac{1}{16}$-inch type size to be used to print information required to appear on the labels of individual serving-size packages of foods if the food is for food service use, not intended for retail sale, and there is insufficient space on the package to print the information as required by existing regulations.

EFFECTIVE DATE: September 13, 1977.

FOR FURTHER INFORMATION CONTACT:

Howard N. Pippin, Bureau of Foods (HFF-312), Food and Drug Administration, Department of Health, Education, and Welfare, 200 C St. SW., Washington, D.C. 20204 (202-245-3092).

SUPPLEMENTARY INFORMATION: In the FEDERAL REGISTER of August 12, 1976 (41 FR 34051) the Commissioner of Food and Drugs issued a proposal to amend § 1.8d (21 CFR 1.8d) in response to a petition received from the Smith-Kline Corp., Philadelphia, Pa. Section 1.8d was recodified as § 101.2 (21 CFR 101.2) in the FEDERAL REGISTER of March 15, 1977 (42 FR 14302); hereafter, it will be referred to by its new designation, § 101.2. The effect of the proposal was to permit a $\frac{1}{32}$-inch type size to be used for printed information on the labels of individual serving-size packages of food that are for institutional food service use when there is insufficient space on the package to print the information as required by existing regulations.

In response to the proposal, 18 comments were received. There were 13 comments from consumers, 3 from industry, 1 from a local government agency, and 1 from a Federal government agency. The majority of the coments supported the proposal. Two comments were not directly applicable to the proposal.

DISCUSSION OF COMMENTS AND THE COMMISSIONER'S RESPONSE

1. Ten comments expressed general support for the proposal. One comment said, "The widespread use and popularity of individual single-service packaging benefits consumer and food service interests alike, permitting the sanitary and efficient distribution of prepared foods. The proposed $\frac{1}{32}$-inch type size exemption makes allowances for the proper labeling of food items so packaged."

The Commissioner agrees, and to this he adds that since there is no prohibition against serving foods from open unlabeled serving containers—a practice that prevails in some food service operations—much has been gained in food service cleanliness and sanitation by the use of individual single-service packaging. Changes in the regulations are being made because the area of the surface available for labeling is often too small to accommodate all the required information in the type size currently required by § 101.2 and because the Commissioner wishes to encourage the use of single-service packaging as opposed to unlabeled open serving containers.

2. Several comments said that consumers will benefit from the proposed amendment even though some may have difficulty reading information printed in $\frac{1}{32}$-inch type. These comments pointed out that a $\frac{1}{32}$-inch type will allow all required information to be readily available on the package at the point of usage, thereby enabling consumers to know the contents of the packaged food and to avoid ingredients to which they may be allergic.

The Commissioner recognizes that some consumers may have difficulty reading information printed in a $\frac{1}{32}$-inch type size. He agrees, however, that the benefits expected from this amendment outweigh this detriment.

The Commissioner emphasizes that only packages having insufficient space available to meet present labeling requirements are entitled to this exemption. Accordingly, packages that have sufficient area for printing the required information in a $\frac{1}{16}$-inch type size are required to do so.

3. Four comments said that the exemption should not be allowed because $\frac{1}{32}$-inch type is difficult to read and would make consumers suspicious of the ingredients in the food. And the comments contended that information printed in $\frac{1}{32}$-inch type is less likely to be read by the consumer, thereby defeating the purpose of placing the information on the package.

The Commissioner believes that for those food packages affected by this proposal it is appropriate to permit a $\frac{1}{32}$-inch type size to be used for the printed information required. Because of the package area limitation of 3 square inches, the regulation is principally applicable to condiments. The Commissioner understands the concerns of the consumers who oppose the use of a $\frac{1}{32}$-inch type size. It has been pointed out, however, that this exemption may serve to increase the availability of single-service packages of foods in food service operations. The increased availability of foods in single-service packaging will not only improve food sanitation, but will also provide the ultimate consumer with product information that may not otherwise be available to him.

4. One comment suggested, as an alternative to the proposed exemption, that manufacturers print the address where consumers can write for the information, which would then be supplied in a type size larger than $\frac{1}{32}$-inch in height.

The Commissioner finds that labeling information should, whenever possible, accompany the food. It would be unfair to consumers to withhold this information from the labels and unreasonable to expect consumers to mail a request for labeling information concerning food about to be eaten.

5. One comment suggested that manufacturers be required to change the packaging size to accommodate printed information in a larger type size.

The Commissioner concludes that requiring manufacturers to enlarge their packages solely to accommodate information printed in a type size larger than $\frac{1}{32}$ inch in height would result in some unreasonable and avoidable cost

increases and environmental impact associated with the production and destruction of the larger packages. In addition, the Commissioner does not wish to impede the development of single-service containers by undue regulation of the size or style of packages for the products covered by this exemption.

6. One comment requested that § 101.2 (c)(5)(i) of the proposal be revised to state the package size limit as "3 square inches or less" rather than the proposed "less than 3 square inches." This comment contends that this revision is more in accord with the Commissioner's intent to include packages having a surface area of 3 square inches.

The Commissioner concurs and is revising paragraph (c)(5)(i) accordingly.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 201, 403, 701(a), 52 Stat. 1040–1042 as amended, 1047–1048 as amended, 1055 (21 U.S.C. 321, 343, 371(a))) and under authority delegated to the Commissioner (21 CFR 5.1), Part 101 is amended in § 101.2 by adding new paragraph (c)(5) to read as follows:

§ 101.2 Information panel of package form food.

• • • • • •

(c) • • •

(5) Individual serving-size packages of food served with meals in restaurants, institutions, and on board passenger carriers, and not intended for sale at retail, are exempt from type-size requirements of this paragraph, provided:

(i) The package has a total area of 3 square inches or less available to bear labeling;

(ii) There is insufficient area on the package available to print all required information in a type size of $\frac{1}{16}$ inch in height;

(iii) The label information includes a full list of ingredients in accordance with regulations in this part and the policy expressed in § 101.8 of this chapter; and

(iv) The information required by paragraph (b) of this section appears on the label in accordance with the provisions of this paragraph, except that the type size is not less than $\frac{1}{32}$ inch in height.

• • • • •

Effective date: September 13, 1977.

(Secs. 201, 403, 701(a), 52 Stat. 1040–1042 as amended, 1047–1048 as amended, 1055 (21 U.S.C. 321, 343, 371(a)).)

Dated: September 7, 1977.

WILLIAM F. RANDOLPH,
Acting Associate Commissioner for Compliance.

Title 29—Labor

CHAPTER XVII—OCCUPATIONAL SAFETY AND HEALTH ADMINISTRATION, DEPARTMENT OF LABOR

PART 1952—APPROVED STATE PLANS FOR ENFORCEMENT OF STATE STANDARDS

Alaska; Certification of Completion of Developmental Steps

AGENCY: Occupational Safety and Health Administration.

ACTION: Certification of completion of developmental steps.

SUMMARY: This document certifies that the State of Alaska has completed all of the developmental steps specified in its occupational safety and health plan as approved on July 31, 1973 (38 FR 21628) and gives notice that commencing with this certification, operations under the plan will be subject to at least one year extensive evaluation to determine whether Federal occupational safety and health standards development and enforcement authority will be relinquished within the State of Alaska pursuant to section 18(e) of the Occupational Safety and Health Act of 1970 (29 U.S.C. 667(e)).

EFFECTIVE DATE: September 9, 1977.

FOR FURTHER INFORMATION CONTACT:

Veronica Allen, Project Officer, Office of State Programs, Occupational Safety and Health Administration, U.S. Department of Labor, 200 Constitution Avenue NW., Room N-3608, Washington, D.C. 20210 (202-523-8031).

SUPPLEMENTARY INFORMATION:

BACKGROUND

Subpart D of Part 1902 of Title 29, Code of Federal Regulations (40 FR 54780) sets out procedures under which the Assistant Secretary of Labor for Occupational Safety and Health (hereinafter referred to as the Assistant Secretary) will make a determination under section 18(e) of the Occupational Safety and Health Act of 1970 (29 U.S.C. 667) (hereinafter referred to as the Act) whether, on the basis of actual operations under a State plan, the criteria of section 18(c) of the Act are being applied under the plan. Such a determination may not be made until at least three years after commencement of operations under the plan and, in the case of a developmental plan, until the State has satisfactorily completed all developmental steps and the Assistant Secretary has had at least one additional year to evaluate the plan on the basis of actual operations. Upon making a determination under 18(e) that the 18(c) requirements are being applied, Federal enforcement of standards and Federal Standards (except with regard to ongoing cases) cease to apply in the State with respect to any occupational safety and health issue covered under the determination.

Section 1902.34 of Subpart D provides that the evaluation of a State's fully operational program, preparatory to an 18(e) determination, shall commence upon publication in the FEDERAL REGISTER of a certification that all developmental steps have been completed. Such certification must list the developmental steps, including approved amendments thereto, and the dates their approvals were published in the FEDERAL REGISTER; approved substantive changes in the State plan and dates published in the FEDERAL REGISTER; documentation that the State merit system has been approved and found acceptable; and a description of the occupational safety and health issues covered by the certification. If the Assistant Secretary finds that the State has completed all the developmental steps specified in the plan, he shall give notice of same by publishing the certification in the FEDERAL REGISTER and amend the appropriate subpart of Part 1952 of this chapter to reflect this finding.

On August 19, 1973, notice was published in the FEDERAL REGISTER (38 FR 21628) of the approval of the Alaska plan as a developmental plan and adoption of Subpart R of Part 1952 containing the decision and describing the plan. During the three year period ending October 1, 1976, following commencement of State operations (three years from date of State's first 23(g) grant award), Edmond N. Orbeck, Commissioner, Alaska Department of Labor, submitted documentation attesting to the completion of each State developmental commitment for review and approval as provided in 29 CFR Part 1953. Following Departmental review, opportunity for public comment and subsequent modification of the State's submissions, as deemed appropriate, the Assistant Secretary has approved the completion of all individual Alaska developmental steps.

NOTICE OF CERTIFICATION OF COMPLETION OF DEVELOPMENTAL STEPS UNDER THE ALASKA PLAN

In accordance with the provisions of 29 CFR 1902.34, notice is given that the Alaska occupational safety and health plan is hereby certified, effective September 9, 1977, as having completed all the developmental steps specified in the plan as approved July 31, 1973, on or before October 1, 1976 (see Subpart C of 29 CFR Part 1952) as follows:

A. All developmental steps specified in the plan and amendments thereto have been completed:

V 42 177 SEP 13 77 UMI

1. The Alaska Occupational Safety and Health Act (§§ 18.60.010 through 18.60.105, Alaska Statutes), effective July 24, 1973, was approved at time of plan approval July 31, 1973 (38 FR 21628, August 10, 1973). State-initiated amended legislation (House Bill No. 588) was signed by the Governor on June 29, 1976, became effective June 30, 1976, and was approved by the Assistant Secretary on August 29, 1977. (See FR Doc. 77-26347 appearing in the Notices section of this issue.)

2. Alaska standards comparable to Subparts D, G, H, I, N, O, and P of Part 1910 were promulgated prior to and approved with the State plan on July 31, 1973. All Federal standards promulgated subsequent to the date of plan approval have been in turn promulgated by the State and approved by the Regional Administrator for Occupational Safety and Health as follows:

(a) State standards identical to Federal standards comparable to Part 1910, Subpart S were approved on June 30, 1975 (40 FR 33291, August 7, 1975).

(b) State standards identical to Federal standards comparable to Part 1910, Subpart J were approved on August 12, 1975 (40 FR 43101, September 18, 1975).

(c) State standards identical to Federal standards comparable to Part 1910, Subparts E, M, and F were approved on September 15, 1975 (40 FR 50582, October 30, 1975).

(d) State standards at least as effective as Federal standards comparable to Part 1910, Subparts K and Q were approved on September 11, 1975 (40 FR 50582, October 30, 1975).

(e) State standards at least as effective as Federal standards comparable to Part 1910, Subpart L were approved on September 15, 1975 (40 FR 50582, October 30, 1975).

(f) State standards at least as effective as the Federal standards comparable to Subpart R, § 1910.261 were approved on July 22, 1976 (41 FR 39112, September 14, 1976).

(g) State standards identical to Federal standards comparable to Subpart R, §§ 1910.-262, 1910.263, and 1910.264 were approved on September 30, 1976 (41 FR 47613, October 29, 1976).

(h) In response to Federal program change, State standards identical to Federal standards comparable to Part 1910, Subpart Z were approved on October 29, 1976 (41 FR 52557, November 30, 1976).

(i) In response to a Federal program change, State standards identical to Federal standards comparable to § 1910.268, Telecommunications, were approved on October 29, 1976 (41 FR 52557, November 30, 1976).

(j) In response to a Federal program change, State standards identical to Federal standards comparable to Part 1928 were approved on October 29, 1976 (41 FR 52558, November 30, 1976).

(k) State standards at least as effective as the Federal standards comparable to Part 1926 were submitted to the Regional Administrator on September 24, 1976, and approved on October 29, 1976 (41 FR 53077, December 3, 1976).

(l) State standards identical to Federal standards comparable to Subpart R, §§ 1910.-265 and 1910.266 were submitted to the Regional Administrator on September 20 and 24, 1976, and approved on October 29, 1976 (41 FR 56409, December 28, 1976).

(m) Update of all State standards comparable to Federal standards in Part 1910, as republished January 11, 1977 (42 FR 2366) were approved on December 3, 1976 (42 FR 2366, January 11, 1977).

(n) In response to a Federal program change, State standards identical to Federal standards comparable to § 1910.1001(i)(1), Asbestos Recordkeeping—Exposure Records, were approved on March 9, 1977 (42 FR 25389, May 17, 1977).

3. The Alaska compliance manual which establishes procedures to be used by State enforcement personnel was developed by February 1, 1974, and was subsequently revised. Documentation on completion of this developmental step was submitted by the State on September 28, 1976, and approved by the Assistant Secretary on August 9, 1977 (42 FR 40195).

4. Alaska developed and implemented a manual Management Information System by October 1, 1974. This developmental step was approved by the Assistant Secretary on August 20, 1976 (41 FR 36206, August 27, 1976).

5. Alaska completed its interim training program by April 1, 1974, and has developed an extended training program by October 1, 1976. This developmental step was approved by the Assistant Secretary on August 20, 1976 (41 FR 36206, August 27, 1976).

6. Alaska submitted a change to its plan to reduce the number of industrial hygienists as outlined in the original plan. This reduction was approved by the Assistant Secretary on November 19, 1976 (41 FR 52556, November 30, 1976). Therefore, in accordance with § 1952.-243(e) Alaska completed hiring of its industrial health staff by October 1, 1976, which was approved by the Assistant Secretary on November 19, 1976 (41 FR 52556, November 30, 1976). Alaska has also provided for an Industrial Health Laboratory capacity which became fully operational on May 31, 1976, and which was approved by the Assistant Secretary on August 20, 1976 (41 FR 36206, August 27, 1976).

7. Alaska has promulgated the following administrative rules and regulations (Alaska Administrative Code) which were submitted on January 26, 1976, subsequently on April 14, May 13, 17, and 18, 1977, in response to Federal review and approved by the Assistant Secretary on August 9, 1977 (42 FR 40195).

(a) Regulation § 8 AAC 61.020 through .155: Inspections, Citations, and Proposed Penalties;

(b) Regulation § 8 AAC 61.225 through .295: Recording and Reporting Occupational Injuries and Illnesses;

(c) Regulation § 8 AAC 61.300 through .400: Variances;

(d) Regulation § 8 AAC 61.160 through .220: Occupational Safety and Health Review Board;

(e) Regulation § 8 AAC 61.410 through .420: Consulting and Training;

(f) Regulation § 8 AAC 61.430 through .460: General Provisions.

8. Alaska has developed a job safety poster applicable to both private and public employees which must be distributed to all workplaces in the State. The poster was approved by the Assistant Secretary on September 28, 1976 (41 FR 43405, October 1, 1976).

9. Alaska has submitted a revised plan. The revisions to the plan are editorial in nature: Clarifying and updating the original plan and eliminating duplications, conflicting time frames and extraneous information. This revision was approved by the Assistant Secretary on July 22, 1977 (42 FR 37607).

B. The personnel operations of the Alaska Department of Labor have been found to be in substantial conformity with the "Standards for a Merit System of Personnel Administration" by the U.S. Civil Service Commission by letter dated May 18, 1976. The merit system also incorporates an affirmative action plan.

C. This certification covers all occupational safety and health issues covered under the Federal program except for the longshoring and maritime standards found in 29 CFR Parts 1915, 1916, 1917, and 1918 (longshoring, ship repairing, shipbuilding, shipbreaking) which are excluded from coverage under the plan. This certification also covers the State program covering State and local government employees.

LOCATION OF THE PLAN AND ITS SUPPLEMENTS FOR INSPECTION AND COPYING

A copy of the plan and the supplements may be inspected and copied during normal business hours at the following locations: Office of Federal Compliance and State Programs, Occupational Safety and Health Administration, Room N-3608, 200 Constitution Avenue NW., Washington, D.C. 20210; Office of the Regional Administrator, Occupational Safety and Health Administration, Room 6048, 909 First Avenue, Seattle, Wash. 98174; and the Alaska Department of Labor, Juneau, Alaska 99801.

EFFECT OF CERTIFICATION

The operation of the Alaska occupational safety and health program will be monitored and evaluated for a period of not less than one year after publication of this certification, to determine whether the State program in operation is at least as effective as operations under the Federal program, in order to make a determination under section 18 (e) of the Act that Federal enforcement authority and standards should cease to apply in issues under the plan.

In accordance with 29 CFR 1902.35 Federal enforcement authority under sections 5(a) (2), 8, 9, 10, 13, and 17 of the Act (29 U.S.C. 654(a) (2), 657, 658, 659, 662, and 666) and Federal standards authority under section 6 (29 U.S.C. 655) of the Act will not be relinquished during this evaluation period. However, under the terms of the operational agreement entered into with Alaska effective January 6, 1977 (42 FR 37547) the exercise of this authority by the U.S. Department of Labor will continue to be limited to, among other things: Federal standards promulgated subsequent to the agreement where necessary to protect employees as in the case of temporary emergency standards promulgated under section 6(c) of the Act (29 U.S.C. 655 (c)) in the issues covered under the plan and agreement until such time as Alaska shall have adopted equivalent standards in accordance with Subpart C of 29 CFR Part 1953; complaints about violations of the discrimination provisions of section 11(c) of the Act (29 U.S.C. 660); Federal standards contained in the issues covered by Subpart B—Ship Repairing, Shipbuilding, Shipbreaking, and Longshoring, 29 CFR 1910.13 through 1910.16; and investigation and inspection for the purpose of evaluation of the Alaska plan under sections 18 (e) and (f) of the Act (29 U.S.C. 667 (e) and (f)).

In accordance with this certification 29 CFR 1952.244 is hereby amended to reflect successful completion of the developmental period by changing the title of the section and by adding a paragraph (h) as follows:

§ 1952.244 Completion of developmental steps and certification.

* * * * *

(h) In accordance with § 1902.34 of this chapter, the Alaska occupational safety and health plan was certified, effective September 9, 1977, as having completed on or before October 1, 1976, all developmental steps specified in the plan as approved on July 31, 1973.

(Sec. 18, Pub. L. 91-596, 84 Stat. 1608 (29 U.S.C. 667).)

Signed at Washington, D.C., this 29th day of August 1977.

EULA BINGHAM,
Assistant Secretary of Labor.

[FR Doc.77-26491 Filed 9-12-77;8:45 am]

PART 1952—APPROVED STATE PLANS FOR ENFORCEMENT OF STATE STANDARDS

Approval of Wyoming Plan Supplement

AGENCY: Occupational Safety and Health Administration.

ACTION: Final rule.

SUMMARY: The Wyoming Occupational Health and Safety Commission formally submitted to OSHA its Affirmative Action Plan fulfilling a commitment in the notice of plan approval for insuring equal employment opportunity. The plan has been approved by both OSHA and the U.S. Civil Service Commission as completion of a developmental aspect of the State's plan.

FOR FURTHER INFORMATION CONTACT:

Charles Boyd, Project Officer, Office of State Programs, Occupational Safety and Health Administration, Department of Labor, 200 Constitution Avenue, NW., Room N-3608, Washington, D.C. 20210 (202-523-8031).

EFFECTIVE DATE: September 9, 1977.

BACKGROUND

Part 1953 of Title 29, Code of Federal Regulations, prescribes procedures under section 18 of the Occupational Safety and Health Act of 1970 (29 U.S.C. 667) (hereinafter referred to as the Act) for review of changes and progress in the development and implementation of State plans which have been approved in accordance with section 18 (c) of the Act and 29 CFR Part 1902. On May 3, 1974, notice was published in the FEDERAL REGISTER (39 FR 15394) of the approval of the Wyoming plan and the adoption of Subpart BB to Part 1952 containing the decision and describing the plan. On June 24, 1977, Wyoming submitted a supplement to the plan involving implementation of its commitment to develop the basis for an ongoing affirmative action plan. The supplement was evaluated by the Regional Administrator for Occupational Safety and Health (hereinafter called the Regional Administrator) in conjunction with Regional Civil Service Commission officials.

DESCRIPTION OF THE SUPPLEMENT

Affirmative Action Plan: The Wyoming Occupational Health and Safety Commission has developed an Affirmative Action Plan outlining its policy of equal employment opportunity and establishing practice and procedures for the recruiting and hiring of minority and women employees, to assure its commitment to a program that provides equal employment opportunity to all persons on the basis of individual merit.

LOCATION OF THE PLAN AND ITS SUPPLEMENT FOR INSPECTION AND COPYING

A copy of the plan may be inspected and copied during normal business hours at the following locations: Office of the Director, Federal Compliance and State Programs, Room N-3608, 200 Constitution Avenue NW., Washington, D.C. 20210; Office of the Regional Administrator, Occupational Safety and Health Administration, Room 15010, Federal Building, 1961 Stout Street, Denver, Colo. 80202; and, the Occupational Health and Safety Department, 200 East Eighth Avenue, Cheyenne, Wyo. 82001.

PUBLIC PARTICIPATION

Under § 1953.2(c) of this chapter, the Assistant Secretary for Occupational Safety and Health (hereinafter Assistant Secretary) may prescribe alternative procedures to expedite the review process or for any other good cause which may be consistent with applicable law. The Assistant Secretary finds that the Wyoming plan supplement described above is consistent at this time with commitments, contained in the approved plan, and previously made available for public comment, State of Wyoming personnel policies, and the overall goals of the State's occupational safety and health program. Accordingly, it is found that further public comment and notice is unnecessary.

DECISIONS

After careful consideration, the Wyoming plan change outlined herein is approved under Part 1953. In addition, 29 CFR 1952.344 is hereby amended to reflect the completion of the developmental step.

§ 1952.344 Completed developmental steps.

* * * * *

(d) The State plan has been amended to include an Affirmative Action Plan outlining the State's policy of equal employment opportunity.

(Sec. 18, Pub. L. 91-596, 84 Stat. 1608 (29 U.S.C. 667).)

Signed at Washington, D.C., this 29th day of August 1977.

EULA BINGHAM,
Assistant Secretary of Labor.

CHAPTER XXV—EMPLOYEE BENEFITS SECURITY OFFICE, DEPARTMENT OF LABOR

PART 2550—RULES AND REGULATIONS FOR FIDUCIARY RESPONSIBILITY

Exemption for Loans to Employee Stock Ownership Plans

Correction

In FR Doc. 77-25695 appearing at page 44383 as a Part IV in the issue for Friday, September 2, 1977, make the following corrections:

(1) On page 44386, third column, in § 2550.408b-3(h)(2), in the 5th line from the bottom, the word "refining" should have read "refinancing".

(2) On page 44387, middle column, in § 2550.408b-3(j), in the 9th line from the bottom, the word "option" should have read "put option".

(3) On the same page, in the same section, third column, in the italicized heading for paragraph (o)(2) the date for 60 days after publication of the final regulations is November 1, 1977.

Title 32—Department of Defense

CHAPTER XII—DEFENSE LOGISTICS AGENCY

[DLAR 5400.21:RCS DD(A&AR) 1379]

PART 1286—PERSONAL PRIVACY AND RIGHTS OF INDIVIDUALS REGARDING THEIR PERSONAL RECORDS

Privacy Act of 1974

AGENCY: Defense Logistics Agency, DOD.

ACTION: Final rule.

SUMMARY: In FR Doc 77-21934 published in the FEDERAL REGISTER issue of July 26, 1977 (42 FR 37982), the Defense Logistics Agency published a proposed rule as a proposed amendment to 32 CFR Part 1286; amendment to Appendix C and modification of the reasons for exemption. No written comments, suggestions, or objections regarding the proposed rule were received. Accordingly, 32 CFR Part 1286 as set forth in 42 FR 37982 is formally adopted.

ADDRESS: Headquarters, Defense Logistics Agency, Attention: DLA-XA, Cameron Station, Alexandria, Va. 22314.

V 42 177 SEP 13 77 UMI

FOR FURTHER INFORMATION CONTACT:

Mr. William A. Smith, 202-274-6234.

By Order of the Director:

WILLIAM A. SMITH,
Chief, Administrative Management Division, Office of Administration.

MAURICE W. ROCHE,
Director, Correspondence and Directives OASD (Comptroller).

SEPTEMBER 8, 1977.

PART 1286—PERSONAL PRIVACY AND RIGHTS OF INDIVIDUALS REGARDING THEIR PERSONAL RECORDS

Sec.
1286.1 Purpose and scope.
1286.2 Policy.
1286.3 Definitions.
1286.4 Responsibilities.
1286.5 Procedures.
1286.6 Forms and reports.

AUTHORITY: Pub. L. 93-579 (5 U.S.C. 552a).

§ 1286.1 Purpose and scope.

(a) This Part 1286 implements the Privacy Act of 1974 (hereinafter referred to as the Act) by prescribing:

(1) The procedures whereby an individual can be notified in response to his[1] request of any system of records named by the individual contains a record pertaining to him.

(2) The requirements for verifying the identity of an individual who requests his record or information pertaining to him before the record or information will be made available to him.

(3) The procedures for granting access to an individual upon his request of his record or information pertaining to him.

(4) The procedures for reviewing a request from an individual concerning the amendment of any record or information pertaining to him, for making a determination on the request, and for an appeal of an initial adverse determination.

(5) The procedures and policies governing the collection, safeguarding, maintenance, public notice, use, and dissemination of personal information.

(6) The conditions under which disclosure of personal information may be made and procedures for exempting systems of records from certain requirements of the Act.

(b) This Part 1286 is applicable to HQDLA and all DLA field activities.

§ 1286.2 Policy.

It is the policy of DLA:

(a) To preserve the personal privacy of individuals, permitting an individual to know what records pertaining to him are collected, maintained, used, or disseminated in DLA, and to have access to and have a comprehensible copy made of all or any portion of such records and to correct or amend such records.

(b) To collect, maintain, use, or disseminate any record of identifiable personal information in a manner that assures that such action is for necessary and lawful purpose; that the information is timely and accurate for its intended use; and that adequate safeguards are provided to prevent misuse of such information.

§ 1286.3 Definitions.

(a) *Individual.* A citizen of the United States or an alien lawfully admitted for permanent residence. A legal guardian or the parent of a minor have the same rights as the individual and may act on behalf of the individual.

(b) *Maintain.* (Records on individuals) collect, use, or disseminate.

(c) *Record.* Any item, collection, or grouping of information about an individual that is maintained by an agency, including, but not limited to, his education financial transactions, medical history, and criminal or employment history and that contains his name, or the identifying number, symbol, or other identifying particular assigned to the individual, such as a finger or voice print or a photograph.

(d) *Routine Use.* The disclosure of a record, or the use of such record for a purpose which is compatible with the purpose for which it was collected. Routine use encompasses not only common or ordinary uses, but also all the proper and necessary uses of the record; even if such use occurs infrequently.

(e) *System Manager.* The official responsible for the policies and practices governing the system of records.

(f) *System of Records.* A group of records under the control of any system manager from which information is retrieved by the name of an individual or by some identifying number, symbol, or other identifying particular assigned to the individual.

§ 1286.4 Responsibilities.

(a) *HQ DLA*—(1) *The Chief, Administrative Management Division, Office of Administration (DLA-XA)* will:

(i) Formulate policy to provide comprehensive guidance necessary for uniform compliance with the Act by all elements of DLA.

(ii) Serve as the focal point on privacy matters for DLA in communication with the Defense Privacy Board and is designated the DLA Privacy Act Officer.

(iii) Supervise the preparation for publication in the FEDERAL REGISTER of all required information or systems of records affected by the Act.

(iv) Serve as the DLA representative on the Defense Privacy Board.

(v) Review for conformity with the Act, all procedures, including DLA and DD forms, which requires an individual to furnish information, and formulate corrective or supplementary provisions, as necessary.

(vi) Maintain this DLAR in a current status and review it annually.

(2) *The Chief, Publication Division, Office of Administration (DLA-XM)* will review DLA publications to assure that those which meet the criteria for publication in the FEDERAL REGISTER are prepared in proper form and transmitted promptly for publication in the FEDERAL REGISTER as required by DLAR 5025.19, Publication of Material in the FEDERAL REGISTER.

(3) *The Counsel (DLA-G)* will review policies, practices, and procedures to ensure conformity with the Act.

(4) *The Assistant Director, Plans, Programs and Systems (DLA-LS)* will provide policies and guidance to preclude unauthorized disclosure of protective information maintained in the automatic data processing facility.

(5) *The Chief, Training and Incentives Division, Office of Civilian Personnel (DLA-KT)* will, in conjunction with the DLA Privacy Board, ensure development of appropriate training program for all personnel where duties involve responsibilities for systems of records affected by the Act.

(6) *The Heads of HQ DLA Principal Staff Elements (PSEs)* will:

(i) Ensure that the collection, maintenance, use, or dissemination of record of identifiable personal information is in a manner that assures that such action is for a necessary and lawful purpose, that the information is timely and accurate for its intended use, and that adequate safeguards are provided to prevent misuse of such information.

(ii) Ensure that internal operating procedures provide for effective compliance with the Act.

(iii) Establish procedures for the granting of confidentiality in regulations and procedures for investigations (e.g., law enforcement, suitability, etc.).

(iv) Prepare and submit reports in accordance with § 1286.6.

(7) *DLA Privacy Board.* Established under the chairmanship of the Chief, Administrative Management Division, Office of Administration (DLA-XA) with membership consisting of representatives from the Comptroller, DLA, Counsel, DLA, Staff Director, Civilian Personnel, DLA, Assistant Director, Plans, Programs, and Systems, DLA, Staff Director, Military Personnel, DLA, Command Security Officer, DLA, and the Executive Director, Industrial Security, HQ DLA CAS. The Board will cause to be reviewed for conformity with the Act, each category of information in a system of records for necessity and relevance; provide assistance in the development of DLA-wide Privacy training program; and review practices and procedures established by system managers to ensure they are in conformity with the Act.

(b) *The Heads of DLA Primary Level Field Activities (PLFAs)* will:

(1) Ensure that the collection, maintenance, use, or dissemination of record of identifiable personal information is in a manner that assures that such action is for a necessary and lawful purpose, that the information is timely and accurate for its intended use, and that adequate safeguards are provided to prevent misuse of such information.

(2) Designate a Privacy Act officer to serve as the principal point of contact on privacy matters.

[1] For convenience in reading, standard pronoun gender usage will be followed in this DLAR. Where such pronouns as "he" or "him", etc., are used, it should be understood to include "she" or "hers", etc.

(3) Ensure that internal operating procedures provide for effective compliance with the Act.

(4) Establish a training program for those personnel whose duties involve responsibilities for systems of records affected by the Act.

§ 1286.5 Procedures.

(a) *Access to personal information.* (1) Upon request, an individual will be informed whether or not a system of records contains a record pertaining to him, and accompanied by a person of his own choosing, if he so desires, will be permitted to review his records, and to obtain a copy of such records in a form that is comprehensible to him at a reasonable cost, unless exempted in accordance with paragraph (o)(1)(v) of this section or paragraph (d) of this section. This Part 1286 does not require that a record be created or that an individual be given access to records which are not retrieved by name or other individual identifier. Only costs of reproduction, as set forth in DLAR 5400.14, Availability to the Public of Official Information, may be charged; however, if copying is the only means whereby the record can be made available to the individual, reproduction fees will not be assessed (i.e., when a copy must be made in order to delete information contained on the record pertaining to another individual).

(i) The granting of access to a record containing personal information will not be conditioned upon any requirement by the individual to state a reason or otherwise justify the need to gain access.

(ii) Prior to granting access to personal information, individuals may be required to provide reasonable verification of his identity.

(a) No verification of identity will be required of an individual seeking access to records which are otherwise available to any member of the public under DLAR 5400.14.

(b) For the individual who seeks access in person, verification of identity will normally be made by those documents which an individual is likely to have readily available, such as employee or military identification card, driver's license, or medical card.

(c) When access is requested by mail, verification of identity may consist of the individual providing certain minimum identifying data, such as name and date of birth or such other information deemed necessary by the system manager having custody of the record. If the sensitivity of the data warrants, a signed notarized statement of identity may be required.

(d) An individual will not be denied access to his record for refusing to disclose his social security number (SSN), unless disclosure of his SSN is required by Federal Statute or required for verification purposes under a system of records existing and operating before 1 January 1975, if such disclosure was required under statute or regulation adopted prior to such a date.

(e) Individuals may not be denied access to a record pertaining to themselves because those records are exempted from disclosure under the provisions of DLAR 5400.14.

(iii) Access to a record or a copy thereof will not be denied solely because the record's physical presence is not readily available (i.e., on magnetic tape), or because the context of the record may disclose sensitive information about another individual. To protect the personal privacy of other individuals who may be identified in a record, an extract will be prepared to delete only that information which would not be releasible to the requesting individual under DLAR 5400.14.

(iv) A medical record will be disclosed to the individual to whom it pertains unless, in the judgement of a physician, access to such record could have an adverse effect upon the individual's physical or mental health. When it has been determined that the disclosure of medical information could have an adverse effect upon the individual to whom it pertains, the information may be transmitted to a physician named by the requesting individual.

(v) This Part 1286 does not entitle an individual to have access to any information compiled in reasonable anticipation of a civil action or proceeding.

(vi) A system manager may require an individual who wishes to be accompanied by another person when receiving access to his records to furnish a written statement authorizing discussion of the records in the presence of the accompanying person.

(vii) Any requests from an individual for access to or copies of records maintained on him will be processed in accordance with this Part 1286 and not the Freedom of Information Act. Normally, requests for access to records will be acknowledged within 10 working days of receipt and access provided within 30 working days.

(viii) Copies of investigatory records compiled by any investigative organization, but in the temporary custody of an element requesting the record for purposes of adjudication or other personnel action, are the records of the originating investigative organization. Individuals seeking access to such records will be directed to the originating investigative organization and should be instructed to direct all requests submitted under the Act to that organization. Records concerning the adjudication, or other personnel actions based on the investigative records, originated by the organization using the investigation, are the records of the using organization which shall respond to all other requests under the Act concerning them.

(2) *Amendment of personal information.* (i) An individual will be given the opportunity to request, either in person or through the mail, that his record be amended. The system manager may, however, require that such requests be made in writing. Instructions for the preparation of a request and any forms employed should be as brief and as simple as possible. Requests should contain as a minimum, identifying information to locate the record, a description of the items to be amended and the reason amendment is being requested. A request will not be rejected or required to be resubmitted unless additional information is essential to process the request. Incomplete or inaccurate requests will not be rejected categorically; the individual will be asked to clarify the request as needed. Individuals will be required to provide verification of identity as paragraph (a)(1)(ii) of this section to assure that the requester is seeking to amend records pertaining to him and not, inadvertently or intentionally, the records of another individual.

(ii) A written acknowledgement of the receipt of a request for amendment of a record must be provided to the individual within 10 working days (excluding Saturdays, Sundays, and legal public holidays) after receipt by the system managers. The acknowledgement will clearly identify the request and advise the individual when he may expect to be advised of action taken on the request. Whenever practicable, the decision will be made within 30 working days. No separate acknowledgement of receipt is necessary if the request can be either approved or denied, and the individual advised within the 10-day period. For requests presented in person, written acknowledgement should be provided at the time the request is presented.

(iii) If the system manager agrees with any portion or all of the individual's request to amend a record, the system manager will promptly advise the individual and amend the record accordingly. If disclosure accounting has been made, the system manager will advise all previous recipients of the record that the amendment has been made and the substance of the correction.

(iv) If the system manager disagrees with all or any portion of a request to amend a record, the system manager will promptly:

(a) Advise the individual of his refusal and the reasons therefor.

(b) Inform the individual that he may request a further review by the designated reviewing official.

(c) Describe the procedures for requesting such a review including the name and address of the official to whom the request should be directed.

(v) A review of the initial refusal to amend a record will be made if requested by the individual.

(a) Heads of HQ DLA PSEs and Heads of PLFAs, as applicable, are designated reviewing officials and will make a review of the initial determination. The Deputy Director, DLA, or the Deputy Director, CAS, for HQ DLA CAS elements and Defense Contract Administration Services Regions, will be the reviewing official when one of the aforementioned officials is identified as a system manager

(b) If, after conducting the review, the reviewing official also refuses to amend the record in accordance with the individual's request, the individual will be notified:

V 42 177 SEP 1377 UMI

(1) Of the refusal and the reasons therefor.

(2) Of his right to file a concise statement of reasons for disagreeing with the decisions of DLA.

(3) Of the procedures for filing a statement of disagreement and such statement will be made available to anyone to whom the record is subsequently disclosed.

(4) That prior recipients of the disputed record will be provided a copy of the statement of disagreement to the extent that an accounting of disclosure is maintained.

(5) Of his right to seek judicial review of DLA's refusal to amend a record.

(c) If the reviewing official determines that the record should be amended in accordance with the request, the system manager will amend the record, advise the individual, and inform previous recipients where an accounting of disclosure has been maintained.

(d) A final determination on the individual's request for a review of an initial refusal to amend a record must be completed within 30 days after receipt by the proper office unless the reviewing official determines that a fair and equitable review cannot be completed in that time. If additional time is required, the individual will be informed, in writing, of the reasons for the delay and of the approximate date on which the review is expected to be completed.

(vi) When an individual files a statement of disagreement, the system manager will clearly annotate the record so that the dispute is apparent to anyone who may subsequently grant access to use or disclose the record. The notation itself will be integral to the record. Where an accounting of disclosure has been made, the system manager will advise previous recipients that the record has been disputed and will provide a copy of the individual's statement.

(e) The individual's statement of disagreement need not be filed as an integral part of the record to which it pertains. It will, however, be maintained in such a manner as to permit ready retrieval whenever the disputed portion of the record is to be disclosed. When information which is the subject of a statement of disagreement, is subsequently disclosed, the system manager will note which information is disputed and provide a copy of the individual's statement.

(f) The system manager may include a brief summary of its reasons for not making an amendment when disclosing disputed information. Summaries normally will be limited to the reasons stated to the individual. The system manager's summary will be treated as part of the individual's record; however, it will not be subject to the amendment procedures.

(b) *Disclosure to others.* (1) Except as prescribed in paragraph (a) of this section, this Part 1286 does not require disclosure of records to anyone other than the individual to whom the records pertain.

(2) No record contained in a system of records maintained within DLA will be disclosed by any means of communication to any person, or to any agency outside DLA, except pursuant to a written request by, or with the prior written consent of, the individual to whom the record pertains, unless disclosure of the record would be:

(i) To those officials and employees of the Department of Defense who have a need for the record in the performance of their official duties and the use is compatible with the purpose for which the record is maintained. This includes, for example, transfer of information between components when civilians or military personnel assigned or affiliated with one component are processed by an activity of another component such as Armed Forces Examination and Entrance Stations (AFEES), Air Terminals, or Defense Investigative Service (DIS).

(ii) Required to be disclosed to a member of the public by DLAR 5400.14. Some examples of personal information pertaining to military personnel which normally are released without an unwarranted invasion of privacy are: name, rank, date of rank, salary, present, and past duty assignments, future assignments which have been finalized, office phone number, source of commission, military and civilian educational level, and promotion sequence number. Disclosure of personal information pertaining to civilian employees shall be made in accordance with the Federal Personnel Manual.

(iii) For a routine use as defined in 1286.3 and decribed in section II H of Appendix A.

(iv) To the Bureau of the Census for purpose of planning or carrying out a census or survey or related activity authorized by law.

(v) To a recipient who has provided DLA with advance adequate written assurance that:

(a) The record will be used solely as a statistical research or reporting record.

(b) The record is to be transferred in a form that is not individually identifiable, (i.e., the identity of the individual cannot be determined by combining various statistical records).

(c) The record will not be used to make any decisions about the rights, benefits, or entitlements of an individual.

(vi) To the National Archives of the United States as a record which has sufficient historical or other value to warrant its continued preservation by the United States Government, or for evaluation by the Administrator of General Services, or his designee to determine whether the record has such value. A record transferred to a Federal records center for safekeeping or storage does not fall within this category since Federal records center personnel act on behalf of DLA in this instance and the records remain under the control of DLA. No disclosure accounting record of the transfer of records to Federal records centers need be maintained.

(vii) To another agency or to an instrumentality of any governmental jurisdiction within or under the control of the United States for a civil or criminal law enforcement activity if the activity is authorized by law, and if the Head of the agency or instrumentality has made a written request to a DLA element which maintains the record specifying the particular portion desired and the law enforcement activity for which the record is sought. Blanket requests for all records pertaining to an individual will not be accepted. A record may also be disclosed to a law enforcement agency at the initiative of a DLA element which maintains the record when criminal conduct is suspected, provided that such disclosure has been established in advance as a "routine use".

(viii) To a person pursuant to a showing or compelling circumstances affecting the health or safety of an individual if upon such disclosure notification is transmitted to the last known address of the individual to whom the record pertains.

(ix) To either House of Congress, or, to the extent of matter within its jurisdiction, any committee or subcommittee thereof, or any joint committee. This does not authorize the disclosure of any record subject to this Part 1286 to members of Congress acting in their individual capacities or on behalf of their constituents.

(x) To the Comptroller General, or any of his authorized representatives, in the course of the performance of the duties of the General Accounting Office.

(xi) Pursuant to the order of a court of competent jurisdiction.

(a) When a record is disclosed under compulsory legal process and when the issuance of that order or subpoena is made public by the court which issued it, reasonable efforts will be made to notify the individual to whom the record pertains. This may be accomplished by notifying the individual by mail at his most recent address as contained in DLA records.

(b) Upon being served with an order to disclose a record, the system manager will endeavor to determine whether the issuance of the order is a matter of public record and, if it is not, seek to be advised when it becomes public. An accounting of the disclosure will be made at the time the system manager complies with the order or subpoena.

(3) Each system manager, with respect to each system of records under his control will:

(i) For all disclosures under paragraph (b)(2) of this section, except those under paragraphs (b)(2) (i) and (ii) of this section, keep an accurate accounting of the following:

(a) The date of the disclosure.

(b) The nature of the disclosure; that is what was disclosed and how; for example, oral disclosure by telephone of home address. Other examples of disclosure include visual review of the record, written, transfer of data through telecommunications network, etc.

(c) The purpose of this disclosure. Describe the condition of the disclosure as listed in paragraphs (b)(2) (iii) thru (xi) of this section. If disclosure is for a routine use published in a records systems notice, briefly describe the specific routine use.

(d) The name and address of the person or agency to whom the disclosure is made. A system manager need not make a notation on a single document of every particular record, provided he can construction from the system for the required accounting information.

(ii) Retain the accounting made under paragraph (b)(3)(i) of this section for at least 5 years after the last disclosure or the life of the record, whichever is longer. No record of the disclosure of this accounting need be maintained.

(iii) Upon request of the individual to whom the record pertains, make available to that individual all information in the accounting of disclosures except that pertaining to disclosures for law enforcement purposes pursuant to paragraph (b)(2)(vii) of this section, and systems that have been determined to be exempt from these provisions under subsections (j) and (k) of the Act.

(4) Names and Addresses. An individual's name and address may not be sold or rented by DLA unless such action is specifically authorized by law. Requests for home addresses may be referred to the last known address of the individual for reply at his discretion and the requester will be notified accordingly. This provision will not be construed to require the withholding of names and addresses otherwise permitted to be made public.

(c) *Collection of personal information from individuals.* (1) *Collection Directly from Individuals.* Personal information shall be collected to the greatest extent practicable directly from the individual when the information may result in adverse determinations about an individual's rights, benefits, and privileges under Federal programs. The collection of information from third parties should be minimized. Exceptions to this policy may be made under certain circumstances, such as the following:

(i) There is need to ensure accuracy of information supplied by an individual by verifying with a third party, such as in the case of verifying information for a security clearance.

(ii) The nature of the information is such that it can only be obtained from a third party, such as an evaluation of employee's performance in a previous job or assignment.

(iii) Obtaining the information from the individual would present exceptional practical difficulties or would result in unreasonable costs.

(2) *Informing Individuals From Whom Information is Requested.* Each individual who is asked to supply personal information must be told of:

(i) The authority (statute or Executive Order) which authorizes its solicitation.

(ii) The principal purpose or purpose for which it is to be used.

(iii) The routine uses, to be made of it.

(iv) Whether furnishing such information is mandatory or voluntary and the effects on him, if any, of not providing it. This notice to the individual will be made on a separate form which can be retained by the individual. This advice must be given on all media used in requesting information whether it is a "form" in the usual sense (i.e., a preprinted document with a control number and an edition date) or a format, questionnaire, survey sheet, or report rendered on a blank sheet. Supplying personal information is when individuals personally complete the fill-in information about themselves on the form or when the individuals furnish the information about themselves verbally as in an interview or question and answer type of arrangement.

(3) *Collection Documents in Use Prior to 27 Sep 75.* These documents in use before 27 Sep 75 and which are to be used on and after that date, must meet the notice requirements by use of a separate statement to go along with each such document subject to the provisions of the Act. The statement will be assigned the identifying form number/RCS/OMB Appeal Number/Form Letter Number used in collecting the information and the suffix "Privacy Act Statement", as follows:

(i) For forms in regularly-issued, numbered series, the Privacy Act Statement will bear the same number and edition date as the form to which it pertains, except as provided in paragraph 2 of Appendix B Example: For DD Form 398, Statement of Personal History, the applicable notice to each individual asked to complete the form will be identified as "DD Form 398—Privacy Act Statement" in the lower left-hand corner.

(ii) For unnumbered formats, questionnaires, surveys, and reports which are not in the regularly-issued form number series, the Privacy Act Statement will bear the report control symbol or OMB Approval Number under the authority for which the information is collected, if applicable.

Example: For the Air Force Junior ROTC Survey for AFJRDTC Cadets (Format A), the applicable notice to each individual asked to complete the questionnaire will be identified as "OMB Approval No. 21-RO268—Privacy Act Statement". Same reports are assigned Reports Control Symbol (RCS) numbers or OMB Approval Numbers. If these reports are controlled in a regular numbered form series, then the Privacy Act Statement will bear the form number reference in lieu of the RCS or OMB Number.

(4) *Preparation of Privacy Act statements.* (i) The proponent (i.e., the initiator) has the final responsibility for determining whether a form, format, questionnaire, survey, or report requires a Privacy Act Statement. The proponent must consult his counsel, particularly for validation of the authority for asking for the information. Statements must be sufficiently complete and specific but, at the same time be concise and couched in easily understood language.

(ii) Forms and information management officers at all echelons must assure that Privacy Act Statements are available for issuance with new forms, when required.

(iii) No Department of Defense component may deny any individual any right, benefit, or privilege provided by law because of such individual's refusal to disclose his SSN, unless such disclosure is:

(a) Required by Federal statute.

(b) To any component maintaining a system of records in existence and operating before 1 Jan 75, if such disclosure was required under statute or regulation adopted prior to such date to verify the identity of an individual. Executive Order No. 9397, 22 Nov 43, authorizes components to use SSN as a system of numerical identification of individuals.

(iv) Any component which requests an individual to disclose his SSN must inform that individual:

(a) Whether that disclosure is mandatory or voluntary.

(b) By what statutory or other authority such number is solicited.

(c) What uses will be made of it.

(v) If disclosure of the SSN is not required by Federal statute or is not for a system of records in existence and operating prior to 1 Jan 75, proponents are nevertheless not precluded from requesting it from individuals concerned. However, the separate Privacy Act Statement for the SSN alone, or a merged Privacy Act Statement, covering not only the SSN but also other items of personal information, must make clear that the disclosure of the SSN is voluntary. If, in such instances, the individual refuses to disclose it, the proponent concerned must be prepared to identify him by alternate means.

(d) *Exemptions.* The Director, DLA will designate the DLA records which are to be exempted from certain provisions of the Act, and DLA-XA will publish in the FEDERAL REGISTER, information specifying the name of each designated system, the specific provisions of the Act from which each system is to be exempted, and the reasons for each exemption of the record system.

(1) *General Exemptions.* To qualify for a general exemption, as defined in the Act, the system of records must be maintained by a system manager who performs as his principal function any activity pertaining to the enforcement of criminal laws, including police efforts to prevent, control, or reduce crime or to apprehend criminals, and the activities of prosecutors, courts, correctional, probation, pardon, or parole authorities. Such system of records must consist of:

(i) Information compiled for the purpose of identifying individual criminal offenders and alleged offenders and containing only identifying data and notations of arrests, the nature and disposition of criminal charges, sentencing, confinement, release, and parole, and probation status.

(ii) Information compiled for the purpose of a criminal investigation, including reports of informants and investigators, and associated with an identifiable individual.

(iii) Reports identifiable to an individual compiled at any stage of the process of enforcement of the criminal laws from arrest or indictment through release from supervision.

V 42 177 SEP 13 77 UMI

(2) *Specific Exemption.* To qualify for a specific exemption, as defined by the Act the systems of records must be:

(i) Specifically authorized under criteria established by an Executive Order to be kept classified in the interest of national defense or foreign policy and are in fact properly classified pursuant to such Executive Order.

(ii) Investigatory material compiled for law enforcement purposes other than material covered under a general exemption. However, an individual will not be denied access to information which has been used to deny him a right or privilege unless disclosure would reveal a source who furnished information to the Government under a promise that the identity of the source would be held in confidence. For investigations made after 27 Sep 75, the identity of the source may be treated as confidential only if based on the expressed guarantee that the identity would not be revealed.

(iii) Maintained in connection with providing protective services to the President of the United States or other individuals protected pursuant to 18 U.S.C. S3056.

(iv) Used only to generate aggregate statistical data or for other similarly evaluative or analytic purposes, and which are not used to make decisions on the rights, benefits, or entitlements of individuals except for the disclosure of a census record permitted by 13 U.S.C. S8.

(v) Investigatory material compiled solely for the purpose of determining suitability, eligibility, or qualifications for Federal civilian employment, Military Service, Federal contracts, or access to classified information, but only to the extent that the disclosure of such material would reveal the identity of a source who furnished information to the Government under an express promise that the source would be held in confidence, or prior to 27 Sep 75, under an implied promise that the identity of the source would be held in confidence.

(vi) Testing or examination material used solely to determine individual qualifications for appointment or promotion in the Federal service, the disclosure of which would compromise the objectivity or fairness of the testing of elimination process.

(vii) Evaluation material used to determine potential for promotion in the Armed Services, but only the extent that the disclosure of such material would reveal the identity of a source who furnished information to the Government under an express promise that the identity of the source would be held in confidence or prior to 27 Sep 75, under an implied promise that the identity of the source would be held in confidence. System managers will specify those categories of individuals for whom pledges of confidentiality may be made when obtaining information on an individual's suitability for promotion.

(e) *System of Records*—(1) *Content.* (i) Systems managers will maintain in its records systems only such information as is relevant and necessary to accomplish a purpose or mission required by statute or Executive Order of the President.

(ii) The proponent of each system of records will identify the specific provision of law, or Executive Order, which provides authority for the maintenance of information in each system of records.

(iii) Authority to establish and maintain a system of records does not convey unlimited authority to collect and maintain all information which may be useful or convenient to have. The proponent of each system of records will evaluate each category of information in a system for both necessity and relevance. In performing this evaluation the following points will be considered:

(a) Relationship of each item of information to the statutory or regulatory purpose for which the system is maintained.

(b) Specific adverse consequence of not colecting each category of information.

(c) Possibility of meeting the information requirement through use of information not individually identifiable or through sampling techniques.

(d) Length of time that the information is needed and, where appropriate, techniques for purging parts of the record.

(e) Financial cost of information maintenance compared to risk or adverse consequence of not maintaining it.

(f) Necessity and relevance of this information to all individuals included in the system.

(iv) Collection will be discontinued for each category or item of information which, after the above evaluation, does not appear to be fully justifiable. Moreover, such information will be withdrawn and destroyed, provided it can be economically segregated from necessary and relevant information.

(v) The evaluation prescribed above will be performed by each proponent of a system of records:

(a) During the design phase of a new system of records or a change in an existing system of records.

(b) Annually, prior to the republication of all system notices in the FEDERAL REGISTER.

(2) *Publication of record system notices*—(i) *General.* A notice of the existence of each system of records, as defined in § 1286.3(d) must be published in the FEDERAL REGISTER.

(ii) *Record System Notices.* System managers proposing new systems will prepare system notices according to Appendix A at least 60 days before the proposed system change may be legally implemented. Initial system notices will be submitted to DLA–XA.

(iii) *Change to Existing Systems Requiring Advanced Public Notice*

(a) The following proposed changes to an existing system must be published in the FEDERAL REGISTER for public comment at least 30 days before the changes are implemented:

(1) Those which expand the categories of individuals on whom records are maintained.

(2) Those which add new categories of records to the system.

(3) Those which add new categories of sources.

(4) New or changed routine uses which involve disclosure to a new category of recipient.

(5) Changes in procedures governing access.

(b) Notices of proposed changes to existing systems will be submitted to DLA–XA, in accordance with Appendix A.

(iv) *Changes to Existing Systems Not Requiring Advanced Public Notice.* Changes in records systems not stated in paragraph (e)(2)(iii) of this section do not require advance publication, but must be submitted for inclusion in the annual consolidated listing of records systems. Accordingly, each system manager will ensure that all such changes are forwarded to DLA–XA by 15 March of each year for annual publication in the FEDERAL REGISTER.

(v) *Reports Concerning New and Changed Systems.* Concurrently with paragraph (e)(2)(ii) and (iii) of this section, DLA–XA will provide OASD (C) advanced notice of proposals to establish new systems or to change routine uses of existing systems.

(vi) *DLA Issuances.* DLA–XA will ensure that information contained in each system notice, as published in the FEDERAL REGISTER, is incorporated and published in DLAR 5400.22, Privacy Act System of Records Notices, to ensure uniform system use and maintenance. All DLA activities will take immediate action to discontinue any system of records not contained in DLAR 5400.22.

(3) *Standards of accuracy.* (i) Records used by system managers in making determinations about an individual will be maintained with such accuracy, relevance, timeliness, and completeness as is reasonably necessary to ensure fairness to the individual in any determination.

(ii) Prior to disseminating any record about an individual to any person other than a Federal agency, unless the dissemination is made pursuant to DLAR 5400.14, reasonable efforts will be made to ensure that such records are accurate, complete, timely and relevant for DLA purposes.

(4) *Restriction on maintenance of certain records.* Maintenance of records describing how individuals exercise rights guaranteed by the First Amendment are prohibited unless expressly authorized by Federal statute or by the individual concerned, unless pertinent to and within the scope of an authorized law enforcement activity. The exercise of these rights includes, but is not limited to, religious and political beliefs, freedom of speech and the press, and the right of assembly, and to petition.

(5) *Rules of conduct.* Heads of HQ DLA PSEs and Heads of PLFAs will assure that persons including Government contractors or their employees, involved in the design, development, operation, or maintenance of any system of records, as defined in § 1286.3, are informed of all requirements to protect the privacy of

the individuals who are subjects of the records. The following sanctions will be emphasized to personnel:

(i) There are criminal penalties for knowingly and willfully disclosing a record about an individual without the written consent or the written request of that individual, or unless disclosure is for one of the reasons listed in paragraph (d) of this section.

(ii) DLA may be subject to civil suit due to failure to comply with the Act.

(6) *Safeguarding personal information in records systems.* (i) System managers will establish administrative and physical safeguards to protect information from unauthorized or unintentional access, disclosure, modification, or destruction. These safeguards will apply to systems of records, in whatever medium in which personal information is processed or stored. Such safeguards will be tailored to the requirements of each system of records. Where a greater degree of protection is not prescribed by other regulations, as a minimum, all records will be afforded the same degree of protection as "For Official Use Only" documents.

(ii) Access to personal information will be restricted to those persons whose official duties require access and the individual concerned in accordance with paragraph (b) of this section.

(iii) System managers will ensure that all persons whose official duties require access to or processing and maintenance of personal information are trained in the proper safeguarding and use of such information.

(iv) Personal records and documents will be stored so as to reasonably preclude unauthorized disclosure.

(v) Disposal of records containing personal information which are no longer required will be accomplished in such a manner that will prevent the contents from being disclosed (e.g., tearing or shredding the record into pieces or burial or in the case of magnetic tapes by degaussing).

§ 1286.6 Forms and reports.

(a) An annual report will be prepared by DLA–XA for the preceding calendar year on its implementation of the Privacy Act of 1974 as follows:

(1) *Summary.* A brief management summary of the status of actions taken to comply with the Act, the results of these efforts, any problems encountered and recommendations for any changes in legislation, policies, or procedures.

(2) *Accomplishments.* A summary of major accomplishments; i.e., improvements in agency information practices and safeguards.

(3) *Plans.* A summary of major plans for activities in the upcoming year, e.g., area of emphasis, additional securing of facilities planned.

(4) *Exemptions.* A list of systems which are exempted during this year from any of the operative provisions of this law permitted under the terms of subsections (j) and (k) of the Act, whether or not the exemption was obtained during the year, the number of records in each system exempted from each specific provision and reasons for invoking the exemption.

(5) *Number of systems.* A brief summary of changes to the total inventory of personal data systems subject to the provisions of the Act, including reasons for major changes; e.g., the extent to which review of the relevance of and necessity for records has resulted in elimination of all or portions of systems of records or any reduction in the number of individuals on whom records are maintained.

(6) *Operational experiences.* A general description of operational experiences including estimates of the number of individuals (in relation to the total number of records in the system) requesting information on the existence of records pertaining to them, refusing to provide information, requesting access to their records, appealing initial refusals to amend records, and seeking redress through the courts.

(7) *Any available data, or estimates, of the cost of administering the Act.*

(8) *Six copies of the annual report* will be furnished to the Assistant Secretary of Defense (Comptroller) on or before 31 March of each year for transmittal to the Office of Management and Budget.

(b) An annual feeder report on the actions of the preceding year will be prepared by Heads of PLFAs and Heads of HQ DLA PSEs for submission in duplicate to DLA–XA on or before 10 March of each year. The report will contain:

(1) *Summary.* A brief management summary of the status of actions taken to comply with the Act, the results of these efforts, any problems encountered and recommendations for any changes in legislation, policies or procedures.

(2) *Accomplishments.* A summary of major accomplishment; i.e., improvements in agency information practices and safeguards.

(3) *Plans.* A summary of major plans for activities in the upcoming year, e.g., area of emphasis, additional securing of facilities planned.

(4) *Exemptions.* A list of systems which are exempted during the year from any of the operative provisions of this law permitted under the terms of subsection (j) and (k) of the Act, whether or not the exemptions were obtained during the year, the number of records in each system exempted from each specific provision and reason for invoking the exemption.

(5) *Number of systems.* A brief summary of changes to the total inventory of personal data systems subject to the provisions of the Act, including reasons for major changes; e.g., the extent to which review of the relevance of and necessity for records has resulted in elimination of all or portions of systems of records or any reduction in the number of individuals on whom records are maintained.

(6) *Operational experiences.* A general description of operational experiences including estimates of the number of individuals (in relation to the total number of records in the system) requesting information on the existence of records pertaining to them, refusing to provide information, requesting access to their records, appealing initial refusals to amend records, and seeking redress through the courts.

(7) *Any available data, or estimates, of the costs of administering the Act.*

(c) Each PLFA will submit to HQ DLA, ATTN: DLA–XA during the last week in January, April, July, and October each year, a consolidated listing of those locally controlled and subordinate echelon forms affected by the Act. The listing will contain the form designation and number in numeric sequence, the edition date, and the complete title. Each group of forms will be identified by activity name. To provide the input for this consolidated listing, the forms management officer at all levels must prepare and maintain current, a listing of those forms for which they control and which are within the purview of the Act.

(d) The Reports Control Symbol for these reports will be RCS DD(A) 1379.

APPENDIX A

INSTRUCTIONS FOR PREPARATION OF RECORD SYSTEM NOTICES

SECTION I. GENERAL INSTRUCTIONS

A. For each system of records submit information in the sequence as shown in section II below. Show in this sequence even though an entry may not be required for all items.

B. Use keywords shown below (i.e., SYSNAME, RECORD-CATEGORY, etc.). Explanations of keywords are shown in parentheses, but do not use.

C. Do not use paragraph or subparagraph numbers or letters.

D. Do not underline any part of the text.

E. Do not use hyphenation at the end of a line or subdivide a word at the end of a line.

G. Each system of records notice will be typed double-spaced on a separate sheet(s) of paper, with the originating office symbol entered in the upper right corner.

H. Do not use military or Government terminology which may not be understood by the public. Authorized abbrevations may be used, provided they are first spelled out in each system notice, e.g., Defense Logistics Agency (DLA).

I. Refer to section III below for systems which may qualify for exemption.

J. Number the pages separately for each draft system notice.

K. New and revised system notices shall be prepared in accordance with instructions contained herein. All notices are to be submitted in full, i.e., no partial system notice shall be accepted).

L. For the purpose of identifying record systems and preparing system of records notices, there are five distinguished categories of record systems subject to the Act:

1. *Category 1.* Automated (ADP) systems of records identified by distinctive number and title and normally maintained according to ADP manuals. As a general rule, these systems are not individually or specifically identified by DLAM 5015.1. Files Maintenance and Disposition, although their output may be functionally identifiable through the manual. For preparation of systems notices, there are three recognizable types of ADP systems:

a. Class A and B systems managed by HQ DLA. Most of these systems are identified in the DoD Automated Data Systems Catalog LSPC 3–70–1.

b. Class C Systems. Individually designed, established, and maintained by DLA field activities.

V 42 177 SEP 13 77 UMI

c. DLA field activities systems which are not yet approved are classified as Class C systems, i.e., unauthorized systems.

2 *Category 2.* Exclusive of ADP Systems, those systems of records established and maintained pursuant to and specifically prescribed by statute, executive order, or DLAR.

3 *Category 3.* Exclusive of ADP Systems, those systems of records established under a function authorized by statute, Executive Order or DLAR rather than specifically prescribed by the statute, Executive Order or DSAR, that are accumulated DLA-wide by offices with similar or identical functions. Normally, decentralized segments of such systems vary only in scope and volume and not in content, for example, name files which are established in processing requests under the Freedom of Information Act. In most instances, these systems are identified in DLAM 5015.1.

4 *Category 4.* Exclusive of ADP Systems, those systems of records established and maintained entirely in response to local needs. Although often difficult to describe, these systems have certain common characteristics which can be used in identifying them for preparation of systems notices:

a Normally, they are unique to the accumulating office.

b They are not accumulated DLA-wide in other elements or activities which perform like functions.

c They are seldom specifically identified in DLAM 5015.1.

5 *Category 5.* Those in the custody of DLA temporarily, which "belong" to other Federal agencies. For example, official civilian personnel files on DLA civilian employees belong to the U.S. Civil Service Commission. Most such systems are identified by DLAM 5015.1

M Responsibility for preparation of system of records notices.

1 For Category 1 (ADP) Systems of Records

a Managers of Class A and B systems of records are responsible for preparing system of record notices applicable to their automated data systems (ADS).

b Proponents of Categories 2, 3, 4, and 5 manual) systems of records are responsible for including in their systems of record notices all Class C and unauthorized ADP systems of records which, in effect, are automated segments of their systems of records.

c Managers are responsible for preparation and submission of system of record notices applicable to those Class C and unauthorized ADP system of records which are not automated segments of a manual system of records

2 For Category 2 and 3 system or records, the office having DLA-wide staff responsibility for the function or process involved is considered to be the system of records proponent. Such proponents are responsible for including in their system of record notices coverage of all decentralized segments of the particular system of records.

3 Proponents of Category 4 (local) systems of records are responsible for preparation and submission of system notices applicable to their systems.

4 For Category 5, the proponent is the Federal agency to which a system of records belongs. It is responsible for system of records notices applicable to its records that are temporarily in DLA custody. For example, the CSC will publish system of records notices applicable to all systems of records prescribed by the Federal Personnel Manual. CSC will not, however, be responsible for any modifications or additions to a CSC system of record. The DLA proponent of such modifications or additions is therefore responsible for preparing a system of records notice for the portion added by him. DSA proponents should contact the appropriate Federal agency for other systems of records temporarily in DSA custody to determine and fix responsibility for preparing applicable system of records notices. In instances where a Federal agency to which the records belong declines to cover a system of records temporarily in DLA custody, the DLA proponent will be responsible for preparing the applicable system of records notice.

SECTION II. SEQUENCE OF SUBMISSIONS AND INSTRUCTIONS

A. Manual or Automated. Indicate whether the system is manual or automated. An automated system would include records processed, maintained, or both, in a machine readable processing tapes and cards, etc. A manual system would include records processed, maintained, or both, in a human readable or vertical file cards, microfiche, roll microfilm, photographs, etc. A mechanized file which requires substantial human intervention for processing or maintenance is considered to be manual, rather than automated.

B. Sysname (System Name). Whenever applicable, identify the system by number and title prescribed in your files or records disposition manual. Use locally originated titles for files which are not described specifically and adequately in the manual or which are otherwise unique to the reporting office. If more than one system is covered by a file description, identify each system. If several files, separately described in DLAM 5015.1, are a part of a single system, identify the system only (see paragraph F below for identification of separate files which form a system). Provide system and file title in unclassified form. Do not use abbreviations, nicknames, or acronyms unless spelled out the first time used. Place acronyms in parentheses immediately following the title.

C. Security. Specify the Defense or other security classification for the system of records if classified pursuant to the provisions of DoD 5200.1-R, Information Security Program Regulation, DLAM 8205.1, Safeguarding of Classified Information, and implementing directives. Do not cite as a security classification For Official Use Only, Internal Working Paper, Eyes Only, or similar marking used for internal control or other handling purposes. If unclassified, including FOUO, state unclassified.

D. Location. If the system is maintained in a single location, provide the exact name of the office, organization, and correspondence or routine symbol. On the other hand, if it is geographically or organizationally decentralized, specify each type of organization or element that maintains a segment of the system. For example, if the system was comprised of clinical records, then medical centers and hospitals, and the National Personnel Records Center would be listed as locations. Where automated data systems encompass a central computer facility, with input/output terminals at several geographical locations, list by category, each location under this heading. In all instances where multiple locations are referred to by type of organization, state that official mailing addresses are in the Department of Defense directory in the appendix to the DLA system of record notices. However, in all cases, give the official mailing address if the office maintaining the system is not listed in the FEDERAL REGISTER. If the address is classified, so state. Be sure to list each type of organization maintaining a segment or duplicate of the system, since maintenance by a type of organization not reported herein will constitute a violation of the Act. When indicating domestic addresses, use the United States Postal Service two letter state abbreviation and the Zip Code.

E. Individual-Category (Categories of Individuals Covered by the System). The purpose of this requirement is to permit an individual to determine whether or not information on him might be in the system of records. Categories of individuals, therefore, should be stated in easily understood, nontechnical terms and include all categories of individuals on whom records are maintained. Avoid using broad general descriptions, such as "all civilian personnel" unless the system applies to all civilian personnel. For example, Civilian Individual Pay Record applies to all civilian employees of DLA, while a system of records of Individual Retirement Records would apply only to civilian employees covered by the Civil Service Retirement program. All categories of individuals included in the system must be listed, regardless of the frequency of inclusion or the number of records involved. All future changes to the system, which broaden or increase the categories of individuals covered, will require preparation and publication of a revised record system notice in the FEDERAL REGISTER.

F. Record Category (Categories of Records in the System). Briefly describe in nontechnical terms all types of records in the system. For example, under the Automatic Payroll Cost and Personnel System (APCAPS), the types would include, but not be limited to individual pay record, substantiating documents, such as certificates for deductions and retained leave and earning statements, records of travel payments, personnel actions, and time and attendance cards. For automated systems, do not list source documents unless they are retained and filed by name, SSN, or other individual identifier. Instead, list the categories of information stored in the system. Be sure to include all types of records in the system regardless of their frequency or volume of accumulation, since future additions of new types of records will require preparations and publication of revised public notices in the FEDERAL REGISTER.

G. Authority (Authority for Maintenance of the System). Cite the specific provision of a Federal statute or Executive Order of the President, including the title thereof which authorizes, or provides a legal basis for, maintenance of the system. Do not cite regulations. In this connection, authority for a system may be derived from a statute or Executive Order which:

1. Explicitly authorizes or directs the agency to maintain a system of records.

2. Authorizes or directs DLA to perform a function, the discharge or which requires maintenance of the system of records.

NOTE.—Check with the appropriate Counsel for assistance in determining the statutory or regulatory basis for the system.

H. Routine Uses (Routine Uses of Records Maintained in the System, Including Categories of Users and the Purposes of Such Uses)

1. Essentially, this requirement calls for the following information in nontechnical terms:

a. The purpose(s) for which information in the system is collected.

b. Each category of user.

c. The specific use(s) made of the information by each user.

2. Each category of user and each use must be reported. Any proposed new use or category of user, or change in an existing use, which has the effect of expanding the availability of the information in the system, will require publication of a revised notice in the FEDERAL REGISTER. Any such proposed change in a routine use must also be described in an advanced notice in the FEDERAL REGISTER to permit 30 days for public comment before it is implemented.

3. As defined by 5 U.S.C. 552a, the term "routine use" means with respect to the disclosure of a record, the use of such record for a purpose which is compatible with the purpose for which it was collected.

4. "Uses" can be distinguished from "purposes" in that "purposes" describe the objective for collecting or maintaining information. "Uses" are the specific ways or processes in which the information is employed, including the persons or organizations to whom the record may be disclosed. For example, the purposes for collecting information may be to evaluate an application for a veteran's benefit and to issue checks. "Uses" might include verification of certain information with the appropriate Military Service and release of check data to the Department of the Treasury. List under routine uses if contractors are engaged to perform a service, such as key punch, optical scan, or telecommunications in connection with the operation of an automated data system. List also Federal agencies to which personal-type information is disclosed, including automated system interfaces, and the purposes for which the disclosures are made.

5. Each proponent of a system (i.e., that office or organization proposing, directing, or otherwise responsible for the system) must prescribe the "routine" uses of the records. Routine use does not merely encompass the common and ordinary uses to which records are put, but also includes all of the proper and necessary uses regardless of frequency. For example, individual income tax returns are routinely used by the Internal Revenue Service to audit the amount of tax due and for assistance on collection of such tax by civil proceedings. They are used less often, however, for referral to the Department of Justice for possible criminal prosecution of fraud or tax evasion. Therefore, the "routine" use of such records would include referrals to the Department of Justice. In addition, description of "routine use" shall include the fact that any individual records in a system of records might be transferred to any component of the Department of Defense. It should be expected normally that "routine use" would include disclosure to law enforcement or investigatory authorities for investigation and possible criminal prosecution, civil court action, or regulatory order.

I. Policy-practice (Policies and Practices for Storing, Retrieving, Accessing, Retaining, and Disposing of Records in the System). Describe how records in the system are managed during their life-cycle. When feasible, extract pertinent information from your files or DLAM 5015.1.

1. *Storage.* In describing records storage, specify the medium in which they are maintained, such as paper records in file folders, visible or vertical file cards, computer magnetic tapes, or disks, computer paper printouts, aperature cards, microfiche, roll microfilm, photographs, video-tape, etc.

2. *Retrievability.* Specify how information is accessed and retrieved, such as by name, SSN, Military Service number, or other identification number, classification or personal characteristics, such as fingerprint classification, voice print identifier, etc. Indicate further whether conventional or computerized indices are required to retrieve individual records from the system.

3. *Safeguards.* Describe what measures are taken to prevent unauthorized disclosure of the records and state the categories of individuals authorized access to the records. Specify system safeguards, such as safes, vaults, locked cabinets or rooms, guards, personnel screening, visitor registers, computer "fail-safe" systems software, etc.

NOTE.—Do not describe security safeguards in such detail as to increase the risk of unauthorized access to the records.

4. *Retention (Retention and Disposal).* State rules on how long the records are to be maintained; if and when they are moved to Federal Records Centers, or to the National Archives or other designated depository; and if, when and how they are destroyed, or otherwise disposed of. Changes in this item will not normally require immediate publication of a revised public notice unless they reflect an expansion in the availability of or access to the system of records.

J. Sysmanager (Title and Duty Address of the Agency Officials Responsible for the System). In all cases, enter the title of the official who is responsible for policies and procedures governing the system; i.e., Staff Director, Civilian Personnel, HQ DLA. If the title of the official is unknown or unknowable (such as for locally evolved systems), specify the Commander or the Head of the Office as the responsible official. In addition, for geographically or organizationally decentralized system, where individuals may deal directly with agency officials at each location to exercise their rights under the Act, give the position or duty title of each category of official responsible for the system, or a segment thereof. For example, in the case of individual accident case report records, the entries should be: Staff Director, Civilian Personnel, HQ DLA, and Safety Officers of PLFAs. Do not include the duty address if already listed in organizational directories metntioned in paragraph D above.

K. Notification (Procedure Whereby Individuals Can Be Notified at Their Request If the System Contains Records Pertaining to Them).

1. Indicate whether or not requests from individuals should be addressed to the above SYSMANAGER as in paragraph J above. If requests are to be addressed to any other officials, list them by duty or position titles.

2. Specify what information will be required from the requesting individual to determine whether or not the system contains a record about him, such as full name, military status, SSN or service number, resident or nonresident, etc.

3. List by specific name, or categories, those offices which the requester may visit to obtain information on whether the system contains records pertaining to him or her.

4. For personel visits, specify what data the requester must present as proof of identity, such as a combination of full name, date and place of birth, parent's name, driver's license, or medicare card, etc. Do not require verification of identity for records which are disclosable under the Freedom of Information Act.

L. Access (Procedures Whereby an Individual Can be Notified at His Request How He Can Gain Access to Any Record Pertaining to Himself contained in the system of records). Include the title or category of officials who can provide assistance, if those officials are other than the SYSMANAGER above. If the mailing addresses are listed in the organizational directory, state that official mailing addresses are in the Department of Defense directory in the appendix to the DLA systems notice. Specific locations and telephone numbers of offices may be indicated for unique or centralized systems.

M. Contest (Rules For Access and Contesting Contents of Records). To comply with this requirement, merely, state: "The agency's rules for access to records and for contesting contents and appealing initial determinations by the individual concerned may be obtained from the SYSMANAGER".

N. Source (Categories of Sources of Records in the System). List by type each source of information in the system, e.g., previous employers, financial institutions, educational institutions, trade associations, automated system interfaces, etc. Specific individuals or institutions need not be identified by name. Again, be sure to include all types, since collection of information from types of sources other than listed will require publication of a revised public notice in the FEDERAL REGISTER before any information is collected from thoso sources.

SECTION III. SYSTEMS QUALIFIED AND PROPOSED FOR EXEMPTION

Generally, the following records may be exempted from the provisions of K, L, and N of section II above (subsection (e)(4) (G), (H), and (I) of the Act):

1. Records maintained by the Central Intelligenco Agency.

2. Records compiled to ensure protection of the President or other officials, classified records, records required by statute to be maintained and used solely as statistical records.

3. Investigatory records, compiled solely for the purpose of determining suitability, eligibility, or qualifications for Federal civilian employment, Military Service, Federal contracts, or access to classified information, but only to the extent as outlined in subsection (k)(5) of the Act.

4. Certain testing and examination material.

5. Certain material used to evaluate potential for promotion in the Armed Services. (All items in section II, above will be completed for systems proposed for exemption, except for K, L, M, and N). Cite the system name and specific provisions of the Act, from which the system is to be exempted and the reasons therefor Consult with Counsel for detailed guidance for systems which may be eligible for exemption. Proponents of systems dealing with the above types of records should contact the appropriate records management staff for addition guidelines, if necessary, for preparing exemption notices for publication in the FEDERAL REGISTER (NOTE: No system of records is exempted from the public notice requirements of the Act). Failure to publish a notice constitutes a criminal violation.

APPENDIX B

DETAILED INSTRUCTIONS FOR FORMS AND INFORMATION REQUIREMENTS SUBJECT TO THE PRIVACY ACT OF 1974

1. Fill-in information on the preprinted blank Privacy Act Statement format will be completed by the *functional element* responsible for the form. It will be completed by typewriter, for use as camera copy to reproduce and distribute to users to the form to which the statement applies.

2. The forms management office will assign an edition date in the block provided, and when revised, a new edition date will be assigned. Edition dates assigned the Privacy Act Statements may differ from the date of the form described in the Statement since each may be revised without revision to the other. The same edition dates will be assigned to both form and related statement when processed simultaneously as new or revised actions. When Privacy Act Statements are revised, previous editions will always be obsoleted. A supersession notice obsoleting the previous edition will be shown in the bottom border of the statement in the same manner as shown on forms when superseding a previous edition. No form number is assigned to the blank Privacy Act Statement format since it may be confused with the applicable form number entered in the space provided in the lower left hand corner.

3. When referencing a specific approved Privacy Act Statement, it will be referred to by the related form number followed by the words "Privacy Act Statement". For example,

V 42 177 SEP 13 77 UMI

if DLA Form 0000 is entered in the lower left corner of the Statement, the Statement will thereafter be referred to as DLA Form 0000-Privacy Act Statement. This will facilitate the requisitioning of supplies of the filled-in printed Statement and for making references in correspondence.

4. Strict attention is invited to item number 1 on the Statement, "Authority". This item, when completed, *must* be coordinated with Counsel for validation. The entry in the "Authority" block must be a "Statute" or "Executive Order". When a SSN is requested, in addition to other items of personal information, the authority for requesting the SSN, if different from the authority for the other items, will also be shown in this block. When a SSN is the only personal information requested, *only* item numbers 1, 3, and 4 of the Privacy Act Statement apply.

5. A supply of *blank* "Privacy Act Statements" will be maintained by the local forms management office for issuance on request from functional staff elements. PLFAs will locally reproduce future needs of the blank statement. HQ DLA and DASC staff elements will obtain additional supplies from DLA-XA.

6. *Completed* and officially approved statements applicable to DD, DLA, DLAH, and DSC forms will be processed for initial distribution in accordance with information contained in block 9 of DLA Form 1424, Request for Processing Privacy Act Statement. HQ DLA and DASC staff elements can obtain additional copies from DASC-PD. Completed statements applicable to DD and DLA forms will be initially distributed to PLFAs, who will redistribute needs to subordinate echelons. PLFAs will locally reproduce additional needs. PLFAs will develop local procedures for printing and distributing supplies of completed and approved Privacy Act Statements applicable to locally designated and controlled forms.

7. DLA Form 1424 will be prepared by functional elements responsible for each statement. It will serve as a source document for preparing a requisition for reproduction and distribution of the approved *completed* statement to all users of the form to which it is applicable. The forms management office will be the source of supply for blank copies of DLA Form 1424.

8. HQ DLA and PLFA forms management offices will maintain a file on each approved Privacy Act Statement along with a copy of the supporting DLA Form 1424, DD Form 843, Requisition for Printing and Binding Service, and DD Form 844, Requisition for Local Duplicating Service. The method of filing is left to the discretion of local forms management officers.

APPENDIX C

EXEMPTED RECORD SYSTEMS

All systems of records maintained by the Defense Logistics Agency shall be exempt from the requirements of 5 U.S.C. 552a(d) pursuant to 5 U.S.C. 552a(k)(1) to the extent that the system contains any information properly classified under Executive Order 11652, and which is required by the Executive Order to be kept secret in the interest of national defense or foreign policy. This exemption, which may be applicable to parts of all systems of records, is necessary because certain record systems not otherwise specifically designated for exemptions herein may contain isolated items of information which have been properly classified.

A. *ID:* S150.20 DLA-T (Specific Exemption)

System name:

Security Violation Files.

Exemption:

This system of records is exempted from the following provisions of the title 5, United States Code, section 552a: (c)(3); (d); and (e)(1).

Authority:

5 U.S.C. 552a(k)(2).

Reasons:

Granting individuals access to information relating to law enforcement could interfere with ongoing investigations and the orderly administration of justice, in that it could result in the concealment, alteration, destruction, or fabrication of information; could hamper the identification of offenders or alleged offenders and jeopardize the safety and well being of informants, witnesses and their families and investigative personnel and their families. Disclosure of this information could also reveal and render ineffectual investigative techniques, sources and methods used by this component and could result in the invasion of privacy of individuals only incidentally related to an investigation. Investigatory material is exempt to the extent that the disclosure of such material would reveal the identity of a source who furnished the information to the Government under an express promise that the identity of the source would be held in confidence, or prior to September 27, 1975 under an implied promise that the identity of the source would be held in confidence. This exemption will protect the identities of certain sources who would be otherwise unwilling to provide information to the Government. The exemption of the individual's right of access to his records and the reasons therefor necessitate the exemptions of this system of records from the requirements of the other cited provisions.

B. *ID:* § 153.01 DLA-T (Specific Exemption)

Sys Name:

Personnel Security Files.

Exemption:

This system of records is exempt from the following provisions of title 5, United States Code, section 552a subsection (d).

Authority:

5 U.S.C. 552a (k) (2) and (5).

Reasons:

Investigatory material is exempt to the extent that the disclosure of such material would reveal the identity of a source who furnished the information to the Government under an express promise that the identity of the source would be held in confidence, or prior to September 27, 1975 under an implied promise that the identity of the source would be held in confidence. This exemption will protect the identities of certain sources who would be otherwise unwilling to provide information to the Government.

C. *ID* S160.50 DLA-T (Specific Exemption)

Sys name:

Criminal Incident/Investigations File.

Exemption:

This system of records is exempted from the following provisions of the title 5, United States Code, section 552a: (c)(3); (d); and (e)(1).

Authority:

5 U.S.C. 552a (k)(2).

Reasons:

Granting individuals access to information collected and maintained by this component relating to the enforcement of criminal laws could interfere with orderly investigations, with the orderly administration of justice, and possibly enable suspects to avoid detection or apprehension. Disclosure of this information could result in the concealment, destruction or fabrication of evidence and jeopardize the safety and well being of informants, witnesses and their families, and law enforcement personnel and their families. Disclosure of this information could also reveal and render ineffectual investigative techniques, sources and methods used by this component and could result in the invasion of the privacy of individuals only incidentally related to an investigation. Investigatory material is exempt to the extent that the disclosure of such material would reveal the identity of a source who furnished the information to the Government under an express promise that the identity of the source would be held in confidence, or prior to September 27, 1975 under an implied promise that the identity of the source would be held in confidence. This exemption will protect the identities of certain sources who would be otherwise unwilling to provide information to the Government. The exemption of the individual's right to access to his records and the reason therefor necessitate the exemption of this system of records from the requirements of the other cited provisions.

D. *ID:* S155.53 DLA-NS (Specific Exemption)

Sys name:

Industrial Personnel Security Clearance File.

Exemption:

This system of records is exempt from the following provisions of title 5, United States Code, Section 552a; subsection (d).

Authority:

5 U.S.C. 552a(k)(5).

Reasons:

Investigatory material is exempt to the extent that the disclosure of such material would reveal the identity of a source who furnished the information to the Government under an express promise that the identity of the source would be held in confidence, or prior to September 27, 1975 under an implied promise that the identity of the source would be held in confidence. This exemption will protect the identities of certain sources who would be otherwise unwilling to provide information to the Government.

Title 37—Patents, Trademarks and Copyrights

CHAPTER II—COPYRIGHT OFFICE, LIBRARY OF CONGRESS

[Docket RM 76-1; Rules Doc. C]

PART 201—GENERAL PROVISIONS

Termination of Transfers and Licenses Covering Extended Renewal Term

AGENCY: Library of Congress, Copyright Office.

ACTION: Final regulation.

SUMMARY: This notice is issued to inform the public that the Copyright Office of the Library of Congress is adopting a new regulation pertaining to the termination of transfers and licenses covering the extended renewal term of copyright. The regulation is adopted to implement section 304(c) of the Act for General Revision of the Copyright Law. The effect of the regulation is to establish requirements governing the form, content, service, and recordation of the notices of termination identified in that section.

EFFECTIVE DATE: This regulation takes effect on October 13, 1977.

FOR FURTHER INFORMATION CONTACT:

Jon Baumgarten, General Counsel, Copyright Office, Library of Congress, Washington, D.C. 20559 (703-557-8731).

SUPPLEMENTARY INFORMATION: Under section 304(c) of Pub. L. 94-553 (90 Stat. 2541), the exclusive or nonexclusive grant of a transfer or license of a renewal copyright executed before January 1, 1978 is subject to termination in certain cases. Termination is effected by serving a notice of termination in writing upon the grantee or the grantee's successor in title under conditions specified in the law. Among other conditions, the notice of termination is to comply in form, content and manner of service "with requirements that the Register of Copyrights shall prescribe by regulation." A copy of the notice of termination shall be recorded in the Copyright Office before the effective date of termination, as a condition to its taking effect.

On November 15, 1976 we published in the FEDERAL REGISTER (41 FR 50300) a proposal to adopt a new regulation § 201.10 establishing requirements governing the form, content, service, and recordation of notices of termination. A number of comments were received in response to that proposal. On January 24, 1977 we published in the FEDERAL REGISTER (42 FR 4134) a notice extending the time to comment, specifically to "permit comment upon, reply to, or reconciliation of the comments already received * * *." Several additional comments were received under the extension of time: included among these were "Joint Reply Comments" submitted by several parties who, in their initial comments, had expressed substantially different views on certain aspects of our proposal.[1]

All comments filed in this proceeding have been well-reasoned and cogently presented. We particularly appreciate the efforts made by the signatories to the Joint Reply Comments, in their words, to "assist the Copyright Office in reconciling the positions taken by the parties in their opening comments." We have not, however, considered ourselves bound by any positions taken, or understandings among, the commenting parties. We have sought to evaluate and modify the proposed regulation in light of all comments received, and several of these comments have led us to make substantial changes from the proposed regulation. A discussion of the major substantive comments follows:

1. THE SERVICE OF NOTICES OF TERMINATION BEFORE JANUARY 1, 1978

The Preamble to our Notice of Proposed Rulemaking stated:

Section 304(c) expressly refers to the possibility of termination of grants during specified periods beginning on January 1, 1978, and requires the serving of notices "not less than two or more than ten years" before the effective date of termination. Thus, a reasonable interpretation would permit the serving of certain termination notices before January 1, 1978.

Several comments objected to this statement and argued that, under the Transitional and Supplementary provisions of the new Copyright Act, termination notices cannot be effectively served or recorded before January 1, 1978.

We recognize that there are arguments on both sides regarding the effectiveness of service or recordation of a termination notice before January 1, 1978. The statement in our Notice of Proposed Rulemaking, quoted above, was intended only to express our view that one reasonable interpretation of the Act would permit such service and recordation; we did not mean to imply that it was the only reasonable interpretation. The validity of pre-January 1, 1978 notices is one reasonable conclusion, and it must therefore be considered to be possible for a court to reach that result. Since section 304(c)(4)(A) of the Act requires termination notices to comply with Copyright Office regulations regarding form, content, and manner of service, our failure to issue these regulations and make them effective before January 1, 1978, could effectively prevent the question from ever coming before a court. We do not believe that our failure to issue regulations effective before January 1, 1978, should have the effect of preventing parties from serving and recording formally proper notices before that date and, if called upon, supporting their substantive validity before the courts.

We therefore adhere to the position just expressed. In making the termination notice regulation effective before January 1, 1978 it is our intent to permit compliance with certain sections of the statute by parties who believe they may serve and record termination notices before that date. The regulation does not purport to pass upon the validity or effectiveness of notices served or recorded before January 1, 1978.

2. IDENTIFICATION OF THE WORK IN WHICH RIGHTS ARE BEING TERMINATED

Our proposed regulation had required that a notice of termination identify the "title of each work covered by the grant being terminated, the name of at least one author of each such work, and, if possible and practicable, the renewal registration number for each such work." Several comments suggested that, since the period during which termination may be effected is measured from the date copyright was originally secured, the facts of original rather than renewal registration and the date copyright was originally secured would be preferable. We have accepted this suggestion and modified § 201.10(b)(ii) accordingly. However, a new paragraph (e)(2), discussed below, has been added to make clear that errors made in giving the date copyright was secured or the original registration number "made in good faith and without any intention to deceive, mislead, or conceal relevant information" will not affect the validity of the notice.

One comment suggested that, if the notice does not include the registration number, it must include a brief explanation of the absence of that information. However, the registration number is intended to serve only as a means of possible assistance to persons receiving a notice of termination in identifying the work to which the notice applies. It is not itself a substantive condition of termination and does not directly affect such matters as the adequacy of service or execution of the notice, or the time periods within which service may be made or termination effected. Under these circumstances, we do not believe it appropriate to burden the notice with an additional requirement which may ultimately become a source of confusion, error, or challenge.

One comment also suggested that, rather than requiring the name of "at least one author," as originally proposed, the regulations require the names of all authors of the work. We have not adopted this suggestion. The name of at least one author of the work will generally be sufficient for purposes of identifying the work. Under section 304(c) of the Act, the preparation of notice of termination will be occurring at a time far removed from the original creation and publication of a work and, in many cases, will involve successors of original authors having little, if any, knowledge of the details of original creation or publication. We do not believe it necessary to require the names of all authors in a provision directed only to identification of the work itself. Although it was asserted that the names of all authors are required for purposes other than identification of the work—namely, to "determine whether the proper parties have joined in the notice"—we do not agree. Under section 304(c) a notice terminating a grant made by more than one author may be effected as to any particular author's share in the work. There is no requirement of unanimity, majority interest, or the like, among granting co-authors. Another argument in favor of identifying all co-authors was that this information would be needed to determine whether the grantee might continue using the work on a non-exclusive basis under a grant from a non-terminating co-author. However helpful such information might be to those receiving termination of notices, this has nothing

[1] The Joint Reply Comments were submitted by the Authors League of America, Inc., the National Music Publishers Association, the American Guild of Authors and Composers, Columbia Pictures Industries, Inc., MCA Inc., Metro-Goldwyn-Mayer, Inc., Paramount Pictures Corp., United Artists Corp., Twentieth Century-Fox Film Corp., and Warner Bros., Inc. Other parties commenting in this proceeding were: M. William Krasilovsky, Esq., W. Michael Cleary, Esq., Association of American Publishers, Inc., Walt Disney Productions, Charles R. Brainard, Esq., Society of Authors Representatives, Inc., Commission on Federal Paperwork, and Music Publishers Assn., Inc.

to do with the effectiveness of a termination notice served by those authors (or their successors), who do wish to terminate rights in a work to the extent of their share.

3 IDENTIFICATION OF THE GRANT BEING TERMINATED

Our proposed regulation required that a notice of termination state "the date of execution of the grant being terminated." Several objections were made by representatives of authors and composers to this proposal. It was noted that, since section 304(c) does not measure the period of permissible termination or service from the date of the grant, that date is not necessary to determine whether the notice can be served or whether the date of termination is correct. These representatives also pointed out that it will commonly be the case that the terminating author, or the terminating renewal claimant, widow, widower, children or grandchildren of a deceased author, will not have a copy of the grant or ready access to a copy. These objections are persuasive, and the final regulation does not require the date of grant.

For similar reasons, we have not adopted suggestions that the termination notice state the location of the grant document or include an offer to produce it, or that a copy of the grant be attached to the notice. Also, our original proposal that the notice identify "the names of persons who executed the grant" has been deleted from the identification of grant paragraph. (In particular cases, the names of some or all of the persons executing the grant may become necessary under other paragraphs of the regulation.)

Instead of the proposed and suggested date, name, location, and copy requirements just discussed, paragraph (b)(iii) of the final regulation requires that the notice include "a brief statement reasonably identifying the grant to which the notice of termination applies." This provision, supported in the Joint Reply Comments, also replaces our proposed requirement that the notice state "the nature of the grant and the rights covered by it". As pointed out in the original comments of the Authors League of America, the concepts of defining the "nature" of a grant and the "rights" conveyed can lead to unnecessary technical disputes, even among experts in the field. The requirement of "reasonable identification" in the final regulation is sufficient to meet our purpose and can be accommodated to varying factual and legal situations. Of course, there would be nothing to prevent a terminating party who wished to do so from including the date of execution, names of parties, or a copy of the contract in the notice under this paragraph.

4. ADDITIONAL INFORMATION

In our Notice of Proposed Rulemaking we stated that the proposed regulation "attempts to avoid the imposition of costly or burdensome requirements while, at the same time, giving the grantee and the public a reasonable opportunity to identify the affected grant and work from the information given in the notice." However, representatives of motion picture companies, who will frequently be in the position of receiving termination notices, argued that the notices should perform an additional function, namely, the providing of information necessary to give notice recipients some assurance that the conditions established in the Act for effective termination have been met. The Act does provide that (i) in the case of grants executed by persons other than the author, termination may only be effected by joint action of all surviving grantors; and (ii) in the case of grants executed by authors since deceased, termination must be effected by those of the author's surviving widow or widower, children and grandchildren who constitute more than one-half of that author's termination interest. Accordingly, the representatives of motion picture companies argued that the notice should include a complete listing of the original grantors (if other than the author) or of the surviving authors of the work and the widow or widower, children and grandchildren of deceased authors, together with an indication of those persons serving the notice who constitute more than one-half of the author's termination interest.

After careful consideration we concluded that, within limits, the providing of information related to compliance with these conditions is justified.[2] Moreover, since the Act itself requires the notice to be signed by or on behalf of all persons necessary to effect the termination, the providing of such information can reasonably be required under our authority to determine the "content" of the notice. At the same time, however, we remain convinced that the required contents of the notice must not become unduly burdensome to grantors, authors, or their successors, and must recognize that entirely legitimate reasons may exist for gaps in their knowledge and certainty.

In light of these considerations we have decided to require certain listings of grantors and author's successors in paragraph (b)(1)(v) of the final regulation. However, this "requirement" is subject to several important qualifications:

(a) We have not accepted the suggestion, implicit in language proposed by the motion picture companies, that when termination is sought of a grant executed by more than one author, the notice must include a list of all surviving authors and the widow or widower, children and grandchildren of any deceased author. As noted in paragraph 2 of this preamble, termination of a grant made by more than one author under section 304(c) may be effected by any of the granting authors, or that author's survivors, to the extent of that author's share. Additional information may be useful to recipients of termination notices but, when termination is sought as to one author's share, information as to other, non-terminating, surviving authors or the successors of other deceased authors is not related to compliance with the statutory conditions of termination. Accordingly, paragraph (b)(1)(v) of the final regulation requires a listing only of the statutory successors to that deceased author whose interest in the grant is being terminated.

(b) As an alternative to providing the listings, paragraph (b)(1)(v) will permit the notice to include both a statement of as much information as is currently available to terminating parties, with a brief explanation of why full information may be lacking, and an assertion that, to their best knowledge and belief, the notice has been signed by all required parties. Use of the word "currently," is intended to avoid any implication that this paragraph of the regulation itself requires that terminating parties first conduct an investigation.

(c) Under paragraph (e) of the final regulation, harmless or good-faith errors in providing the lists or giving the alternative explanation and assertion will not affect the validity of the notice.

The original comments of several motion picture companies also urged that we require the notice to include statements that the grant being terminated was not made by will and that the work was not made for hire. Although testamentary grants and works made for hire are excluded from section 304(c), we have not adopted this suggestion. There is no real reason to believe that recipients of termination notices will rely on such statements rather than on their own review of the nature of the work and grant. Moreover, in making such a review the relevant information may well be expected to be at least equally available to grantees as to original grantors, authors, or their successors. Under such circumstances, the requirement suggested in the comments would amount to a ritualistic formality serving no real purpose.

5. SIGNATURE

Following suggestions made in the Joint Reply Comments, paragraph (c) of § 202.10 has been revised to follow the language and intent of the statute as to the signatures required of a notice of termination. The alternative provision of paragraph (b)(1)(v), discussed above in item (4) of this preamble is not intended to affect these statutory requirements. Section 202.10(b)(1)(v) only provides an alternative to other requirements regarding the contents of the notice; whether the notice has been properly executed must be determined by the Act.

The final regulation also requires that the signature of an authorized agent clearly identify the person or person on whose behalf the agent is acting. One comment suggested that notices signed by agents be accompanied by an explanation of why the principal did not sign, and a statement of the agent's "source of authority"; another suggested that agents be required to certify their agency and authority under oath. Since the person on whose behalf an agent is acting must clearly be identified under paragraph (c)(3) of § 202.10 we consider these additional requirements unnecessary. The Act indicates no preference for a terminating party's own signature over that of an agent, nor does it suggest disfavor of an agent's participation in the decision to terminate.

To ensure clarity, paragraph (c)(4) of § 201.10 contains a new provision that the notice include a typewritten or legibly hand printed statement of the full names and addresses of the parties or agents signing the notice.

Paragraph (c)(2) requires that in certain cases where termination is exercised by the successors of a deceased author, the signature of those successors, or of their authorized agents, be accompanied by a "brief statement of their relationship or relationships to that author." This provision earlier appeared as § 201.10(b)(1)(v) of our proposed regulation. It is not intended to require any more than, for example, categorization as "widow", "widower", "child", or "grandchild" of the deceased author.

6. SERVICE; "SUCCESSORS IN TITLE"

A substantial number of comments revolved around the following portion of section 304(c)(3) of the Act: "The termination shall be effected by serving an advance notice in writing upon the grantee or the grantee's successor in title." The comments raised essentially two issues: (a) Who is a "successor in title" to a grantee; and (b) where there is a "successor in title", who must be served?

(a) "WHO IS A SUCCESSOR IN TITLE"?

The comment letters appear to offer two interpretations of the phrase "successor in title". Under one interpretation a "successor in title" to a grantee is only one who has acquired from that grantee all of the rights originally acquired by that grantee, for the identical duration as originally acquired and without qualification. Under another interpretation, one who acquires from a grantee any one or portion of the rights originally acquired by that grantee is a "successor in title" as to that right or portion.

The phrase "successor in title" is not defined in the new Copyright Act. However relevant it may be to judicial inquiry or legal advice, it is not appropriate for us to conclude in this proceeding that the phrase "successor in title" necessarily has or does not have a meaning related to the definitions of "copyright owner" or "transfer of copyright ownership" in section 101 of the Act, or to consider the meaning and significance of "successor in title" as used in other areas of law which may be analogous or relevant. This Office's actions in deciding whether or not to record a copy of a notice of termination, for example, will generally not involve an investigation as to whether the persons identified in the notice have been properly categorized. Accordingly, we have modified the proposed regulation only to substitute the statutory term "successor in title" where we had originally proposed the word "successor"; we have not adopted an interpretation of this phrase.

(b) WHERE THERE IS A "SUCCESSOR IN TITLE", WHO MUST BE SERVED?

Assuming there is a "successor in title" to a grantee, the comments indicated considerable uncertainty as to whether either one of or both of the "grantee" and "successor in title" must be served. Representatives of authors and composers, for example, pointed to the Act's use of the word "or" and expressed concern lest they be required to serve successors in title of whom they lacked knowledge in order to recapture the rights held by the successor. We agree that, whether or not the original grantee is still exploiting rights in a work, there are cases where author and composers are not aware of others holding rights in the work under a successorship to the original grantee. For example: the successor may not be actively exploiting the work; or no royalties may be owing to the author; or royalty statements may not separately identify sources of revenue; or the author's consent may not have been required for the successor's acquisition of rights; or a relevant document may not be recorded in the Copyright Office.

Representatives of producers and publishers, however, argued that use of the word "or" in the Act did not offer a complete option to parties serving termination notices and expressed concern over the possibility that their rights could be terminated by service of their predecessors in title and without their knowledge. We also agree that this does pose risks of liability and may generate an unfortunate lack of business certainty.

Section 201.10(d) of the final regulation attempts to deal with this problem. With considerable support in the comments from several parties who desired some guidance in this matter, paragraph (2) of this section provides that the service requirements of the Act are satisfied if a reasonable investigation is first made by the terminating parties and if: (i) The notice is served upon the grantee where the investigation does not give reason to believe there is a successor in title; or (ii) the notice is served upon the successor in title where the investigation does give reason to believe there is a particular successor in title. Paragraph (3) then defines certain elements to be included in a "reasonable investigation".

In order to avoid possible conflict with the literal language of the Act, paragraph (4) of § 201.10(d) contains an important qualification. This paragraph makes it clear that the regulations in paragraphs (2) and (3) of the section do not themselves impose an obligation on terminating parties to conduct a reasonable investigation, or to serve persons disclosed by such an investigation. If an investigation is not conducted, or if it does disclose (or would have disclosed) a successor in title who is not served, our regulations do not purport to question the validity of service. In cases where § 202.10(d)(2) or (3) have not been followed, any questions as to the validity of service are left solely to interpretation and application of 17 U.S.C. 304(c)(4) in other forums.

Two comments suggested that we require service by mail to be registered or certified. We have not accepted this suggestion. A requirement that service be effected by registered or certified mail might lead to totally inadvertant mistakes, and substantively insignificant grounds of avoiding or challenging termination. Moreover the provisions of the final regulation dealing with recordation provide a basis for making of a record of service. Although we recognize that this is not a complete answer, since recordation might occur considerably later than service, we are not persuaded that registered or certified mail should be made a requirement.

7. ERRORS

Paragraph (e)(1) of the final regulation is new. It adopts a suggestion made in the initial comments of the Authors League of America, Inc., and later endorsed in the Joint Reply Comments, that "harmless errors" in a notice of termination shall not render the notice invalid. Additionally, the final regulation requires specific items of information that, in some cases, were not in our proposal. We do not intend that the validity of notices of termination should be subject to disputes over whether errors concerning these specific items are "harmless." Accordingly, we have added a new paragraph (e)(2) to make clear that errors made in connection with this information will not affect the validity of the notice if they were made in good faith and without intent to deceive, mislead, or conceal information.

8. RECORDATION

Several comments suggested that the final regulations should provide some demonstration of the facts of service. As suggested in the Joint Reply Comments, we have added a new paragraph (ii) to § 201.10(f)(1) requiring that the copy of the notice submitted for recordation be accompanied "by a statement setting forth the date on which the notice was served and the manner of service, unless such information is contained in the notice."

This information need not appear in the notice itself, and inclusion is not a condition of a valid notice. However, the Copyright Office will not record a copy of a notice of termination unless a proper statement as required in this paragraph is submitted to accompany it. Changes have also been made in the provisions of the final regulation dealing with the fee and date of recordation, to reflect this requirement.

The Joint Reply Comments urged the Copyright Office to give "notice of recordation • • • to all parties named in the notice." Even if not considered a condition of effective termination or recordation, such a provision would impose upon

[2] The Joint Reply Comments would have us require such lists, but then provide that a failure to include them has no effect. This would render the provision nugatory and the "requirement" meaningless, and we have therefore not accepted this suggestion.

V 42 177 SEP 13 77 S UMI

the Copyright Office in an affirmative responsibility which was not contemplated by the Act and which we are not prepared or equipped to undertake. Of course, our records of recorded copies of termination notices will be fully open to public inspection. Moreover, the search services of the Office will be available to interested parties and our search personnel will extend full cooperation and assistance in responding to requests for periodic or other specially-structured search reports.

We have amended paragraph (f)(1)(i) of § 201.10 to make it clear that the copy submitted for recordation must "include the actual signature or signatures, or a reproduction of the actual signature or signatures, appearing" on the notice as served. This requirement was also contemplated by our original proposal, which provided that the copy be a "complete and exact duplicate of the notice as served." However, some question was raised on the point in one comment, and we have therefore decided to mention the signature requirement expressly. Although the comment suggested that the copy need not bear the signatures, the significance of signature under the Act has led us to conclude otherwise.

Paragraph (4) of § 201.10(f) is new, and reflects a point made in several comments. That the act of the Copyright Office in recording a copy of a notice of termination does not accord that notice any presumption of validity. Although this point is rather clear from the statute itself, sufficient concern was expressed to justify stating it expressly in the regulation.

One comment suggested that we add a new section to permit the filing of "notices of dispute of termination", containing specific information, by grantees or successors in title who challenge a notice of termination. As the statute does not specifically provide for such notices, or attach any consequences to their recordation, we have not adopted this suggestion.

Part 201 of 37 CFR Chapter II is amended by adding a new § 201.10 to read as follows:

§ 201.10 Notices of termination of transfers and licenses covering extended renewal term.

(a) *Form.* The Copyright Office does not provide printed forms for the use of persons serving notices of termination.

(b) *Contents.* (1) A notice of termination must include a clear identification of each of the following:

(i) The name of each grantee whose rights are being terminated, or the grantee's successor in title, and each address at which service of the notice is being made;

(ii) The title and the name of at least one author of, and the date copyright was originally secured in, each work to which the notice of termination applies; and, if possible and practicable, the original copyright registration number;

(iii) A brief statement reasonably identifying the grant to which the notice of termination applies;

(iv) The effective date of termination; and

(v) In the case of a termination of a grant executed by a person or persons other than the author, a listing of the surviving person or persons who executed the grant. In the case of a termination of a grant executed by one or more of the authors of the work where the termination is exercised by the successors of a deceased author, a listing of the names and relationships to that deceased author of all of the following, together with specific indication of the person or persons executing the notice who constitute more than one-half of that author's termination interest: That author's surviving widow or widower; and all of that author's surviving children; and, where any of that author's children are dead, all of the surviving children of any such deceased child of that author; however, instead of the information required by this subdivision (v), the notice may contain both of the following: (A) A statement of as much of such information as is currently available to the person or persons signing the notice, with a brief explanation of the reasons why full information is or may be lacking; together with (B) a statement that, to the best knowledge and belief of the person or persons signing the notice, the notice has been signed by all persons whose signature is necessary to terminate the grant under section 304(c) of title 17, U.S.C., or by their duly authorized agents.

(2) Clear identification of the information specified by paragraph (b)(1) of this section requires a complete and unambiguous statement of facts in the notice itself, without incorporation by reference of information in other documents or records.

(c) *Signature.* (1) In the case of a termination of a grant executed by a person or persons other than the author, the notice shall be signed by all of the surviving person or persons who executed the grant, or by their duly authorized agents.

(2) In the case of a termination of a grant executed by one or more of the authors of the work, the notice as to any one author's share shall be signed by that author or by his or her duly authorized agent. If that author is dead, the notice shall be signed by the number and proportion of the owners of that author's termination interest required under clauses (1) and (2) of section 304(c) of title 17, U.S.C., or by their duly authorized agents, and shall contain a brief statement of their relationship or relationships to that author.

(3) Where a signature is by a duly authorized agent, it shall clearly identify the person or persons on whose behalf the agent is acting.

(4) The handwritten signature of each person effecting the termination shall either be accompanied by a statement of the full name and address of that person, typewritten or printed legibly by hand, or shall clearly correspond to such a statement elsewhere in the notice.

(d) *Service.* (1) The notice of termination shall be served upon each grantee whose rights are being terminated, or the grantee's successor in title, by personal service, or by first-class mail sent to an address which, after a reasonable investigation, is found to be the last known address of the grantee or successor in title.

(2) The service provision of section 304(c)(4) of title 17, U.S.C., will be satisfied if, before the notice of termination is served, a reasonable investigation is made by the person or persons executing the notice as to the current ownership of the rights being terminated, and based on such investigation: (i) If there is no reason to believe that such rights have been transferred by the grantee to a successor in title, the notice is served on the grantee; or (ii) if there is reason to believe that such rights have been transferred by the grantee to a particular successor in title, the notice is served on such successor in title.

(3) For purposes of subparagraph (2) of this paragraph (d), a "reasonable investigation" includes, but is not limited to, a search of the records in the Copyright Office; in the case of a musical composition with respect to which performing rights are licensed by a performing rights society, as defined by section 116(e)(3) of title 17, U.S.C., a "reasonable investigation" also includes a report from that performing rights society identifying the person or persons claiming current ownership of the rights being terminated.

(4) Compliance with the provisions of clauses (2) and (3) of this paragraph (d) will satisfy the service requirements of section 304(c)(4) of title 17, U.S.C. However, as long as the statutory requirements have been met, the failure to comply with the regulatory provisions of subparagraph (2) or (3) of this paragraph (d) will not affect the validity of the service.

(e) *Harmless errors.* (1) Harmless errors in a notice that do not materially affect the adequacy of the information required to serve the purposes of section 304(c) of title 17, U.S.C., shall not render the notice invalid.

(2) Without prejudice to the general rule provided by subparagraph (1) of this paragraph (e), errors made in giving the date or registration number referred to in paragraph (b)(1)(ii) of this section, or in complying with the provisions of paragraph (b)(1)(v) of this section, or in describing the precise relationships under clause (2) of paragraph (c) of this section, shall not affect the validity of the notice if the errors were made in good faith and without any intention to deceive, mislead, or conceal relevant information.

(f) *Recordation.* (1) A copy of the notice of termination will be recorded in the Copyright Office upon payment of the fee prescribed by subparagraph (2) of this paragraph (f) and upon compliance with the following provisions:

(i) The copy submitted for recordation shall be a complete and exact duplicate of the notice of termination as served and shall include the actual signature or signatures, or a reproduction of the actual signature or signatures, appearing on the notice; where separate copies of the same notice were served on more than one grantee or successor in title, only one copy need be submitted for recordation; and

(ii) The copy submitted for recordation shall be accompanied by a statement setting forth the date on which the notice was served and the manner of service, unless such information is contained in the notice.

(2) For a document consisting of six pages or less, covering no more than one title, the basic recordation fee is $5 if recorded before January 1, 1978, and $10 if recorded after December 31, 1977; in either case an additional charge of 50 cents is made for each page over six and each title over one. The statement referred to in paragraph (f)(1)(ii) of this section will be considered a part of the document for this purpose.

(3) The date of recordation is the date when all of the elements required for recordation, including the prescribed fee and, if required, the statement referred to in paragraph (f)(1)(ii) of this section, have been received in the Copyright Office. After recordation the document, including any accompanying statement, is returned to the sender with a certificate of record.

(4) Recordation of a notice of termination by the Copyright Office is without prejudice to any party claiming that the legal and formal requirements for issuing a valid notice have not been met.

(17 U.S.C. 207, and under the following sections of Title 17 of the United States Code as amended by Pub. L. 94-553: Sections 304(c); 702; 708(11).)

Dated: September 7, 1977.

Title 40—Protection of Environment

CHAPTER I—ENVIRONMENTAL PROTECTION AGENCY

[FRL 782-2]

PART 600—FUEL ECONOMY OF MOTOR VEHICLES

Fuel Economy Calculation and Test Procedure for 1978 and Later Model Year Automobiles

AGENCY: Environmental Protection Agency.

ACTION: Interim-Final Rulemaking.

SUMMARY: This Interim-Final Rulemaking establishes procedures for calculating a manufacturer's average fuel economy for nonpassenger automobiles effective in 1979 and later model years by extending previously published regulations on 1978 and later model year passenger automobiles to apply to nonpassenger automobiles. The term "nonpassenger automobiles" generally means light trucks and vans, and is defined by the Secretary of Transportation in a separate rulemaking. The value calculated in accordance with these procedures will be used by the Secretary of Transportation in enforcing the fuel economy standards established by the Secretary under authority granted in Title V, of the Motor Vehicle Information and Cost Savings Act, as amended.

DATE: October 13, 1977. Comments with respect to model year 1980 and later must be received no later than November 25, 1977.

FOR FURTHER INFORMATION CONTACT:

Paula Machlin, Regulatory Management Staff, Office of Mobile Source Air Pollution Control, U.S. Environmental Protection Agency, Washington, D.C. 20460 (202-755-0596).

SUPPLEMENTARY INFORMATION: Title V of the Motor Vehicle Information and Cost Savings Act, as amended ("the Act", 15 U.S.C. 2001 et seq., mandates the establishment of a comprehensive program to promote the manufacture and purchase of increasingly fuel efficient automobiles. The responsibility for carrying out this program is divided among several Federal agencies.

Specifically, section 503 of the Act requires the Environmental Protection Agency to develop testing and calculation procedures by which the fuel economy averages of a manufacturer's passenger automobile (PA) and nonpassenger automobile (NPA) fleets will be determined each model year, beginning in model years 1978 and 1979, respectively. In addition, EPA is required to perform, or to cause to be performed, the fuel economy testing and calculation that is necessary for determining a manufacturer's fuel economy average and for fuel economy labeling pursuant to section 506.

The manufacturer's average fuel economy values (AFE) calculated by EPA will be used by the Secretary of Transportation for comparison with the applicable fuel economy standards, and in assessing penalties or credits, as appropriate, under sections 507 and 508 of the Act. Section 502 establishes average fuel economy standards for model years 1978-80 and 1985 PA's. That same section requires the Secretary to establish fuel economy standards for model years 1981-1984 PA's, and for model year 1979 and later NPA's, based on technical, economic, and energy-related considerations. Under section 501, the Secretary is also responsible for defining which vehicles are to be considered automobiles for the purposes of the Act and, of those vehicles, which are PA's and which are NPA's.

PUBLICATION WITHOUT FORMAL PUBLIC COMMENT PERIOD

Publication of this rule establishes interim-final procedures for the testing and calculation of a manufacturer's average fuel economy for model year 1979 and later nonpassenger automobiles. Comments are requested on this action and will be considered with respect to model year 1980 and later. A Notice of Proposed Rulemaking (NPRM) has not been previously issued.

Section 553 of Title 5 of the United States Code (pertaining to administrative procedure) provides for the promulgation of regulations without prior issuance of an NPRM, "When the agency for good cause finds (and incorporates the finding and a brief statement of reasons therefore in the rules issued) that notice and public procedure are impracticable, unnecessary, or contrary to the public interest."

Section 503 of the Act requires that fuel economy testing and calculation regulations be published not less than 12 months prior to the model year to which such procedures apply. Thus the regulations for model year 1979 NPA's must be published no later than August, 1977, to the extent that such procedures apply to model year 1979. (EPA has previously found that, for the purpose of meeting the deadlines in section 503, a model year begins no earlier than August of the preceding calendar year (September 10, 1976, 41 FR 38674).) Thus, EPA finds that issuance of an NPRM and provision of a public comment period for this rulemaking prior to interim promulgation of these regulations would at this time be contrary to the public interest.

From the time that the Act was enacted on December 22, 1975, EPA has devoted considerable time and effort to developing regulations that prescribe fuel economy testing and calculation procedures for determining a manufacturer's average fuel economy for model year 1978 and later PA's, and to providing technical assistance to DOT in support of DOT's enforcement responsibilities under the Act. During this same period, regulations have been prepared to implement sections 506 (fuel economy labeling) and 511 (fuel economy retrofit devices) of the Act. The level of effort required to carry out these responsibilities, together with the deadline in the Act, have made it impossible to issue rules for 1979 nonpassenger automobiles with prior issuance of an NPRM.

In addition, it was apparent to EPA that it would be appropriate to pattern the NPA fleet average calculation scheme after that for PA's and that, therefore, development of NPA procedures would be greatly facilitated if EPA was able to capitalize on experience gained with PA's. As noted throughout this rule, many of the provisions of the passenger automobile AFE calculation regulations are extended by this rule to apply to nonpassenger automobiles.

In developing the testing and calculation scheme for PA's, EPA consulted with and provided drafts to interested parties including manufacturers and other interested agencies. The direction ultimately taken by EPA in formulating the PA testing and calculation scheme was significantly affected by these consultations, and the resulting rule has been favorably received by all parties. (Background information pertaining to public

V 42 177
SEP 13 77
UMI

participation in developing the PA rules is available on the Public Docket.) Because the majority of the provisions for the testing and calculation of a manufacturer's nonpassenger automobile AFE contained in this rule are substantially the same as those established for PA's, EPA expects that these rules will be favorably received by all interested parties as well. Nevertheless, EPA has provided interested parties the opportunity to comment informally on drafts of this rule. The responses received were generally favorable.

Background: Fuel Economy Regulations Currently in Effect

To a large extent, the provisions of this regulation are based on previously published EPA regulations (September 10, 1976, 41 FR 38674). Those regulations establish fuel economy testing and calculation procedures to be used in generating fuel economy label values for all automobiles (i.e., PA's and NPA's) under section 506 of the Act, as well as a procedure for calculating the passenger automobile AFE value to be used by the DOT in enforcing the applicable PA fuel economy standards. (Additional provisions that pertain specifically to fuel economy labeling under section 506 are contained in the November 10, 1976 Federal Register (41 FR 49752).) A detailed discussion of the issues involved and the alternatives evaluated in developing the vehicle selection, testing, and calculation procedures established previously is contained in the preamble to the regulations.

In consultation with DOT, the EPA has determined that a majority of the provisions of the existing regulations can be extended to apply to the calculation of nonpassenger automobile average fuel economy, since the legal, technical, and administrative considerations are generally the same with respect to both classes of automobiles. In both cases, the statute requires that fuel economy testing be conducted in conjunction with emissions testing to the extent practicable and provides for a civil penalty of $5 per automobile for .1 mpg that the manufacturer's average fuel economy is below the standard. Thus the test vehicle selection scheme for both PA's and NPA's must permit average fuel economy calculations to be made with the same degree of accuracy, constrained by the same economic considerations such as the costs of testing (to both government and industry). Therefore, the provisions of the existing regulations on passenger automobile AFE calculation are extended by this rule to nonpassenger automobiles except where modifications were necessary to account for inherent differences between PA's and NPA's or to maintain consistency with actions taken by DOT pursuant to its responsibilities under the Act.

It should also be noted that this regulation provides for use of the same procedures for test vehicle selection, for the measurement of a test vehicle's fuel consumption, and for sales-weighting test results to yield a single value for a model type established for fuel economy labeling purposes (published in final on September 12, 1977). Although there is no explicit statutory requirement that EPA adopt the same procedures in calculating a manufacturer's nonpassenger automobile AFE as are used in labeling, it is clearly most reasonable to do so, since it minimizes cost to both industry and government without affecting the program adversely.

This regulation will require an increase in the number of fuel economy tests that must be performed by the industry over that required for labeling purposes early in the model year. For model year 1979, the increase will not be significant. EPA will reevaluate the impacts of the nonpassenger automobile vehicle selection and testing regulations in future model years in light of developments that affect the appropriateness of the rule.

In addition, there may be an increase in the number of fuel economy tests required to account for running changes during the model year. A running change is a design modification made by a manufacturer during the model year, usually to correct an unexpected problem occurring in the field, to optimize fuel economy or performance, or to save costs. The provisions that currently apply to running change testing of PA's for fuel economy purposes are extended by this regulation to NPA's, as noted previously. As discussed in the preamble to the passenger car regulations, exemptions from running change testing will be granted if the manufacturer's preliminary average fuel economy calculation exceeds the applicable fuel economy standard by a safety margin of an as yet unspecified amount. That amount will be of sufficient magnitude to ensure that the manufacturer remains in compliance during the model year irrespective of the effect of running changes.

Modifications to the PA Testing and Calculation Regulations That Are Established for NPA's in This Regulation

It was necessary to modify several aspects of the passenger automobile AFE calculation procedure in establishing a procedure for NPA's to account for inherent differences between PA's and NPA's as well as to maintain consistency with actions taken by DOT pursuant to its authority under the Act. Those modifications are discussed below:

1. *Test Vehicle Selection.* This regulation contains a provision granting the EPA Administrator authority to select additional test vehicles in those NPA base levels [1] for which he determines that the level of testing under the general vehicle selection rules (§ 600.207 and § 600.605) is not sufficiently representative of that base level. (In many cases, only one vehicle configuration is tested within a base level.) This could occur if the vehicle configurations comprising that NPA base level exhibit a wide range in magnitude for a specific parameter. It is expected that this authority will be evoked mainly to select additional vehicles based on the existence of a wide range of axle ratios among vehicle configurations in a NPA base level. EPA has determined that a range of axle ratio on the order of 0.75 (found in some PA base levels) can result in relatively high variability within a base level. In fact, EPA explored the possibility of including axle ratio as a determinant in the definition of base level during the development of the PA regulation, and found that it would yield very little benefit while incurring considerable cost to both the Agency and the industry.

It is expected that axle ratio ranges will be greater than 0.75 in about 25 percent of the NPA base levels. Consequently, it is desirable to permit the Administrator to isolate those cases where additional testing is needed to insure that the test fleet adequately represents the over-all fleet. EPA anticipates establishing guidelines to define where additional testing might be required (such as axle ratio bands).

2. *Two Categories of NPA's with Distinct Standards.* On March 14, 1977, DOT published a regulation under section 502 that established two categories of NPA's and a fuel economy standard applicable to each effective in model year 1979 (42 FR 13807). The two categories are entitled "jeep-type vehicles" and "all other NPA's", and the fuel economy standards are 15.8 mpg and 17.2 mpg, respectively. Moreover, in that rule the DOT provided that a manufacturer may determine compliance by either (1) comparing the AFE for his entire NPA fleet to the standard for the "all other NPA" category, or (2) comparing the AFE for each category of his NPA fleet to standards for their respective categories.

Accordingly, this regulation establishes a procedure for the separate calculation of AFE values for a manufacturer's jeep-type vehicles and for all other NPA's, and a procedure for calculating a single value for a manufacturer's entire NPA fleet. In the case where a manufacturer chooses to demonstrate compliance with the fuel economy standards on a separate basis for each NPA category, the value for each category will be calculated on a production-weighted model type basis. An AFE value will be calculated for the import portion of the vehicles in each category, and that value will be included in the respective calculations as if it were a model type value.

In the case where a manufacturer opts to demonstrate compliance with the "all other NPA" fuel economy standard on the basis of his entire NPA fleet, average fuel economy will also be calculated on a production-weighted model type basis. An AFE value will be calculated for the import portion of his entire NPA fleet, and that value will be included in the final calculation as if it were a model type AFE value.

In some cases, vehicles that are grouped in the same car line for labeling purposes will be grouped into different NPA categories. For example, the Ram Charger (a car line) is produced both with and without four-wheel drive. The four-wheel drive version of the Ram Charger is a jeep-type vehicle under the current DOT definition, but the two-wheel drive Ram Charger is not. For the purpose of calculating average fuel economy in the case of vehicles that fall into the same car line but different NPA categories, separate model type fuel economy values will be calculated for the vehicles in each category.

3. *Inclusion of Imports in the Calculation of NPA AFE.* The regulations on passenger automobile AFE calculation limit the volume of imports that may be included in the calculation for model years prior to 1980 and require that the fuel economy of the remaining portion of a manufacturer's import fleet be calculated on a separate basis. In 1980 and later model years, the entire imported PA fleet will be treated as if produced by a separate manufacturer. The Act specifically mandates this approach for passenger automobiles but does not provide similar guidance with respect to imported NPA's.

This regulation provides for the calculation of an AFE value for the import component of a manufacturer's NPA fleet. That import fuel economy value is then treated as a model type fuel economy value in the calculation of a manufacturer's average fuel economy. The approach is identical to that used for PA's in model year 1978 and 1979, except that the production-weighting factor of the import fuel economy value is not limited. The approach reflects the methodology used by DOT in establishing the NPA fuel economy standards as discussed in detail in the March 14, 1977, Federal Register (42 FR 13807). DOT is currently reviewing alternative approaches to the inclusion of imported NPA's in the AFE calculation for use in 1980 and later model years. EPA will modify the NPA calculation procedures with respect to inclusion of imports as necessary to reflect changes in DOT methodology.

Other Issues

The DOT published a regulation (July 28, 1977, 42 FR 38362) under section 501(d)(1) of the Act establishing which vehicles are to be considered automobiles for the purposes of the Act, and, of those vehicles, which are PA's and which are NPA's. The NPA class includes all vehicles currently certified by EPA as light-duty trucks for emissions purposes (Gross Vehicle Weight Rating of no greater than 6,000 lbs.), plus vehicles such as the Chevrolet El Camino and the Ford Ranchero. EPA tests the latter vehicles under the light-duty vehicle emissions testing procedures. The Chevrolet El Camino and Ford Ranchero are classified as light-duty vehicles by EPA for emissions purposes since those vehicles are derivatives of passenger cars and, as such, passenger car emission control technology may be applied. Under EPCA, vehicles must be classified based on design intent. The DOT has classified those vehicles as nonpassenger automobiles based on their similarity to pickup trucks in view of the open bed configurations.

As a result, the calculation of a manufacturer's AFE for NPA's will be based on data generated under different test procedures. The Agency has determined that this will not affect the validity of the calculation, since the fuel economy of the test vehicles are appropriately measured under the respective procedures and the classifications are appropriate with respect to statutory requirements.

It should also be noted that DOT published a regulation (July 28, 1977, 42 FR 38369) that assigns the responsibility for compliance with AFE standards to the incomplete vehicle manufacturer in the case of vehicles that are completed by a subsequent manufacturer. Incomplete vehicles will be treated as a model type in calculating AFE.

Request for Comments

Manufacturers and other interested parties may participate in this rulemaking for 1980 and later model years by submitting comments (in quadruplicate) to the Deputy Assistant Administrator, Environmental Protection Agency, Attention: Office of Mobile Source Air Pollution Control AW-455, 401 M Street SW., Washington, D.C. 20460, no later than November 25, 1977. The regulations established here are effective for model year 1979.

It is EPA's intention to assure all interested parties an opportunity to study all information which may become the basis for EPA's final action in this proceeding. Accordingly, the Agency will not consider in this rulemaking any material which cannot be made available to the public. Parties who wish to submit comments on this Interim-Final Rulemaking are cautioned that EPA will summarily return any comments which are claimed, in whole or in part, to be confidential.

Availability of Material

A copy of all public comments will be available for inspection and copying at the U.S. Environmental Protection Agency, Public Information Reference Unit, Room 2922 (EPA Library), 401 M Street SW., Washington, D.C. 20460. As provided in 40 CFR Part 2, a reasonable fee may be charged for copying services.

Economic Impact

Note: The Environmental Protection Agency has determined that this document does not contain a major action requiring preparation of an Economic Impact Analysis under Executive Orders 11821 and 11949 and OMB Circular A-107.

Dated: August 31, 1977.

Douglas M. Costle,
Administrator.

Part 600 of Chapter I, Title 40 of the Code of Federal Regulations is amended as follows:

1. Section 600.002-79 is revised to read as follows:

§ 600.002-79 Definitions.

(a) The following definitions apply beginning with the 1979 model year. The definitions in § 600.002-78 remain effective except that definition number (14) is hereby superseded, definition numbers (41) and (42) are added. All terms used in this subpart that are not defined herein shall have the meaning given them in the Act.

(1) "Act" means Part I of Title V of the Motor Vehicle Information and Cost Savings Act (15 U.S.C. 1901 et seq.).

(2) "Administrator" means the Administrator of the Environmental Protection Agency or his authorized representative.

(3) "Secretary" means the Secretary of Transportation or his authorized representative.

(4) "Automobile" means any 4-wheeled vehicle propelled by fuel which is manufactured primarily for use on public streets, roads, or highways (except any vehicle operated on a rail or rails) and which is rated at 6,000 lbs gross vehicle weight or less or is a type of vehicle which the Secretary determines is substantially used for the same purposes.

(5) "Passenger Automobile" means any automobile which the Secretary determines is manufactured primarily for use in the transportation of no more than 10 individuals.

(6) "Model Year" means the manufacturer's annual production period (as determined by the Administrator) which includes January 1 of such calendar year. If a manufacturer has no annual production period, the term "model year" means the calendar year.

(7) "Federal Emission Test Procedure" refers to the dynamometer driving schedule, dynamometer procedure, and sampling and analytical procedures described in Part 86 for the respective model year, which are used to derive city fuel economy data.

(8) "Federal Highway Fuel Economy Test Procedure" refers to the dynamometer driving schedule, dynamometer procedure, and sampling and analytical procedures described in Subpart B of this part and which are used to derive highway fuel economy data.

(9) "Fuel" means gasoline and diesel fuel.

(10) "Fuel Economy" means the average number of miles traveled by an automobile or group of automobiles per gallon

[1] To facilitate test vehicle selection and the calculation of a manufacturer's average fuel economy, EPA has grouped vehicles into several categories and subcategories based on engineering parameters that are expected to significantly affect fuel economy. The categories are defined in the regulations in § 600.002 as follows:

(19) "Model Type" means a unique combination of car line, basic engine, and transmission class.

(23) "Base Level" means a unique combination of basic engine, inertia weight, and transmission class.

(24) "Vehicle Configuration" means a unique combination of basic engine, engine code, inertia weight, transmission configuration, and axle ratio within a base level.

A more detailed discussion of the rationale for those definitions is contained in the preamble to the September 10, 1976, Federal Register notice (41 FR 38674).

V 42-177 SEP 13 77 UMI

of gasoline or diesel fuel consumed as computed in § 600.113 or § 600.207.

(11) "City Fuel Economy" means the fuel economy determined by operating a vehicle (or vehicles) over the driving schedule in the Federal Emission Test Procedure.

(12) "Highway Fuel Economy" means the fuel economy determined by operating a vehicle (or vehicles) over the driving schedule in the Federal Highway Fuel Economy Test Procedure.

(13) "Combined Fuel Economy" means the fuel economy value determined for a vehicle (or vehicles) by harmonically averaging the city and highway fuel economy values, weighted 0.55 and 0.45 respectively.

(14) "Average Fuel Economy" means the unique fuel economy value as compiled under § 600.510 for a specific class of automobiles produced by a manufacturer that are subject to average fuel economy standards.

(15) "Certification Vehicle" means a vehicle which is selected under § 86.077-24(b)(1) and used to determine compliance under § 86.077-30 for issuance of an original certificate of conformity.

(16) "Fuel Economy Data Vehicle" means a vehicle used for the purpose of determining fuel economy which is not a certification vehicle.

(17) "Label" means a sticker that contains fuel economy information and is affixed to new automobiles in accordance with Subpart D of this part.

(18) "Dealer" means a person who resides or is located in the United States, any territory of the United States or the District of Columbia and who is engaged in the sale or distribution of new automobiles to the ultimate purchaser.

(19) "Model Type" means a unique combination of car line, basic engine, and transmission class.

(20) "Car Line" means a name denoting a group of vehicles within a make or car division which has a degree of commonality in construction (e.g., body, chassis.) Car line does not consider any level of decor or opulence and is not generally distinguished by characteristics as roof line, number of doors, seats or windows except for station wagons or light-duty trucks. Station wagons and light-duty trucks are considered to be different car lines than passenger cars.

(21) "Basic Engine" means a unique combination of manufacturer, engine displacement, number of cylinders, fuel system (as distinguished by number of carburetor barrels or use of fuel injection), catalyst usage, and other engine and emission control system characteristics specified by the Administrator.

(22) "Transmission Class" means a group of transmissions having the following common features: Basic transmission type (manual, automatic, or semi-automatic), number of forward speeds (e.g., manual 4-speed, 3-speed automatic, 2-speed semi-automatic), and other characteristics determined to be significant by the Administrator (e.g., "creeper" first gear, over-drive final gear ratio, or overdrive unit) considering factors such as the manufacturer's recommendation for use and/or the numerical gear ratios.

(23) "Base Level" means a unique combination of basic engine, inertia weight, and transmission class.

(24) "Vehicle Configuration" means a unique combination of basic engine, engine code, inertia weight, transmission configuration, and axle ratio within a base level.

(25) "Engine Code" means a unique combination, within an engine-system combination (as defined in Part 86 of this Chapter), of displacement, carburetor (or fuel injection) calibration, distributor calibration, choke calibration, auxiliary emission control devices and other engine and emission control system components specified by the Administrator.

(26) "Inertia Weight" means the inertia weight class into which a vehicle is grouped based on its loaded vehicle weight in accordance with the provisions of Part 86 of this chapter.

(27) "Transmission Configuration" means a unique combination, within a transmission class, of the number of forward gears, and, if applicable, overdrive. The Administrator may further subdivide a transmission configuration (based on such criteria as gear ratios, torque converter multiplication ratio, stall speed, shift calibration, etc.) if he determines that significant fuel economy differences exist within that transmission configuration.

(28) "Axle Ratio" means the number of times the input shaft to the differential (or equivalent) turns for each turn of the drive wheels.

(29) "Auxiliary Emission Control Devices (AECD)" means an element of design as defined in Part 86.

(30) "Rounded" means a number shortened to the specific number of decimal places in accordance with the "Round Off Method" specified in ASTM E 29-67.

(31) "Calibration" means the set of specifications, including tolerances, unique to a particular design, version or application of a component or component assembly capable of functionally describing its operation over its working range.

(32) "Production Volume" means, for a domestic manufacturer, the number of vehicle units domestically produced in a particular model year but not exported, and for a foreign manufacturer, means the number of vehicle units of a particular model imported into the United States.

(33) "Body Style" means a level of commonality in vehicle configurations as defined by number of doors and roof treatment (e.g., sedan, convertible, fastback, hatchback) and number of seats (i.e. front seat, second, or third seat) requiring seat belts pursuant to National Highway Traffic Safety Administration safety regulations. Station wagons and light trucks are identified as car lines.

(34) "Hatchback" means a passenger automobile where the conventional luggage compartment, i.e., trunk, is replaced by a cargo area which is open to the passenger compartment and accessed vertically by a rear door which encompasses the rear window.

(35) "Pickup Truck" means a nonpassenger automobile which has a passenger compartment and an open cargo bed.

(36) "Station Wagon" means a passenger automobile with an extended roof line to increase cargo or passenger capacity, cargo compartment open to the passenger compartment, a tailgate and one or more rear seats readily removed or folded to facilitate cargo carrying.

(37) "Gross Vehicle Weight Rating" means the manufacturer's gross weight rating for the individual vehicle.

(38) "Ultimate Consumer" means the first person who purchases an automobile for purposes other than resale, or leases an automobile.

(39) "Van" means any nonpassenger automobile having an integral enclosure, fully enclosing the driver compartment and load-carrying device, and having no body sections protruding more than 30 inches ahead of the leading edge of the windshield.

(40) "Base Vehicle" means the lowest priced version of each body style that makes up a car line.

(41) "Nonpassenger automobile" means an automobile that is not a passenger automobile, as defined by the Secretary of Transportation at 42 CFR 523.5.

(42) "Jeep-type Vehicle" means a 4-wheel drive, general purpose automobile capable of off-highway operation that has a wheelbase not more than 110 inches and that has a jeep-type configuration, as defined by the Secretary of Transportation at 42 CFR 533.4.

2. Section 600.002-80 is amended by revising definition (14) and by adding new definitions (40) and (41), reading as follows:

§ 600.002-80 Definitions.

* * * * *

(14) "Average Fuel Economy" means the unique fuel economy value as compiled under § 600.510 for a specific class of automobiles produced by a manufacturer that are subject to average fuel economy standards.

* * * * *

(41) "Nonpassenger automobile" means an automobile that is not a passenger automobile, as defined by the Secretary of Transportation at 42 CFR 523.5.

(42) "Jeep-type Vehicle" means a 4-wheel drive, general purpose automobile capable of off-highway operation that has a wheelbase not more than 110 inches and that has a jeep-type configuration, as defined by the Secretary of Transportation at 42 CFR 533.4.

* * * * *

3. The title of Subpart F is revised to read as follows:

Subpart F—Fuel Economy Regulations for Model Year 1978 Passenger Automobiles and for 1979 and Later Model Year Automobiles (Nonpassenger and Passenger)—Procedures for Determining Manufacturer's Average Fuel Economy

4. A new § 600.501-79 is added reading as follows:

§ 600.501-79 General applicability.

The provisions of this subpart are applicable to 1979 and later model year automobiles (passenger and nonpassenger).

5. A new § 600.502-79 is added reading as follows:

§ 600.502-79 Definitions.

(a) The following definitions apply beginning with the 1979 model year. The definitions in § 600.502-78 remain effective except that provision (a)(2)(ii) is hereby superseded. The definitions in § 600.002 also apply to this subpart.

(1) "Declared value" of imported components shall be the value at which components are declared by the importer to the U.S. Customs Service at the date of entry into the customs territory of the United States, or, with respect to imports into Canada, the declared value of such components as if they were declared as imports into the United States at the date of entry into Canada.

(2) "Cost of production" of a car line shall mean the aggregate of the products of:

(i) The average U.S. dealer wholesale price for such car line as computed from each official dealer price list effective during the course of a model year, and

(ii) The number of automobiles within the car line produced during the part of the model year that the price list was in effect.

6. A new § 600.506-79 is added reading as follows:

§ 600.506-79 Preliminary determination of manufacturer's average fuel economy.

(a) The manufacturer shall submit, for approval by the Administrator, a determination of his preliminary average fuel economy value.

(1) The average must be submitted within 10 days after the date of the availability of the initial range of fuel economy values of comparable automobiles (ref. § 600.314(d)(1) or within 30 days after the date the manufacturer's first model type is initially offered for sale, whichever is later.

(2) The deadline for submission of the preliminary average may be waived upon petition by the manufacturer to the Administrator if the Administrator finds good cause. The Administrator will set a new reporting date if a waiver is granted.

(b) The preliminary average fuel economy value will be calculated according to the procedures in § 600.510 except that:

(1) Sales projections will be used for the calculations in place of the production values, and must be updated at the time of the preliminary calculation.

(2) The fuel economy data used in the calculation shall be that approved by the Administrator as of the date of the preliminary average calculation including:

(i) All fuel economy data from original certification vehicles and fuel economy data vehicles as required by § 600.207,

(ii) Fuel economy data from all vehicles tested for running changes approved under § 86.077-23,

(iii) Fuel economy data required by paragraph (d), and

(iv) Other fuel economy data accepted by the Administrator under Subpart A of this part.

(c) Minimum data requirements will be established under paragraph (d) of this section for each base level with a sales fraction of 0.0100 or greater (known as a significant base level).

(1) The sales to be used in this determination are those in paragraph (b)(1) of this section.

(2) For the purposes of this section, the sales fraction for a base level shall be the quotient (rounded to the nearest 0.0001) of projected sales of passenger automobiles (where projected sales are calculated according to § 600.511), nonpassenger automobiles, or category of nonpassenger automobiles, as appropriate, except that projected sales are used in place of production values.

(d) For each significant base level identified in paragraph (c) of this section the manufacturer shall submit prior to the submission of the preliminary calculation, fuel economy data for those vehicle configurations, taken in order of decreasing sales (according to the projection submitted in paragraph (b)(1) of this section, whose sales total a minimum of 90 percent of the sales of that base level. For all other base levels, the minimum data requirements of § 600.207(a)(3)(iii) must be met.

(e) All fuel economy data submitted under this subpart must:

(1) Be determined by the test procedures specified in Subpart B or an approved analytical method as permitted under § 600.006(e), and

(2) Be accepted by the Administrator under the requirements of Subpart A.

(f) *For nonpassenger automobiles*, the Administrator may require additional testing to be conducted in a nonpassenger automobile base level if he determines that the vehicle configurations comprising that base level can reasonably be expected to exhibit an unacceptably large range in combined fuel economy. The Administrator will make that determination based upon the data submitted at the time of the preliminary calculation.

7. A new § 600.510-79 is added following §600.510-78 which retains the provisions of § 600.510-78 except that the entire paragraphs (b) and (e) are hereby superseded and paragraphs (a)(3) and (d) are added reading as follows.

§ 600.510-79 Calculation of average fuel economy.

(a) Average fuel economy will be calculated to the nearest 0.1 mpg for the classes of automobiles identified herein, and the results of such calculations will be reported to the Secretary of Transportation for use in determining compliance with the applicable fuel economy standards.

(1) An average fuel economy calculation will be made for the category of passenger automobiles that are domestically manufactured plus the includable imports as defined in § 600.511(d)(1).

(2) An average fuel economy calculation will be made for the category of passenger automobiles that are not domestically manufactured as defined in § 600.511(d)(2).

(3) An average fuel economy calculation will be made either for all nonpassenger automobiles or for each category of nonpassenger automobile (jeep-type vehicles and all other nonpassenger automobiles) in accordance with the preference indicated by the manufacturer in § 600.512.

(b) For the purpose of calculating average fuel economy under paragraphs (c), (d), and (e) of this section:

(1) All fuel economy data submitted under § 600.512 must be used.

(2) Fuel economy will be calculated for each model type according to § 600.207 except that:

(i) Separate fuel economy values will be calculated for model types and base levels associated with car lines that are:

(A) Domestically produced and

(B) Non-domestically produced and imported;

(ii) Model year production data, as required by this subpart, will be used instead of sales projections;

(iii) The fuel economy value of diesel-powered model types will be multiplied by the factor 1.0 to convert gallons of diesel fuel to equivalent gallons of gasoline;

(iv) The fuel economy value will be rounded to the nearest 0.1 mpg;

(v) High altitude test data will be included; and

(vi) If a model type is comprised of vehicles that are jeep-type vehicles and vehicles that are not, as defined at 42 CFR 553.4 by the Secretary of Transportation, and if the manufacturer has indicated in § 600.512(c)(8) that average fuel economy will be calculated separately for jeep-type vehicles, then separate model type calculations will be made for those vehicles that are jeep-type vehicles and those that are not.

(3) The fuel economy value for each vehicle configuration is the combined fuel economy calculated according to § 600.206 except that:

(i) Separate fuel economy values will be calculated for vehicle configurations associated with car lines that are:

(A) Domestically produced and

(B) Non-domestically produced and imported;

(ii) Model year production data, as required by this subpart, will be used instead of sales projections; and

(iii) The fuel economy value of diesel-powered model types will be multiplied by the factor 1.0 to convert gallons of diesel fuel to equivalent gallons of gasoline.

(c) *For passenger automobiles*, average fuel economy will be calculated as follows:

V 42 177
SEP 1377
UMI

(1) For the category of passenger automobiles defined in § 600.511(d)(1), divide:

(i) The total domestic production volume plus the includable import volume, as determined in § 600.511, by

(ii) A sum of terms, where

(A) One term is a fraction determined by dividing the includable import volume by the average passenger automobile fuel economy value determined in paragraph (e) of this section, and

(B) Each of the remaining terms corresponds to a domestically produced model type and is a fraction determined by dividing the total production volume of that model type by the fuel economy value for that model type calculated in accordance with paragraph (b)(2) of this Section.

(2) The average fuel economy for the category of automobiles defined in § 600.511(d)(2) is the value calculated in accordance with paragraph (e) of this section.

(d) *For nonpassenger automobiles,* average fuel economy will be calculated as follows:

(1) In the case where a manufacturer elects to calculate a single average fuel economy for all nonpassenger automobiles, divide:

(i) The total number of domestically-produced nonpassenger automobiles plus the total number of nonpassenger automobiles which are not domestically produced and are imported, by

(ii) A sum of terms, where

(A) One term is a fraction determined by dividing the total number of nonpassenger automobiles which are not domestically produced and are imported, by the average nonpassenger automobile fuel economy determined in paragraph (e) of this section, and

(B) Each of the remaining terms corresponds to a domestically-produced model type and is a fraction determined by dividing the total production volume of that model type by the fuel economy value for that model type calculated in accordance with paragraph (b)(2) of this section.

(2) In the case where a manufacturer elects to calculate a separate average fuel economy for each category of nonpassenger automobile (jeep-type vehicles and all other nonpassenger automobiles), for each category divide:

(i) The total number of domestically-produced nonpassenger automobiles in that category plus the total number of nonpassenger automobiles in that category which are not domestically produced and are imported, by

(ii) A sum of terms, where

(A) One term is a fraction determined by dividing the total number of nonpassenger automobiles in that category which are not domestically produced and are imported, by the average fuel economy value for that category determined in paragraph (e) of this section, as applicable, and

(B) Each of the remaining terms corresponds to a domestically-produced model type in that category and is a fraction determined by dividing the total production volume of that model type by the fuel economy value for that model type calculated in accordance with paragraph (b)(2) of this section.

(e) An average fuel economy value will be calculated for the domestically-produced-but-not-imported component of each category of automobile identified in § 600.510(a) as specified below.

(1) Divide the total production volume of the automobiles which are not domestically-produced and are imported in each of the categories identified in paragraph (a) of this section, as appropriate, by

(2) A sum of terms, each of which corresponds to a model type that is not domestically produced and is imported and is a fraction determined by dividing:

(i) The number of automobiles of that model type imported by the manufacturer in the model year, by

(ii) The fuel economy calculated for that model type in accordance with paragraph (b)(2) of this section.

8. Section 600.510–80 is amended by revising paragraphs (a)(3), (b), (d) and (e) to read as follows:

§ 600.510–80 Calculation of average fuel economy.

* * * * *

(a) * * *

(3) An average fuel economy calculation will be made either for all nonpassenger automobiles or for each category of nonpassenger automobile (jeep-type vehicles and all other nonpassenger automobiles) in accordance with the preference indicated by the manufacturer in § 600.512.

(b) For the purpose of calculating average fuel economy under paragraphs (c), (d), and (e) of this section:

(1) All fuel economy data submitted under § 600.512 must be used.

(2) Fuel economy will be calculated for each model type according to § 600.207 except that:

(i) Separate fuel economy values will be calculated for model types and base levels associated with car lines that are:

(A) Domestically produced and

(B) Non-domestically produced and imported;

(ii) Model year production data, as required by this subpart, will be used instead of sales projections;

(iii) The fuel economy value of diesel-powered model types will be multiplied by the factor 1.0 to convert gallons of diesel fuel to equivalent gallons of gasoline;

(iv) The fuel economy value will be rounded to the nearest 0.1 mpg;

(v) High altitude test data will be included; and

(vi) If a model type is comprised of some vehicles that are jeep-type vehicles and some that are not, as defined at 42 CFR § 553.4 by the Secretary of Transportation, and if the manufacturer has indicated in § 600.512(c)(8) that average fuel economy will be calculated separately for jeep-type vehicles, then separate model type calculations will be made for those vehicles that are jeep-type vehicles and those that are not.

(3) The fuel economy value for each vehicle configuration is the combined fuel economy calculated according to § 600.206 except that:

(i) Separate fuel economy values will be calculated for vehicle configurations associated with car lines that are:

(A) Domestically produced and

(B) Non-domestically produced and imported;

(ii) Model year production data, as required by this subpart will be used instead of sales projections; and

(iii) The fuel economy value of diesel-powered model types will be multiplied by the factor 1.0 to convert gallons of diesel fuel to equivalent gallons of gasoline.

* * * * *

(d) *For nonpassenger automobiles,* average fuel economy will be calculated as follows:

(1) In the case where a manufacturer elects to calculate a single average fuel economy for all nonpassenger automobiles, divide:

(i) The total number of domestically-produced nonpassenger automobiles, plus the total number of nonpassenger automobiles that are not domestically imported, by

(ii) A sum of terms, where

(A) One term is a fraction determined by dividing the total number of nonpassenger automobiles which are not domestically produced and are imported, by the average nonpassenger automobile fuel economy determined in paragraph (e) of this section, and

(B) Each of the remaining terms corresponds to a domestically-produced model type and is a fraction determined by dividing the total production volume of that model type by the fuel economy value for that model type calculated in accordance with paragraph (b)(2) of this section.

(2) In the case where a manufacturer elects to calculate a separate average fuel economy for each category of nonpassenger automobile (jeep-type vehicles and all other nonpassenger automobiles), for each category divide

(i) The total number of domestically-produced nonpassenger automobiles in that category plus the total number of nonpassenger automobiles in that category which are imported, by

(ii) A sum of terms, where

(A) One term is a fraction determined by dividing the total number of nonpassenger automobiles in that category which are not domestically produced and are imported by the average fuel economy value for that category determined in paragraph (e) of this section, as applicable, and

(B) Each of the remaining terms corresponds to a domestically-produced model type of that category and is a fraction determined by dividing the total production volume of that model type by the fuel economy value for that model type calculated in accordance with paragraph (b)(2) of this section.

(e) An average fuel economy value will be calculated for the domestically-produced-but-not-imported component of each category of automobile identified in § 600.510(a) as specified below.

(1) Divide the total production volume of the automobiles which are not domestically produced and are imported in each of the categories identified in paragraph (a) of this section, as appropriate, by

(2) A sum of terms, each of which corresponds to a model type that is domestically-produced and is imported and is a fraction determined by dividing:

(i) The number of automobiles of that model type imported by the manufacturer in the model year, by

(ii) The fuel economy calculated for that model type in accordance with paragraph (b)(2) of this section.

9. A new § 600.512–79 is added following § 600.512–78 that retains the provisions of § 600.512–78 except that paragraphs (b)(3) and (c)(8) are added reading as follows:

§ 600.512–79 Model year report.

(a) For each model year, the manufacturer shall submit to the Administrator a report, known as the model year report, containing all information necessary for the calculation of the manufacturer's average fuel economy.

(b) (1) The model year shall be in writing, signed by the authorized representative of the manufacturer and shall be submitted no later than 60 days after the report required in § 86.078–37 for the final production quarter.

(2) The Administrator may waive the requirement that the model year report be submitted within 60 days after the final quarterly production report. Based upon a request by the manufacturer, if the Administrator determines that 60 days is insufficient time for the manufacturer to provide all additional data required as determined in either §§ 600.506, 600.507, or 600.508, the Administrator shall establish a date by which the model year report must be submitted.

(3) Separate reports shall be submitted for passenger automobiles and nonpassenger automobiles.

(c) The model year report must include the following information:

(1) All fuel economy data used in the preliminary calculation and subsequently required by the Administrator either under §§ 600.506, 600.507, or 600.508.

(2) All fuel economy data for certification vehicles, and for vehicles tested for running changes approved under paragraph 86.078–33.

(3) Any additional fuel economy data submitted by the manufacturer under § 600.509.

(4) A fuel economy value for each model type of the manufacturer's product line calculated according to § 600.510.

(5) The manufacturer's average fuel economy value calculated according to § 600.510.

(6) A listing of both domestically and non-domestically produced car lines as determined in § 600.511 and the cost information upon which the determination was made.

(7) Production data, the authenticity and accuracy of which shall be attested to by the corporation, and shall bear the signature of the Chief Executive Officer.

(8) A statement that indicates the manner in which jeep-type vehicles will be included in the average fuel economy calculation for nonpassenger automobiles in accordance with the options established by the Secretary of Transportation at 42 CFR 553.5.

(Sec. 301, Pub. L. 94–163, 89 Stat. 901 (15 U.S.C. 2001, 2003, 2005, 2006).)

Title 41—Public Contracts and Property Management

CHAPTER 4—DEPARTMENT OF AGRICULTURE

PART 4–4—SPECIAL TYPES AND METHODS OF PROCUREMENT

Office-Type Copying Machines

AGENCY: Department of Agriculture.

ACTION: Final rule.

SUMMARY: This rule amends the Agriculture Procurement Regulations by revising the section covering acquisition of office equipment to include duplicating equipment and by making requisitioners responsible for obtaining required acquisition approval prior to submitting requisitions.

EFFECTIVE DATE: This rule is effective September 13, 1977.

FOR FURTHER INFORMATION CONTACT:

William B. Saltsgaver, Office of Operations, Transportation and Supply Management Staff, United States Department of Agriculture, Washington, D.C. 20250 (202–447–7557).

SUPPLEMENTARY INFORMATION: This amendment involves matters relating to agency management and contracting and, while not subject by law to the notice and public procedure requirements for rule making under 5 U.S.C. 553, is subject to the Secretary's Statement of Policy (36 FR 13804). The amendment corrects or clarifies existing policy. No useful purpose would be served by public participation, and it is found upon good cause, in accordance with the Secretary's Policy Statement, that notice and other public procedures with respect to the amendment are impracticable and unnecessary.

1. Section 4–4.5021 is revised to read as follows:

§ 4–4.5021 Office-type copying machines.

Proposed acquisitions of office-type copying and duplicating machines and related equipment to be located in the downtown Washington, D.C., complex and the Washington Metropolitan area (including all organizational activities in Beltsville and Hyattsville, Md., and Roslyn, Va., shall be accompanied by written approval from the Director, Office of Operations, or his designee. Requests for procurement action not supported by a written approval form the Office of Operations shall be returned to the requisitioner. It shall be the responsibility of the requisitioner to prepare the justification statement. A copy of the justification statement and written approval shall be attached to the agency's file copy of the purchase order. Proposed acquisitions for other locations shall be approved by an agency designee. (See § 104–25.302–50 of Agriculture Property Management Regulations.)

AUTHORITY: This amendment is made under the authority of 5 USC 301, 40 USC 486 (c).

Done at Washington, D.C., this 8th day of September, 1977.

E. ALVAREZ,
Director, Office of Operations.

[FR Doc.77–26604 Filed 9–12–77;8:45 am]

Title 43—Public Lands: Interior

CHAPTER I—BUREAU OF RECLAMATION, DEPARTMENT OF THE INTERIOR

PART 423—1976–77 DROUGHT LOANS, GRANTS, AND DEFERMENTS

Rules for Emergency Loans, Grants, and Deferments Under Emergency Drought Act of 1977

AGENCY: Bureau of Reclamation, Interior.

ACTION: Final rules.

SUMMARY: This document provides rules consistent with Public Law 95–107, signed by President Carter on August 17, 1977. The new regulation provides additional time to perform certain action under the Bureau of Reclamation Emergency Drought Act of 1977 (Pub. L. 95–18, approved April 7, 1977) and releases funds from the water bank for other purposes.

DATES: These rules are effective on September 13, 1977, and expire on November 30, 1977.

FOR FURTHER INFORMATION CONTACT:

Eugene Hinds, Bureau of Reclamation, Department of the Interior, Washington, D.C. 20240 (202–343–5104).

SUPPLEMENTARY INFORMATION: These amendments bring the rules into conformity with legislation enacted by the Congress and signed by President Carter on August 17, 1977. The new Pub. L. 95–107 amends the Bureau of Reclamation Emergency Drought Act of 1977, approved April 7, 1977, to accomplish the following:

(a) Extends the authorities of the Act from September 30, 1977, to November 30, 1977.

(b) Extends the time for accomplishment of construction activities under those authorities from November 30, 1977, to January 31, 1978.

(c) Releases any remaining funds in the water bank provision of the Act for all authorized uses except for fish and wildlife grants.

(d) Removes the limitation on nonreimbursable funds available to State water resource agencies during fiscal year 1977, if such programs are found to be compatible with the broad purposes of the Act.

V 42 177
SEP 13 77
UMI

(e) Gives the Secretary the discretion to waive all, or a portion of, the repayment of loans upon the agreement of a recipient to undertake a program of water conservation and efficient management meeting standards established by the Secretary.[1]

Funds for non-Federal projects continue to be limited to 15 percent of the available funds, and not more than $1 million may be expended for any individual non-Federal contracting entities. Also, the limitation continues that funds not to exceed $10 million may be expended on a nonreimbursable basis to purchase or to acquire entitlement to water from any available source to mitigate damages to fish and wildlife resources caused by drought.

Although the authorities of the Act have been extended until November 30, 1977, the $100 million authorized to be appropriated to carry out the provisions of the Act have been appropriated only for fiscal year 1977. In the absence of further action by Congress, all funds to be used under that authority must be obligated by September 30, 1977.

Section 5 of the April 7, 1977, Act provides that actions taken pursuant thereto are in response to emergency conditions. To effect their prompt implementation, it has been decided not to publish the rules in proposed form for public comment. However, the public may submit comments for consideration in possible future revisions.

Section 5 further provides that such actions are not a major Federal action significantly affecting the quality of the human environment for the purposes of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(c)).

NOTE.—This document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and Office of Management and Budget Circular A-107.

The primary author of this document is: Aldon D. Nielsen, Assistant Chief, Division of Water and Land, Bureau of Reclamation, Washington, D.C. 20240, telephone number 202-343-5104.

Under authority of Pub. L. 95-18, as amended by Pub. L. 95-107, it is proposed to amend Subtitle B, Chapter I, Title 43 of the Code of Federal Regulations by amending Part 423, Subpart A, as set forth below:

§ 423.9 [Amended]

1. Section 423.9(b) is amended by changing November 30, 1977, to January 31, 1978.

§ 423.14 [Amended]

2. Section 423.14 is amended by changing September 30, 1977, in the last sentence to November 30, 1977.

§ 423.22 [Amended]

3. Section 423.22(c) is amended by changing November 30, 1977, in the last sentence to January 31, 1978.

Dated: September 6, 1977.

CECIL D. ANDRUS,
Secretary of the Interior.

[FR Doc.77-26531 Filed 9-12-77;8:45 am]

[1] The Secretary does not intend to exercise this authority. Since a very short time remains before this authority expires, it has been determined that there is not sufficient time to promulgate the standards required for the exercise of this authority.

Title 47—Telecommunication

CHAPTER I—FEDERAL COMMUNICATIONS COMMISSION

PART 83—STATIONS ON SHIPBOARD IN THE MARITIME SERVICES

Editorial Amendment Concerning Station Documents

AGENCY: Federal Communications Commission.

ACTION: Order.

SUMMARY: The Federal Communications Commission is clarifying its rules to specify that only vessels subject to the Communications Act and Great Lakes Agreement are required to retain a copy of Part 83 of the Commission's rules on board. Barge and towing vessels operating on rivers are only subject to the Bridge-to-Bridge Radiotelephone Act. Since they are in regular communications with their home offices where an amended copy of the rules is retained, no useful purpose is served in requiring these vessels to retain a copy of Part 83 of the Commission's rules on board.

EFFECTIVE DATE: September 16, 1977.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Nicholas G. Bagnato, Safety and Special Radio Services Bureau (202-632-7197).

SUPPLEMENTARY INFORMATION:

In the Matter of Editorial amendment of § 83.367(b) of the Commission's Rules and Regulations.

ORDER

Adopted: August 31, 1977.

Released: September 7, 1977.

1. Pursuant to section 83.367 of the rules, vessels that are subject to compulsory radio requirements are required to have a copy of Part 83 aboard the vessel. When this requirement was placed in the rules compulsorily equipped vessels were for the most part large sea going vessels, i.e., those subject to the Safety Convention, Title III, Parts II and III of the Act and the Great Lakes Agreement. However, with the advent of the Bridge-to-Bridge Radiotelephone Act the number of vessels required to be fitted with radio increased greatly. For the most part, this new addition to the compulsorily equipped category was made up of tugs and other similar vessels operated solely on bays, sounds, port areas or rivers.

2. Many barge and towing companies operate numerous vessels subject to Bridge-to-Bridge. The requirement that each of these vessels carry Part 83 becomes an administrative burden that serves no useful purpose. In the past, the Commission has granted waivers to several barge and towing companies from this requirement provided a copy of Part 83 is retained in a suitable place on shore, a provision which is in the rules now for voluntarily equipped vessels. The American Waterways Operators, Inc., has now requested that a similar waiver be granted to all towing and barge companies.

3. The rule requirement does not serve any useful purpose when applied to vessels that are subject only to the compulsory requirements of the Bridge-to-Bridge Radiotelephone Act. These towing and barge vessels operating on the rivers are in communications with their home offices on a regular basis. A copy of the rules is retained at the home office and the information contained in the rules is available to the vessel at all times. Therefore, amendment of the rules to eliminate this requirement which was never intended to apply to this type of vessel is appropriate.

4. Since the amendment is editorial because it removes a requirement that was not intended to apply to the class of vessel discussed herein, the prior notice, procedures and effective date provisions of 5 USC 553 are not applicable.

5. It is ordered, That pursuant to authority contained in Sections 4(i) and 303(r) of the Communications Act of 1934, as amended, Part 83 of the Commission's rules is amended effective September 16, 1977, as set forth below. Part 83 of Chapter I of Title 47 of the Code of Federal Regulations is amended to read as follows; § 83.367(b) is amended to read as follows:

§ 83.367 **Station documents.**

* * * * * *

(b) Ship radiotelephone stations not subject to the Safety Convention shall be provided with the documents listed in subparagraphs (1), (2), (3), and (6) of paragraph (a) of this section: *Provided*, That, at the option of the licensee of a radiotelephone station not subject to the compulsory equipment requirements of the Communications Act or the Great Lakes Agreement, the required copy of Part 83 of the Commission's rules may be retained in a suitable place on shore in lieu of being provided aboard the vessel.

* * * * * *

(Secs. 4, 303, 48 Stat., as amended, 1066, 1082; 47 U.S.C. 154, 303.)

FEDERAL COMMUNICATIONS COMMISSION,
RICHARD D. LICHTWARDT,
Executive Director.

[FR Doc.77-26602 Filed 9-12-77;8:45 am]

Title 50—Wildlife and Fisheries

CHAPTER I—UNITED STATES FISH AND WILDLIFE SERVICE, DEPARTMENT OF THE INTERIOR

PART 32—HUNTING

Opening of Chautauqua National Wildlife Refuge, Ill., to Hunting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special Regulation.

SUMMARY: The Director has determined that the opening to migratory game bird hunting of Chautauqua National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

DATES: October 22, 1977, through December 30, 1977.

FOR FURTHER INFORMATION CONTACT:

Howard A. Lipke, Refuge Manager, Mark Twain National Wildlife Refuge, P.O. Box 225, Quincy, Ill. 62301. Telephone: 217-224-8580.

SUPPLEMENTARY INFORMATION:

§ 32.12 **Special regulations; migratory game bird hunting for individual wildlife refuge areas.**

Public hunting of migratory game birds is permitted on the Chautauqua National Wildlife Refuge, Ill., only on the areas designated by signs. These areas comprising 745 acres are delineated on maps available at the refuge headquarters and from the office of the Regional Director, U.S. Fish and Wildlife Service, Federal Building, Fort Snelling, Twin Cities, Minn. 55111. Migratory game bird hunting shall be in accordance with all applicable State regulations subject to the following conditions:

1. Blinds—No permanent structure, excluding wood or brush duck blinds, shall be permitted, no blinds shall be locked or otherwise sealed against public entry.

2. Steel shot ammunition is required when hunting ducks, geese, and coots with 12 gauge shotguns. Hunters taking waterfowl and coots with 12 gauge shotguns may not possess ammunition containing lead or other toxic shot. Only 12 gauge shotguns will be required to use steel shot during the 1977 waterfowl season. All other sizes of shotgun, including 10 gauge, are exempt from the steel shot requirements during this year's season.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50 Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comments at any time.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107.

Dated: September 2, 1977.

JACK E. HEMPHILL,
Regional Director.

PART 32—HUNTING

Opening of Certain National Wildlife Refuges to Hunting of Migratory Game Birds; Arizona, California, New Mexico, Oklahoma, Texas

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulations.

SUMMARY: The Director has determined that the opening to hunting of certain national wildlife refuges in Arizona, California, New Mexico, Oklahoma, and Texas, is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public. The name of each affected refuge and the special regulations for each refuge are set forth below.

EFFECTIVE DATES: See the dates listed for each refuge under Supplementary Information below.

FOR FURTHER INFORMATION CONTACT:

Refuge Manager, as listed for each refuge under Supplementary Information below.

SUPPLEMENTARY INFORMATION:

CIBOLA NATIONAL WILDLIFE REFUGE

DATES: September 1, 1977, through January 3, 1978.

FOR FURTHER INFORMATION CONTACT:

George M. Constantino, Refuge Manager, Cibola National Wildlife Refuge, Box AP, Blythe, Calif. 92225, telephone: 714-922-4433.

§ 32.12 **Special regulations; migratory game birds; for individual wildlife refuge areas.**

Public hunting of doves on the Cibola National Wildlife Refuge, Arizona and California, is permitted as follows: Arizona—mourning and white-winged doves, from September 1 through September 25, 1977; mourning doves only, from December 10, 1977, through January 3, 1978. California—mourning and white-winged doves, from September 1 through September 30, 1977, and from November 19 through December 4, 1977. Hunting is permitted only on the areas designated by signs as open to hunting. These open areas, comprising 7,500 acres, are delineated on maps available at refuge headquarters, and from the Regional Director, U.S. Fish and Wildlife Service, P.O. Box 1306, Albuquerque, N. Mex. 87103. Hunting shall be in accordance with all State and Federal regulations subject to the following special conditions:

1. Up to 2 dogs per hunter may be used for the purpose of hunting and retrieving.

2. Pits or permanent blinds are prohibited.

3. Hunting is prohibited within one-fourth mile of any occupied dwelling or 250 yards of any farm field worker.

4. Campfires will be permitted only in designated areas. All other open fires are prohibited.

5. Cibola Lake, located in Zone I, is closed to fishing from October 1 through March 1 during the waterfowl use period.

HAVASU NATIONAL WILDLIFE REFUGE

DATES: September 1, 1977, through January 3, 1978.

FOR FURTHER INFORMATION CONTACT:

Tyrus W. Berry, Refuge Manager, Havasu National Wildlife Refuge, P.O. Box A, Needles, Calif. 92362, telephone: 714-326-3853.

§ 32.12 **Special regulations; migratory game birds; for individual wildlife refuge areas.**

Public hunting of doves on the Havasu National Wildlife Refuge, Arizona and California, is permitted only on the area designated by signs as open to hunting. This open area, comprising 23,200 acres, is delineated on maps available at refuge headquarters, and from the Regional Director, U.S. Fish and Wildlife Service, P.O. Box 1306, Albuquerque, N. Mex. 87103. Hunting seasons are as follows: Arizona—mourning doves, from September 1 through September 25, 1977, and from December 10, 1977, through January 3, 1978. White-winged doves, from September 1 through September 25, 1977. California—mourning and white-winged doves, from September 1 through September 30, 1977, and from November 19 through December 4, 1977. Hunting shall be in accordance with all applicable State and Federal regulations covering the hunting of doves subject to the following special conditions:

1. Hunting is prohibited within one-fourth mile of any occupied dwelling or concession operation.

2. The Pintail Slough Management Unit will be open to hunting only on Saturdays, Sundays, and Wednesdays. This unit is comprised of all refuge land north of the north dike.

IMPERIAL NATIONAL WILDLIFE REFUGE

DATES: November 19, 1977, through January 3, 1978.

FOR FURTHER INFORMATION CONTACT:

Gerald E. Duncan, Refuge Manager, Imperial National Wildlife Refuge, Box 2217, Martinez Lake, Ariz. 85364, telephone: 602-783-3400.

§ 32.12 **Special regulations; migratory game birds; for individual wildlife refuge areas.**

Public hunting of doves on the Imperial National Wildlife Refuge, Arizona

V 42 177
SEP 13 77
UMI

and California, is permitted only on the area designated by signs as open to hunting. This open area, comprising 16,500 acres, is delineated on maps available at refuge headquarters, and from the Regional Director, U.S. Fish and Wildlife Service, P.O. Box 1306, Albuquerque, N. Mex. 87103. Hunting seasons are as follows: Arizona—mourning doves only, from December 10, 1977, to January 3, 1978; California—mourning and white-winged doves, from November 19 through December 4, 1977. Hunting shall be in accordance with all applicable State and Federal regulations.

BITTER LAKE NATIONAL WILDLIFE REFUGE

DATES: Mourning and white-winged doves: September 1 through December 23, 1977. Teal ducks: September 17 through September 25, 1977.

FOR FURTHER INFORMATION CONTACT:

LeMoyne B. Marlett, Refuge Manager, Bitter Lake National Wildlife Refuge, Box 7, Roswell, N. Mex. 88201, telephone: 505–622–6755.

§ 32.12 Special regulations; migratory game birds; for individual wildlife refuge areas.

1. Public hunting of mourning and white-winged doves on the Bitter Lake National Wildlife Refuge is permitted from September 1 through September 30, 1977 and from November 24 through December 23, 1977, but only on the areas designated by signs as open to hunting. These areas consist of 1,600 acres on the North Refuge Unit (Area B) and 1,800 acres on the South Refuge Unit (Area C). Hunting areas are delineated on maps available at refuge headquarters, 13 miles northeast of Roswell, N. Mex., and from the Regional Director, U.S. Fish and Wildlife Service, P.O. Box 1306, Albuquerque, N. Mex. 87103. Hunting shall be in accordance with all State and Federal regulations subject to the following special condition:

a. Steel (iron) shot shotgun ammunition only may be used for the taking of doves on the South Refuge Unit (Area C) during the special teal hunting season (September 17 through September 25, 1977) and during the regular waterfowl hunting season when both seasons run concurrently. Steel (iron) shot shotgun ammunition is available from at least 2 commercial outlets in Roswell, N. Mex.

2. Public hunting of teal ducks on the Bitter Lake National Wildlife Refuge is permitted from September 17 through September 25, 1977, but only on the areas designated by signs as open to hunting. These areas consist of 1,600 acres on the North Refuge Unit (Area B) and 1,800 acres on the South Refuge Unit (Area C). Hunting areas are delineated on maps available at refuge headquarters, 13 miles northeast of Roswell, N. Mex., and from the Regional Director, U.S. Fish and Wildlife Service, P.O. Box 1306, Albuquerque, N. Mex. 87103. Hunting shall be in accordance with all applicable State and Federal regulations covering the hunting of teal ducks subject to the following special condition:

a. Steel (iron) shot shotgun ammunition only may be used for the taking of teal ducks on the South Refuge Unit (Area C) from September 17 through September 25, 1977. Steel (iron) shot shotgun ammunition is available from at least 2 commercial outlets in Roswell, N. Mex.

BOSQUE DEL APACHE NATIONAL WILDLIFE REFUGE

DATES: September 1 through December 23, 1977.

FOR FURTHER INFORMATION CONTACT:

Richard W. Rigby, Refuge Manager Bosque del Apache National Wildlife Refuge, P.O. Box 278, San Antonio, N. Mex. 87832, telephone: 505–835–1828.

§ 32.12 Special regulations; migratory game birds; for individual wildlife refuge areas.

Public hunting of mourning and white-winged doves on the Bosque del Apache National Wildlife Refuge is permitted from September 1 through September 30, 1977, and from November 24 through December 23, 1977, but only on the area designated by signs as open to hunting. This area, encompassing 9,275 acres, includes the area from the Bureau of Reclamation Low Flow Channel east generally to the western boundary of the Little San Pascual Wilderness Unit and from the A.T. & S.F. railroad tracks west to the Bureau of Reclamation power line. The open area is delineated on maps available at refuge headquarters, 8 miles south of San Antonio, N. Mex., and from the Regional Director, U.S. Fish and Wildlife Service, P.O. Box 1306, Albuquerque, N. Mex. 87103. Hunting shall be in accordance with all State and Federal regulations covering the hunting of doves subject to the following special conditions:

1. Vehicles are permitted only on established roads.

2. Hunters shall leave the refuge by one-half hour after sunset.

3. No camping or open fires are allowed.

SEVILLETA NATIONAL WILDLIFE REFUGE

DATES: September 1 through December 23, 1977.

FOR FURTHER INFORMATION CONTACT:

Richard W. Rigby, Refuge Manager, Bosque del Apache National Wildlife Refuge, P.O. Box 278, San Antonio, N. Mex. 87832, telephone: 505–835–1828.

§ 32.12 Special regulations; migratory game birds; for individual wildlife refuge areas.

Public hunting of doves and teal ducks on the Sevilleta National Wildlife Refuge, San Acacia, N. Mex., is permited only on the areas designated by signs as open to hunting. These open areas, comprising 1,992 acres, are delineated on maps available at refuge headquarters of the Bosque del Apache National Wildlife Refuge, and from the Regional Director, U.S. Fish and Wildlife Service, P.O. Box 1306, Albuquerque, N. Mex 87103. Hunting seasons are as follows mourning and white-winged doves, from September 1 through September 30, 1977 and from November 24 through December 23, 1977; teal ducks, from September 17 through September 25, 1977 Hunting shall be in accordance with all State and Federal regulations covering the hunting of doves and teal ducks subject to the following special conditions:

1. No camping will be permitted on the area.

2. Parking will be limited to areas as posted and designated on hunt map.

3. Vehicle entry will be restricted to areas as posted and designated on hunt map.

4. There will be no entry to the hunt area earlier than 2 hours before sunrise

5. All hunters must be out of the hunt area by one-half hour after shooting hours.

6. Up to 2 dogs per hunter may be used for the purpose of hunting and retrieving.

7. Hunters may not enter closed areas to retrieve birds.

SEQUOYAH NATIONAL WILDLIFE REFUGE

DATES: September 1 through December 30, 1977.

FOR FURTHER INFORMATION CONTACT:

Robert H. Stratton, Jr., Refuge Manager, Sequoyah National Wildlife Refuge, Box 398, Sallisaw, Okla. 74955 telephone: 918–775–4931.

§ 32.12 Special regulations; migratory game birds; for individual wildlife refuge areas.

Public hunting of doves and teal ducks on the Sequoyah National Wildlife Refuge is permitted on three areas designated by signs as open to hunting These open areas, comprising 10,500 acres, are delineated on maps available at refuge headquarters, and from the Regional Director, U.S. Fish and Wildlife Service P.O. Box 1306, Albuquerque, N. Mex 87103. Hunting seasons are as follows doves, from September 1 through September 30, 1977, and December 1 through December 30, 1977; teal ducks, from September 10 through September 18 1977. Hunting shall be in accordance with all State and Federal regulations covering the hunting of doves and teal ducks subject to the following special conditions:

1. Hunting weapons of any kind are prohibited in areas not posted as open to public hunting, except the Kerr-McClellan Navigation Channel where weapons must be cased or broken down

2. Only longbow and arrow or shotguns without slug ammunition are permitted.

3. Camping or possession of firearms on the refuge at night is prohibited

4. All vehicles must be parked in designated parking areas as shown on maps available at refuge headquarters and at leaflet boxes throughout the public hunting area.

TISHOMINGO NATIONAL WILDLIFE REFUGE

DATES: September 1 through September 30, 1977.

FOR FURTHER INFORMATION CONTACT:

Ernest S. Jemison, Refuge Manager, Tishomingo National Wildlife Refuge, Box 248, Tishomingo, Okla. 73460, telephone: 405–371–2402.

§ 32.12 Special regulations; migratory game birds; for individual wildlife refuge areas.

Public hunting of doves and teal ducks on the Tishomingo National Wildlife Refuge is permitted only on the area designated by signs as open to hunting. This open area, comprising 3,170 acres, is delineated on maps available at refuge headquarters, and from the Regional Director, U.S. Fish and Wildlife Service, P.O. Box 1306, Albuquerque, N. Mex. 87103. Hunting shall be in accordance with all applicable State and Federal regulations covering the hunting of doves and teal ducks subject to the following special conditions:

1. The open season for hunting mourning doves on the refuge extends from September 1 through September 30, 1977.

2. The open season for hunting teal ducks on the refuge extends from September 10 through September 18, 1977.

3. Up to 2 dogs per hunter may be used for the purpose of hunting and retrieving.

4. A Federal permit is not required to enter the public hunting area, but hunters, upon entering and leaving, shall report at designated checking stations as may be established for the regulation of the hunting activity and shall furnish information pertaining to their hunting, as requested.

BRAZORIA NATIONAL WILDLIFE REFUGE

DATES: September 10 through September 18, 1977.

FOR FURTHER INFORMATION CONTACT:

Larry M. Ivy, Refuge Manager, Brazoria National Wildlife Refuge, Box 1088, Angleton, Tex. 77515, telephone: 713–849–6062.

§ 32.12 Special regulations; migratory game birds; for individual wildlife refuge areas.

Public hunting of teal ducks on the Brazoria National Wildlife Refuge is permitted only on the area designated by signs as open to hunting. This open area, comprising 2,300 acres of Rattlesnake Island on the southeast side of the Intracoastal Waterway and adjacent to Bastrop, Christmas, and Drum Bays, is delineated on maps available at refuge headquarters, and from the Regional Director, U.S. Fish and Wildlife Service, P.O. Box 1306, Albuquerque, N. Mex. 87103. Hunting shall be in accordance with all applicable State and Federal regulations covering the hunting of teal ducks subject to the following special conditions:

1. The open season for hunting of teal du..ks on the refuge extends from September 10 through September 18, 1977.

2. Access to the hunting area is entirely over public water routes. Travel across the refuge mainland to and from the area open to hunting is not permitted.

3. Only temporary blinds may be constructed or used on the hunting area. Natural materials may be used for blind construction.

4. Up to 2 dogs per hunter may be used for the purpose of hunting and retrieving.

HAGERMAN NATIONAL WILDLIFE REFUGE

DATES: September 1 through September 30, 1977.

FOR FURTHER INFORMATION CONTACT:

Bert E. Blair, Refuge Manager, Hagerman National Wildlife Refuge, Route 3, Box 123, Sherman, Tex. 75090, telephone: 214–786–2826.

§ 32.12 Special regulations; migratory game birds; for individual wildlife refuge areas.

Public hunting of mourning doves on the Hagerman National Wildlife Refuge is permitted only on the area designated by signs as open to hunting. This open area, comprising 1,754 acres, is delineated on maps available at refuge headquarters, and from the Regional Director, U.S. Fish and Wildlife Refuge, P.O. Box 1306, Albuquerque, N. Mex. 87103. Hunting shall be in accordance with all applicable State and Federal regulations subject to the following special condition:

1. The open season for hunting mourning doves on the refuge extends from September 1 through September 30, 1977.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact State under Executive Order 11949 and OMB Circular A–107.

The provisions of these special regulations supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comments at any time.

W. O. NELSON, JR.,
Regional Director,
Albuquerque, N. Mex.

proposed rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Food Safety and Quality Service

[7 CFR Part 2852]

UNITED STATES STANDARDS FOR GRADES OF CANNED TOMATO PUREE (TOMATO PULP) [1]

AGENCY: Food Safety and Quality Service, USDA.

ACTION: Proposed rule.

SUMMARY: This proposal is to amend the grading standards for canned tomato puree (tomato pulp). This action was initiated at the request of the industry. The effect of the change will be to provide for electronic color meters as an alternative method of evaluating the color of the product.

DATE: Comments, in duplicate, must be received on or before December 31, 1977.

ADDRESS: Send comments to: Hearing Clerk, U.S. Department of Agriculture, Room 1077, South Building, Washington, D.C. 20250. Comments will be available for public inspection at the same address during regular business hours.

FOR FURTHER INFORMATION CONTACT:

Dale C. Dunham, Standardization Section, Processed Products Branch, Fruit and Vegetable Quality Division, Food Safety and Quality Service, U.S. Department of Agriculture, Washington, D.C. 20250, (202-447-4693).

SUPPLEMENTARY INFORMATION: Notice is hereby given that the United States Department of Agriculture is considering an amendment to the United States Standards for Grades of Canned Tomato Puree (Tomato Pulp) (7 CFR 52.5081–52.5091) (to be recodified 7 CFR 2852.5081–2852.5091) issued pursuant to the authority contained in the Agricultural Marketing Act of 1946 (Sec. 205, 60 Stat. 1090, as amended, 7 U.S.C. 1924).

The current United States Standards for Grades of Canned Tomato Puree (Tomato Pulp) have been in effect since 1970.

During the last several years, the United States Department of Agriculture has conducted formal studies designed to accumulate data which would establish the relationships between visual and instrumental evaluations of the colors of tomato products. These studies were conducted during 1974, 1975, and 1976 in collaboration with the University of California at Davis and the Canners League of California.

As a result of these studies, it was established that certain approved electronic color meters (which had been properly calibrated and standardized) would give readouts that could be mathematically converted into numerical values of the colors of canned tomato puree (tomato pulp) that closely approximated the numerical value assigned when the same canned tomato puree (tomato pulp) was visually evaluated for color by members of an expert panel.

The accuracy and applicability of the methodology and conversion equations were verified during processing runs and confirmation tests conducted among packers of canned tomato puree (tomato pulp) during the 1975 and 1976 processing seasons.

Because of the apparent interchange between the two methods of accurately evaluating the color of canned tomato puree (tomato pulp), the Canners League of California has requested the United States Department of Agriculture to amend the United States Standards for Grades of Canned Tomato Puree (Tomato Pulp) to allow for the instrumental evaluation of the color of the product.

The Department, after careful consideration, concurs with the request. The reasons are as follows:

(1) The use of electronic color meters to determine color values provides objectivity when making such evaluations.

(2) The use of electronic color meters provides repeatability of results and helps to minimize human visual errors such as eye fatigue, poor color discrimination, and/or subjective evaluations.

(3) Either a visual or instrumental method of the evaluation of the color of canned tomato puree (tomato pulp) is permitted.

(4) Precise lighting conditions which are absolutely necessary for accurate visual color evaluations are eliminated; provided, of course, that the electronic color meter that is used is properly calibrated and standardized. This is essential when using electronic color meters.

The amendment proposed is:

In Part 2852, Subpart—United States Standards for Grades of Canned Tomato Puree (Tomato Pulp), Sec. 2852.5088 Color, is amended to read as follows:

§ 2852.5088 Color.

(a) *General.* The amount of red in tomato puree is determined by comparing the color of the product, diluted, if necessary, with water to between 8.0 percent and 8.6 percent, inclusive, of natural tomato soluble solids (N.T.S.S.) with that produced by spinning a combination of the following Munsell color discs:

Disc 1—Red (5R 2.6/13) (glossy finish).
Disc 2—Yellow (2.5YR 5/12) (glossy finish).
Disc 3—Black (N1) (glossy finish).
Disc 4—Grey (N4) (mat finish).

Such comparison is made under a diffused light source of approximately 250 foot-candle (candela) intensity and having a spectral quality approximating that of daylight under a moderately overcast sky, and a color temperature of 7,500 degree Kelvin ±200 degree. With the light source directly over the disc and product, observation is made at an angle of 45 degrees and at a distance of 12 or more inches from the product.

(b) *Availability of color reference.* The colors referred to in this section are available from the approved supplier under a license from the U.S. Department of Agriculture:

Munsell Color Co., 2441 North Calvert Street, Baltimore, Md. 21218.

(c) *Use of electronic color meters.*—(1) Values that may be used for conversion to a numerical score point color evaluation of the product may be determined by any electronic color meter system approved by the United States Department of Agriculture. Such values may be determined by electronic color meters only on tomato puree that has a concentration of, or may be diluted with water to, 8.5 percent (±0.1 percent) natural tomato soluble solids (N.T.S.S.).

(2) The values derived with the approved electronic color meter system shall be resolvable into a calculated numerical score point by use of any appropriate conversion formula that has been approved by the USDA.

(d) *Grade A classification.*—(1) Tomato puree that has a good color may be given a score of 45 to 50 points. "Good color" means a bright, typical, red tomato puree color. Such color, when the product of the proper concentration and observed as specified in this section, is as red as, or more red than, that produced by spinning the specified Munsell color discs in the following combinations or an equivalent of such composite color:

65 percent of the area of Disc 1;
21 percent of the area of Disc 2; and
14 percent of the area of either Disc 3 or Disc 4; or
7 percent of the area of Disc 3 and 7 percent of the area of Disc 4, whichever most nearly matches the appearance of the sample.

(2) Any calculated numerical score of 45 points, for a product of the proper concentration, shall be equivalent to a visually evaluated color score of 45 points produced under the conditions specified in paragraph (d) (1) of this section. Proportionately higher calculated numerical scores or visually assigned score points may be assigned to products of the proper concentration which show more redness.

(e) *Grade C classification.*—(1) Tomato puree that has at least a fairly good color may be given a score of 40 to 44 points. Tomato puree that falls into this classification shall not be graded above U.S. Grade C, regardless of the total score for the product (this is a limiting rule). "Fairly good color" means a typical red tomato puree color which may be slightly dull or have a slight yellow, yellow-orange, or brownish cast. Such color, when the product is of the proper concentration and is observed as specified in this section, is as red as, or more red than, that produced by spinning the specified Munsell color discs in the following combinations or an equivalent of such composite color:

53 percent of the area of Disc 1;
28 percent of the area of Disc 2; and
19 percent of the area of either Disc 3 or Disc 4; or
9½ percent of the area of Disc 3 and 9½ percent of the area of Disc 4, whichever most nearly matches the appearance of the sample.

(2) Any calculated numerical score of 40 points, for a product of the proper concentration, shall be equivalent to a visually evaluated color score of 40 points produced under the conditions specified in paragraph (e) (1) of this section. Proportionately higher calculated numerical scores or visually assigned score points may be assigned to products of the proper concentration which show more redness.

(f) *Substandard classification.* Tomato puree that fails to meet the requirements of paragraph (e) of this section may be given a score of 0 to 39 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

NOTE.—The Food Safety and Quality Service has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A-107.

Dated: September 7, 1977.

ROBERT ANGELOTTI,
Administrator.

UNITED STATES STANDARDS FOR GRADES OF CANNED TOMATO JUICE [1]

AGENCY: Food Safety and Quality Service, USDA.

ACTION: Proposed rule.

SUMMARY: This proposal is to amend the grading standards for canned tomato juice. This action was initiated at the request of the industry. The effect of the change will be to provide for electronic color meters as an alternative method of determining the color of the product.

DATE: Comments, in duplicate, must be received on or before December 31, 1977.

ADDRESS: Send comments to: Hearing Clerk, U.S. Department of Agriculture, Room 1077, South Building, Washington, D.C. 20250. Comments will be available for public inspection at the same address during regular business hours.

FOR FURTHER INFORMATION CONTACT:

Dale C. Dunham, Processed Products Branch, Fruit and Vegetable Quality Division, Food Safety and Quality Service, U.S. Department of Agriculture, Washington, D.C. 20250. Phone 202-447-4693.

SUPPLEMENTARY INFORMATION: Notice is hereby given that the United States Department of Agriculture is considering an amendment to the United States Standards for Grades of Canned Tomato Juice (7 CFR 52.3621–52.3630) (to be recodified 7 CFR 2852.3621–2852.3630) pursuant to the authority contained in the Agricultural Marketing Act of 1946 (Sec. 205, 60 Stat. 1090 as amended, 7 U.S.C. 1624).

The current United States Standards for Grades of Canned Tomato Juice have been in effect since 1958.

During the last several years, the United States Department of Agriculture has conducted formal studies designed to accumulate data which would establish the relationships between visual and instrumental evaluations of the colors of tomato products. These studies were conducted in 1974, 1975, 1976 and 1977 in California at Davis and the Canners League of California.

As a result of these studies, it was established that certain approved electronic color meters (which had been properly calibrated and standardized) would give readouts that could be converted into numerical values of the colors of canned tomato juice that closely approximated the numerical values assigned when the same canned tomato juice was visually evaluated for color by members of an expert panel.

The accuracy and applicability of the methodology and conversion equations were verified during processing runs and confirmation tests conducted among packers of canned tomato juice during the 1976 processing season.

Because of the apparent interchange between the two methods of accurately evaluating the color of canned tomato juice, the Canners League of California has requested the United States Department of Agriculture to amend the United States Standards for Grades of Canned Tomato Juice to allow for the instrumental evaluation of the color of the product.

The Department, after careful consideration, concurs with the request. The reasons are as follows:

(1) The use of electronic color meters to determine color values provides objectivity when making evaluations.

(2) The use of electronic color meters provides repeatability of results and helps to minimize human visual errors such as eye fatigue, poor color discrimination, and subjective evaluations.

(3) Either a visual or instrumental method of the evaluation of the color of canned tomato juice is permitted.

(4) Precise lighting conditions which are absolutely necessary for accurate visual color evaluations are eliminated; provided, of course, that the electronic color meter that is used is properly calibrated and standardized. This is essential when using electronic color meters.

The amendment proposed is:

In Part 2852, Subpart—United States Standards of Grades of Canned Tomato Juice, Sec. 2852.3625 Color, is amended to read as follows:

§ 2852.3625 Color.

(a) *General.* The amount of red in canned tomato juice is determined by comparing the color of the product with that produced by spinning a combination of the following Munsell color discs:

Disc 1—Red (5R 2.6/13) (glossy finish).
Disc 2—Yellow (2.5 YR 5/12) (glossy finish).
Disc 3—Black (N1) (glossy finish).
Disc 4—Grey (N4) (mat finish).

Such comparison is made under a diffused light source of approximately 250 foot-candle intensity and having a spectral quality approximately that of daylight under a moderately overcast sky, and a color temperature of 7,500 degrees Kelvin ±200 degrees. With the light source directly over the disc and product, observation is made at an angle of 45 degrees and at a distance of 12 inches or more from the product.

(b) *Availability of color reference.* The colors referred to in this section are available from the approved supplier under a license from the U.S. Department of Agriculture:

Munsell Color Co., 2441 North Calvert Street, Baltimore, Md. 21218.

(c) *Use of electronic color meters.*

(1) Values that may be used for conversion to a numerical score point color evaluation of the product may be determined by any electronic color meter system approved by the United States Department of Agriculture.

(2) The values derived with the approved electronic color meter system shall be resolvable into a calculated numercial score point by use of any appropriate conversion formula that has been approved by the USDA.

(d) *Grade A classification.*

(1) Canned tomato juice that has a good color may be given a score of 26 to 30 points. "Good color" means a color that is typical of canned tomato juice, made from well ripened red tomatoes, which has been properly prepared and properly processed. Such color contains as much red as, or more red than, that produced by spinning the specified Munsell color discs in the following combinations or an equivalent of such composite color:

65 Percent of the area of Disc 1;
21 Percent of the area of Disc 2; and

[1] Compliance with the provisions of these standards shall not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act, or with applicable State laws and regulations.

[1] Compliance with the provisions of these standards shall not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act, or with applicable State laws and regulations.

V 42 177
SEP 13 77
UMI

14 Percent of the area of either Disc 3 or Disc 4; or

7 Percent of the area of Disc 3 and 7 percent of the area of Disc 4, whichever most nearly matches the reflectance of the product.

(2) Any calculated numerical score of 26 points for the product shall be equivalent to a visually evaluated color score of 26 points produced under the conditions specified in paragraph (d)(1) of this section. Proportionally higher calculated numerical scores or visually assigned score points may be assigned to products which show more redness.

(e) *Grade C classification.*

(1) Canned tomato juice that has a fairly good color may be given a score of 23 to 25 points. Canned tomato juice that scores 23 or 24 points for color shall not be graded above U.S. Grade C, regardless of the total score for the product (this is a partial-limiting rule). "Fairly good color" means a color that is typical of canned tomato juice. To score 25 points for color, the juice shall contain as much red as, or more red than, that produced by spinning the specified Munsell color discs in the following combinations or an equivalent of such composite color:

59 Percent of the area of Disc 1;
24¼ Percent of the area of Disc 2; and
16¼ Percent of the area of either Disc 3 or Disc 4; or
8¼ Percent of the area of Disc 3 and 8¼ percent of the area of Disc 4, whichever most nearly matches the reflectance of the product.

(2) Any calculated numerical score of 25 points for a product shall be equivalent to a visually evaluated color score produced under the conditions specified in paragraph (e)(1) of this section.

(3) To score 23 or 24 points for color the canned tomato juice shall contain as much red as, or more red than, that produced by spinning the specified Munsell color discs in the following combinations or an equivalent of such composite color:

53 Percent of the area of Disc 1;
28 Percent of the area of Disc 2; and
19 Percent of the area of either Disc 3 or Disc 4; or
9½ Percent of the area of Disc 3 and 9½ percent of the area of Disc 4, whichever most nearly matches the reflectance of the product.

(4) Any calculated numerical score of 23 points for a product shall be equivalent to a visually evaluated color score produced under the conditions specified in paragraph (e)(3) of this section. A proportionally higher calculated numerical score or visually assigned score may be assigned to products which show more redness.

(f) *Substandard classifications.* Canned tomato juice that fails to meet the requirements of paragraph (e) of this section may be given a score of 0 to 22 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

NOTE.—The Food and Quality Service has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A-107.

Dated: September 1, 1977.

ROBERT ANGELOTTI,
Administrator.

Animal and Plant Health Inspection Service

[9 CFR Parts 1, 3]

MARINE MAMMALS

Proposed Regulations and Standards for the Humane Handling, Care, Treatment, and Transportation; Informal Public Hearing

AGENCY: Animal and Plant Health Inspection Service (APHIS), USDA.

ACTION: Notice of informal public hearings.

SUMMARY: On August 19, 1977, the Deputy Administrator, Veterinary Services, APHIS, published in the FEDERAL REGISTER proposed rulemaking under the authorities of the Animal Welfare Act (7 U.S.C. 2131) to provide for the humane handling, care, treatment, and transportation of marine mammals maintained in captivity. The notice gave all interested persons a period of 60 days for the filing of written comments concerning the proposed regulations and standards. Informal public hearings will be held to give interested persons a further opportunity to participate in the rulemaking proceeding through the submission of written comments with an opportunity for oral presentation.

DATES: The hearings will be held on Monday, September 26, 1977, at Los Angeles, Calif., and on Thursday, September 29, 1977, at Miami Springs, Fla., between the hours of 8:30 a.m. through 4:30 p.m.

ADDRESS: The informal public hearings will be held at the Century III Room, Quality Hotel—International Airport, 5249 West Century Boulevard, Los Angeles, Calif. 90045, telephone number 213–645–2200, and at the Buena Vista Room, Holiday Inn, 1111 South Royal Poinciana, Miami Springs, Fla. 33166, telephone number 305–885–1941.

FOR FURTHER INFORMATION CONTACT:

Dale F. Schwindaman, Senior Staff Veterinarian, Animal Care Staff, Veterinary Services, Animal and Plant Health Inspection Service, United States Department of Agriculture, Room 703, Federal Building, 6505 Belcrest Road, Hyattsville, Md. 20782, telephone number 301–436–8271.

SUPPLEMENTARY INFORMATION: Dr. Dale F. Schwindaman will serve as chairman at the informal public hearings. The procedure to be followed will be informal and without a structured agenda. Individual presentations will not be scheduled in advance. A written copy of a speaker's comments must be given to the chairman prior to the speaker's oral presentation, but is not required to be read into the record. Individuals making presentations may verbally summarize or emphasize certain points of their written comments. Opportunity will be provided for the chairman or other persons at the hearing to ask questions relating to each presentation made. The time for oral presentations and questions may be limited in the discretion of the chairman in order to give all persons at the hearing an opportunity to be heard. Transcripts of the oral hearings will be made, and copies of the transcripts and any written comments submitted at the hearings, will be made a part of the record in this rulemaking proceeding and will be available for public inspection together with all other comments received in this proceeding in accordance with the notice dated August 19, 1977.

The American Association of Zoological Parks and Aquariums (AAZPA) is holding their 53rd Annual Conference in San Diego, Calif., from September 18 through 22, 1977. The agenda for such a conference calls for a post-conference field trip on September 23,1977, to the Los Angeles Zoo. The members of the AAZPA possess extensive experience, knowledge, and expertise in the handling, care, treatment, and transportation of marine mammals, which is involved in this rulemaking proceeding. The Department is hopeful that many members of the AAZPA in attendance at such conference will attend the informal public hearing in Los Angeles if it is conveniently scheduled in conjunction with their conference, and thereby provide this Department with invaluable information concerning its proposed regulations and standards covering marine mammals. Therefore, it is deemed reasonable to set the date for such informal public hearing at Los Angeles less than 15 days after publication of this notice in the FEDERAL REGISTER.

Done at Washington, D.C. this 9th day of September 1977.

NOTE.—The Animal and Plant Health Inspection Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821 and OMB Circular A-107.

PIERRE A. CHALOUX,
Deputy Administrator,
Veterinary Services.

SMALL BUSINESS ADMINISTRATION

[13 CFR Part 121]

SMALL BUSINESS SIZE STANDARDS

Definition of Small Business for Purpose of Government Procurement for Establishments Engaged in Architectural and/or Engineering Services

AGENCY: Small Business Administration.

ACTION: Proposed rule.

SUMMARY: The purpose of this rule is to eliminate the current separate definitions of small business for the purpose

of Government procurement for architectural and engineering services and to adopt a single $3.5 million standard for application to contracts for either or both. Confusion has existed among contracting officers and vendors as to which standard to apply when both architectural and engineering services are involved. Procurement for architectural services carried a size standard of $2 million, while engineering services is $7.5 million. This new definition is intended to eliminate the confusion while maintaining adequate competition by contractors qualified to meet Government requirements.

DATE: Written comments must be submitted by October 13, 1977.

ADDRESS: William L. Pellington, Director, Size Standards Division, Small Business Administration, 1441 L Street NW., Washington, D.C. 20416.

FOR FURTHER INFORMATION CONTACT:

John D. Whitmore, 202–653–6373.

SUPPLEMENTARY INFORMATION: This proposal was prompted by comments received from contracting officers, vendors, and professional associations concerning the dual size standards and also the present level.

The perplexity of deciding which standard to apply when the primary requirement of the procurement called for substantially equal proportions of both architectural and engineering services has bewildered both contracting officers and vendors alike. This situation has caused numerous protests to be lodged against the size standard applied in various procurements, causing delays in contract awards.

Additionally, commenters have indicated that the present size standard for engineering services is extremely high, so that very few firms are excluded, thus causing small firms to try and compete with the very large. It is their contention that the size standard for engineering services should be lowered to the point which would allow only those firms who, because of their size, have problems maintaining their competitive viability.

In this light, consideration has also been given to the issue of maintaining adequate competition among contractors qualified to meet Government requirements. Research shows that over 96 percent of the companies would fall under the $3.5 million standard. This puts to rest any fear of insufficient qualified contractors. Accordingly, we propose to adopt a $3.5 million annual receipts standard for both architectural and engineering services contracts.

More specifically, it is proposed to amend § 121.3–8 of Part 121, Chapter I, Title 13 of the Code of Federal Regulations, by revising § 121.3–8(e)(1) to read as follows:

§ 121.3–8 Definition of small business for Government procurement.

• • • • • •

(e) Services. • • •

(1) Any concern bidding on a contract for engineering services, architectural services, or architectural and engineering services is classified as small if its average annual receipts for its preceding 3 fiscal years do not exceed $3.5 million.

• • • • • •

Dated: August 31, 1977.

A. VERNON WEAVER,
Administrator.

[40 CFR Part 52]

[FRL 785–8]

APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Maine Revision

AGENCY: Environmental Protection Agency (EPA).

ACTION: Disapproval of a proposed Implementation Plan revision.

SUMMARY: A revision to the Maine Implementation Plan, which would have exempted municipal refuse conical incinerators from the particulate emission standards, is being disapproved on the basis of predicted violations of the National Ambient Air Quality Standards. Accordingly, these facilities must continue to comply with Regulation 100.4 of the Maine Air Pollution Control Regulations.

EFFECTIVE DATE: September 13, 1977.

FOR FURTHER INFORMATION CONTACT:

Wallace Woo, Air Branch, EPA Region I, Room 2113, JFK Federal Building, Boston, Mass. 02203 (617–223–5609).

SUPPLEMENTARY INFORMATION: On May 31, 1972 (37 FR 10870) pursuant to Section 110 of the Clean Air Act and 40 CFR Part 51, the Administrator approved, with exceptions, the Maine Implementation Plan for the attainment of National Ambient Air Quality Standards (NAAQS).

On June 13, 1977, there was published in the FEDERAL REGISTER (42 FR 30219) a proposal to exempt municipal refuse conical incinerators serving populations of 25,000 or less from the incinerator particulate emission standards contained in Regulation 100.4 of the Maine Air Pollution Control Regulations. The proposed revision to the State Implementation Plan (SIP) was submitted by the Maine Department of Environmental Protection (Maine DEP) on November 18, 1976, and was accompanied by an evaluation of the air quality impact of the revision.

The calculations performed by the Maine DEP showed that air quality levels exceeding the NAAQS for total suspended particulates (TSP) could occur in the vicinity of municipal refuse conical incinerators which are not subject to any emission limitations. Based on this analysis, the Regional Administrator indicated in the FEDERAL REGISTER proposal that he was considering disapproval of the proposed revision.

No comments were received during the 30-day comment period, nor was any additional technical information submitted.

After evaluation of the State's submittal, the Administrator has determined that the Maine revision does not meet the requirements of the Clean Air Act and 40 CFR Part 51. Therefore, this submittal is disapproved as a revision to the Maine Implementation Plan.

(Section 110(a) of the Clean Air Act, as amended, 42 U.S.C. 1857c–5(a).)

Dated: September 7, 1977.

DOUGLAS M. COSTLE,
Administrator.

FEDERAL COMMUNICATIONS COMMISSION

[47 CFR Part 43]

[Docket No. 21385; RM-2765; FCC 77-603]

ANNUAL REPORTS FORMS

Amending Form M for Telephone Companies, Form O for Wire-Telegraph and Ocean-Cable Carriers, and Form R for Radiotelegraph Carriers

AGENCY: Federal Communications Commission.

ACTION: Proposed rulemaking.

SUMMARY: The Federal Communications Commission proposes to amend certain annual report forms used by telephone companies, wire-telegraph and ocean-cable carriers, and radiotelegraph carriers. The document would amend the reporting requirements for the compensation of employees other than officers and directors.

Comments are solicited from State Commissions and the general public on two major areas: (1) the adequacy of the compensation groups being proposed for aggregating employees other than officers and directors; and (2) which company officials shall be individually reported as officers in the revised schedules.

This proposal is in response to an original and an amended petition for rulemaking and will result in a reduction in respondent's reporting requirements.

DATES: Comments from the State Commissions and the general public should be submitted on or before November 1, 1977, and reply comments on or before December 1, 1977. The proposed effective date to amend Annual Report Forms M, O, and R is for the report for the year 1977.

ADDRESSES: Send comments to: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Gary R. Oddi, Accounting Branch, Accounting and Audits Division, Common Carrier Bureau, 202–632–3863.

In the Matter of Amendment of Annual Reports Form M for Telephone Companies, Form O for Wire-Telegraph and Ocean-Cable Carriers, and Form R for Radio-telegraph Carriers to amend the reporting requirements for compensation of employees other than officers and directors, (Docket No. 21385 (RM-2765)).

Adopted August 31, 1977.

Released: September 2, 1977.

1. On October 26, 1976, Public Notice was given that a Petition for Rulemaking in the above-entitled matter had been filed on October 6, 1976, by the American Telephone and Telegraph Company (AT&T). As a result of responses to its petition, AT&T amended its original petition on March 14, 1977.

2. Schedule 70B, "Compensation of Officers, Directors, Etc.," of Annual Report Form M requires each telephone company [1] to furnish names, positions, and compensations data with respect to (1) officers and directors, (2) all other persons having an annual salary of $40,000 or more, and (3) persons to whom the carrier paid $40,000 or more during the year as compensation for current or past services.[2]

3. In 1934, carriers were required to report the name, position, and amount of compensation paid to each officer and director in Annual Report Form M. In addition, the annual compensation of each employee not designated as an officer or director was required to be reported if the amount was $10,000 or more. In 1948, this amount was raised to $15,000 and in 1959, to $20,000. In 1965, the reporting compensation level for those carriers having annual operating revenues exceeding $25,000,000 was raised to $30,000. In 1973, the present requirements were adopted. The compensation level for reporting data on these employees has been raised over the years because of increasing salary scales.

4. In its October 6, 1976, petition, AT&T requested the Commission to eliminate from Annual Report Form M the requirement for reporting the names, positions, and compensation of employees as distinguished from officers and directors. In AT&T's amended petition, compensation of employees other than officers and directors would continue to be reported but it would be aggregated by reporting the number of such persons within designated compensation groups. A description of the general nature of the position included within each compensation group would also be reported. The names of individuals so aggregated would not be reported but such information would be maintained by the carriers for submittal to the Commission upon request. AT&T believes its amended proposal would ensure the privacy of individuals who are neither directors nor officers while at the same time continue to provide an overall picture of the compensation of top management. For purposes of preparing this schedule, AT&T proposes that directors are those individuals who comprise the Board of Directors and officers are those corporate officials who are elected or appointed by the Board of Directors.

5. GTE Domestic Telephone Operating Companies and the Western Union Telegraph Company filed comments in support of AT&T's original request. The telegraph company urged that an equivalent change be made to Schedule 3, "General Officers and Executives," of Annual Report Form O. Comments in opposition to AT&T's original request were filed by the State Corporation Commission of Kansas, the State of Michigan Department of Attorney General, and the National Telephone Cooperative Association (NTCA).[3] Each of these parties cited a regulatory or public interest need for compensation data of highly paid telephone company employees such as for (1) comparisons of executive and professional salaries among various telephone operating companies and between telephone and gas and electric utilities,[4] (2) recommending disallowances in establishing intrastate telephone rates or in reporting to local commissions by their staffs of excessive executive compensation, (3) surveys of management compensation practices, and (4) compilations of industry salary and benefit levels. AT&T's amended request is designed to continue to satisfy the needs of these parties and at the same time reduce the companies reporting burden and protect the privacy of employees who are not officers or directors.

6. We are aware that Schedule 70B of our Annual Report Form M in addition to serving this Commission also serves the needs of the state commissions [5] and the general public. Accordingly, we are proposing two alternative amendments to our annual forms which are similar to AT&T's request.[6] In addition we are inviting specific comments on two major areas. These comments shall be weighed heavily before reaching a final decision in this proceeding. These areas are (1) the adequacy of the compensation groups being proposed for the reporting of compensation of employees other than officers and directors and (2) which company officers shall be individually reported as officers in the revised schedule. Shall officers be limited to general officers or shall assistant officers [7] such as assistant vice presidents, assistant secretaries, assistant treasurers, etc., also be included? Comments are invited on the extent these officials engage in the establishment of company policies and the establishment of procedures to implement these policies as well as the right of members of the rate paying public to know the names and salaries of company officials whose decisions affect the public.

7. It is proposed, therefore, to amend Annual Report Form M, O, and R, effective in the report for the year 1977, as set forth below.

8. This Notice of Proposed Rulemaking is issued under authority of sections 4(i) and 219 of the Communications Act of 1934, as amended, 47 U.S.C. 154(i), 219.

9. Pursuant to applicable procedures set forth in 47 CFR 1.415, interested persons may file comments on or before November 1, 1977, and reply comments on or before December 1, 1977. All relevant and timely comments and reply comments will be considered by the Commission before final action is taken. In reaching its decision, the Commission may also take into account other relevant information before it, in addition to the specific comments invited by this Notice.

10. In accordance with the provisions of 47 CFR 1.419, an original and 5 copies of all statements or briefs shall be furnished to the Commission. Responses will be available for public inspection during regular business hours in the Commission's Broadcast and Dockets Reference Room.

11. Although GAO clearance is not required, it should be noted that a reduction in respondents' reporting burden will be achieved under this proposal.

FEDERAL COMMUNICATIONS COMMISSION,
VINCENT J. MULLINS,
Secretary.

I

Annual Report Forms M for Telephone Companies, O for Wire-Telegraph and Ocean-Cable Carriers, and R for Radiotelegraph Carriers are amended as follows: in Schedule 70B, Compensation of Officers, Directors, Etc., of Form M and in Schedule 3, General Officers and Executives, of Forms O and R, instruction 1 is amended to read as follows:

1 (a). Furnish the indicated data with respect to each officer and director, whether or not he received any compensation from the respondent at any time during the year for current or past services. For purposes of preparing this schedule, "directors" are those individuals who comprise the Board of Directors of the respondent, and "officers" are general officers as defined in Section 51.3 of Part 51 of Commission's rules and regulations.

(b). Furnish the indicated data with respect to all other persons having an annual salary rate of $20,000 or more ($40,000 or more if respondent's annual operating revenues exceeded $100,000,000) at any time during the year or to whom the respondent paid $20,000 or more ($40,000 or more if respondent's annual operating revenue exceeded $100,000,000) during the year as compensation for current or past services.

With respect to the information requested in 1(b), above: Respondents having annual operating revenues of $100,000,000 or less may aggregate by stating the number of such persons within the following compensation groups without naming them:

i. $20,000—$29,999
ii. $30,000—$39,999
iii. $40,000—

Respondents having annual operating revenues in excess of $100,000,000 may aggregate by stating the number of such persons within the following compensation groups without naming them:

i. $40,000—$59,999
ii. $60,000—$79,999
iii $80,000—$99,999
iv. $100,000—

Furnish in Column (a) the aggregate number of such persons by compensation group. Furnish in Column (c) the compensation groups as applicable. Furnish in Columns (d), (e), and (f) the aggregate amounts received by such persons included in each compensation group. A brief description of the general nature of the positions included within each compensation group shall be included in a footnote on the schedule.

(c). The respondent shall keep such records as are necessary to provide the Commission the individual data with respect to all columns of information for each of the persons aggregated, and will upon request of the Commission provide such individual data.

II

Annual Report Forms M for Telephone Companies, O for Wire-Telegraph and Ocean-Cable Carriers, and R for Radiotelegraph Carriers are amended as follows: in Schedule 70B, Compensation of Officers, Directors, Etc., of Form M and in Schedule 3, General Officers and Executives, of Forms O and R, instruction 1 is amended to read as follows:

1 (a). Furnish the indicated data with respect to each officer and director, whether or not he received any compensation from the respondent at any time during the year for current or past services. For purposes of preparing this schedule, "directors" are those individuals who comprise the Board of Directors of the respondent, and "officers" are general officers as defined in Section 51.3 of Part 51 of Commission's rules and regulations.

(b). Furnish the indicated data with respect to all other persons having an annual salary rate of $20,000 or more ($40,000 or more if respondent's annual operating revenues exceeded $100,000,000) at any time during the year or to whom the respondent paid $20,000 or more ($40,000 or more if respondent's annual operating revenue exceeded $100,000,000) during the year as compensation for current or past services.

With respect to the information requested in 1(b), above: Respondents having annual operating revenues of $100,000,000 or less may aggregate such persons according to their job title in the following compensation groups:

i. $20,000—$29,000
ii. $30,000—$39,000
iii. $40,000—

Respondents having annual operating revenues in excess of $100,000,000 may aggregate such persons according to their job title in the following compensation groups.

i. $40,000—$49,000
ii. $50,000—$59,000
iii. $60,000—$69,000
iv. $70,000—$79,000
v. $80,000—$89,000
vi. $90,000—

Data will be accumulated in a similar matrix format as Schedule 70C Furnish in column (a) the job titles of such persons to be aggregated. Under the column headings of the various compensation groups, furnish within the matrix the applicable number of persons associated with the job title under the applicable compensation group.

(c). The respondent shall keep such records as are necessary to provide the Commission the individual data with respect to all columns of information for each of the persons aggregated, and will upon request of the Commission provide such individual data.

[Docket No. 21264]

COMMON CARRIERS BETWEEN UNITED STATES MAINLAND AND HAWAII, ALASKA, AND PUERTO RICO/VIRGIN ISLANDS

Integration of Rates and Services for Provision of Communications; Federal-State Joint Board

AGENCY: Federal Communications Commission.

ACTION: Supplemental Joint Board Notice.

SUMMARY: In this action the Commission accepts the nominations for State Commissioner representatives to this proceeding, appoints the Commission members to the Board, and schedules the first formal meeting of the Board.

DATES: The Joint Board will meet on September 22, 1977, at 9 a.m. in the Commission's Offices at 1919 M Street NW., Washington, D.C.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Francis L. Young, Common Carrier Bureau, 632-5550.

SUPPLEMENTARY INFORMATION:

FIRST SUPPLEMENTAL NOTICE

Adopted: September 2, 1977.

Released: September 7, 1977.

In the matter of integration of rates and services for the provision of com-

[1] Schedule 3, "General Officers and Executives," of Annual Report Forms O and R requires the same reporting for wire-telegraph, ocean-cable and radiotelegraph carriers.

[2] $20,000 or more is the reporting level if the carrier's annual operating revenue does not exceed $100 million.

[3] Late comments were filed by the Federation of Telephone Workers of Penn., but were not served upon AT&T and were not addressed in AT&T's reply comments. Because of these factors, such comments have not been considered.

[4] Similar compensation for gas and electric utilities are required by the Federal Power Commission.

[5] Annual Report Form M as modified for particular local needs serves as the reporting vehicle for state regulatory commissions.

[6] With an exception, officers to be reported in Schedule 70B shall be general officers as defined in Section 51.3 of Part 51 of the Commission's Rules and Regulations.

[7] See Section 51.32 of Part 51 of the Commission's Rules and Regulations.

munications by authorized common carriers between the United States Mainland and Hawaii, Alaska, and Puerto Rico/Virgin Islands, Docket No. 21264.

1. In a "Notice of Inquiry, Proposed Rulemaking and Creation of Federal-State Joint Board," FCC 77-366, released June 7, 1977, we gave notice of the convening of a Federal-State Joint Board pursuant to section 410(c) of the Communications Act of 1934, as amended, 47 U.S.C. 410 (c) [1] This Joint Board was convened to prepare a recommended decision for the purpose of establishing the separations procedure(s) applicable to Puerto Rico and the Virgin Islands. Before us for consideration are the State Commissioner nominations submitted by the National Association of Regulatory Utility Commissioners (NARUC).

2. Pursuant to section 410(c) of the Communications Act of 1934, as amended, 47 U.S.C. 410(c), the following State Commission members of the Joint Board have been nominated by NARUC and submitted for our approval: Luis Berrios-Amadeo, Puerto Rico Public Service Commission; Gustav A. Danielson, Virgin Islands Public Services Commission; Alexander Kalinski, New Hampshire Public Utilities Commission; and Edward P. Larkin, New York Public Service Commission. We hereby accept these very competent State Commissioners as members of the Joint Board. They will be joined by Commissioners Richard E. Wiley, Robert E. Lee, and Joseph R. Fogarty of this Commission.[2]

3. It is the further purpose of this notice to organize and establish a meeting place and date so that the Board may determine at that time procedures appropriate to the stated purpose of the creation of this Board. It is anticipated that the initial meeting will explore a schedule for a notice and comment procedure so that all interested parties will have an adequate opportunity to develop a record supporting what modifications, if any, should be made to the existing Separations Manual in order that it would be applicable to Puerto Rico and the Virgin Islands. In addition, we anticipate that the Board will address the procedures under which the Board will operate including ex parte rules.

4. *Accordingly, it is ordered*, That Luis Berrios-Amadeo, Gustav A. Danielson, Alexander J. Kalinski, Edward P. Larkin, Richard E. Wiley, Robert E. Lee, and Joseph R. Fogarty are appointed to the Federal-State Joint Board mentioned herein and the first meeting of such board shall be held on September 22, 1977 at 9 a.m. in the offices of this Commission at 1919 M Street, NW., in Washington, D.C.

FEDERAL COMMUNICATIONS COMMISSION,[3]
VINCENT J. MULLINS,
Secretary.

[FR Doc.77-26589 Filed 9-12-77;8:45 am]

[1] See 42 FR 30220, June 13, 1977.
[2] Commissioner Abbott M. Washburn is designated as an alternate to this Joint Board.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration

[21 CFR Part 299]

[Docket No. 77N-0115]

DRUGS; OFFICIAL NAMES

Proposed Amendment of Designation of Official Names

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

SUMMARY: This document proposes to amend the drug regulations by updating the list of official names of drugs to reflect changes in chemical structure and the addition of new official names. Pursuant to statutory authority, the Commissioner of Food and Drugs is revising the designation of official names for certain drugs for reasons of usefulness and simplicity.

DATE: Comments by November 14, 1977.

ADDRESSES: Written comments to the Hearing Clerk (HFC-20), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, Md. 20857.

FOR FURTHER INFORMATION CONTACT:

Charles Kumkumian, Bureau of Drugs (HFD-102), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, Md. 20857. 301-443-4330.

SUPPLEMENTARY INFORMATION: The following changes are proposed:

1. Based on new chemical evidence concerning the composition of the drugs, and on adoption of the changes by the United States Adopted Names (USAN) Council, the official names "cisclomiphene" and "transclomiphene" are changed to "enclomiphene" and "zuclomiphene", respectively, and the chemical name of each is revised. Also based on new chemical evidence, the chemical name and molecular formula of "clorazepic acid" are revised and the spelling of the official name is corrected.

2. For the same reasons, the description of "colestipol" is revised.

3. The official name "dextran 40" is replaced with "dextran," and the official names "nonoxynol 4," "nonoxynol 9," "nonoxynol 15," and "nonoxynol 30" are replaced with "nonoxynol." The chemical descriptions are revised in keeping with currently accepted nomenclature. The changes reflect FDA policy that, with rare exceptions, only the parent name of a drug is listed even though various salts, molecular weights, ratios of components, etc., might be available; a footnote is added to the table to explain that this is the agency's policy.

4. Forty-one additional official names, all of which have been adopted by the USAN Council, are added, together with the chemical name or description of each and the molecular formula where appropriate.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 508, 76 Stat. 789 (21 U.S.C. 358)) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 299 by revising the table in § 299.20 by deleting the complete entries for "chlorazepic acid," "cisclomiphene," "transclomiphene," "dextran 40," "nonoxynol 4," "nonoxynol 9," "nonoxynol 15," and "nonoxynol 30;" revising the description of colestipol; adding an explanatory footnote; and alphabetically inserting new entries, as follows:

§ 299.20 Drugs; official names.

Official name [1]	Chemical name or description	Molecular formula
Amoxicillin	[2*S*[2α,5α,6β(*S**)]]-6-[[Amino(4-hydroxyphenyl)acetyl]amino]-3,3-dimethyl-7-oxo-4-thia-1-azabicyclo[3.2.0]heptane-2-carboxylic acid.	$C_{16}H_{19}N_3O_5S$
Beclomethasone	9-Chloro-11β,17,21-trihydroxy-16β-methylpregna-1,4-diene-3,20-dione.	$C_{22}H_{29}ClO_5$
Benzquinamide	2-(Acetyloxy)-*N*,*N*-diethyl-1,3,4,6,7,11b-hexahydro-9,10-dimethoxy-2*H*-benzo[*a*]quinolizine-3-carboxamide.	$C_{24}H_{32}N_2O_5$
Buptvacaine	1-Butyl-*N*-(2,6-dimethylphenyl)-2-piperidinecarboxamide.	$C_{18}H_{28}N_2O$
Calusterone	(7β,17β)-17-Hydroxy-7,17-dimethylandrost-4-en-3-one.	$C_{21}H_{32}O_2$
Carbidopa	(*S*)-α-Hydrazino-3,4-dihydroxy-α-methylbenzenepropanoic acid.	$C_{10}H_{14}N_2O_4$
Cephacetrile	(6*R*-*trans*)-3-[(Acetyloxy)methyl]-7-[(cyanoacetyl)amino]-8-oxo-5-thia-1-azabicyclo[4.2.0]oct-2-ene-2-carboxylic acid.	$C_{14}H_{13}N_3O_6S$
Chlorazepic acid	7-Chloro-2,3-dihydro-2-oxo-5-phenyl-1*H*-1,4-benzodiazepine-3-carboxylic acid.	$C_{16}H_{11}ClN_2O_3$
Clotrimazole	1-[(2-Chlorophenyl)diphenylmethyl]-1*H*-imidazole.	$C_{22}H_{17}ClN_2$
Colestipol	Copolymer of diethylenetriamine and 1-chloro-2,3-epoxypropane (with approximately 1 out of 5 amine nitrogens protonated).	
Dacarbazine	5-(3,3-Dimethyl-1-triazenyl)-1*H*-imidazole-4-carboxamide.	$C_6H_{10}N_6O$
Dantrolene	1-[[5-(4-Nitrophenyl)-2-furanyl]methylene]amino]-2,4-imidazolidinedione.	$C_{14}H_8N_4O_5$
Desonide	(11β,16α)-11,21-Dihydroxy-16,17-[(1-methylethylidene)bis(oxy)]pregna-1,4-diene-3,20-dione.	$C_{24}H_{32}O_6$
Dextran	A polysaccharide produced by the action of *Leuconostoc mesenteroides* on sucrose.	
Dinoprost	(5*Z*,9α,11α,13*E*,15*S*)-9,11,15-Trihydroxyprosta-5,13-dien-1-oic acid.	$C_{20}H_{34}O_5$
Doxorubicin	(8*S*-*cis*)-10-[(3-Amino-2,3,6-trideoxy-α-L-*lyxo*-hexopyranosyl)oxy]-7,8,9,10-tetrahydro-6,8,11-trihydroxy-8-(hydroxyacetyl)-1-methoxy-5,12-naphthacenedione.	$C_{27}H_{29}NO_{11}$
Enclomiphene	(*E*)-2-[4-(2-Chloro-1,2-diphenylethenyl)phenoxy]-*N*,*N*-diethylethanamine.	$C_{26}H_{28}ClNO$
Enflurane	2-Chloro-1-(difluoromethoxy)-1,1,2-trifluoroethane.	$C_3H_2ClF_5O$
Fenfluramine	*N*-Ethyl-α-methyl-3-(trifluoromethyl)benzeneethanamine.	$C_{12}H_{16}F_3N$
Fenoprofen	(±)-α-Methyl-3-phenoxybenzeneacetic acid.	$C_{15}H_{14}O_3$
Halcinonide	(11β,16α)-21-Chloro-9-fluoro-11-hydroxy-16,17-[(1-methylethylidene)bis(oxy)]pregn-4-ene-3,20-dione.	$C_{24}H_{32}ClFO_5$
Haloprogin	1,2,4-Trichloro-5-[(3-iodo-2-propynyl)oxy]benzene.	$C_9H_4Cl_3IO$
Hetastarch	A starch that is composed of more than 90 pct of amylopectin and that has been etherified to the extent that an average of 7 to 8 of the OH groups present in every 10 D-glucopyranose units of starch polymer have been converted into OCH_2CH_2OH groups.	
Lactulose	4-*O*-β-D-Galactopyranosyl-D-fructose.	$C_{12}H_{22}O_{11}$
Loxapine	2-Chloro-11-(4-methyl-1-piperazinyl)dibenz[*b*,*f*][1,4]oxazepine.	$C_{18}H_{18}ClN_3O$
Mazindol	5-(4-Chlorophenyl)-2,5-dihydro-3*H*-imidazo[2,1-*a*]isoindol-5-ol.	$C_{16}H_{13}ClN_2O$
Mebendazole	Methyl (5-benzoyl-1*H*-benzimidazol-2-yl)carbamate.	$C_{16}H_{13}N_3O_3$
Megestrol	17-Hydroxy-6-methylpregna-4,6-diene-3,20-dione.	$C_{22}H_{30}O_3$
Menotropins	Extract of postmenopausal urine of women containing primarily the follicle-stimulating hormone (FSH).	
Metaproterenol	5-[1-Hydroxy-2-[(1-methylethyl)amino]ethyl]-1,3-benzenediol.	$C_{11}H_{17}NO_3$
Metrizoic acid	3-(Acetylamino)-5-(acetylmethylamino)-2,4,6-triiodobenzoic acid.	$C_{11}H_9I_3N_2O_4$
Miconazole	1-[2-(2,4-Dichlorophenyl)-2-[(2,4-dichlorophenyl)methoxy]ethyl]-1*H*-imidazole.	$C_{18}H_{14}Cl_4N_2O$
Mitomycin	[1a*R*-(1aα,8β,8aα,8bα)]-6-Amino-8-[[(aminocarbonyl)oxy]methyl]-1,1a,2,8,8a,8b-hexahydro-8a-methoxy-5-methylazirino[2',3':3,4]pyrrolo[1,2-*a*]indole-4,7-dione.	$C_{15}H_{18}N_4O_5$
Naproxen	(+)-6-Methoxy-α-methyl-2-naphthaleneacetic acid.	$C_{14}H_{14}O_3$
Nonoxynol	α-(Nonylphenyl)-ω-hydroxypoly(oxy-1,2-ethanediyl).	$C_{15}H_{24}O(C_2H_4O)_n$
Oxolinic acid	5-Ethyl-5,8-dihydro-8-oxo-1,3-dioxolo[4,5-*g*]quinoline-7-carboxylic acid.	$C_{13}H_{11}NO_5$
Oxybutynin	4-(Diethylamino)-2-butynyl α-cyclohexyl-α-hydroxybenzeneacetate.	$C_{22}H_{31}NO_3$
Prazosin	1-(4-Amino-6,7-dimethoxy-2-quinazolinyl)-4-(2-furanylcarbonyl)piperazine.	$C_{19}H_{21}N_5O_4$
Probucol	4,4'-[(1-Methylethylidene)bis(thio)]bis[2,6-bis(1,1-dimethylethyl)phenol].	$C_{31}H_{48}O_2S_2$
Sulfacytine	4-Amino-*N*-(1-ethyl-1,2-dihydro-2-oxo-4-pyrimidinyl)benzenesulfonamide.	$C_{14}H_{16}N_4O_3S$
Terbutaline	5-[2-[(1,1-Dimethylethyl)amino]-1-hydroxyethyl]-1,3-benzenediol.	$C_{12}H_{19}NO_3$
Tobramycin	O-3-Amino-3-deoxy-α-D-glucopyranosyl-(1→6)-O-[2,6-diamino-2,3,6-trideoxy-α-D-*ribo*-hexopyranosyl-(1→4)]-2-deoxy-D-streptamine.	$C_{18}H_{37}N_5O_9$
Tolmetin	1-Methyl-5-(4-methylbenzoyl)-1*H*-pyrrole-2-acetic acid.	$C_{15}H_{15}NO_3$
Trimethoprim	5-[(3,4,5-Trimethoxyphenyl)methyl]-2,4-pyrimidinediamine.	$C_{14}H_{18}N_4O_3$
Zuclomiphene	(*Z*)-2-[4-(3-Chloro-1,2-diphenylethenyl)phenoxy]-*N*,*N*-diethylethanamine.	$C_{26}H_{28}ClNO$

[1] With rare exceptions, only the parent name is listed for a drug, even though various salts, molecular weights, or ratios of components may be available.

[3] Commissioner Joseph R. Fogarty absent.

V 42 177 SEP 1377 UMI

November 14, 1977, submit to the Hearing Clerk (HFC–20), Food and Drug Administration, Rm. 4–65, 5600 Fishers Lane, Rockville, Md. 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

NOTE.—The Food and Drug Administration has determined that this document does not contain a major proposal requiring preparation of an economic impact statement under Executive Order 11821 and OMB Circular A–107.

Dated: August 16, 1977.

JOSEPH P. HILE,
Associate Commissioner for Compliance.

Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[Marketing Agreement 146]

PEANUTS; 1977 CROP

Outgoing Quality Regulation and Indemnification Amendment

Pursuant to the provisions of sections 32, 34, and 36 of the marketing agreement regulating the quality of domestically produced peanuts heretofore entered into between the Secretary of Agriculture nd various handlers of peanuts (30 FR 9402) and upon recommendation of the Peanut Administrative Committee established pursuant to such agreement and other information, it is hereby found that the amendments hereinafter set forth to the Outgoing Quality Regulation and Terms and Conditions of Indemnification Applicable to 1977 Crop Peanuts (42 FR 32278) will tend to effectuate the objectives of the Agricultural Marketing Agreement Act of 1937, as amended, and of such agreement.

Amendment of paragraph (g)(2) of the Outgoing Quality Regulation is necessary to provide that handlers may keep separate or commingle lots of loose shelled kernels, fall through, and pickouts. This proposal would change the restriction which requires pickouts to be kept separate and apart from loose shelled kernels and fall through and should facilitate movement of such peanuts to intended outlets.

Therefore, paragraph (g)(2) of the Outgoing Quality Regulation (42 FR 32278) is amended by deleting the second sentence and replaced by the following:

Such categories may be kept separate or be commingled in the same lot and shall be bagged in suitable new or clean, used bags or placed in bulk containers acceptable to the Committee.

Amendment of last paragraph of the Terms and Conditions of Indemnification is necessary to bring the indemnification values into conformity with determinations of the Committee. This proposed change would specify a specific indemnification price for the various indemnifiable categories of peanuts rather than basing such prices on the national average support price.

Therefore, the last paragraph of the Terms and Conditions of Indemnification (42 FR 32278) is amended by deleting the entire paragraph and replaced by the following:

The indemnification value for all categories of peanuts eligible for indemnification, except U.S. Virginia Extra-Large and all types of peanuts grading U.S. splits as noted hereinafter, shall be 31.4 cents per pound. The value for U.S. Virginia Extra-Large shall be 33.4 cents per pound. The value of U.S. splits of all types shall be 28.4 cents per pound.

The Peanut Administrative Committee has recommended that these amendments be issued as soon as possible so as to implement and effectuate the provisions of the marketing agreement dealing with the Outgoing Quality Regulation and Terms and Conditions of Indemnification. Marketing of the 1977 peanut crop is well underway and such regulations and terms and conditions for actual operations under the agreement should therefore be modified and made effective as soon as possible, i.e., on the effective date specified herein. Handlers of peanuts who will be affected by such amendments have signed the marketing agreement authorizing the issuance of such regulations, they are represented on the Committee which recommended such amendments and time does not permit prior notice of the proposed amendments to such handlers.

The foregoing amendments of the Outgoing Quality Regulations are hereby approved.

Dated: September 7, 1977.

CHARLES R. BRADER,
Deputy Director, Fruit and Vegetable Division.

[FR Doc.77–26555 Filed 9–12–77;8:45 am]

Rural Electrification Administration

COOPERATIVE POWER ASSOCIATION

Negative Determination

Notice is hereby given that the Rural Electrification Administration (REA) has made a negative determination on the need for an environmental impact statement by REA in connection with a proposed loan guarantee commitment from the Rural Electrification Administration for Cooperative Power Association (CPA) of Minneapolis, Minn., to construct a combustion turbine in Minnesota. The proposed loan guarantee commitment will assist in obtaining financing to purchase a 50 MW combustion turbine to be located at the existing 115/69 kV substation in Waterford Township, Minn.

An on-site investigation on the proposed site was conducted by REA. REA has prepared an Environmental Assessment on the proposed action. CPA has prepared an Environmental Analysis of the proposed action in which REA had extensive input. The Environmental Analysis is in compliance with REA's environmental guidelines and numerous commitments have been made by CPA to satisfy Federal, State, and local requirements.

Installation permits have been obtained from the Minnesota Pollution Control Agency. Rare and endangered species, prime and unique farmlands, archaeological and historic sites, and other potential impacts of the project are adequately considered, and we do not anticipate any significant effects as a result of this project.

Our independent evaluation of the proposed project leads us to conclude that REA's proposed financial assistance for this project does not represent a major Federal action that would significantly affect the quality of the human environment.

Based on REA's independent evaluation, our Environmental Assessment, our review of the Environmental Analysis and REA experience with installations of this type and the subsequent environmental effects, a negative determination was made under Section 5K of REA Bulletin 20–21.

Copies of the Environmental Assessment and Environmental Analysis may be secured on request, submitted to Mr. Richard F. Richter, Assistant Administrator—Electric, Rural Electrification Administration, U.S. Department of Agriculture, Washington, D.C. 20250.

Final REA action with respect to this matter may be taken after September 28, 1977, but only after REA has reached satisfactory conclusions with respect to its environmental effects and after procedural requirements set forth in the National Environmental Policy Act of 1969 have been met.

Dated at Washington, D.C., this 6th day of September 1977.

DAVID A. HAMIL,
Administrator, Rural Electrification Administration.

DEPARTMENT OF COMMERCE

Bureau of the Census

SPECIAL CENSUS

Summary Results

The Bureau of the Census conducts a program whereby a local or State government can contract with the Bureau to conduct a special census of population. The content of a special census is ordinarily limited to questions on household relationship, age, race, and sex, although additional items may be included at the request and expense of the sponsor. The enumeration in a special census is conducted under the same concepts which govern the Decennial Census.

V 42 177
SEP 13 77
UMI

Summary results of special censuses are published semiannually in the Current Population Reports—Series P-28, prepared by the Bureau of the Census. For each area which has a special census population of 50,000 or more, a separate publication showing data for that area by age, race, and sex is prepared. If the area has census tracts, these data are shown by tracts.

The data shown in the following table are the results of special censuses conducted since December 31, 1976, for which tabulations were completed between August 1, 1977, and August 31, 1977.

Dated: September 7, 1977.

DEPARTMENT OF DEFENSE

Office of the Secretary

DOD ADVISORY GROUP ON ELECTRON DEVICES

Advisory Committee Meeting

Working Group A (Mainly Microwave Devices) of the DoD Advisory Group on Electron Devices (AGED) will meet in closed session at the Naval Research Laboratory, 4555 Overlook Avenue SW., Building 208, Room 260A, Washington, D.C. 20375, on September 27, 1977.

The purpose of the Advisory Group is to provide the Director of the Defense Research and Engineering, the Director, Defense Advanced Research Projects Agency and the Military Departments with technical advice on the conduct of economical and effective research and development programs in the area of electron devices.

The Working Group A meeting will be limited to review of research and development programs which the Military Departments propose to initiate with industry, universities or in their laboratories. The microwave area includes programs on developments and research related to microwave tubes, solid state microwave, electronic warfare devices, millimeter wave devices, and passive devices. The review will include details of classified defense programs throughout. In accordance with Section 10(d) of Appendix I, Title 5, United States Code, it is hereby determined that this meeting of the Advisory Group on Electron Devices concerns matters listed in section 552b (c) of Title 5 of the United States Code, specifically Subparagraph (1) thereof, and that accordingly this meeting will be closed to the public.

MAURICE W. ROCHE,
Director, Correspondence and Directives, Office of the Assistant Secretary of Defense (Comptroller).

NATIONAL COMMITTEE FOR EMPLOYER SUPPORT OF THE GUARD AND RESERVE

Open Meeting

Pursuant to the provisions of Section 10, Pub. L. 92-463, effective January 5, 1973, notice is hereby given that a meeting of the National Committee for Employer Support of the Guard and Reserve Executive Committee will take place on September 16, 1977, in the Pentagon Conference Area, 1E801, Room 7.

The purpose of the meeting is to determine new objectives of the National Committee and discuss methods by which it may continue in its solicitation of Employer Support for the Guard and Reserve.

A transcript will be available to anyone desiring information about the meeting.

Additional information concerning these meetings may be obtained by contacting the Assistant to the National Chairman, National Committee for Employer Support of the Guard and Reserve, 1117 North 19th Street, 9th Floor, Arlington, Va. 22209 (telephone 697-6966).

CALIFORNIA STATE STANDARDS

Motor Vehicle Pollution Control; Public Hearing

On August 7, 1977, the Clean Air Act Amendments of 1977 (hereinafter "the Amendments") were enacted. Pub. L. 95-95, 91 Stat. 685. As explained below, the Amendments altered the findings that the Administrator must make before denying a State request for a waiver of Federal preemption under section 209 (b) of the Clean Air Act, as amended (hereinafter "the Act"). 42 U.S.C. 7543.[1]

The language of section 209(a), setting forth the general Federal preemption in this area, remains unchanged: "No State or any political subdivision thereof shall adopt or attempt to enforce any standard relating to the control of emissions from new motor vehicles or new motor vehicle engines subject to this part. No State shall require certification, inspection, or any other approval relating to the control of emissions from any new motor vehicle or new motor vehicle engine as condition precedent to the initial retail sale, titling (if any), or registration of such motor vehicle, motor vehicle engine, or equipment."

However, section 209(b), which sets forth the conditions under which the Environmental Protection Agency (EPA) Administrator may waive application of section 209(a), was completely revised by section 207 of the amendments (91 Stat. 755):

(b)(1) The Administrator shall, after notice and opportunity for public hearing, waive application of this section to any State which has adopted standards (other than crankcase emission standards) for the control of emissions from new motor vehicles or new motor vehicle engines prior to March 30, 1966, if the State determines that the State standards will be, in the aggregate, at least as protective of public health and welfare as applicable Federal standards. No such waiver shall be granted if the Administrator finds that—

(A) the determination of the State is arbitrary and capricious,

(B) such State does not need such State standards to meet compelling and extraordinary conditions, or

(C) such State standards and accompanying enforcement procedures are not consistent with section 202(a) of this part.

(2) If each State standard is at least as stringent as the comparable applicable Federal standard, such State standards shall be deemed to be at least as protective of health and welfare as such Federal standards for purposes of paragraph (1).

(3) In the case of any new motor vehicle or new motor vehicle engine to which State standards apply pursuant to a waiver granted under paragraph (1), compliance with such State standards shall be treated as compliance with applicable Federal standards for purposes of this title.

The amended section 209(b) of the Act now requires a determination by California that its standards will be, in the aggregate, at least as protective of public health and welfare as applicable Federal standards, and now prohibits the Administrator from granting a California waiver request if he finds California's determination is arbitrary and capricious. Before the amendments, a waiver could only be granted for standards that were determined by the Administrator to be more stringent than applicable Federal standards.

The EPA has determined that the new amendments apply to all California waiver requests not acted upon by the Administrator prior to enactment of the amendments. The EPA will, therefore, review the following pending waiver requests in light of the amended Act:

(i) Compliance and inspection testing of 1977 and subsequent model year motor vehicles except 1977 and 1978 model year gasoline-powered passengers cars and light duty trucks under sections 2100 et seq., Title 13, California Administrative Code,

(ii) Assembly line test procedures for 1978 model year diesel-powered light duty trucks, and medium duty vehicles,

(iii) Exhaust emission standards and test procedures for 1979 and subsequent model year passenger cars, light duty trucks and medium duty vehicles,

(iv) Exhaust emission standards and test procedures for 1980 and subsequent model year passenger cars, light duty trucks and medium duty vehicles, including high altitude test requirements applicable to these classes of vehicles,

(v) Certification test procedures applicable to 1980 and subsequent model year passenger cars, light duty trucks and medium duty vehicles imposing a limitation on idle mixture adjustability,

(vi) Evaporative emission standard and test procedures (SHED test) for 1980 and subsequent model year gasoline-powered motor vehicles except motorcycles and, also, amendments to the SHED test procedures for 1978 and subsequent model year gasoline-powered motor vehicles except motorcycles,

(vii) Restrictions on allowable maintenance applicable to 1980 and subsequent model year gasoline-powered passenger cars and 1981 and subsequent model year gasoline-powered light duty trucks and medium duty vehicles adopted May 26, 1977,

(viii) The reconsideration of the October 1, 1977, motorcycle waiver decision and compliance testing and inspection of 1978 and subsequent model year motorcycles, and

(ix) Amendments to the California exhaust emission standards and test procedures for 1980 and subsequent model year passenger cars, light duty trucks, and medium duty vehicles pertaining to more stringent NO_x standards.

Notice is hereby given that:

(1) A public hearing will be convened to consider whether California's determinations pursuant to section 209(b)(1) are arbitrary and capricious,

(2) At that hearing, interested parties are invited to make further comments, limited to any information which has become available to the interested parties after the initial public hearings, on whether California needs such standards to meet compelling and extraordinary conditions or whether California's standards are not inconsistent with section 202(a)[2] of this part,

(3) A public hearing on these matters will be convened at the Federal Building & U.S. Courthouse, Room 13450, 450 Golden Gate Avenue, San Francisco, Calif., on Thursday, October 13, 1977, commencing at 9 a.m. Benjamin R. Jackson, Director, Mobile Source Enforcement Division, EPA, is designated as the Presiding Officer for this hearing.

Any person desiring to make a statement at the hearing or to submit material for the hearing record should file a notice of such intention along with ten copies of his or her proposed statement (and other relevant material) by October 11, 1977, with the Director, Mobile Source Enforcement Division (EN-340), Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460. The agenda will be determined by the order in which these notices are received. In addition, if feasible, twenty-five copies of such statement or material for the hearing record should be submitted to the Presiding Officer at the time of the public hearing.

The pertinent California standards and test procedures can be found in:

(i) Sections 2100 et seq., Title 13, California Administrative Code, "California New Vehicle Compliance Test Procedures," adopted on June 24, 1976, and "California New Motorcycle Test Procedures," adopted on June 30, 1977,

(ii) Sections 1955.1, 1955.5, 1959, Title 13, California Administrative Code and "California Exhaust Emission Standards and Test Procedures for 1975 Through 1978 Model Passenger Cars, Light-Duty Trucks, and Medium-Duty Vehicles," adopted February 19, 1975, last amended June 8, 1977,

(iii) Section 1959.5, Title 13, California Administrative Code and "California Exhaust Emission Standards and Test Procedures for 1979 Model Passenger Cars, Light-Duty Trucks, and Medium-Duty Vehicles," adopted June 8, 1977,

(iv) Section 1960, Title 13, California Administrative Code, and "California Exhaust Emission Standards and Test Procedures for 1980 and Subsequent Model Passenger Cars, Light-Duty Truck, and Medium-Duty Vehicles," adopted November 23, 1976, last amended June 22, 1977,

(v) Section 1976(b), Title 13, California Administrative Code, and "California Evaporative Emission Standards and Test Procedures for 1978 and Subsequent Model Gasoline-Powered Motor Vehicles except Motorcycles," adopted April 16, 1975, last amended June 8, 1977.

(vi) Section 2056, Title 13, California Administrative Code, and "California Assembly-Line Test Procedures for 1978 Model-Year Passenger Cars, Light-Duty Trucks, and Medium-Duty Vehicles," adopted January 25, 1977, and

(vii) Section 1958, Title 13, California Administrative Code, and "California Exhaust Emission Standards and Test Procedures for 1978 and Subsequent Production Motorcycles," adopted July 15, 1975.

A copy of the above-described material is available for public inspection during normal working hours (8:00 a.m. to 4:30 p.m.) at the U.S. Environmental Protection Agency, Public Information Reference Unit, Room 2922 (EPA Library), 401 M Street SW., Washington, D.C. 20460. Copies of the California standards and test procedures are available upon request from the California Air Resources Board, 1102 Q Street, P.O. Box 2815, Sacramento, Calif. 95812.

Procedures. Since the public hearing is designed to give interested persons an opportunity to participate in this proceeding by the presentation of data, views, arguments, or other pertinent information concerning the Administrator's proposed action, there are no adversary parties as such. Statements by

[1] The U.S. Code classifications of the Clean Air Act were changed upon publication of the Amendments. The former classification of section 209 was 42 U.S.C. § 1857f-6a.

[2] 42 U.S.C. 7521(a), formerly 42 U.S.C. § 1857f-1; see note 1, supra.

V 42-177 SEP 13 77 UMI

the participants will not be subject to cross-examination.

Presentations by the participants should be limited to the matters set forth in subparagraphs (1) and (2), above.

In order to assure full opportunity for the presentation of data, views, and arguments by participants, the Presiding Officer will, upon request of the participants, allow a reasonable time after the close of the hearing for the submission of written data, views, arguments, or other pertinent information to be included as part of the hearing record.

A verbatim record of the proceeding will be made. A copy of the transcript can be requested from the reporter during the hearing and will be made at the expense of the person so requesting.

The determination of the Administrator regarding the action to be taken with respect to the waiver of the prohibition of section 209(a) for the State of California is not required to be made solely on the record of the public hearing. Other scientific, engineering, and related pertinent information, not presented at the public hearing, may also be considered. This information will be available for public inspection prior to the Administrator's determination on this matter.

Dated: September 6, 1977.

RICHARD D. WILSON,
Acting Assistant Administrator for Enforcement.

FLORIDA PLAN

Application of Mirex in Coastal Counties; Solicitation of Public Views

On December 29, 1976 (41 FR 56694), the Administrator's Decision to Accept Plan of Mississippi Authority (the "Mississippi Plan") and Order Suspending Hearing for the Pesticide Chemical Mirex was published in the FEDERAL REGISTER. The Mississippi Plan provided that:

> States that desire relief from the current label restrictions against aerial Mirex application in coastal counties may develop a plan in accordance with the criteria contained herein and additional guidelines as found necessary, and may submit the plan to the Office of Pesticide Programs (EPA) for review and approval. Such plan must be submitted to EPA for approval at least 45 days prior to application. The Office of Pesticide Programs may, by approving the Plan in whole or in part, grant relief from the label prohibition against aerial Mirex application in any coastal county to the extent that such aerial application is performed consistently with the Plan and any conditions imposed by EPA Office of Pesticide Programs in conjunction with approving the Plan. The current coastal county restrictions shall remain in effect for each county for which an acceptable coastal zone plan is not submitted. (41 FR 56704)

EPA has not received a request from the Florida Department of Agriculture and Consumer Services, Division of Plant Industry that Florida be granted relief from the current label restrictions against aerial application of Mirex to control fire ants in certain coastal counties; in accordance with the December 29, 1976 publication in the FEDERAL REGISTER of the Administrator's Decision, it has developed a plan (the "Florida Plan").

In order to allow EPA to make the best informed decision regarding the Florida submission and to provide for public participation in that decision, EPA is making the Florida Plan available to the public for inspection and is soliciting comments on it. The Florida Plan may be inspected at the following locations:

Federal Register Section, Technical Services Division (WH-569), Office of Pesticide Program, EPA, Room 401 East Tower, 401 M Street SW., Washington, D.C. 20460. Hours: 8:30 a.m. to 4 p.m.

Florida Department of Agriculture and Consumer Services, Division of Plant Industry, 1911 Southwest 34th Street, Gainesville, Fla. 32601. Hours: 7:45 a.m. to 4:30 p.m.

Comments should be addressed to the Federal Register Section at the address above and must be received on or before October 3, 1977. Any comments received will be available for inspection in the Office of the Federal Register Section during the hours mentioned above.

Dated: September 6, 1977.

EDWIN L. JOHNSON,
Deputy Assistant Administrator for Pesticide Programs.

NEW HAMPSHIRE

State Plan for Certification of Pesticide Applicators; Extension of Contingent Approval

In accordance with the provisions of section 4(a)(2) of the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 86 Stat. 751; 7 U.S.C. 136 et seq.) and 40 CFR Part 171 (39 FR 36445 (October 9, 1974) and 40 FR 11698 (March 12, 1975)), the Honorable Meldrim Thomson, Jr., Governor of the State of New Hampshire, submitted a State Plan for Certification of Pesticide Applicators to the Environmental Protection Agency (EPA) for approval, contingent upon the promulgation of additional implementing regulations. On August 24, 1976, the Regional Administrator, EPA, Region I, approved the Plan on a contingency basis. Contingent approval was granted until August 23, 1977. Notice of the approval was published in the FEDERAL REGISTER on September 21, 1976 (41 FR 41154).

Subsequently, on August 9, 1977, the State of New Hampshire requested an extension of the period of the contingent approval in order to allow additional time to conduct a public hearing before promulgation of certain changes in regulations requested by EPA. The Agency finds that there is good cause for approving this request and as such has granted an extension until October 21, 1977.

Dated: August 23, 1977.

WILLIAM R. ADAMS, JR.,
Regional Administrator, Region I.

PESTICIDE PROGRAMS

Voluntary Cancellation of Registrations of Pesticide Products Containing Arsenic Trioxide

On November 24, 1976, the American Smelting and Refining Co. (ASARCO), 120 Broadway, New York, N.Y. 10005 requested that the Environmental Protection Agency (EPA) cancel its registrations of Arsenic trioxide 95 percent and arsenic trioxide 99 percent (EPA Registration Numbers 567-6 and 567-7). Both products were formulated for use as chemical intermediates (see 40 CFR 162.4(c)(6)), but could have been used after reformulation or repackaging as pesticides (40 CFR 162.4(b)(3)) by other registrants, who like ASARCO, utilize arsenic trioxide as a pesticide ingredient. ASARCO intends to continue the sale of arsenic trioxide to other pesticide registrants as a chemical intermediate only. Such sale is compatible with a non-registered status.

Cancellation of the registrations for these two products shall be effective October 13, 1977, unless the registrant, or an interested person with the concurrence of the registrant, requests that the registrations be continued in effect.

Further formulation of these two products as pesticides after October 13, 1977, is prohibited. While the Administrator may permit the continued sale and use of these products as pesticides, no request for such sale or use has been made by ASARCO; the continued sale or use of these two products as pesticides is, therefore, prohibited.

Comments concerning this action may be submitted in triplicate to the Federal Register Section, Technical Services Division (WH-569), Office of Pesticide Programs, EPA, Room 401, East Tower, 401 M St. SW., Washington, D.C. 20460. Any such submissions should bear a notation indicating both the subject and the OPP document control number (OPP-66033). Any comments or other documents filed regarding this notice of cancellation will be available for public inspection in the office of the Federal Register Section from 8:30 a.m. to 4 p.m. Monday through Friday.

Dated: August 3, 1977.

EDWIN L. JOHNSON,
Deputy Assistant Administrator for Pesticide Programs.

[FR Doc.77-26549 Filed 9-12-77;8:45 am]

[FRL 789-5; OPP-66036]

PESTICIDE PROGRAMS

Voluntary Withdrawal From the Heptachlor/Chlordane Hearings

The registrants and applicants listed have filed motions for leave to withdraw from the heptachlor/chlordane hearings now in progress. The reasons stated for the motions to withdraw include the fact that the registrant or applicant no longer desires to maintain the registrations involved or the applications for registrations and the registration in issue is no longer in dispute herein or does not exist.

As a result of the requests of withdrawal from these proceedings, pertinent registrations are cancelled and pertinent applications for registrations are withdrawn. Cancellation of the registration for these products and withdrawal of these applications were effective June 23, 1977.

Sale, distribution or use of products manufactured after July 29, 1975 is prohibited. Sale, distribution or use of existing stocks of these products beyond the effective date of cancellation constitutes an unlawful act under section 12(a)(2)(K) and is punishable under sections 13 and 14 of FIFRA.

Comments concerning this action may be submitted in triplicate to the Federal Register Section, Technical Services Division (WH-569), Office of Pesticide Programs, EPA, Rm. 401, East Tower, 401 M St. SW., Washington, D.C. 20460. Any submissions should bear a notation indicating both the subject and the OPP document control number "OPP-66036". Any comments or other documents filed regarding this notice of withdrawal will be available for public inspection in the office of the Federal Register Section from 8:30 a.m. to 4 p.m. Monday through Friday.

Dated: August 30, 1977.

EDWIN L. JOHNSON,
Deputy Assistant Administrator for Pesticide Programs.

PLANT CLOSINGS ATTRIBUTABLE TO ENVIRONMENTAL REGULATIONS

Request for Information

The U.S. Environmental Protection Agency (EPA) is attempting to identify all industrial plant closings that have resulted from Federal, State, or local pollution control regulations. The EPA promptly transmits this information to the U.S. Department of Labor so that adverse employment effects can be minimized. This interagency reporting system is known as the Economic Dislocation Early Warning System (EDEWS). The information generated by the EDEWS is also essential in evaluating the effects of pollution control regulations on specific industries.

EPA is aware that plant closings generally result from a combination of factors, one of which may be the requirement to comply with environmental regulations. Because of the complexity of the subject and the unique circumstances of each decision to close a plant, EPA is not attempting to set forth guidelines as to what, in its view, may constitute a plant closing attributable to regulations for environmental protection. EPA would like to be contacted by any firm which has closed or plans to close a facility where inability to meet pollution control regulations is a substantial factor. The EPA would also appreciate any information regarding such situations from sources other than the firms themselves.

Please mail or phone the firm's name and address to the EPA contact in the appropriate region listed below.

FEDERAL COMMUNICATIONS COMMISSION

[Docket No. 20122; FCC 77–602]

INTER-GOVERNMENTAL MARITIME CONSULTATIVE ORGANIZATION CONVENTION ON SAFETY OF FISHING VESSELS

International Radiotelephone and Radiotelegraph Regulations for Fishing Vessels

Adopted: August 31, 1977.

Released: September 2, 1977.

Order—Proceeding Terminated. In the matter of international radiotelephone and radiotelegraph regulations for fishing vessels: Draft of (IMCO) Convention on Safety of Fishing Vessels.

1. The Commission has adopted several Notices of Inquiry in this Docket[1] concerning proposed radio regulations to be included in a new Inter-Governmental Maritime Consultative Organization (IMCO) Convention on Safety of Fishing Vessels.

2. The comments received in response to these inquiries were used to provide guidance information for use by the United States delegation to the IMCO Subcommittee on Radiocommunications. The Subcommittee was responsible for preparation of draft regulations concerning radio communication equipment to be mandatorily fitted on certain fishing vessels. Draft regulations pertaining to various aspects of the safety of fishing vessels were prepared by a number of IMCO Subcommittees and a draft convention was prepared.

3. An International Conference on Safety of Fishing Vessels was held in Torremolinos, Spain, from March 7, 1977, to April 2, 1977, to consider the draft convention which was approved by the Maritime Safety Committee at its thirty-fourth session. The United States and forty-five other countries were represented at the Conference. The convention was named "Torremolinos International Convention for the Safety of Fishing Vessels, 1977" and will be available for signature at the IMCO Headquarters from October 1, 1977, to June 13, 1978.

4. The final text adopted by the Conference was unacceptable to the United States in numerous areas including the regulations pertaining to radiocommunications. The United States does not at this time plan to become a signatory to this convention and, consequently, since no further purpose could be served in keeping this docket open, we are terminating this proceeding.

5. In view of the above, *It is ordered*, That this proceeding is terminated.

FEDERAL COMMUNICATIONS COMMISSION,[2]
VINCENT J. MULLINS,
Secretary.

FEDERAL POWER COMMISSION

[Docket No. RP73–66 (PGA77–2)]

INTER-CITY MINNESOTA PIPELINES LTD., INC.

Proposed Changes in FPC Gas Tariff Under Purchased Gas Adjustment Clause Provisions

SEPTEMBER 2, 1977.

Take notice that Inter-City Minnesota Pipelines Ltd., Inc. on August 19, 1977, tendered for filing Ninth Revised Sheet No. 4 to its FPC Gas Tariff, Original Volume No. 1, proposed to be effective October 1, 1977.

Minnesota Pipelines states that this filing is submitted to reflect a Purchased Gas Cost adjustment based on an increase in the Canadian border rates effective September 21, 1977, and the consequent increase in the price which Minnesota Pipelines is required to pay its supplier ICG Transmission Limited.

Minnesota Pipelines also states that copies of this filing have been served upon all its customers.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before September 14, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77–26581 Filed 9–12–77;8:45 am]

[Docket No. ER77–557]

KANSAS CITY POWER & LIGHT CO.

Filing of Service Schedule

SEPTEMBER 8, 1977.

Take notice that on August 15, 1977, Kansas City Power Co. (KCPL) tendered for filing Service Schedule SE for System Energy between KCPL and Associated Electric Cooperative, Inc. KCPL requests waiver of the Commission's notice requirements to allow for an effective date of July 10, 1977. KCPL indicates that the proposed Service Schedule SE adds "System Energy" to the Missouri Participation Agreement.

KCPL states that the proposed rates are KCPL's rates and charges for similar service under schedules previously filed by KCPL with the Federal Power Commission.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8, and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before September 14, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are avaliable for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77–26655 Filed 9–9–77;1:51 pm]

[Docket No. CP77–577]

MICHIGAN WISCONSIN PIPE LINE CO.

Pipeline Application

SEPTEMBER 6, 1977.

Take notice that on August 22, 1977, Michigan Wisconsin Pipe Line Co. (Applicant), One Woodward Avenue, Detroit, Mich. 48226, filed in Docket No. CP77–577 an application pursuant to section 7(c) of the Natural Gas Act, as amended, for a certificate of public convenience and necessity authorizing the construction and operation of compressor facilities to maintain the receipt of natural gas supplies from two non-associated reservoirs within the Eugene Island Area Block 266 Field, Offshore Louisiana, which otherwise would not be deliverable to it, all as more fully set forth in the application on file with the Commission and open to public inspection.

The application indicates that by Gas Sales Contracts between Applicant and Cities Service Oil Co. dated April 19, 1968, Atlantic Richfield Co. dated April 18, 1968, Getty Oil Co. dated April 17, 1968, and Continental Oil Co. (Conoco) dated April 19, 1968, Applicant acquired the right to purchase all of the recoverable gas reserves underlying the land and leaseholds down to the base of the FR Sand in Eugene Island Area Blocks 246, 266, 267, and 269 and South Marsh Island Area Blocks 95, 96, 108, and 109 (collectively hereinafter referred to as the Block 266 Field), all in Offshore Louisiana. All of the Gas Sales Contracts are substantially identical except for the name of the producer and the date of the contract, and dedicate an aggregate

of 500 Bcf of natural gas reserves to Applicant. Applicant states that Article IX of each of the Gas Sales Contracts provides that either Applicant or the producer may, but is not required to, install compressor facilities, and if neither the producer not Applicant elects to install the necessary compressor facilities to effectuate deliveries, then Applicant will release the reserves attributable to the contract.

Applicant states that it has been advised by Conoco, as operator of the Block 266 Field, that by the first quarter of 1978, the pressure attributable to the DG–2 (DG–B1) and DQ (DQ–B1) non-associated gas reservoirs located in South Marsh Island Area Block 108 will have declined to approximately 800 psia as a result of normal pressure decline caused by continuing production from such reservoirs. At a pressure of 800 psia, delivery of gas supplies from the affected non-associated reservoirs against the normal line pressure of Applicant's pipeline facility would be precluded. Accordingly, to obviate the loss of the supplies from such reservoirs, Applicant states that it has elected to install the necessary compressor facilities to enable it to maintain the receipt into its system of those recoverable gas reserves.

Applicant states that it requests authorization to cause to have installed and operated approximately 1,100 (1,160 ISO rated) horsepower of compression which will be located on the existing "D" production platform located in South Marsh Island Area Block 108. In accordance with a Construction and Operating Agreement between Applicant and Conoco dated March 10, 1977, the required compressor facilites including associated appurtenances will be wholly owned by Applicant but designed, installed, and operated by Conoco on Applicant's behalf. Applicant states that the agreement provides that the compressor is subject to its approval as to design, construction specifications, construction drawings, and equipment selections, and projects that the installation of the compression will increase the gas deliverability from the two non-associated reservoirs in Block 108 by over 70 Bcf.

Applicant estimates the total cost of the facilities proposed herein to be $910,150, which it states will be financed with funds on hand.

Any person desiring to be heard or to make any protest with reference to said application, on or before September 26, 1977, should file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding, or to participate as a party in any hearing therein, must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene if filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that formal hearing is required, any further notice of such hearing will be duly given.

Under the procedure here in provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77–26585 Filed 9–12–77;8:45 am]

[Docket No. RP74–100]

NATIONAL FUEL GAS SUPPLY CORP.

Order Rejecting Proposed Tariff Sheets

SEPTEMBER 2, 1977.

On August 4, 1977, National Fuel Gas Supply Corp. (National) tendered for filing tariff sheets to its FPC Gas Tariff, Original Volume No. 1.[1] These sheets propose to allow National to track future increases in the cost of coke oven gas purchased from Donner-Hanna Coke Corp. (Donner-Hanna) through National's PGA clause. For the reasons stated, the Commission shall reject the proposed tariff sheets.

National and Donner-Hanna entered a new contract, effective November 1, 1976, for the sale of coke oven gas to National. Under this contract the price of the gas will change semi-annually based on the average price of coal in the preceding six month period. The proposed tariff sheets would permit National to track the changes in the cost through its PGA clause. Under the Commission's applicable regulations coke oven gas may not be reflected in a pipeline's PGA clause without prior approval of the Commission.

The Commission finds that good cause has not been shown to permit coke oven gas purchases to be included in National's PGA clause. The Donner-Hanna coke oven gas constitutes only a small portion of National's total system supply. Data submitted by National in Docket No. RP76–96 indicates that coke oven gas accounts for less than three percent of National's total gas supply. The Commission also notes that National has filed four rate increase applications with the Commission pursuant to section 4 of the Natural Gas Act within the last two years[2] in addition to numerous PGA rate filings.[3] While the Commission does not seek to encourage additional rate filings, the frequency of National's filings suggests that any increases in the cost of coke oven gas will be adequately considered in Section 4 proceedings.

Based on the foregoing considerations the Commission finds that National's request to include coke oven gas in its tariff PGA Clause is not justified, and the proposed tariff sheets shall accordingly be rejected.

The Commission orders. (A) National's proposed tariff sheets, tendered for filing on August 4, 1977, are rejected.

(B) The Secretary shall cause prompt publication of this order in the FEDERAL REGISTER.

By the Commission.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77–26582 Filed 9–12–77;8:45 am]

[Docket No. CP77–586]

NORTHERN NATURAL GAS CO.

Application

SEPTEMBER 6, 1977.

Take notice that on August 24, 1977, Northern Natural Gas Co. (Applicant), 2223 Dodge Street, Omaha, Nebr. 68102, filed in Docket No. CP77–586 an application for a budget-type certificate of public convenience and necessity authorizing, pursuant to section 7(c) of the Natural Gas Act and § 157.7(c) of the regulations thereunder (18 CFR 157.7 (c)), unspecified miscellaneous branchline and town border station rearrangements during calendar year 1978 and permitting and approving, pursuant to section 7(b) of the Natural Gas Act and § 157.7(e) of the regulations thereunder (18 CFR 157.7(e)), abandonment of various minor direct sales facilities during the calendar year 1978, all as more fully set forth in the application on file with the Commission and open to public inspection.

The stated purpose of the instant budget-type application for miscellaneous rearrangements of facilities is to augment Applicant's ability to accommodate, among other things, highway construction work, commercial development, and relocation of minor water ways; which it will not result in any change in service rendered by means of the facilities involved.

Applicant states that the total cost of the proposed miscellaneous rearrangements will not exceed $300,000 for the calendar year and will be financed from cash on hand and funds generated through operations.

Applicant indicates that its application to abandon facilities is filed pursuant to

[1] Substitute Third Revised Sheet Nos. 35 and 36; First Revised Sheet No. 36A; Second Revised Sheet No. 37.

[2] Docket Nos. RP76–4, RP76–96, RP77–14, and RP77–57.

[3] National has filed seven PGA rate changes so far during the current fiscal year.

V 42 177 SEP 13 77 UMI

§ 157.7(e) of the Commission's regulations, which is intended to augment Applicant's ability to act with reasonable dispatch in abandoning service and removing direct sales measuring, regulating, and related minor facilities during a 12-month period by providing for the filing of an abbreviated budget-type abandonment application when (1) deliveries to any one direct sale customer through any one of the sales measuring facilities proposed to be abandoned have not exceeded 100,000 Mcf of natural gas during the last year of service and (2) Applicant will not abandon any service unless it receives a written request or written permission from the customer to terminate service. If such request or permission cannot be obtained, a statement certifying that the customer has no further need of service must be filed with the Commission.

Any person desiring to be heard or to make any protest with reference to said application should on or before September 26, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that grant of the certificate and permission and approval for the proposed abandonments are required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-26586 Filed 9-12-77;8:45 am]

[Docket Nos. ER77-102 and ER77-277]

PENNSYLVANIA POWER CO.

Order Granting Motion To Dismiss and Terminate Proceeding, Denying Motion To Reject Filing, Granting Interventions, Establishing Price-Squeeze Procedures, Denying Reconsideration, and Setting Prehearing Conference Dates

SEPTEMBER 2, 1977.

On July 11, 1977, Pennsylvania Power Company (Company) tendered for filing [1] proposed rate schedules for jurisdictional sales to five of its customers [2] in Docket No. ER77-277. By order issued August 1, 1977, the Commission accepted the submittal for filing and suspended the rates and charges for one month, after which they are to become effective subject to refund.

The proposed rate schedules contain flat demand and energy charges. The schedules contain a fuel adjustment clause which conforms to Commission Order No. 517, a minimum bill, a high voltage discount, a 60 percent ratchet provision, and a tax clause. Any attempt to implement a tax adjustment clause requires full cost-of-service support as specified in § 35.13 of the Commission's regulations prior to implementation.

Notice of the proposed increase was issued April 8, 1977, with comments, protests, and/or petitions to intervene due on April 20, 1977. On April 20, the Boroughs of Ellwood City, Grove City, New Wilmington, Wampum, and Zelienople, Pennsylvania (Boroughs) filed motions to reject the filing and a petition to intervene in the proceeding.[3] The Boroughs own and operate their own electric distributing systems under the laws of the Commonwealth of Pennsylvania and receive their electrical power from the Company. The Boroughs request that the proposed filing be rejected for the following reasons:

(1) The Company's proposed filing represents an attempt to threaten the existence of Ellwood City as a public power entity and jeopardize its continuing ability to serve existing and prospective loads in that the company has sought to totally change a Commission-adopted formula or methodology for a discount high voltage service (Docket No. E-8159, Commission Order of August 20, 1975).

(2) Failure to comply with § 35.13 of the Commission's regulations.

The Company filed an answer to the motions of the Boroughs on May 11, 1977.

We reviewed these filings prior to our decision to accept for filing the Company's rate schedules in our prior order in this docket.

The Motions and Petitions of the Boroughs also contain price-squeeze allegations and the Boroughs expressly state that they do not waive their rights to full and complete discovery on the price-squeeze issue. Accordingly, we will direct the Administrative Law Judge to convene a prehearing conference within 15 days from the date of this order for the purpose of hearing the petitioners' request for data necessary to present their prima-facie showing on the price-squeeze issue.

On August 8, 1977, the Boroughs filed a Petition for Rehearing, Reconsideration, and Expedited Action of the August 1 order.[4] The Petition requests a number of Commission actions: (1) Grant of a Motion to Reject the Company's filing in ER77-277 because its high-voltage discount formula differs from the formula adopted in the previous FPC rate proceeding between the parties; (2) A full five month suspension period in place of the one month suspension period mentioned in the August 1 order; (3) A grant of Request for Intervenor status; (4) Grant of request to delay effectiveness of rates pending the outcome of a final Commission determination of the justness and reasonableness of the rates.

The Commission notes the substantial interest of the Boroughs in this proceeding and has no difficulty in granting intervenor status to the Boroughs. We shall deny the Motion to Reject, however, because the contention that the rates are excessive is better left to resolution in public hearing which we shall hereinafter order. Nothing contained in the Borough's petition causes us to reconsider the length of suspension period previously established. The request that the Company be allowed to establish new rates only after final Commission resolution of the issues must be denied because the Commission lacks the authority to suspend a rate increase filing for more than five months.

In a related docket, ER77-102, the Company submitted for filing on December 8, 1976, an interim high voltage service rate for Ellwood City in purported compliance with the Commission's order issued August 20, 1975, in Docket No. E-8159. Analysis of the ER77-102 filing discloses that (1) the proposed high voltage discount is identical to the one developed in the E-8159 proceeding and (2) the supply of electric power and energy is restricted to one delivery point at either high or low voltage but not at both voltages. The Commission's order of January 28, 1977, in Docket No. ER77-102 accepted the proposed high voltage discount rate effective January 23, 1977, but suspended operation of the restrictive language until July 28, 1977. In addition, the Company was ordered to file its case-in-chief in support of the restrictive provision.

On April 7, 1977, the Company submitted its case-in-chief and stated its willingness to serve at dual voltage and dual delivery points. Thereafter, the Borough of Ellwood City indicated that in light of the change in position on the part of the Company it was no longer necessary to hold a hearing in Docket No. ER77-102 and Ellwood City would not object to a motion by Penn Power to dismiss the proceedings. Such motion was filed on May 9, 1977.

Since no parties object to termination of ER77-102, we will grant the Company's motion to dismiss and terminate the proceeding, provided that the Company files revised language within 30 days for its agreement with Ellwood City which is not restrictive as to delivery points and voltage levels. This revised filing is to be effective for the period beginning January 23, 1977.

The Commission finds: (1) Good cause exists to grant the Company's Motion to Dismiss and Terminate Proceeding in Docket No. ER77-102, as hereinafter ordered.

(2) Good cause exists to establish price-squeeze procedures in Docket No. ER77-277 to effectuate the Commission's policy announced in Order No. 563.

(3) Good cause does not exist to allow implementation of the tax clause in the Company's filing in Docket No. ER77-277, absent cost of service support prior to implementation.

(4) Good cause exists to accept the petition to intervene of the Boroughs.

(5) Good cause does not exist to reject the Company's filing in Docket No. ER77-277.

(6) Good cause does not exist to reconsider the length of the suspension period specified in the August 1, 1977 order.

(7) Good cause does not exist to require the delay of effectiveness of the proposed rates pending final Commission determination of the reasonableness of the rates.

The Commission orders: (A) The Company's motion to terminate the proceeding in Docket No. ER77-102 is hereby granted: *Provided, however,* That the Company files acceptable substitute language with respect to its agreement with Ellwood City which eliminates the issue of restrictions as to delivery points and delivery voltages. Said filing shall be made within 30 days from the date of issuance of this order and shall be effective as of January 23, 1977.

(B) In Docket No. ER77-277, the Administrative Law Judge shall convene a prehearing conference within 15 days from the date of this order for the purpose of hearing the petitioners' request for data required to present their case, including a prima facie showing, on the price squeeze issue. Also, the Company shall be required to respond to the discovery requests authorized by the Administrative Law Judge within 30 days, and the petitioners shall file their case-in-chief on the price squeeze issue within 30 days after the Company's response.

(C) The tax adjustment clause contained in the Company's filing in ER77-277 shall remain inoperative pending cost of service support prior to its implementation.

(D) The Boroughs are hereby permitted to intervene in Docket No. ER77-277 subject to the rules and regulations of the Commission: *Provided, however,* That participation of such intervenor shall be limited to matters affecting asserted rights and interests as specifically set forth in the petition to intervene; *And provided, further,* That the admission of such intervenor shall not be construed as recognition by the Commission that they might be aggrieved because of any Commission order entered in this proceeding.

(E) The Staff shall prepare and serve top sheets on all parties for settlement purposes on or before November 10, 1977 (See Administrative Order No. 157).

(F) A Presiding Administrative Law Judge to be designated by the Chief Administrative Law Judge for that purpose (See Delegation of Authority, 18 CFR 3.5(d)), shall preside at an initial conference in this proceeding to be held on November 23, 1977, at 10 a.m., in a hearing room of the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426. Said Law Judge is authorized to establish all procedural dates and to rule upon all motions, (except petitions to intervene, motions to consolidate and sever and motions to dismiss), as provided for in the rules of practice and procedure.

(G) Nothing contained herein shall be construed as limiting the rights of parties to this proceeding regarding the convening of conferences or offers of settlement pursuant to § 1.18 of the Commission's rules of practice and procedure.

(H) The Boroughs' motion to reject the Company's filing in Docket No. ER77-277 is hereby denied.

(I) The Boroughs' petition for reconsideration of the length of suspension period is hereby denied.

(J) The Boroughs' request to delay effectiveness of the proposed rates pending final Commission determinations of the reasonableness of the rates is hereby rejected.

(K) The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-26583 Filed 9-12-77;8:45 am]

[1] The filing was originally submitted on April 1, 1977. The Commission sent to Company a deficiency letter on April 26, 1977, and the Company responded on May 5, 1977. Another deficiency letter was sent on June 2, 1977, and the Company cured its filing on July 11, 1977.

[2] Boroughs of Ellwood City, Grove City, New Wilmington, Wampum, and Zelienople, Pennsylvania.

[3] On April 19, 1977 the Borough of New Wilmington, Pa., filed a letter of protest in this docket.

[4] Since our order of August 1, 1977, is interlocutory, no application for rehearing is permitted (§ 1.34 of the Commission's rules of practice and procedure). However, the Commission will treat the Application as a Motion for Reconsideration.

[Docket No. ER76-285]

PUBLIC SERVICE CO. OF NEW HAMPSHIRE

Extension of Time

SEPTEMBER 2, 1977.

On August 3, 1977, the Commission issued an order modifying Opinion No. 790 to provide for the payment of refunds in the above-designated matter. On August 9, 1977, the Public Service Company of New Hampshire filed an application for rehearing and a motion for stay until 30 days after the date of issuance of the rehearing order for filing refunds pursuant to ordering paragraph (B) of the Commission's August 3, 1977, order.

Upon consideration, notice is hereby given that the time within which Public Service Company of New Hampshire shall make refunds pursuant to the August 3, 1977, order extended pending further order of the Commission.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-26584 Filed 9-12-77;8:45 am]

[Docket No. RP73-3 (PGA77-3)]

TRANSCONTINENTAL GAS PIPE LINE CORP.

Order Accepting for Filing and Suspending Proposed PGA Rate Adjustment, Permitting Refiling of Adjusted PGA Rates, and Directing Submission of Additional Information

AUGUST 31, 1977.

On August 1, 1977, Transcontinental Gas Pipe Line Corporation (Transco) tendered for filing a proposed PGA rate increase of 5.1 cents per dekatherm (dth)[1] consisting of (1) an increase of 0.9 cents per dth, or $46,458,754 annually, in Transco's current cost of purchased gas and (2) a net increase of 4.2 cents per dth (from 0.8 to 5.0 cents per dth) in the surcharge to recover the balance in the deferred purchase gas cost account (FPC Account No. 191). The latter net increase results from an increase of 3.1 cents per dth due to the elimination of a negative deferred adjustment of the same amount pursuant to Transco's PGA tracking rate filing which became effective on March 1, 1977, and an increase of 1.1 cents per dth to recover the balance in the deferred account as of June 30, 1977, for gas purchase costs exclusive of amounts attributable to Commission Opinion No. 770-A. Transco proposes a September 1, 1977, effective date.

A review of Transco's filing indicates that it is predicated, in part, upon 60-day emergency purchases under § 2.68 of the Commission's general rules at rates in excess of those established in Opinion 770-A. Transco should be allowed to include in its purchased gas costs those rates for emergency purchases which a

[1] Second Substitute Third Revised Sheet No. 12 and Substitute Second Revised Sheet No. 15 to FPC Gas Tariff, Second Revised Volume No. 1.

V 42 177
SEP 13 77
UMI

reasonably prudent pipeline would pay for gas under the same or similar circumstances. To assist the Commission in determining the reasonableness of the emergency purchases, Transco shall be required to submit certain additional information as specified in ordering paragraph (C) below.

In light of the foregoing the Commission finds that Transco's PGA rates should be accepted for filing, suspended for one day, and permitted to become effective on September 2, 1977, subject to refund and to the terms of this order. Transco shall be allowed to refile PGA rates to be made effective September 1, 1977, for those PGA rates excluding emergency purchases at rates in excess of those established in Opinion No. 770–A. This procedure would limit Transco's refund liability to those emergency purchases.

The Commission orders: (A) Transco's proposed PGA rates are accepted for filing and suspended for one day until September 2, 1977, when they shall be permitted to become effective subject to refund.

(B) Within 30 days of the date of this order, Transco shall be permitted to refile adjusted PGA rates to be made effective September 1, 1977, reflecting that portion of the proposed adjustment which includes costs other than those related to emergency purchases at rates in excess of those established in Opinion No. 770–A.

(C) Transco shall, within 30 days of the date of this order, file with the Commission and serve on all of its customers and interested state commissions the following information concerning its 60-day emergency purchases under § 2.68 of the Commission's general rules at rates in excess of those established in Opinion 770–A:

(1) The pipeline's need for the gas;
(2) The availability of other gas supplies;
(3) The amount of gas purchased under each 60-day transaction;
(4) A comparison of each emergency purchase price with appropriate market prices in the same or nearby areas; and
(5) The relationship between purchaser and seller.

(D) The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission.

KENNETH F. PLUMB,
Secretary.

COMANCHE LAND & CATTLE CO.

Request for Determination and Opportunity for Hearing

Notice is hereby given that a request has been made to the Board of Governors of the Federal Reserve System, pursuant to the provisions of section 2(g)(3) of the Bank Holding Company Act of 1956 (12 U.S.C. 1841(g)(3)) ("the Act"), by Comanche Land & Cattle Co., Comanche, Tex. ("Comanche"), which has transferred 40.8 percent of the outstanding voting shares of First State Bank of Bangs, Bangs, Tex., to Messrs. James H. Weatherby, Charles Womack, Dub Slocum and W. J. Smelley ("Purchasers"), for a determination that Comanche is not nor will be capable of controlling Purchasers, notwithstanding the fact that Purchasers are directors of Comanche, and notwithstanding the fact that Mr. Dub Slocum is indebted to Comanche.

Section 2(g)(3) of the Act provides that shares transferred after January 1, 1966, by any bank holding company (or any company which but for such transfer, would be a bank holding company) directly or indirectly to any transferee that is indebted to the transferor or has one or more officers, directors, trustees, or beneficiaries in common with or subject to control by the transferor, shall be deemed to be indirectly owned or controlled by the transferor, unless the Board, after opportunity for hearing, determines that the transferor is not, in fact, capable of controlling the transferee.

Notice is hereby given, that, pursuant to section 2(g)(3) of the Act, an opportunity is provided for filing a request for oral hearing. Any such request or written comments on the application should be submitted in writing (in duplicate) to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, to be received no later than September 30, 1977. If a request for oral hearing is filed, each request should contain a statement of the nature of the requesting person's interest in the matter, his reasons for wishing to appear at an oral hearing, and a summary of the matters concerning which such person wishes to give testimony. The Board subsequently will designate a time and place for any hearing it orders, and will give notice of such hearing to the transferor, the transferee, and all persons that have requested an oral hearing. In the absence of a request for an oral hearing, the Board will consider the requested determination on the basis of documentary evidence filed in connection with the application.

Board of Governors of the Federal Reserve System, September 2, 1977.

ROBERT E. MATTHEWS,
Assistant Secretary of the Board.

[FR Doc.77-26537 Filed 9-12-77;8:45 am]

DETROITBANK CORP.

Order Approving Merger of Bank Holding Companies

DETROITBANK Corp., Detroit, Mich. ("DETROITBANK"), a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval under section 3(a)(5) of the Act (12 U.S.C. 1842(a)(5)) to acquire all of the voting shares of the successor by merger to Lake Shore Financial Corp., Muskegon, Mich., and thereby indirectly acquire shares of Hackley Union National Bank and Trust Co. of Muskegon, Muskegon, Mich. ("Bank").

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with section 3(b) of the Act. The time for filing comments and views has expired, and the Board has considered the application and all comments received including those of the United States Department of Justice and those of National Lumberman's Bank and Trust Co., Muskegon, Mich. ("Protestant"), in light of the factors set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

DETROITBANK controls six banks with aggregate deposits of $2.8 billion, representing 8.8 percent of the total deposits in commercial banks in Michigan, and is the third largest banking organization in the State.[1] Consummation of the proposed merger would increase Applicant's share of deposits in commercial banks in Michigan by 0.6 percent and would have no appreciable effect upon the concentration of banking resources in Michigan.

All but one of Applicant's subsidiary banks are located in the Detroit banking market, approximately 170 miles from Muskegon.[2] Approval of this application would not eliminate any significant amount of existing competition.

With respect to potential competition, the Department of Justice and Protestant have expressed the opinion that Applicant is a likely entrant into the market and that approval of the application would result in the elimination of potential competition and decrease the likelihood of the market becoming less concentrated in the future. While it appears that consummation of the proposal would result in some slight adverse effects on potential competition, for the reasons discussed below, the Board is unable to conclude that consummation of the proposal would result in a significant loss of potential competition.

Bank is the largest of six banking organizations in the Muskegon banking market.[3] Bank holds total deposits of $188 million, representing approximately 33.5 percent of the total deposits in commercial banks in the Muskegon market.

The Board has previously found that the Muskegon market, with the exception of the Norton Shores area, was not attractive for de novo entry.[4] Since that finding was made, an application for a charter for a de novo bank in Norton Shores has been filed with chartering authorities and, if that application is granted, the attractiveness of the Norton Shores area for de novo entry by others will be lessened.

Moreover, it appears that the overall Muskegon market continues to be generally unattractive for de novo entry. The deposits per banking office ratio for the Muskegon Standard Metropolitan Statistical Area is below the State average. Population of the Muskegon County portion of the market increased 0.2 percent between 1970 and 1975, ranking fifteenth in population growth among the 17 Michigan counties with population in excess of 100,000. It is anticipated that Muskegon County's population growth will continue to lag behind that of the other Michigan counties at least until 1980. In view of the apparent lack of attractiveness of the Muskegon area for de novo entry,[5] particularly vis a vis other areas in Michigan in which Applicant is not currently represented, the Board is unable to conclude that Applicant is one of the most likely de novo entrants into the Muskegon area.

Of the six banks currently represented in the Muskegon market, three are affiliated with multibank holding companies.[6] While "foothold" entry into the market would be preferable to Applicant's acquisition of the largest bank in the market, only two possibilities exist for Applicant to acquire an established bank as a means of entry into the market and neither of those appears feasible. The two banks that might be available for acquisition are Protestant, the second largest bank in Muskegon, and a bank located in the town of Coopersville that is prohibited by Michigan law from branching into the city of Muskegon and conducts its operations primarily in the Grand Rapids banking market. The former would not constitute a true "foothold" entry in view of its size and market share. Acquisition of the latter would

[1] Banking data are as of December 31, 1976.

[2] Applican recently entered western Michigan by acquiring Kentwood Bank located 40 miles from Muskegon in a suburb of Grand Rapids. The application under the Bank Holding Company Act to acquire that bank was approved under delegated authority by the Federal Reserve Bank of Chicago on July 7, 1977. Kentwood Bank is not located in the relevant market, but rather competes in the adjacent Grand Rapids market. Bank derives only a nominal amount of deposits and loans from the Grand Rapids market.

[3] The Muskegon banking market, the relevant market, is approximated by all of Muskegon County, except for Casnovia Township, plus Grand Haven, Spring Lake, and Crockery Townships in Ottawa County.

[4] See Board's Order of March 26, 1975, denying application of Old Kent Financial Corp., Grand Rapids, Mich., 61 Fed. Res. Bull. 247 (1975) and Board's Order of January 25, 1974, denying application of Old Kent Financial Corp., Grand Rapids, Mich., 60 Fed. Res. Bull. 133 (1974).

[5] Applicant's subsidiary banks are barred by Michigan's restrictive branching law (Mich. Stat. Ann. § 23.710(171)) from branching into Muskegon. However, Michigan law does not prohibit the formation of de novo banks by Applicant and it is this form of de novo entry referred to in the text.

[6] A pending de novo charter application, if approved, would enable a fourth multibank holding company, Old Kent Financial Corp., Grand Rapids, Mich., to enter this market and would thus increase the number of banking organizations in the market from six to seven.

V 42 I 177 SEP 13 77 UMI

not be likely to produce any significant procompetitive benefit in the Muskegon market.

Considerations relating to the financial and managerial resources and future prospects of Bank, Applicant, and Applicant's subsidiaries are regarded as generally satisfactory. Although Applicant would incur some debt as a result of this acquisition, it appears that dividends from Bank would be sufficient to retire that debt.

Applicant has stated its intention to augment the services of Bank by providing equipment leasing, accounts receivable financing, international services, cash management services, money market services, and real estate trust services. Bank does not currently provide many of these services. In addition, affiliation with Applicant would increase bank's lending limits at a time when there appears to be an increasing demand by local industries for large loans. Thus, considerations relating to the convenience and needs of the community to be served lend weight toward approval of the application and outweigh any slight adverse competitive effects that may result from the proposal.

On the basis of the record,[1] the application is approved for the reasons summarized above. The transaction shall not be made (a) before the thirtieth calendar day following the effective date of this Order or (b) later than three months after the effective date of this Order, unless such period is extended for good cause by the Board, or by the Federal Reserve Bank of Chicago pursuant to delegated authority.

By order of the Board of Governors,[2] effective September 1, 1977.

ROBERT E. MATTHEWS,
Assistant Secretary of the Board.

FIRST PARK RIDGE CORP.

Formation of Bank Holding Company

First Park Ridge Corp., Chicago, Ill., has applied for the Board's approval under section 3(a) (1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to become a bank holding company by acquiring 80 per cent or more of the voting shares of First State Bank & Trust Co. of Park Ridge, Park Ridge, Ill. The factors that are considered in acting on the application are set forth in section 3(c) of not later than October 4, 1977.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Chicago. Any person wishing to comment on the application should submit views in writing to the Reserve Bank, to be received not later tha October 4, 1977.

Board of Governors of the Federal Reserve System, September 6, 1977.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

[FR Doc.77-26539 Filed 9-12-77;8:45 am]

OMAHA NATIONAL CORP.

Proposed Acquisition of Wyoming Trust & Management Co.

Omaha National Corporation, Omaha, Nebraska, has applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(2) of the Board's Regulation Y (12 CFR 225.4(b)(2)), for permission to acquire voting shares of Wyoming Trust & Management Co., Gillette, Wyo. Notice of the application was published on July 21, 1977, in the "News Letter Journal", a newspaper circulated in Newcastle, Wyo., "The Sundance Times", a newspaper circulated in Sundance, Wyo., and "The Douglas Budget," a newspaper circulated in Converse County, Wyo. Notice of the application was also published on July 22, 1977, in the "Wyoming State Tribune," a newspaper circulated in Laramie County, Wyo., the "Casper Star-Tribune," a newspaper circulated in Casper, Wyo., the "News-Record," a newspaper circulated in Gillette, Wyo., and "The Sheridan Press," a newspaper circulated in Sheridan, Wyo.

Applicant states that the proposed subsidiary would engage in fiduciary, agency, and custodial activities that may be carried on by a trust company but will neither accept deposits nor make loans. Such activities have been specified by the Board in § 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of § 225.4(b).

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question should be accompanied by a statement summarizing the evidence the person requesting the hearing proposes to submit or to elicit at the hearing and a statement of the reasons why this matter should not be resolved without a hearing.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Kansas City.

Any views or requests for hearing should be submitted in writing and received by the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, not later than September 30, 1977.

Board of Governors of the Federal Reserve System, September 2, 1977.

ROBERT E. MATTHEWS,
Assistant Secretary of the Board.

[FR Doc.77-26540 Filed 9-12-77;8:45 am]

SOUTHWEST FLORIDA BANKS, INC.

Proposed Acquisition of Southwest Financial Services, Inc.

Southwest Florida Banks, Inc., Fort Myers, Fla., has applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(2) of the Board's Regulation Y (12 CFR 225.4(b)(2)), for permission to acquire voting shares of Southwest Financial Services, Inc., Fort Myers, Fla. Notice of the application was published on June 10, 1977, in "Naples Daily News," a newspaper circulated in Naples, Fla., and on June 11, 1977, in "Fort Myers News-Press" and "Sarasota Herald-Tribune," newspapers circulated in Fort Myers, Florida, and Sarasota, Florida, respectively.

Applicant states that the proposed subsidiary would engage de novo in the activity of providing, as agent, credit life and credit accident and health insurance that is directly related to extensions of credit by Applicant's subsidiary banks. Such activities have been specified by the Board in § 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of § 225.4(b).

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question should be accompanied by a statement summarizing the evidence the person requesting the hearing proposes to submit or to elicit at the hearing and a statement of the reasons why this matter should not be resolved without a hearing.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Atlanta.

Any views or requests for hearing should be submitted in writing and received by the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, not later than September 30, 1977.

Board of Governors of the Federal Reserve System, September 2, 1977.

ROBERT E. MATTHEWS,
Assistant Secretary of the Board.

SWORD FINANCIAL CORP.

Formation of Bank Holding Company

Sword Financial Corporation, Horicon, Wis., has applied for the Board's approval under section 3(a) (1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to become a bank holding company by acquiring 82.65 percent of the voting shares of Horicon State Bank, Horicon, Wisconsin. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Chicago. Any person wishing to comment on the application should submit views in writing to the Reserve Bank, to be received not later than September 29, 1977.

Board of Governors of the Federal Reserve System, September 2, 1977.

ROBERT E. MATTHEWS,
Assistant Secretary of the Board.

[FR Doc.77-26542 Filed 9-12-77;8:45 am]

[1] Dissenting Statement of Governor Wallich filed as part of the original document. Copies are available upon request to Board of Governors of the Federal Reserve System, Washington, D.C. 20551 or to the Federal Reserve Bank of Chicago.

[2] Voting for this action: Chairman Burns and Governors Coldwell, Partee and Lilly. Voting against this action: Governor Wallich. Absent and not voting: Governors Gardner and Jackson.

GENERAL ACCOUNTING OFFICE

REGULATORY REPORTS REVIEW

Receipt of Report Proposals

The following request for clearance of reports intended for use in collecting information from the public were received by the Regulatory Reports Review Staff, GAO, on September 2, and September 6, 1977. See 44 U.S.C. 3512 (c) and (d). The purpose of publishing this notice in the FEDERAL REGISTER is to inform the public of such receipt.

The notice includes the title of the request received; the name of the agency sponsoring the proposed collection of information; the agency form number, if applicable; and the frequency with which the information is proposed to be collected.

Written comments on the proposed ICC requests are invited from all interested persons, organizations, public interest groups, and affected businesses. Because of the limited amount of time GAO has to review the proposed requests, comments (in triplicate) must be received on or before October 3, 1977, and should be addressed to Mr. John M. Lovelady, Acting Assistant Director, Regulatory Reports Review, U.S. General Accounting Office, Room 5033, 441 G Street NW., Washington, D.C. 20548.

Further information may be obtained from Patsy J. Stuart of the Regulatory Reports Review Staff, 202–275–3532.

INTERSTATE COMMERCE COMMISSION

The ICC requests an extension without change clearance of Form ACC–42, Field Report of Highway Form A. This form collects information relating to the distribution of wage expenses to various types of carrier service and is reported by 216 intercity motor common carriers of general freight. Data are compiled and published to provide information to carriers for ratemaking processes. ICC estimates reporting burden to average 16 hours per annual response.

The ICC requests an extension without change clearance of Quarterly Report of Freight Loss and Damage Claims—Railroads, Form QLD–R, required to be filed by some 59 Class I linehaul railroads (except switching and terminal companies) with an average operating revenue of $10 million or more, pursuant to Section 20 of the Interstate Commerce Act. Data collected by Form QL&D–R are used for economic regulatory purposes. ICC estimates reporting burden for carriers to average 64 hours per report. Reports are mandatory and available for use by the public.

The ICC requests extension without change clearance of quarterly report forms as follows: Revenue Piggyback and Container Traffic Class I Railroads, Form PTR–R; Piggyback Traffic of Class I Motor Carriers of Property, Form PTR–M; and Piggyback Traffic Originated by Class A Freight Forwarders, Form PTR–FF. Form PTR–R is required to be filed by 59 Class I line-haul railroads, Form PTR–M by 1,014 Class I motor carriers of property, and Form PTR–FF by 143 Class A freight forwarders, pursuant to order of the Interstate Commerce Commission, 49 CFR 1252. Data are used for economic regulatory purposes. No change is made in the data requirements. ICC estimates that reporting burden for carriers to average 114 hours for railroads, 5 hours for motor carriers, and 15 hours for freight forwarders per report. Reports are not available for public inspection pursuant to the above order of the Commission.

The ICC requests clearance of a new form, Piggyback Traffic Terminated by Class A Water Carriers and Maritime Carriers, Form PTR–W. This form is required to be filed by 67 Class A Water carriers pursuant to order of the Interstate Commerce Commission 49 CFR 1252. Data collected by this form are used for economic regulatory purposes. ICC estimates that reporting burden for the 67 carriers will average 8 hours per response. Reports are not available for public inspection pursuant to above Commission order.

The ICC requests clearance without change of Quarterly Report of Freight Commodity Statistics (Railroads), Form QCS. This form is required to be filed by some 59 Class I line-haul railroads pursuant to Section 20 of the Interstate Commerce Act. Data are used for economic purposes. ICC estimates that reporting burden for carriers averages 217 hours per response. Reports are not available for public inspection pursuant to the above order of the Commission.

NORMAN F. HEYL,
Regulatory Reports Review Officer.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Alcohol, Drug Abuse, and Mental Health Administration

ADVISORY COMMITTEES

Notice of Renewals

Pursuant to the Federal Advisory Committee Act of October 6, 1972 (5 U.S.C. Appendix I), the Alcohol, Drug Abuse, and Mental Health Administration announces the renewal by the Secretary, Department of Health, Education, and Welfare, with the concurrence of the Office of Management and Budget Committee Management Secretariat, of the following advisory committees:

Clinical Projects Research Review Committee
Clinical Psychopharmacology Research Review Committee
Developmental Problems Research Review Committee
Experimental and Special Training Review Committee
Mental Health Small Grant Committee
Personality and Cognition Research Review Committee

Authority for these committees will expire December 31, 1977, unless the Secretary formally determines that continuance is in the public interest.

Dated: September 2, 1977.

DAVID F. KEFAUVER,
Acting Deputy Administrator, Alcohol, Drug Abuse, and Mental Health Administration.

Food and Drug Administration

ADVISORY COMMITTEES

Meetings

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: This notice announces forthcoming meetings of public advisory committees on the Food and Drug Administration (FDA). This notice also sets forth a summary of the procedures governing committee meetings and methods by which interested persons may participate in open public hearings conducted by the committees and is issued under section 10(a) (1) and (2) of the Federal Advisory Committee Act (Pub. L. 92–463, 86 Stat. 770–776 (5 U.S.C. App. I)), and FDA regulations (21 CFR Part 14) relating to advisory committees. The following advisory committee meetings are announced:

Committee name	Date, time, and place	Type of meeting and contact person
1. Contraceptive and Other Vaginal Drug Products Panel.	Oct. 1 and 2, 9 a.m., Holiday Inn, 8120 Wisconsin Ave., Bethesda, Md.	Open public hearing Oct. 1, 9 a.m. to 10 a.m.; open committee discussion, Oct. 1, 10 a.m. to 4:30 p.m., Oct. 2, 9 a.m. to 4:30 p.m.; Armond M. Welch (EFD-510), 5600 Fishers Lane, Rockville, Md. 20857, 301-443-4960.

V 42 177 SEP 1377 UMI

General function of the committee. Reviews and evaluates available data concerning the safety and effectiveness of nonprescription drug products.

Agenda—Open public hearing. Any interested persons may present data, information, or views, orally or in writing, on issues pending before the committee. Those desiring to make formal presentations should notify the contact person before September 28, 1977, and submit a brief statement of the general nature of the data, information, or views they wish to present, the names and addresses of proposed participants, and an indication of the approximate time desired for their presentation.

Open committee discussion. The panel will review data submitted pursuant to the over-the-counter (OTC) review's call for data for this panel (see also 21 CFR 330.10(a)(2)).

The panel will be reviewing, voting upon, and modifying the content of summary minutes and categorization of ingredients and claims.

Committee name	Date, time, and place	Type of meeting and contact person
2. Gastrointestinal Drugs Advisory Committee.	Oct. 3 and 4, 9 a.m., Conference room G, Parklawn Bldg., 5600 Fishers Lane, Rockville, Md.	Open public hearing Oct. 3, 9 a.m. to 10 a.m.; open committee discussion Oct. 3, 10 a.m. to 5 p.m., Oct. 4, 9 a.m. to 1 p.m.; Joan C. Standaert (HFD-110), 5600 Fishers Lane, Rockville, Md. 20857, 301-443-4730.

General function of the committee. Reviews and evaluates available data concerning the safety and effectiveness of marketed and investigational prescriptional drugs for use in gastrointestinal diseases.

Agenda—Open public hearing. Any interested persons may present data, information, or views, orally or in writing, on issues pending before the committee.

Open committee discussion. Discussion on Chenodeoxycholic Acid (IND 11,134) (Update—National Cooperative Gallstone Study); Metaclopramide Injectable (NDA 17-862, A. H. Robins); and the FDA action report on final guidelines for Fogarty International Symposium.

Committee name	Date, time, and place	Type of meeting and contact person
3. General Hospital and Personal Use Device Classification Panel.	Oct. 3 and 4, 9 a.m., room 425, 8757 Georgia Ave., Silver Spring, Md.	Open public hearing Oct. 3, 9 a.m. to 10 a.m.; open committee discussion Oc. 3, 10 a.m. to 5 p.m., Oct. 4, 9 a.m. to 5 p.m.; William C. Dierksheide, Ph. D. (HFK-440), 8757 Georgia Ave., Silver Spring, Md. 20910, 301-427-7234.

General function of the committee. Reviews and evaluates available data concerning the safety and effectiveness of devices currently in use and makes recommendations for their regulation.

Agenda—Open public hearing. Interested parties are encouraged to present information pertinent to the classification of general hospital and personal use devices to the executive secretary. Submission of data relative to tentative classification findings is also invited. Those desiring to make formal presentations should notify the executive secretary by September 26, 1977, and submit a brief statement of the general nature of the evidence or arguments they wish to present, the names and addresses of proposed participants, references to any data to be relied on, and also an indication of the approximate time required to make their presentation.

Open committee discussion. The panel will review classification recommendations for the following devices: Fiber absorbent; absorbent tipped applicator; neonatal invasive oxygen analyzer; newborn urine collection bag; ostomy drainage bag with adhesive; elastic bandage; emesis basin; AC-powered bed; hydraulic bed; manual bed; pediatric open bed; tiltable cradle bed; AC-powered water flotation bed; neonatal open bed with radiant heat; bedpan; abdominal binder; perineal binder; bed board; cardiopulmonary resuscitation board; hot/cold water bottle; vacuum collection bottle; aerator cabinet; nasal cannula; examination cape; intravascular catheter; umbilical artery catheter; blood-donor chair; geriatric chair; wheeled geriatric chair; examination and treatment chair; patient care reverse isolation chamber; recirculating filter room air cleaner; ultrasonic cleaner; adhesive strip skin closure; specimen collector; manual external cardiac compressor; powered external cardiac compressor; mattress cover; inflation cuff; ring cutter; tongue depressor; occlusion devices; dressing; infusion line filter; patient examination glove; sugrical glove; operating room gown; infant oxygen hood; neonatal incubator; neonatal transport incubator; biological sterilization indicator; physical/chemical sterilization indicator; (IR) heat lamp; operating room lamp; blood lancet; jet lavage; patient lift; overhead boom patient lift; aneroid blood pressure manometer; mercury blood pressure manometer; spinal pressure manometer; oxygen mask; venturi oxygen mask; alternating pressure air flotation mattress; heated water mattress; silicone mattress and chair cushions; invasive neonatal blood pressure monitor; ultrasonic/doppler neonatal blood pressure monitor; neonatal heart rate monitor; electronic gravity flow infusion line monitor; nursery respiratory/apnea monitor; all types hollow lumen needles; special lambs nipple; chemical cold pack; chemical hot pack; neonatal eye pad; electric heating pad; kelley pad, prophylactic (condom); skin pressure protector; infusion pump; manual cuff inflating air pump; U.V. air purifier; mechanical oxygen regulator; vacuum regulator; neonatal ventilator respirator; protective restraint; manual pulmonary resuscitator; patient rollers; AC-powered patient rollers; mechanical bedpan sanitizer; body weight scale; patient scale; sponge scale; general hospital scissors; intravascular administration set; sterile burn sheet; gas sterilizer; steam sterilizer; DC-powered stethoscope; mechanical stethoscope; elastic stocking; stopcock; hand carried stretcher; wheeled stretcher; scrotal support; piston syringe; AC-powered operating room table; manual operating room table; pediatric aerosol tent; clinical color change thermometer; clinical electronic thermometer; mercury/clinical thermometer; suction tip; feeding tube; levine tube; fluid delivery intravascular tubing; laminar airflow unit; surgical patient isolation unit; perfusion unit; sterilization wrap.

Committee name	Date, time, and place	Type of meeting and contact person
4. Biologic Effects of Ultrasound Subcommittee of the Obstetrical and Gynecological Device Classification Panel.	Oct. 4, 9 a.m., room 6821, FB-8, 200 C St. SW., Washington, D.C.	Open public hearing/open committee discussion 9 a.m. to 4 p.m.; Lillian Yin, Ph. D. (HFK-440), 8757 Georgia Ave., Silver Spring, Md. 20910, 301-427-7555.

General function of the committee. Reviews and evaluates available data concerning the safety and effectiveness of devices currently in use and makes recommendations for their regulation.

Agenda—Open public hearing/open committee discussion. Richard Asofsky, M.D., will discuss "Differentiation in the Immune System"; J. Donald Hare, M.D., and Edwin Carstenson, Ph. D., will discuss "Immunological Effects of Ultrasound"; Andrew A. Monjan, Ph. D., will discuss "Stress Induced Modulation of the Immune Response"; and Melvin Stratmeyer, Ph. D., Bureau of Radiological Health, will discuss "Possible Immune Effects in Mice Following Exposure to Diagnostic Levels of Ultrasound." Interested parties are encouraged to present information pertinent to the effect of ultrasound on immunological response to the executive secretary. Submission of data relative to tentative classification findings is also invited. Those desiring to make formal presentations should notify the executive secretary by September 27, 1977, and submit a brief statement of the general nature of the evidence or arguments they wish to present, the names and addresses of proposed participants, references to any data to be relied on, and also an indication of the approximate time required to make their presentation.

Committee name	Date, time, and place	Type of meeting and contact person
5. Clinical Toxicology Device Classification Panel.	Oct. 6 and 7, 8 a.m., room 425, 8757 Georgia Ave., Silver Spring, Md.	Open public hearing Oct. 6, 8 a.m. to 9 a.m.; open committee discussion Oct. 6, 9 a.m. to 5 p.m., Oct. 7, 8 a.m. to 5 p.m.; Srikrishna Vadlamudi, Ph. D., D.V.M. (HFK-440), 8757 Georgia Ave., Silver Spring, Md. 20910, 301-427-7234.

General function of the committee. Reviews and evaluates available data concerning the safety and effectiveness of devices currently in use and makes recommendations for their regulation.

Agenda—Open public hearing. Interested parties are encouraged to present information pertinent to products listed below to the executive secretary. Submission of data relative to tentative classification findings is also invited. Those desiring to make formal presentations should notify the executive secretary by September 29, 1977, and submit a brief statement of the general nature of the evidence or argumefits they wish to present, the names and addresses of proposed participants, references to any data to be relied on, an dalso an indication of the approximate time required to make their presentation.

Open committee discussion. The panel will review and comment on the reclassification petition under section 513(f)(2) of the Federal Food, Drug, and Cosmetic Act, by the following companies on their products: (1) Diagnostic Products Corp., Los Angeles, Calif. (Amikacin Kit); (2) Becton, Dickinson and Co., Washington, D.C. (Amisak); (3) P. L. Biochemicals, Inc., Milwaukee, Wis. (Quantitative Test for Gentamicin); and (4) the Syva Co., Palo Alto, Calif. (Emit: Theophylline and Lidocaine Assays). The panel will review classification results for consistency with the Medical Device Amendments of 1976. The panel will also review supplementary data sheets for all products classified at previous meetings.

Committee name	Date, time, and place	Type of meeting and contact person
6. Radiopharmaceutical Advisory Committee.	Oct. 6 and 7, 9 a.m., Conference room A, Parklwan Bldg., 5600 Fishers Lane, Rockville, Md.	Open committee discussion Oct. 6, 9 a.m. to 1 p.m.; open public hearing Oct. 6, 1 p.m. to 2 p.m.; open committee discussion Oct. 6, 2 p.m. to 4 p.m., Oct. 7, 9 a.m. to 1 p.m.; G. Richard Grove, Ph. D. (HFD-150), 5600 Fishers Lane, Rockville, Md. 20857, 301-443-4250.

General function of the committee. Reviews and evaluates available data concerning the safety and effectiveness of marketed and investigational prescription drugs for use in the practice of nuclear medicine.

Agenda—Open public hearing. Any interested persons may present data, information, or views, orally or in writing, on issues pending before the committee.

Open committee discussion. Discussion of the major responsibilities of the Bureau of Medical Devices; safety and effectiveness of pediatric use of Sodium Pertechnetate Tc99m; objectives of the AIF/NBS Standards Program for Radiopharmaceutical Drugs; and the status report of Adverse Reaction and Product Defect Reporting Program.

8. Neurologic Drugs Advisory Committee.	Oct. 12, 9 a.m., Conference room, G-H, Parklawn Bldg., 5600 Fishers Lane, Rockville, Md.	Open public hearing 9 a.m. to 10 a.m.; open committee discussion 10 a.m. to 6 p.m.; Charles Pretzlyman (HFD-120), 5600 Fishers Lane, Rockville, Md. 20857, 301-443-3980.

General function of the committee. Reviews and evaluates available data concerning safety and effectiveness of marketed and investigational prescription drugs for use in neurologic diseases.

Agenda—Open public hearing. Any interested persons may present data, information, or views, orally or in writing, on issues pending before the committee.

Open committee discussion. Review of NDA for Sodium Valproate and treatment of multiple sclerosis with ACTH.

Committee name	Date, time, and place	Type of meeting and contact person
9. Orthotic Prosthetic Subcommittee of the Physical Medicine Device Classification Panel.	Oct. 13, 9 a.m., room 5160, HEW-N, 330 Independence Ave. SW., Washington, D.C.	Open public hearing 9 a.m. to 10 a.m.; open committee discussion 10 a.m. to 4 p.m.; Johnnie W. Bailey (HFK-470), 8757 Georgia Ave., Silver Spring, Md. 20910, 301-427-7238.

General function of the committee. Reviews and evaluates available data concerning the safety and effectiveness of devices currently in use and makes recommendations for their regulation.

Agenda—Open public hearing. Interested parties are encouraged to present information pertinent to classification of devices on the Physical Medicine Device Classification Panel list to the executive secretary. Submission of data relative to tentative classification findings is also invited. Those desiring to make formal presentations should notify the executive secretary by October 1, 1977, and submit a brief statement of the general nature of the evidence or arguments they wish to present, the names and addresses of proposed participants, references to any data to be relied on, and also an indication of the approximate time required to make their presentation.

Open committee discussion. The following devices will be reviewed for approval for the panel's final report to FDA of their classification results and recommendations: External limb prostheses and components; limb and truncal orthoses; mobility assist devices; prosthetic, orthotic and wheelchair accessories.

The following devices will be classified: Foot driving control; force measuring platform; and flotation cushion.

Committee name	Date, time and place	Type of meeting and contact person
10. National Advisory Food and Drug Committee.	October 13 and 14, 9 a.m., Conference Room J, Parklawn Bldg., 5600 Fishers Lane, Rockville, Md.	Open public hearing Oct. 13, 9 a.m. to 10 a.m.; open committee discussion Oct. 13, 10 a.m. to 4 p.m., Oct. 14, 9 a.m. to 1 p.m.; William V. Whitehorn, M.D. (HFG-1), 5600 Fishers Lane, Rockville, Md. 20857, 301-443-1547.

General function of the committee. Reviews and evaluates agency programs and advises on policy matters of national significance as they relate to the statutory mission of the Food and Drug Administration in the areas of food, drugs, cosmetics, medical devices, biological products, and electronic products. Reviews and makes recommendations on applications for grants-in-aid for research projects relevant to the mission of the Food and Drug Administration as required by law.

Agenda—Open public hearing/open committee discussion. Agenda items to be announced.

11. Physical Medicine Device Classification Panel.	October 14, 9 a.m., Room 5160, HEW-N, 330 Independence Ave. SW., Washington, D.C.	Open public hearing 9 a.m. to 10 a.m., open committee discussion 10 a.m. to 4 p.m.; Johnnie W. Bailey (HFK-470), 8757 Georgia Ave., Silver Spring, Md. 20910, 301-427-7238.

General function of the committee. Reviews and evaluates available data concerning the safety and effectiveness of devices currently in use and makes recommendations for their regulation.

Agenda—Open public hearing. Interested parties are encouraged to present information pertinent to classification of devices on the Physical Medicine Device Classification Panel list to the executive secretary. Submission of data relative to tentative classification findings is also invited. Those desiring to make formal presentations should notify the executive secretary by October 1, 1977, and submit a brief statement of the general nature of the evidence or arguments they wish to present, the names and addresses of proposed participants, references to any data to be relied on, and also an indication of the approximate time required to make their presentation.

Open committee discussion. Discussion of the panel's involvement under the premarket approval regulations—Dr. Keith Lusted, FDA/BMD.

The following devices will be classified: AC-powered exerciser, whole limb, active and active/passive.

The panel will review their final report to FDA of their classification results and recommendations.

Committee name	Date, time, and place	Type of meeting and contact person
12. Miscellaneous Internal Drug Products Panel.	Oct. 15, 16, and 17, 9 a.m., Holiday Inn, 8120 Wisconsin Ave., Bethesda, Md. (Oct. 15 and 16). Conference Room L, Parklawn Bldg., 5600 Fishers Lane Rockville, Md. (Oct. 17).	Open public hearing Oct. 15, 9 a.m. to 10 a.m.; open committee discussion Oct. 15, 10 a.m. to 4:30 p.m., Oct. 16 and 17, 9 a.m. to 4:30 p.m.; Arnond M. Welch (HFD-510), 5600 Fishers Lane, Rockville, Md. 20857, 301-443-4960.

General function of the committee. Reviews and evaluates available data concerning the safety and effectiveness of nonprescription drug products.

Agenda—Open public hearing. Any interested persons may present data, information, or views, orally or in writing, on issues pending before the committee. Those desiring to make formal presentations should notify the contact person before October 12, 1977, and submit a brief statement of the general nature of the data, information, or views they wish to present, the names and addresses of proposed participants, and an indication of the approximate time desired for their presentation.

Open committee discussion. The panel will review data submitted pursuant to the over-the-counter (OTC) review's call for data for this panel (see also 21 CFR 330.10(a)(2)).

The panel will be reviewing, voting upon, and modifying the content of summary minutes and categorization of ingredients and claims.

Kennedy (HFD-510), 5600 Fishers Lane, Rockville, Md. 20857, 301-443-4960.

General function of the committee. Reviews and evaluates available data concerning the safety and effectiveness of nonprescription drug products.

Agenda—Open public hearing. Any interested persons may present data, information, or views, orally or in writing, on issues pending before the committee. Those desiring to make formal presentations should notify the contact person before October 19, 1977, and submit a brief statement of the general nature of the data, information, or views they wish to present, the names and addresses of proposed participants, and an indication of the approximate time desired for their presentation.

Open committee discussion. The panel will review data submitted pursuant to the over-the-counter (OTC) review's call for data for this panel (see also 21 CFR 330.10(a)(2)).

The panel will be reviewing, voting upon, and modifying the content of summary minutes and categorization of ingredients and claims.

Committee name	Date, time, and place	Type of meeting and contact person
20. Vitamin, Mineral, and Hematinic Panel.	Oct. 31 and Nov. 1, 9 a.m., Conference room K, Parklawn Bldg., 5600 Fishers Lane, Rockville, Md.	Open public hearing Oct. 31, 9 a.m. to 10 a.m.; open committee discussion Oct. 31, 10 a.m. to 4:30 p.m., Nov. 1, 9 a.m. to 4:30 p.m.; Thomas D. DeCillis (HFD-510), 5600 Fishers Lane, Rockville, Md. 20857, 301-443-4960.

General function of the committee. Reviews and evaluates available data concerning the safety and effectiveness of nonprescription drug products.

Agenda—Open public hearing. Any interested persons may present data, information, or views, orally or in writing, on issues pending before the committee. Those desiring to make formal presentations should notify the contact person before October 27, 1977, and submit a brief statement of the general nature of the data, information, or views they wish to present, the names and addresses of proposed participants, and an indication of the approximate time desired for their presentation.

Open committee discussion. The panel will review data submitted pursuant to the over-the-counter (OTC) review's call for data for this panel (see also 21 CFR 330.10(a)(2)).

The panel will be reviewing, voting upon, and modifying the content of summary minutes and categorization of ingredients and claims.

FDA public advisory committee meetings may have as many as four separable portions: (1) An open public hearing, (2) an open committee discussion, (3) a closed presentation of data, and (4) a closed committee deliberation. Every advisory committee meeting shall have an open public hearing portion. Whether or not it also includes any of the other three portions will depend upon the specific meeting involved. There are no closed portions for the meetings announced in this notice. The dates and times reserved for the open portions of each committee meeting are listed above.

The open public hearing portion of each meeting shall be at least 1 hour long unless public participation does not last that long. It is emphasized, however, that the 1 hour time limit for an open public hearing represents a minimum rather that a maximum time for public participation, and an open public hearing may last for whatever longer period the committee chairman determines will facilitate the committee's work.

Meetings of advisory committees shall be conducted, insofar as is practical, in accordance with the agenda published in this FEDERAL REGISTER notice. Changes in the agenda will be announced at the beginning of the open portion of a meeting.

Any interested person who wishes to be assured of the right to make an oral presentation at the open public hearing portion of a meeting shall inform the contact person listed above, either orally or in writing, prior to the meeting. Any person attending the hearing who does not in advance of the meeting request an opportunity to speak will be allowed to make an oral presentation at the hearing's conclusion, if time permits, at the chairman's discretion.

Persons interested in specific agenda items to be discussed in open session may ascertain from the contact person the approximate time of discussion.

A list of committee members and summary minutes of meetings may be obtained from the Public Records and Documents Center (HFC-18), 5600 Fishers Lane, Rockville, Md. 20857, between the hours of 9 a.m. and 4 p.m., Monday through Friday. The FDA regulations relating to public advisory committees may be found in 21 CFR Part 14.

The Commissioner approves the scheduling of meetings at locations outside of the Washington, D.C. area on the basis of the criteria of 21 CFR 14.22 of FDA's regulations relating to public advisory committees.

Dated: September 8, 1977.

JOSEPH P. HILE,
Associate Commissioner for Compliance.

Health Resources Administration

NATIONAL COUNCIL ON HEALTH PLANNING AND DEVELOPMENT

Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), announcement is made of the following National Advisory body scheduled to assemble during the month of September 1977:

NAME: National Council on Health Planning and Development.

DATE AND TIME: September 23-24, 1977, 9 a.m.

PLACE: 1st Floor Auditorium, South Portal Building, 200 Independence Avenue, SW., Washington, D.C. 20201.

OPEN for entire meeting.

PURPOSE: The National Council on Health Planning and Development is responsible for advising and making recommendations with respect to: (1) the development of national guidelines under section 1501 of Pub. L. 93-641, (2) the implementation and administration of Title XV and XVI of Pub. L. 93-641, and (3) an evaluation of the implications of new medical technology for the organization, delivery, and equitable distribution of health care services. In addition, the Council advises and assists the Secretary in the preparation of general regulations to carry out the purposes of section 1122 of the Social Security Act and on policy matters arising out of the implementation of it, including the coordination of activities under that section with those under other parts of the Social Security Act or under other Federal or federally assisted health programs. The Council considers and advises the Secretary on proposals submitted by the Secretary under the provisions of section 1122(d)(2) that health care

V 42 177
SEP 13 77
UMI

facilities or health maintenance organizations be reimbursed for expenses related to capital expenditures notwithstanding that under section 1122(d)(1) there would otherwise be exclusion of reimbursement for such expenses.

Agenda: This meeting of the Council will primarily be devoted to planning the future work schedule: Organization of the Council and Discussion of Election of a Chairperson; Report on Health Planning; Report on Health Technology Issues; Report of Section 1526 and 1533 (d); and Discussion of DOD and VA Health Programs.

The meeting is open to the public for observation. A portion of the meeting will be available for comments and public participation. Anyone wishing to participate, obtain a roster of members, minutes of meeting, or other relevant information should contact Mr. Daniel I. Zwick, Office of Planning, Evaluation and Legislation, Room 10–22, Center Building, 3700 East-West Highway, Hyattsville, Md. 20782, telephone 301–436–7270.

Agenda items are subject to change as priorities dictate.

Dated: September 8, 1977.

NOTE.—Original notice of meeting, signed on August 23, 1977, was lost in the mail, thereby reducing time of public notice.

JAMES A. WALSH,
Associate Administrator for Operations and Management.

Office of the Secretary

NATIONAL HEALTH INSURANCE

Public Hearing

President Carter has pledged his Administration to submit to the Congress a proposal for National Health Insurance. As Secretary of Health, Education, and Welfare, I must formulate recommendations to the President on the Administration's program. In order to develop the best possible proposal for the President's consideration, the Department has undertaken a wide-ranging process of consultation.

I have established an advisory committee on National Health Insurance issues, and I have solicited advice from all members of Congress, every Governor, and more than 2,000 organizations and individuals with special interest or expertise in health matters. HEW Regional Offices will soon be engaged in a vigorous effort to obtain the views of other individuals and organizations throughout the country to supplement the Department's activities in Washington. Materials and studies prepared by HEW staff will also be available for comment by interested parties.

To provide a further forum for analysis and discussion of the critical issues involved in National Health Insurance, I have decided to chair personally a public hearing so that concerned citizens can advise me of their views on the many issues involved. This hearing will be conducted as a legislative-type hearing, and will be held on Tuesday, October 4, 1977, at the HEW North Building Auditorium, 330 Independence Avenue SW., Washington, D.C. The hearing schedule will be from 8:30 a.m. to 1 p.m. and from 2 p.m. to 6 p.m. We will try to assure a fair opportunity for proponents of all positions to present their views.

Requests to testify will be accepted from public officials, representatives of civic, public interest, professional or trade organizations, and concerned citizens. Time allotments will be governed by the number of requests received, but will not exceed 10 minutes for each participant. If the requests exceed the available time, the Department will select witnesses to provide a broad range of views.

Any public official, representative of an organization, or other individual desiring to participate at the hearing should write directly to me on or before September 24, 1977, providing the following information:

1. Name.
2. Business address.
3. Telephone number during normal working hours.
4. Capacity in which presentation will be made (i.e., public official, organization representative, or citizen).
5. Principal issues to be addressed.
6. Time desired, which must be 10 minutes or less.
7. Text of presentation, if available, or summary of presentation.

In order to assure prompt handling of requests to testify, envelopes should be marked *National Health Insurance Hearing*, and should be addressed to Secretary of Health, Education, and Welfare, 200 Independence Avenue SW., Washington, D.C. 20201, or hand-delivered to Room 405F, Department of Health, Education, and Welfare, 200 Independence Avenue SW., Washington, D.C.

To aid in the process of identifying issues to be addressed, the Department will publish in the FEDERAL REGISTER, in the near future, a list of key issues and questions upon which comment and testimony might be based.

The public and press are invited to attend the hearing, which will be transcribed electronically. The transcription and all written submissions will become a part of the record in this proceeding.

Additionally, written statements may be offered by any person, including those who testified orally. Such statements should be submitted directly to me before November 1, 1977. They should be addressed to Secretary of Health, Education, and Welfare, National Health Insurance Statement, Room 405F, 200 Independence Avenue SW., Washington, D.C. 20201.

Dated: September 9, 1977.

JOSEPH A. CALIFANO, JR.,
Secretary of Health, Education, and Welfare.

PRESIDENT'S COMMITTEE ON MENTAL RETARDATION

Meeting

The President's Committee on Mental Retardation was established by Executive Order to provide advice and assistance in the area of mental retardation to the President including evaluation of the adequacy of the national effort to combat mental retardation; coordination of activities of Federal agencies; provision of adequate liaison between foundations and other private organizations; and development of information designed for dissemination to the general public.

The Committee in cooperation with the Department of Special Education, Norfolk State College will meet on October 10, 11, and 12, 1977, 9 a.m. to 4 p.m., at Norfolk State College, Norfolk, Va. At the meeting the Committee and Norfolk State College will discuss the issues and necessary action to reduce the prevalence of mental retardation associated with social disadvantage to the lowest level possible by the end of this century.

These meetings are open to the public. Further information on the President's Committee on Mental Retardation may be obtained from Mr. Fred J. Krause, Executive Director, President's Committee on Mental Retardation, Room 2614, ROB No. 3, 7th and D Streets SW., Washington, D.C. 20201, telephone: area code 202–245–7634.

Dated: September 1, 1977.

FRED J. KRAUSE,
Executive Director, President's Committee on Mental Retardation.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of Assistant Secretary for Housing—Federal Housing Commissioner

[Docket No. D-77-493]

ACTING ASSISTANT SECRETARY FOR HOUSING—ACTING FEDERAL HOUSING COMMISSIONER

Designation

Section A.—Designation. The officials appointed to, or designated to serve as Acting during a vacancy in the following positions are hereby designated to serve as Acting Assistant Secretary for Housing—Acting Federal Housing Commissioner during the absence of the Assistant Secretary for Housing—Federal Housing Commissioner with all the powers, functions, and duties delegated or assigned to the Assistant Secretary for Housing—Federal Housing Commissioner: *Provided*, That no official is authorized to serve as Acting Assistant Secretary for Housing—Acting Federal Housing Commissioner unless all other officials whose appointed, or designated Acting, position titles precede his in this designation are unable to act by reason of absence:

1. Deputy Assistant Secretary for Housing—Deputy Federal Housing Commissioner.
2. Deputy Assistant Secretary for Insured and Direct Loan Programs.
3. Deputy Assistant Secretary for Assisted Housing.
4. Director, Office of Policy Development and Evaluation.
5. Director, Office of Management.

Section B.—Authorization. Each head of an organizational unit of Housing is authorized to designate an employee under his jurisdiction to serve as Acting during the absence of the head of the unit.

Section C.—Supersedure. This designation supersedes the designation of Acting Assistant Secretary for Housing—Acting Federal Housing Commissioner published at 41 FR 55243, December 17, 1976. (Secretary's delegation of authority to designate Acting officials, 36 FR 5004, March 16, 1971.)

Effective date. This designation to serve as Acting Assistant Secretary for Housing—Acting Federal Housing Commissioner is effective as of April 5, 1977.

Issued at Washington, D.C., September 1, 1977.

LAWRENCE B. SIMONS,
Assistant Secretary for Housing—Federal Housing Commissioner.

Office of Interstate Land Sales Registration

[Docket Nos. N-77-798, 77-119-IS]

LAKE SURF, LAKE SURF, INC., AND A. B. HARDEE

Hearing

Pursuant to 15 U.S.C. 1706(e) and 24 CFR 1720.165(b) Notice is hereby given that:

1. Lake Surf, Lake Surf, Inc., and A. B. Hardee, President, its officers and agents, hereinafter referred to as "Respondents", being subject to the provisions of the Interstate Land Sales Full Disclosure Act (Pub. L. 90–448) (15 U.S.C. 1701, et seq.) received a Notice of Proceedings and Opportunity for Hearing dated July 8, 1977, which was sent to the developer pursuant to 15 U.S.C. 1706(b), 24 CFR 1701.45(a)(1) and 1720.120 based on information obtained by the Office of Interstate Land Sales Registration showing that the Statement of Record and Property Report for Lake Surf, located in Moor County, N.C., contain untrue statements of material fact or omit to state material facts required to be stated herein or necessary to make the statements therein not misleading.

2. The Respondent filed an Answer received July 28, 1977, in response to the Notice of Proceedings and Opportunity for Hearing.

3. In said Answer the Respondent requested a hearing on the allegations contained in the Notice of Proceedings and Opportunity for Hearing.

4. Therefore, pursuant to the provisions of 15 U.S.C. 1706(d) and 24 CFR 1720.160(d): *It is hereby ordered*, That a public hearing for the purpose of taking evidence on the questions set forth in the Notice of Proceedings and Opportunity for Hearing will be held before Judge James W. Mast, in Room 7143, Department of HUD, 451 Seventh Street SW., Washington, D.C., on Septmeber 28, 1977, at 10 a.m.

5. The following time and procedure is applicable to such hearing: The parties are directed to file all affidavits and a list of all witnesses with the Hearing Clerk, HUD Building, Room 10278, Washington, D.C. 20410, on or before September 7, 1977. Copies of all documents filed should be served at the same time on all parties of record.

6. The Respondent is hereby notified that failure to appear at the above scheduled hearing shall be deemed a default and the proceedings shall be determined against Respondent, the allegations of which shall be deemed to be true, and an order Suspending the Statement of Record, herein identified, shall be issued pursuant to 24 CFR 1710.45(b)(1).

This Notice shall be served upon the Respondent forthwith pursuant to 24 CFR 1720.440.

Dated: August 12, 1977.

By the Secretary.

JAMES W. MAST,
Chief, Administrative Law Judge.

[FR Doc.77-26559 Filed 9-12-77;8:45 am]

[Docket Nos. N-77-797, 77-116-IS]

OAK MEADOWS, PARSEL II, OAK MEADOWS, INC., AND FLOYD A. MEGEE

Hearing

Pursuant to 15 U.S.C. 1706(e) and 24 CFR 1720.165(b)

Notice is hereby given that:

1. Oak Meadows, Parcel II, Oak Meadows, Inc., and Floyd A. Megee, President, its officers and agents, hereinafter referred to as "Respondent", being subject to the provisions of the Interstate Land Sales Full Disclosure Act (Pub. L. 90–448) (15 U.S.C. 1701, et seq.) received a Notice of Proceedings and Opportunity for Hearing dated July 7, 1977, which was sent to the developer pursuant to 15 U.S.C. 1706(b), 24 CFR 1701.45(a)(1) and 1720.120 based on information obtained by the Office of Interstate Land Sales Registration showing that the Statement of Record and Property Report for Sussex County, Del., contain untrue statements of material fact or omit to state material facts required to be stated therein or necessary to make the statements therein not misleading.

2. The Respondent filed an Answer received August 2, 1977, in response to the Notice of Proceedings and Opportunity for Hearing.

3. In said Answer the Respondent requested a hearing on the allegations contained on the Notice of Proceedings and Opportunity for Hearing.

4. Therefore, pursuant to the provisions of 15 U.S.C. 1706(d) and 24 CFR 1720.160(d): *It is hereby ordered*, That a public hearing for the purpose of taking evidence on the questions set forth in the Notice of Proceedings and Opportunity for Hearing will be held before Judge James W. Mast, in Room 7143, Department of HUD, 451 Seventh Street SW., Washington, D.C., on September 15, 1977, at 10 a.m.

5. The following time and procedure is applicable to such hearing: The parties are directed to file all affidavits and a list of all witnesses with the Hearing Clerk, HUD Building, Room 10278, Washington, D.C. 20410, on or before September 2, 1977. Copies of all documents filed should be served at the same time on all parties of record.

6. The Respondent is hereby notified that failure to appear at the above scheduled hearing shall be deemed a default and the proceedings shall be determined against Respondent, the allegations of which shall be deemed to be true, and an order Suspending the Statement

V 42 177 SEP 13 77 UMI

of Record, herein identified, shall be issued pursuant to 24 CFR 1710.45(b)(1).

This Notice shall be served upon the Respondent forthwith pursuant to 24 CFR 1720.440.

Dated: August 12, 1977.

By the Secretary.

JAMES W. MAST,
Chief Administrative Law Judge.

[Docket Nos. N-77-799, 77-98-IS]

VISTA GRANDE ESTATES I AND II, W. J. LOWELLS, AND BETTY LOWELLS

Hearing

Pursuant to 15 U.S.C. 1706(c) and 24 CFR 1720.165(b) Notice is hereby given that:

1. Vista Grande Estates I and II, W. J. Lowells, Owner and Betty Lowells, Owner authorized agents, hereinafter referred to as "Respondent", being subject to the provisions of the Interstate Land Sales Full Disclosure Act (Pub. L. 90-448) (15 U.S.C. 1701, et seq.) received a Notice of Proceedings and Opportunity for Hearing dated June 16, 1977, which was sent to the developer pursuant to 15 U.S.C. 1706(b), 24 CFR 1710.45(a)(1) and 1720.120 based on information obtained by the Office of Interstate Land Sale Registration showing that the Statement of Record and Property for Vista Grande Estates I and II, located in Yavapai County, Ariz., contain untrue statements of material fact or omit to state material facts required to be stated therein or necessary to make the statements therein not misleading.

2. The Respondent filed an Answer received July 6, 1977, in response to the Notice of Proceedings and Opportunity for Hearing.

3. In said Answer the Respondent requested a hearing on the allegations contained in the Notice of Proceedings and Opportunity for Hearing.

4. Therefore, pursuant to the provisions of 15 U.S.C. 1706(d) and 24 CFR 1720.160(d): *It is hereby ordered*, That a public hearing for the purpose of taking evidence on the questions set forth in the Notice of Proceedings and Opportunity for Hearing will be held before Judge James W. Mast, in Room 7143, Department of HUD, 451 Seventh Street SW., Washington, D.C., on September 23, 1977, at 10 a.m.

5. The following time and procedure is applicable to such hearing: The parties are directed to file all affidavits and a list of all witnesses with the Hearing Clerk, HUD Building, Room 10278, Washington, D.C. 20410, on or before September 8, 1977.

Copies of all documents filed should be served at the same time on all parties of record.

6. The Respondent is hereby notified that failure to appear at the above scheduled hearing shall be deemed a default and the proceedings shall be determined against Respondent, the allegations of which shall be deemed to be true, and an order Suspending the Statement of Record, herein identified, shall be issued pursuant to 24 CFR 1710.45(b)(1).

This Notice shall be served upon the Respondent forwith pursuant to 24 CFR 1720.440.

Dated: August 19, 1977.

By the Secretary.

JAMES W. MAST,
Chief Administrative Law Judge.

SOUTHWEST REGIONAL ADVISORY COMMITTEE

Meeting

Notice is hereby given in accordance with the Federal Advisory Committee Act that a meeting of the Southwest Regional Advisory Committee will be held at 8:30 a.m., C.D.T., September 27 and 28, 1977, at the Padre Island Beach Hotel at Padre Island National Seashore, Tex.

The Southwest Regional Advisory Committee was established pursuant to Pub. L. 91-383 to provide for the free exchange of ideas between the National Park Service and the public and to facilitate the solicitation of advise or other counsel from members of the public on programs and problems pertinent to the Southwest Region of the National Park Service.

The members of the Southwest Regional Advisory Committee are:

Dr. Nell Compton, Bentenville, Ark.
Mr. Ernie C. Deane, Fayetteville, Ark.
Mr. Perry A. Denton, Carlsbad, N. Mex.
Dr. Bertha P. Dutton, Santa Fe, N. Mex.
Mr. Sam R. Powell, Tulsa, Okla. (Chairman).
Mr. J. R. Singleton, Austin, Tex.
Mrs. Roulhac Toledano, New Orleans, La.
Mr. Elo J. Urbanovsky, Lubbock, Tex.

Designated Federal Officer to attend the meeting is John E. Cook, Regional Director, Southwest Region, National Park Service, or his designee.

The matters to be discussed at this meeting include:

1. The Barrier Beach Environment.
2. Management of National Seashores.
3. Water Safety in National Park Service Areas.

Tht meeting will be open to the public. However, facilities and space for accommodating members of the public are limited, and persons will be accommodated on a first-come, first-served basis. Any member of the public may appear before the Committee or file with the Committee a written statement concerning the matters to be discussed.

Persons wishing further information concerning this meeting, or who wish to submit written statements, may contact Frank Mentzer, Assistant to the Regional Director, P.O. Box 728, National Park Service, Southwest Regional Office, Santa Fe, N.Mex. 87501, telephone area code 505-988-6375. Minutes of the meeting will be available for public inspection four weeks after the meeting at the office of the Southwest Region.

Dated: August 30, 1977.

JOHN E. COOK,
Regional Director, Southwest Region, National Park Service.

INTERNATIONAL TRADE COMMISSION

[AA 1921-168]

PRESSURE SENSITIVE PLASTIC TAPE FROM WEST GERMANY

Determination of No Injury or Likelihood Thereof

On June 14, 1977, the United States International Trade Commission received advice from the Department of the Treasury that pressure sensitive plastic tape of more than 1⅜ inches in width and not exceeding 4 mils in thickness from West Germany is being, or is likely to be, sold in the United States at less than fair value within the meaning of the antidumping Act, 1921, as amended (19 U.S.C. 160(a)). Accordingly, on June 27, 1977, the Commission instituted investigation No. AA1921-168 under section 201(a) of said act to determine whether an industry in the United States is being or is likely to be injured, or is prevented from being established, by reason of the importation of such merchandise into the United States.

Notices of the institution of the investigation and of the public hearing held in connection therewith were published in the FEDERAL REGISTER on July 5, 1977, and July 20, 1977 (42 FR 34385 and 42 FR 37258). On August 9, 1977, a hearing was held in Washington, D.C., at which all persons who requested the opportunity were permitted to appear by counsel or in person.

In arriving at its determination, the Commission gave due consideration to all written submissions from interested parties and information adduced at the hearings as well as information obtained by the Commission's staff from questionnaires, personal interviews, and other sources.

On the basis of its investigation, the Commission has unanimously determined that an industry in the United States is not being and is not likely to be injured, and is not prevented from being established, by reason of the importation of pressure sensitive plastic tape of more than 1⅜ inches in width and not

V 42 177
SEP 13 77
UMI

exceeding 4 mils in thickness from West Germany that is being, or is likely to be, sold at less than fair value within the meaning of the Antidumping Act, 1921, as amended.

STATEMENT OF REASONS FOR THE NEGATIVE DETERMINATION OF VICE CHAIRMAN JOSEPH O. PARKER AND COMMISSIONERS GEORGE M. MOORE, CATHERINE BEDELL, AND ITALO H. ABLONDI

On June 14, 1977, the United States International Trade Commission received advice from the Department of the Treasury that pressure sensitive plastic tape more than 1⅜ inches in width and not exceeding 4 mils in thickness from West Germany is being, or is likely to be, sold in the United States at less than fair value (LTFV) within the meaning of the Antidumping Act, 1921, as amended (19 U.S.C. 160(a)). Accordingly, on June 27, 1977, the Commission instituted investigation No. AA1921-168 under section 201(a) of said act to determine whether an industry in the United States is being or is likely to be injured, or is prevented from being established, by reason of the importation of such merchandise into the United States.

In order to find in the affirmative in this investigation, the Commission must find that two conditions are satisfied. First, it must find that an industry in the United States is being or is likely to be injured or is prevented from being established.[1] Second, any injury or likelihood of injury must be by reason of the importation into the United States of the class or kind of foreign merchandise which Treasury has determined is being, or is likely to be, sold at LTFV within the meaning of the Antidumping Act, 1921, as amended.

DETERMINATION

On the basis of the information obtained in the investigation, we determine that an industry in the United States is not being and is not likely to be injured by reason of the importation of certain pressure sensitive plastic tape from West Germany which is being, or is likely to be, sold at LTFV.

THE IMPORTED ARTICLE AND THE DOMESTIC INDUSTRY

Pressure sensitive plastic tape more than 1⅜ inches in width and not exceeding 4 mils in thickness (PSP tape), the imported article which Treasury found to be sold at LTFV, is a plastic-film-backed tape with an adhesive on one side that remains permanently tacky at room temperature. The tape firmly adheres to a variety of surfaces upon mere contact, without the need of more than finger or hand pressure. No activation by water, solvent, or heat is required in order to obtain a strong adhesive holding force. PSP tape of the size and specifications which the Department of the Treasury determined is being or is likely to be sold at LTFV is used primarily in the sealing of corrugated boxes.

In making this determination we have considered the U.S. industry to consist of the facilities in the United States devoted to the production of PSP tape. There are nine known producers of such tape.

LTFV SALES

The Department of the Treasury examined sales of PSP tape from West Germany during the period February 1976 through August 1976. Three West German firms were found to have made sales at LTFV, but the weighted average LTFV margins found on sales by two of these firms were regarded by Treasury to be minimal (less than 1 percent). These two firms provided Treasury with assurances that further sales to the United States will be made at prices not less than fair value, and they were excluded from the Treasury determination. LTFV margins ranging from 1 to 13 percent were found on virtually all sales by the third West German firm. The weighted average margin of the LTFV sales was approximately 9 percent.

NO INJURY OR LIKELIHOOD OF INJURY BY REASON OF LTFV IMPORTS FROM WEST GERMANY

Notwithstanding our earlier decisions regarding injury or likelihood thereof to the domestic industry owing to LTFV imports of pressure sensitive plastic tape from Italy,[2] in the instant investigation we have made a negative determination because the second condition requisite for an affirmative determination has not been met. Specifically, we are unable to find that those sales caused any injury injury or likelihood thereof and LTFV imports from West Germany.

As noted above, only one West German manufacturer was found by Treasury to have made LTFV sales with sufficient margins to justify subjecting it to a LTFV determination. We cannot find that those sales caused any injury or threat thereof to the domestic industry within the meaning of the Antidumping Act, 1921, as amended. That firm's share of the U.S. market for pressure sensitive plastic tape declined by 25 percent from 1975 to 1976, the period in which Treasury found that the West German sales were made at LTFV. In January-May 1977, the company's market share dropped again by about 20 percent, compared with its share in the corresponding period in 1976.[3]

An analysis of prices for PSP tape in the U.S. market during 1975, 1976, and January-May 1977 showed that LTFV imports from West Germany were competitively priced, but were not a price leader.[4] Furthermore, the Commission could verify only one sale that a U.S. producer lost to tape imported from the West German supplier of LTFV imports.

CONCLUSION

The conditions mentioned above and the trends that they represent lead us to conclude that an industry in the United States is not being and is not likely to be injured by reason of the importation of pressure sensitive plastic tape more than 1⅜ inches in width and not exceeding 4 mils in thickness from West Germany which is being, or is likely to be, sold at LTFV within the meaning of the Antidumping Act, 1921, as amended.

STATEMENT OF REASONS OF NEGATIVE DETERMINATION OF CHAIRMAN DANIEL MINCHEW

On June 14, 1977, the United States International Trade Commission (Commission) received advice from the Department of Treasury (Treasury) that PSP tape from West Germany is being, or is likely to be, sold in the United States at less than fair value (LTFV) within the meaning of the Antidumping Act, 1921, as amended. Accordingly, on June 27, 1977, the Commission instituted investigation No. AA1921-168 under section 201(a) of the Act to determine whether an industry in the United States is being or is likely to be injured, or is prevented from being established, by reason of the importation of such merchandise into the United States.

Before the Commission may find in the affirmative in these investigations, it is necessary that the following two conditions be met:

(1) An industry in the United States is being or is likely to be injured, or is prevented from being established,[5] and

(2) The requisite injury must be by reason of the importation into the United States of the merchandise which Treasury has determined is being, or is likely to be, sold at LTFV within the meaning of the Antidumping Act, 1921, as amended.

DETERMINATION

On the basis of information obtained in this investigation, I have determined that an industry in the United States is not being injured and is not likely to be injured, nor is it prevented from being established, by reason of the importation of pressure sensitive plastic tape more than 1⅜ inches in width and not exceeding 4 mils in thickness from West Germany which is being, or is likely to be, sold at LTFV within the meaning of the Antidumping Act, 1921, as amended.

[1] Prevention of establishment of an industry is not an issue in this investigation and will not be discussed further.

[2] See Pressure Sensitive Plastic Tape From Italy: Determination * * * in Investigation No. AA1921-167 * * *, USTIC Publication 830, 1977.

[3] Vice Chairman Parker and Commissioner Ablondi note that this is in marked contrast to LTFV imports of PSP tape from Italy, which more than doubled from 1975 to 1976 and continued to increase in 1977.

[4] Vice Chairman Parker and Commissioner Ablondi note that during the same period Italian producers emerged as the downside price leaders, as evidenced by the fact that imports of PSP tape from Italy were priced below its domestic counterpart.

[5] Prevention of the establishment of an industry is not an issue in the instant investigation and will not be discussed further.

THE U.S. INDUSTRY

Pressure sensitive plastic tape more than 1⅜ inches in width and not exceeding 4 mils in thickness is the article which is the subject of this investigation. It is a plastic-film-backed tape that firmly adheres to a variety of surfaces upon contact. Its major use is as corrugated-box-sealing tape, but can also be used for the manufacture of printed labels, for tabbing, for color coding, and for label protection.

In considering what makes the U.S. industry, I have determined that it consists of the facilities in the United States devoted to the production of plastic tape more than 1⅜ inches in width and not exceeding 4 mils in thickness. There are nine known producers of this tape in the United States.

NO INJURY BY REASON OF LTFV IMPORTS

On August 31, 1977, the Commission reported to the Secretary of the Treasury that a U.S. industry was being or was likely to be injured by reason of the importation of pressure sensitive plastic tape of more than 1⅜ inches in width and not exceeding 4 mils in thickness from Italy that was being, or was likely to be, sold at less than fair market value within the meaning of the Antidumping Act, 1921, as amended.[1]

Along with Commissioner Bedell, I dissented from that position determining that there was no injury or likelihood of injury to an industry in the United States by reason of the importation of that article. In so finding, I, along with Commissioner Bedell, stated that "in our opinion the information gathered during the investigation indicates that an industry in the United States is not being injured. Furthermore, if the requisite injury had been established, there would be no persuasive indication that such injury was caused by LTFV imports."[2]

Further, with regard to likelihood of injury, we found that "the strong growth trends evidenced by the domestic industry lead us to believe that LTFV imports as described by Treasury are not likely to injure the domestic industry."[3]

As the U.S. industry in question in this investigation is identical to the one in the case involving pressure sensitive tape from Italy, and I found no injury in that industry within the last few days, it would not seem necessary to further discuss the question of injury. And, even if it could be shown that there was some injury, the even lower level of LTFV import penetration in this case, about one-half of that attained by the Italian supplier in 1975 would indicate even less likelihood that causation could be established.[4]

CONCLUSION

For the reasons stated above, I have concluded that an industry in the United States is not being injured and is not likely to be injured by reason of LTFV imports of pressure sensitive plastic tape from West Germany.

Issued: September 7, 1977.

By order of the Commission.

KENNETH R. MASON,
Secretary.

[FR Doc.77-26553 Filed 9-12-77;8:45 am]

[TA-201-23]

CERTAIN HEADWEAR

Report to the President

AUGUST 18, 1977.

To the President:

In accordance with section 201(d)(1) of the Trade Act of 1974, the United States International Trade Commission herein reports the results of an investigation relating to certain headwear.

The investigation (No. TA-201-23) was undertaken to determine whether headwear, knit or not knit, assembled from two or more cut pieces of fabric, of cotton, flax, or both, or of manmade fibers, provided for in items 702.06, 702.12, 702.14, 703.05, 703,10, and 703.15 of the Tariff Schedules of the United States (TSUS), and visors with straps, whether or not such straps are adjustable, designed to be worn on the head, knit or not knit, of cotton or of manmade fibers, provided for in TSUS items 382.00, 382.04, 382.06, 382.33, 382.78, and 382.81, are being imported into the United States in such increased quantities as to be a substantial cause of serious injury, or the threat thereof, to the domestic industry producing articles like or directly competitive with the imported articles.

The Commission instituted the investigation, under the authority of section 201(b)(1) of the Trade Act on February 22, 1977, following the receipt, on February 8, 1977, of a petition for import relief under section 201 of the Trade Act of 1974 (19 U.S.C. 2251) filed by the Empire State Cloth Hat and Cap Manufacturers Association and the United Hatters, Cap and Millinery Workers International Union.

The Commission held public hearings on this matter in New York City, on May 17, 1977, and in St. Louis, Mo., on May 26, 1977.

Notice of the institution of the investigation and of the scheduling of the public hearings was published in the FEDERAL REGISTER of February 28, 1977 (42 FR 11288). Notice of the amendment to the scope of the investigation was published in the FEDERAL REGISTER of March 21, 1977 (42 FR 15375).

The information for this report was obtained from field work and interviews by members of the Commission's staff, from other Federal agencies, from responses to the Commission's questionnaires, from information presented at the public hearings, from briefs submitted by interested parties, and from the Commission's files.

A transcript of the hearing and copies of briefs filed by interested parties in connection with the investigation are attached.[1]

DETERMINATION OF THE COMMISSION

On the basis of the investigation, the Commission (Vice Chairman Parker not participating) determines that headwear, knit or not knit, assembled from two or more cut pieces of fabric, of cotton, flax, or both, or of manmade fibers, provided for in items 702.06, 702.12, 702.14, 703.05, 703.10, and 703.15 of the Tariff Schedules of the United States (TSUS), and visors with straps, whether or not such straps are adjustable, designed to be worn on the head, knit or not knit, of cotton or of manmade fibers, provided for in TSUS items 382.00, 382.04, 382.06, 382.33, 382.78, and 382.81, are not being imported into the United States in such increased quantities as to be a substantial cause of serious injury, or the threat thereof, to the domestic industry producing articles like or directly competitive with the imported articles.

VIEWS OF COMMISSIONERS GEORGE M. MOORE, CATHERINE BEDELL, AND ITALO H. ABLONDI

On February 8, 1977, the United States International Trade Commission received a petition filed by the Empire State Cloth Hat and Cap Manufacturers Association and the United Hatters, Cap and Millinery Workers International Union requesting an investigation under section 201(b)(1) of the Trade Act of 1974 with respect to certain headwear. The petition was amended by the petitioners on February 18, 1977. On February 22, 1977, the Commission instituted an investigation pursuant to section 201(b)(1) of the Trade Act to determine whether head-

[1] Pressure Sensitive Plastic Tape From Italy, USITC Publication 830, August 1977.

[2] Ibid. p. 10.

[3] Ibid. p. 12.

[4] The share of U.S. apparent consumption of all types of PSP tape supplied by Braas, the only West German manufacturer with substantial LTFV margins, declined by about one-quarter from 1975 to 1976 and continued to decline in January-May, 1977, as contrasted with the Italian suppliers of LTFV imports whose share of U.S. consumption doubled from 1975 to 1976 and continued to increase in January-May, 1976.

[1] Attached to the original report sent to the President, and available for inspection at the U.S. International Trade Commission, except for material submitted in confidence.

V 42 177 SEP 13 77 UMI

wear, knit or not knit, assembled from two or more cut pieces of fabric, of cotton, flax, or both, or of manmade fibers, provided for in items 702.06, 702.12, 702.14, 703.05, 703.10, and 703.15 of the Tariff Schedules of the United States (TSUS), and visors with straps, whether or not such straps are adjustable, designed to be worn on the head, knit or not knit, of cotton or of manmade fibers, provided for in TSUS items 382.00, 382.04, 382.06, 382.33, 382.78, and 382.81,[1] are being imported into the United States in such increased quantities as to be a substantial cause of serious injury, or the threat thereof, to the domestic industry producing articles like or directly competitive with the imported articles.[2]

Before making an affirmative determination under section 201(b)(1) of the Trade Act, the Commission must find that all three of the following criteria are met:

(1) Imports of an article into the United States are increasing (either actually or relative to domestic production);

(2) The domestic industry producing an article like or directly competitive with the imported article is being seriously injured or threatened with serious injury; and

(3) Increased imports are a substantial cause (i.e., an important cause and not less than any other cause) of serious injury, or the threat thereof, to the domestic industry producing an article like or directly competitive with the imported article.

Because these criteria are cumulative, a finding that any one of them is not met requires a negative determination. In this case, we determine that the second criterion under section 201(b)(1) as set forth above has not been met, namely, the domestic industry producing articles like or directly competitive with the imported articles is not being seriously injured or threatened with serious injury.

THE DOMESTIC INDUSTRY

We have determined that the domestic industry in the present case consists of facilities in the United States devoted to the production of casual and sport headwear.

SERIOUS INJURY OR THREAT THEREOF

Examination of the performance of the producers of casual and sport headwear does not establish evidence of serious injury. In addition, the trends noted below demonstrate that despite increasing imports, there is no threat of serious injury at this time.

Domestic production of casual and sport headwear increased from 2.8 million dozen in 1972 to 5.6 million dozen in 1976. In terms of value of production, the industry realized an average annual average annual increase of 4.8 percent during the period 1972–76. By 1976 the value of production had reached $90.4 million, compared with $37.3 million in 1972.

In the aggregate, net sales of domestic producers providing usable profit-and-loss information to the Commission rose every year from 1972 to 1976. On the basis of figures supplied by the same firms, the ratio of net operating profit to net sales is also trending upward. In 1972 the ratio of net operating profit to net sales was 6.2 percent; by 1976, the ratio had climbed to 9.7 percent despite a decrease of less than 1 percent from the previous year when the ratio was 10.4 percent. Thus, the combined profit-and-loss statements of the producers reveal that even in 1976, when imports had achieved a 22-percent penetration of the market, these firms had higher combined net sales and operating profits than they did in 1972, when imports accounted for only 7.6 percent of the U.S. market.

The average number of persons employed in the production of casual and sport headwear has increased annually since 1972: The 1976 employment figure of 4,999 production workers is approximately 47 percent higher than the employment levels reported for 1972. Although there is evidence of a slight decline in the number of persons employed in the first quarter of 1977 as compared with the first quarter of 1976, the overall trend in employment is positive during years of increasing imports.

Price comparisons of casual and sport headwear must be qualified by the fact that there is extensive product differentiation in their lines. With this in mind, it is still apparent that there is no evidence of price depression or suppression. Average wholesale prices rose by 32 percent from 1972 to 1976, which is very healthy when compared with the 15 percent increase of prices in the apparel industry during the same period.

CONCLUSION

In view of the above, we have determined that the domestic casual and sport headwear industry is not being seriously injured or threatened with serious injury within the meaning of section 201(b)(1) of the Trade Act by increasing imports of the articles under investigation, and, therefore, we have made a negative determination.

VIEWS OF CHAIRMAN DANIEL MINCHEW

On February 22, 1977, the United States International Trade Commission (Commission) instituted an investigation under section 201 of the Trade Act of 1974 (Trade Act) to determine whether headwear, knit or not knit, assembled from two or more cut pieces of fabric, of cotton, flax, or both, or of manmade fibers, provided for in items 702.06, 702.12, 702.14, 703.05, 703.10, and 703.15 of the Tariff Schedules of the United States (TSUS), and visors with straps, whether or not such straps are adjustable, designed to be worn on the head, knit or not knit, of cotton or of manmade fibers, provided for in TSUS items 382.00, 382.04, 382.06, 382.33, 382.78, and 382.81, are being imported into the United States in such increased quantities as to be a substantial cause of serious injury, of the threat thereof, to the domestic industry producing articles like or directly competitive with the imported articles.

Section 201(b)(1) of the Trade Act requires that each of the following criteria is met before the Commission may recommend import relief:

(1) That imports of an article into the United States are increasing (either actually or relative to domestic production);

(2) That the domestic industry producing an article like or directly competitive with the imported article is being seriously injured or threatened with serious injury; and

(3) That increased imports are a substantial cause of serious injury, or the threat thereof, to the domestic industry producing an article like or directly competitive with the imported article.

The failure to satisfy any of these criteria, therefore, necessitates a negative determination.

THE DOMESTIC INDUSTRY

The "domestic industry," as defined in section 201(b)(1), consists of the domestic producers of "an article like or directly competitive with the imported article." Additionally, in considering what constitutes the domestic industry, section 201(b)(3) provides:

The Commission—

(A) May, in the case of a domestic producer which also imports, treat as part of such domestic industry only its domestic production,

(B) May, in the case of a domestic producer which produces more than one article, treat as part of such domestic industry only that portion or subdivision of the producer which produces the like or directly competitive article, and

(C) May, in the case of one or more domestic producers, who produce a like or directly competitive article in a major geographic area of the United States and whose production facilities in such area for such article constitute a substantial portion of the domestic industry in the United States and primarily serve the market in such area, treat as such domestic industry only that segment of the production located in such area.

It has been argued in this investigation that the Commission should consider the facilities devoted to the production of headwear, as noticed in the investigation, which are located in the New York or St. Louis/Kansas City areas, as geographic domestic industries as defined in section 201(b)(3)(C). In order to qualify as a "geographic" industry within the meaning of section 201(b)(3)(C), four specific conditions must exist:

1. One or more domestic producers must produce an article like or directly competitive with the imported articles under investigation in a major geographic area of the United States.

2. The production facilities of such domestic producers must constitute a substantial portion of the domestic industry.

3. Such domestic producers must primarily serve the market in such geographic area.

4. The subject imports must be concentrated in such geographic area.

The failure to satisfy any of these conditions rules out the consideration of an industry as being "geographic" under the statute.

Information obtained in the current investigation indicates that production facilities concentrated in two geographic areas—New York and St. Louis/Kansas City—supply the entire country with headwear. In addition, while imports enter the United States through several major ports, there is no evidence that the imports impact primarily in that area. Taking this information into account, I have concluded that the criteria for a "geographic" domestic industry have not been met.

I have concluded that the domestic industry consists of those facilities in the United States devoted to the production of headwear, as noticed in investigation TA–201–23.

DETERMINATION

Based on the information obtained in investigation TA–201–23, I have determined that headwear, knit or not knit, assembled from two or more cut pieces of fabric, of cotton, flax, or both, or of manmade fibers, provided for in items 702.06, 702.12, 702.14, 703.05, 703.10, and 703.15 of the Tariff Schedules of the United States, and visors with straps, whether or not such straps are adjustable, designed to be worn on the head, knit or not knit, of cotton or of manmade fibers, provided for in TSUS items 382.00, 382.04, 382.06, 382.33, 382.78, and 382.81, are not being imported into the United States in such increased quantities as to be a substantial cause of serious injury, or the threat thereof, to the domestic industry producing articles like or directly competitive with the imported articles.

Specifically, I have determined that the second criteria for an affirmative determination, i.e., that of serious injury or the threat thereof, has not been met. As the failure of any single criteria necessitates a negative determination, I will limit my discussion to serious injury or the threat thereof.

SERIOUS INJURY OR THE THREAT THEREOF

In determining whether the domestic industry is seriously injured, the Commission is directed, under section 201(b)(2) of the Trade Act, to take into account—

All economic factors which it considers relevant, including (but not limited to)—

(A) * * * the significant idling of productive facilities in the industry, the inability of a significant number of firms to operate at a reasonable level of profit, and significant unemployment or underemployment within the industry.

In determining whether the domestic industry is being threatened with serious injury, the Commission considers, in addition to the factors of serious injury, the following factors found in section 201(b)(2)(B):

* * * a decline in sales, a higher and growing inventory and a downward trend in production, profits, wages, or employment (or increasing underemployment) in the domestic industry concerned.

The ensuing discussion will consider both serious injury and the threat of serious injury together when possible.

Total U.S. production of casual and sport headwear has followed a steady trend upward from 2.8 million dozen in 1972, to 5.6 million dozen in 1976. Broken down by type of headwear, the figures show an upward trend in caps, hats and visors; with production in hats and visors decreasing very slightly in 1976. Domestic production of caps increased from 1.9 million dozen in 1972, to 4.2 million dozen in 1976, for an average annual increase of 22 percent. Domestic production of hats increased from 804 thousand dozen in 1972, to 1,141 thousand dozen, in 1974, before decreasing slightly to 1,060 thousand dozen in 1976. Production of visors increased from about 101 thousand dozen in 1972 to 380 thousand dozen in 1975 before decreasing to about 321 thousand dozen in 1976. The trends show a clear increase in production over the past five years.

U.S. producers' shipments of casual and sport headwear increased from 2.8 million dozen at $37.3 million in 1972, to 5.6 million dozen valued at $90.4 million in 1976, an average annual increase in quantity shipped of 18.9 percent. During the same period, the average unit value of producers' shipments rose steadily at an average rate of 4.8 percent.

Inventories are not an important consideration in the headwear industry, as production is usually undertaken on a direct order basis, which eliminates the need to carry large inventories of finished goods.

Employment in establishments in which casual and sport headwear are manufactured rose from 5,125 in 1972, to 7,896 in 1976. There appears to have been a slight decline in employment in the first quarter of 1977. The number of production workers producing casual and sport headwear increased from 3,389 in 1972, to 4,999 in 1976, before declining slightly in the first quarter of 1977. However, despite a marginal decline in employment in the first quarter of 1977, the trend of employment has been upward.

There appears to have been little evidence of pricing advantages in imported headwear, or at least of advantages passed along to the consumer, and there appears to have been little evidence of price suppression. From 1972 to 1976 the average wholesale prices for domestic caps, hats, and visors increased by an average annual rate of 6.7 percent, 7 percent, and 8.1 percent, respectively.

Net sales of headwear by U.S. producers increased annually throughout the period 1972–76, increasing from $50.4 million in 1972, to $100.1 million in 1976. Net operating profits increased steadily from $3.1 million in 1972 to $9.7 million in 1976. The ratio of net operating profit to net sales generally followed the same trend as that of dollar operating profits, rising from 6.2 percent in 1972, to 10.4 percent in 1975, before falling slightly to 9.7 percent in 1976.

The information obtained by the Commission indicates that certain producers of headwear have not done nearly as well as the above figures indicate.[4] However, as I have been unable to find that there is a "geographic" domestic industry, I am compelled to look at the industry as a whole. The factors discussed above lead me to the conclusion that the "serious injury or threat thereof" criterion is not met.

CONCLUSION

As stated earlier, I have determined that the requirements of section 201(b)(1) of the Trade Act have not been met, and I must therefore determine in the negative.

By order of the Commission.

Issued: September 8, 1977.

KENNETH R. MASON,
Secretary.

[FR Doc.77-26554 Filed 9-12-77;8:45 am]

[1] The headwear and visors described above will hereinafter be referred to as casual and sport headwear.

[2] Commissioners Moore and Bedell observe that the Commission did not consider the existence of the Arrangement Regarding International Trade in Textiles (MFA) and the bilateral agreements negotiated by the United States pursuant thereto as a legal bar to the conduct by the Commission of an investigation pursuant to section 201 of the Trade Act of 1974 since the MFA does not purport to preempt or preclude other possible remedies respecting textiles which are consistent with the provisions of the General Agreement on Tariffs and Trade. However, Commissioners Moore and Bedell note the applicability of the MFA and the bilateral agreements negotiated by the United States under article 4 of the MFA to the articles which are the subject of the Commission's escape clause investigation.

[4] While the Commission has determined that the domestic industry is not eligible for import relief under section 201, a number of the individual firms and employees may qualify for relief under other sections of the Trade Act.

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

ALMAR PHARMACY

Revocation of Registration

On August 16, 1976, the Administrator of the Drug Enforcement Administration (DEA) directed to Mr. Albert Marcovsky, as pharmacist and owner of Almar Pharmacy, an Order to Show Cause requesting the Respondent to show why his DEA Registration AA5944928 should not be revoked for the reason that on June 11, 1976, in the United State District Court for the Western District of Pennsylvania, Mr. Marcovsky had been convicted of seven counts of illegal distribution of controlled substances and with one related count of conspiracy to distribute controlled substances. On September 14, 1976, the Respondent through his attorney requested a hearing on the proposed revocation. At the conclusion of prehearing matters, a formal hearing was conducted on May 3, 1977, before Administrative Law Judge Francis L. Young.

Judge Young certified the entire record with his recommended findings of fact and conclusions of law and decision to the Administrator pursuant to 21 CFR 1316.65 on August 5, 1977. The Administrator, pursuant to 21 CFR 1316.66, hereby publishes his final order in this matter.

In reviewing Mr. Marcovsky's felony conviction relating to controlled substances, the Administrative Law Judge

V 42 I 177 SEP 13 77 UMI

found that between January and June of 1975, Almar Pharmacy became accountable for approximately 85,000 dosage units of methaqualone, a Schedule II narcotic drug. The pharmacy, however, was unable to properly account for the distribution of approximately 24,000 of the 85,000 dosage units. Of the dosage units distributed and accounted for by the Respondent, 22,800 units of methaqualone had allegedly been distributed to two boarding homes for the elderly. Both the operators of the two boarding homes and the elderly residents, however, failed to indicate that they had received methaqualone in any amount close to the quantities represented by the Respondent's records.

The Respondent's records showed that the distribution of methaqualone to the two boarding homes was based on prescriptions signed by a Dr. Elias Yurek. The Administrative Law Judge found that Dr. Elias Yurek would usually come to the Respondent's pharmacy and while in the pharmacy prepare the prescriptions for the two boarding homes which were then filled one hundred percent of the time by the Respondent. Dr. Yurek's prescriptions for methaqualone were all prepared simultaneously at approximately the same time each month between January and June of 1975. The prescriptions were made out to everyone residing in the two boarding homes including the home operators and family members. Each months prescriptions were sequentially numbered with approximately 50 prescriptions going to each home with each prescription made out for 50 tablets of methaqualone. Faced with the felony conviction at the administrative hearing on this matter the Respondent indicated that he believed he had done nothing wrong with respect to his conspiratorial association with Dr. Elias Yurek and his illegal distribution of methaqualone.

The Respondent's felony conviction also centered around the sale of 300 methaqualone tablets for $350.000 to a confidential government informant. The sale occurred on three prescriptions, two of which were forged copies of an original. The Respondent was convicted of distributing 200 of the methaqualone tablets under the forged prescriptions At the time of this sale the legitimate price for methaqualone was approximately $15–$16 per hundred. After the Respondent filled the three prescriptions he gave the two copies back to the confidential informant. The Respondent testified at his hearing that when he received $350.-00 for the 300 methaqualone tablets the only thought which occurred to him was that the individual must have needed the pills badly.

In his recommended opinion the Administrative Law Judge finds that in light of the Respondent's past conduct he should not be permitted to dispense controlled substances in a pharmacy. Therefore, Judge Young recommends that the pharmacy registration be revoked.

The Administrator adopts the findings and recommendations of the Administrative Law Judge and upon consideration of the entire record in this matter and pursuant to the authority vested in the Attorney General and redelegated to the Administrator of the Drug Enforcement Administration, the Administrator hereby orders that the registration issued to Almar Pharmacy, Albert Marcovsky, owner, under registration number AA59-44928 be revoked, effective immediately.

Dated: September 6, 1977.

PETER B. BENSINGER,
Administrator.

Office of the Secretary

U.S. V. U.S. STEEL CORP.

Proposed Consent Decree In Action To Enjoin Discharge of Air Pollutants

In accordance with Departmental Policy, 28 CFR 50.7, 38 FR 19029, notice is hereby given that on September 1, 1977, a proposed consent decree in *United States of America* v. *United States Steel Corp.*, was lodged with the District Court for the Northern District of Illinois, Eastern Division. The proposed decree would require defendant to bring a sinter plant at its integrated steel mill in Chicago into compliance with the particulate standard of the Illinois air pollution abatement implementation plant over a 32-month six-step time period through the addition of a wet electrostatic precipitator pollution control device. Liquidated damages are applicable if compliance is not achieved.

The Department of Justice will receive on or before October 13, 1977, written comments relating to the proposed judgment. Comments should be addressed to the Assistant Attorney General of the Land and Natural Resources Division, Department of Justice, Washington, D.C. 20530, and refer to *United States of America* v. *United States Steel Corp.*, D.J. Ref. 90-5-2-3-806.

The proposed consent decree may be examined at the office of the United States Attorney, 219 South Dearborn Street, Chicago, Ill. 60604, at the Region V Office of the Environmental Protection Agency, Enforcement Division, 230 South Dearborn Street, Chicago, Ill. 60606 and at the Pollution Control Section, Land and Natural Resources Division of the Department of Justice, Room 2629, Department of Justice Building, Ninth Street and Pennsylvania Avenue NW., Washington, D.C. 20530. A copy of the proposed consent judgment may be obtained in person or by mail from the Pollution Control Section, Land and Natural Resources Division of the Department of Justice.

JAMES W. MOORMAN,
Acting Assistant Attorney General, Land and Natural Resources Division.

BUSINESS RESEARCH ADVISORY COUNCIL'S COMMITTEE ON CONSUMER AND WHOLESALE PRICES

Meeting

The BRAC Committee on Consumer and Wholesale Prices will meet at 9:30 a.m., September 29, 1977, at the General Accounting Office Building, 441 G Street NW., Room 4454, Washington, D.C. The agenda for the meeting is as follows:

1. The new CPI weights for both the "W" and the "U" indexes. This material should include the technique used to move from 1972–73 survey data to the final weights.
2. The WPI revision.
3. Export and import prices.
4. A report on the reaction to the Committee's suggestions on the Family Budget series.

This meeting is open to the public. It is suggested that persons planning to attend this meeting as observers contact Kenneth G. Van Auken, Executive Secretary, Business Research Advisory Council on (Area Code 202) 523–1559.

Signed at Washington, D.C. this 8th day of September 1977.

JULIUS SHISKIN,
Commissioner of Labor Statistics.

Office of Federal Contract Compliance Programs

HAHN & CLAY, MACHINE & BOILER WORKS, INC.

Debarment and Contract Compliance

Notice hereby is given that for violating Executive Order 11246, as amended, all existing United States Government contracts and subcontracts with Hahn & Clay, Machine & Boiler Works, Inc., Houston, Tex., are cancelled and the Company (its divisions and subsidiaries, and any and all purchasers, successors, assignees, and/or transferees), is declared ineligible for further contracts or subcontracts funded in whole or in part with Federal funds, and for extensions or other modifications of any such existing contracts or subcontracts until such time as the Company has satisfied the Director, Office of Federal Contract Compliance Programs, that it has established and will carry out employment policies and practices in compliance with Executive Order 11246, as amended, and the implementing rules and regulations of the Secretary of Labor. This action is predicated upon Hahn & Clay's violations of 41 CFR 60–1.32.

The debarment and contract cancellation also apply but are not limited to, the following Hahn & Clay division or subsidiary: Houston Column Co., Houston, Tex.

A copy of my Decision is enclosed for publication in the FEDERAL REGISTER.

Dated: August 31, 1977.

WELDON J. ROUGEAU,
Director, OFCCP.

UNITED STATES DEPARTMENT OF LABOR; OFFICE OF FEDERAL CONTRACT COMPLIANCE PROGRAMS

[Case No. OFCC–DSA]

DECISION BY THE DIRECTOR OF OFCCP

In the Matter of Hahn & Clay and Defense Supply Agency.

After a hearing in the above-captioned matter, Administrative Law Judge Burton S. Sternburg found that Hahn & Clay, Machine & Boiler Works, Inc., Houston, Tex., had violated its contractual obligations pursuant to 41 CFR Part 60–1.32 of the Secretary of Labor's regulations implementing Executive Order 11246, as amended, and recommended that with respect to Hahn & Clay, any and all existing United States Government contracts and subcontracts be cancelled and terminated, and further that Hahn & Clay be declared ineligible for further contracts and subcontracts with the United States Government. Subsequently, the Assistant Secretary of Defense for Manpower Reserve Affairs and Logistics forwarded a proposed cancellation and debarment order to the Director of the Office of Federal Contract Compliance Programs.

In accordance with the powers granted to the Director, Office of Federal Contract Compliance Programs by Title 41, Code of Federal Regulations Sections 60–1.26, 60–1.27 (1976) and 60–30.30(b), as amended January 18, 1977 (42 FR 3467) of the Secretary of Labor's regulations issued pursuant to Executive Order 11246, as amended, I hereby approve the debarment of Hahn & Clay, Machine & Boiler Works, Inc.; its divisions and subsidiaries and any and all purchasers, successors, assignees, and/or transferees, from the award of any contract or subcontract funded in whole or in part with Federal funds, and from extensions or other modifications of any such existing contracts or subcontracts. Further, all existing United States Government contracts and subcontracts with Hahn & Clay Machine & Boiler Works, Inc., and its divisions and subsidiaries are hereby cancelled and terminated.

The debarment will continue in effect until such time as Hahn & Clay has satisfied the Director, Office of Federal Contract Compliance Programs, that it has established and will carry out employment policies and practices in compliance with the equal opportunity clause of Executive Order 11246, as amended.

This debarment and contract and subcontract cancellation shall be effective as of this date and shall also apply, but is not limited to, the following Hahn & Clay division or subsidiary: Houston Column Co., Houston, Tex.

The company also is ordered to pay to the Office of Federal Contract Compliance Programs, for delivery to Lorenzo Garcia, back pay in the amount of $1,226.80 plus 6 percent interest.

Attached hereto and made a part hereof is the Recommended Decision and Order of Administrative Law Judge, Burton S. Sternburg.

Signed at Washington, D.C., this 31st day of August 1977.

WELDON J. ROUGEAU,
Director, OFCCP.

[Case No. OFCC–DSA]

In the Matter of Hahn & Clay and Defense Supply Agency.

Karl E. Kraft, Esquire, Bobbitt & Kraft, 640 Capital National Bank Building, Houston, Tex. 77002, for Hahn & Clay.

Faith F. Emory, Esquire, Joseph O. Collins, Esquire, DCRT–L, DOASR, Dallas, 500 South Ervay, Dallas, Tex. 75201, for the Defense Supply Agency.

Before: Burton S. Sternburg, Administrative Law Judge.

RECOMMENDED DECISION AND ORDER

STATEMENT OF THE CASE

This is a proceeding under Executive Order 11246, as amended (hereinafter called the Order) and the applicable rules and regulations promulgated thereunder by the Secretary of Labor (41 CFR Chapter 60). Pursuant to 41 CFR 60–1.26(b), on July 12, 1976, the Defense Supply Agency notified Hahn & Clay that it was not in compliance with the Order and applicable rules and regulations because its Affirmative Action Program (AAP) was deficient in certain respects and because it had discriminatorily discharged employee Lorenzo Garcia for a filing a charge with the Equal Employment Opportunity Commission. On the basis of the foregoing, the Defense Supply Agency proposed cancellation of Hahn & Clay's contracts with the United States Government and debarment from any future such contracts.[1]

In accordance with the above-mentioned notice dated September 3, 1976, a hearing was held before the undersigned Administrative Law Judge on October 26 and 27, 1976, in Houston, Tex.[2] Evidence was received as to whether or not employee Lorenzo Garcia's action in filing an EEO complaint played any part in his subsequent discharge from Hahn & Clay.[3] All parties were represented by Counsel and were afforded full opportunity to be heard, to adduce evidence and to examine and cross-examine witnesses. Opportunity was also afforded the parties to argue orally at the hearing and to file briefs, proposed findings of fact, and conclusions of law on or before December 6, 1976.

Upon the basis of the entire record, including my observation of the witnesses and their

[1] Prior to the Notice of Violation and Proposed Action, the Defense Contract Administration Service Region, Dallas, had on July 10, 1975, issued a "show cause" letter to Hahn & Clay pointing out their deficiencies.

[2] The Hearing was conducted pursuant to, and in accordance with, 41 CFR 60–1.26(b) and Defense Supply Agency Regulation 5500–7 (32 CFR Part 1281).

[3] Although the complaint alleged certain deficiencies in Hahn & Clay's AAP, Government Counsel made it clear at the commencement of the Hearing that all alleged deficiencies with the exception of the Garcia matter had been corrected by Hahn & Clay prior to the hearing. Accordingly, the hearing was limited to the reasons for Mr. Garcia's discharge.

V 42 177 SEP 13 77 UMI

demeanor, I make the following proposed findings of fact, conclusions and recommendations:

PROPOSED FINDINGS OF FACT

1. Hahn & Clay is a Houston, Tex., based contractor who performs two categories of work, (1) heavy industrial maintenance and repair, and (2) the manufacture of special products including a substantial amount of nuclear work. For 12 to 15 years, Hahn & Clay has performed as prime contractor on Government contracts, primarily for the Navy.

2. Hahn & Clay has agreed, pursuant to the Equal Opportunity Clause of its United States Government contracts, to comply with all provisions of Executive Order 11246, as amended, and the rules, regulations, and relevant orders of the Secretary of Labor, appearing in 41 CFR Chapter 60.

3. The Defense Supply Agency, Defense Contract Administration Services Region, Dallas, is responsible for monitoring Hahn & Clay's compliance with Executive Order 11246, as amended, and the implementing rules and regulations promulgated thereunder.

4. Mr. Lorenzo Solis Garcia began working as welder for Hahn & Clay on June 29, 1973. Mr. Garcia received and was receiving top welder's wages at the time of the events underlying the instant dispute.

5. On or about December 10, 1974, Mr. Garcia requested overtime work for the following weekend. Upon failing to receive the specific overtime work requested Mr. Garcia told Assistant foreman McKaskle that he was quitting and left the premises. The next day Mr. Garcia went to the Equal Employment Opportunity Commission and filed a discrimination complaint against Hahn & Clay based on national origin discrimination in the areas of overtime and wages. Mr. Garcia returned to work on December 12, 1974, following a discussion with, and urging by, Mr. Woodruff, vice-president in charge of production. At this time Hahn & Clay was not aware of Mr. Garcia's action in filing an EEOC complaint.

6. About two weeks after the filing of the complaint by Mr. Garcia, a "Notice of Charge of Employment Discrimination" was served on Supervisory Job Foreman Brantley. Mr. Brantley informed Mr. Garcia that he had received the charge but could take no action until such time as Mr. Lewis, Hahn & Clay's Personnel Manager, returned from vacation.

7. Upon Mr. Lewis' return from vacation on January 2, 1975, a meeting was held between Mr. Garcia, Mr. Lewis and Mr. Brantley wherein Mr. Garcia's complaint with EEOC was discussed. Mr. Lewis took the position that Mr. Garcia's charges were false and that he, Mr. Garcia, should go back to EEOC and drop the charges or he would lose his job.

8. On January 3, 1975, Mr. Garcia, who was under the impression from the conversation of the day before that he was discharged unless he withdrew his pending complaint with the EEOC, again visited the EEOC office, related the conversation of January 2, 1975, and filed a second charge predicated upon reprisal and discharge.

9. On January 8, 1975, Mr. Garcia returned to Hahn & Clay to pick up a pay check. At that time he inquired of Mr. Brantley if he still had a job. Upon being asked if he had withdrawn the pending charges, Mr. Garcia handed Mr. Brantley a copy of the newly filed reprisal charge. Whereupon, Mr. Brantley escorted Mr. Garcia to Mr. Lewis' office. After reading the second charge, Mr. Lewis informed Mr. Garcia that he was discharged and that in order to come back to work he would have to drop both charges and bring evidence from the EEOC of such action.

10. Mr. Garcia subsequently secured work with the Hunt Tool Co. on January 15, where he remained through February 26, 1975. He was paid $5.50 per hour at the Hunt Tool Co., as opposed to the $5.80 he made at Hahn & Clay.

11. On February 26, 1975 Mr. Garcia, being dissatisfied with his current work, contacted Mr. Lewis by telephone and inquired whether or not he could come back to work if he withdrew the EEOC complaints. Following the conversation, Mr. Garcia withdrew the complaints, presented verification of same and was rehired back on February 27, 1975, at top pay ($6.05 per hour), but as a new employee with a loss of his accrued seniority. Mr. Garcia offered to withdraw his complaints and furnish verification of same only because he remembered the January 1975 exit conversation with Mr. Lewis.

12. Hahn & Clay's vacation policy grants two weeks paid vacation for employees completing two years of continuous service with the company. Mr. Garcia's two year anniversary date with Hahn & Clay would have occurred on June 29, 1975. But for the discharge, Mr. Garcia would have been entitled to two paid weeks vacation for 1975 and two weeks paid vacation for 1976. Mr. Garcia was paid for one week of vacation on his January 2, 1975, pay check. After his return to work, Mr. Garcia was considered a new employee and therefore received no more vacation pay in 1975. During the calendar year 1976, Mr. Garcia received only one week paid vacation.

13. Several conciliation meetings were held between Hahn & Clay personnel and Government personnel as required by 41 CFR 60–1.20 (a) and (b) and 41 CFR 60–2.2(c)(2). Defense Contract Administration Service Region, Dallas, made adequate efforts to secure Hahn & Clay's voluntary compliance with the requirements of the Order and applicable rules and regulations promulgated thereunder.

14. Hahn & Clay's Affirmative Action Programs for 1975 and 1976 do not contain action oriented programs covering the resolution of the Garcia incident as it relates to back pay and seniority. Otherwise, the 1975 and 1976 Affirmative Action Programs of Hahn & Clay are acceptable to the Government.

15. While Hahn & Clay might well have discharged Mr. Garcia for past indiscretions amounting to poor job performance, such indiscretions were overlooked prior to the filing of Mr. Garcia's first complaint with EEOC

PROPOSED CONCLUSIONS OF LAW

1. Jurisdiction over the parties and the subject matter is proper under the provisions of Executive Order 11246, as amended, and the implementing rules and regulations of the Secretary of Labor.

2. Under the Provisions of Part II, Section 201 of Executive Order 11246, as amended, the Secretary of Labor is directed and empowered to adopt "such rules and regulations and issue orders as he deems necessary and appropriate to achieve the purpose * * * of Parts II and III of the Order." Pursuant to such direction and authority the Secretary of Labor has adopted the Affirmative Action Program requirements contained in 41 CFR 60–1 and 60–2.

3. Under delegation of authority by the Office of Federal Contracts Compliance, the Defense Supply Agency, DCASR Dallas, has been charged with the responsibility of ensuring that Federal contractors and subcontractors comply with the equal opportunity provisions of Government contracts and subcontracts and the implementing rules and regulations of the Secretary of Labor.

4. In accordance with the equal opportunity provisions contained in Hahn & Clay's Government contracts, Hahn & Clay was required to develop and adopt for 1975 and 1976 written APPs which met the requirements of the provisions of 41 CFR 60–2.

5. Hahn & Clay's actions in the Gracia dismissal constituted a violation of 41 CFR 60–1.32.[4]

a. Regardless of Mr. Garcia's past job performance, Hahn & Clay took no action against Mr. Garcia until after he had filed his first complaint.

b. The filing of the first complaint was contributing cause to Hahn & Clay's dismissal of Mr. Garcia.[5]

c. The filing of the second complaint was a contributing cause to Hahn & Clay's refusal to allow Mr. Garcia's return to work on 8 January 1975.

d. Mr. Garcia was fired on 2 January 1975, effective beginning 3 January 1975, in that the effect of the 2 January meeting was to create the impression that Mr. Garcia had been discharged unless he withdraw his first complaint.

e. Mr. Garcia was lead to believe that the withdrawal of both complaints was a condition precedent to his returning to work for Hahn & Clay.

f. Hahn & Clay intimidated Mr. Garcia and interfered with his right to file an EEOC complaint. (See EEOC Decision No. 711151 (1971) 3 FEP 387.)

6. Under the provisions of 41 CFR 602.13 (f), Hahn & Clay's AAPs for 1975 and 1976 must contain action oriented programs designed to eliminate the results of the violation of 41 CFR 601.32.

7. In order to eliminate the effects of the discrimination against Mr. Garcia, the required action oriented programs must include the payment of back pay to Mr. Garcia and the restoration of Mr. Garcia's seniority rights.

8. Hahn & Clay's Affirmative Action Programs (AAP) for 1975 and 1976 do not contain adequate action oriented programs as required by 41 CFR 60–2.13(f) designed to correct the deficiencies created by Hahn & Clay's violation of 41 CFR 60–1.32.

9. Except for those deficiencies listed in paragraph 7 above, the 1975 and 1976 AAPs are acceptable to the Government.

10. The acceptable action oriented programs should include back pay in the amount of $1226.60 plus interest at 6 percent and restoration of Mr. Garcia's seniority.[6]

11. The Government has made reasonable efforts to secure Hahn & Clay's voluntary compliance with the Executive Order and the Rules and Regulations issued thereunder through conciliation and persuasion as required by 41 CFR 60–1.20(b) and 60–2.2(c)(2).

PROPOSED ORDER

Hahn & Clay having been found in noncompliance with Executive Order 11246, and its implementing rules and regulations, it is recommended that the following Order be entered:

Ordered, pursuant to Section 209 of Executive Order 11246, as amended, and 41 CFR 60–1.26(b), that, with respect to Hahn & Clay, any and all existing United States Government contracts and subcontracts are hereby cancelled and terminated and further, that Hahn & Clay is hereby declared ineligible for further contracts and subcontracts with the United States Government.

Dated: December 9, 1976, Washington, D.C.

BURTON S. STERNBURG,
Administrative Law Judge.

---

[4] 41 CFR 601.32 provides that the sanctions and penalties contained in Subpart D of the Order may be exercised against any contractor who allows discrimination against an individual filing a complaint under the Order or any other Federal Law requiring equal employment opportunity.

[5] *Bradington v. IBM*, 360 F. Supp. 845, 853, Aff'd, without OP. (CA4 Md) 492 F. 2d 1240.

[6] Back pay computations are attached hereto as Appendix A.

Back pay: Hahn & Clay's total back pay liability arising out of the improper Garcia discharge is, based on a straight time 40 hour week.

Unemployed

Weekly Pay Period	40 hour week	Amount of Back Pay
3 Jan 75	8 hrs x $5.80 p/h	$ 46.40
6-10 Jan 75	40 hrs x $5.80 p/h	232.00
13-14 Jan 75	16 hrs x $5.80 p/h	92.80

Employed at Hunt Tools ($5.50 p/h)

Weekly Pay Period	40 hour week	Amount of Back Pay
15-17 Jan 75	Actual: 29 hrs x $5.50p/h=$159.00 Difference: 24 hrs x $ .30p/h=$ 7.20	$ 7.20
20-24 Jan 75	Actual: 39 hrs x $5.50p/h=$214.50 Difference: 39 hrs x $ .30p/h= 11.70 plus 1 hr x $5.80p/h=$ 5.80	$ 17.50
27-31 Jan 75	Actual: 24-1/2 hrs x $5.50p/h=$134.75 Difference: 24-1/2 hrs x $ .30p/h=$ 7.35 plus 15-1 hrs x $5.80p/h=$ 89.90	$ 97.25
3-7 Feb (3-4Feb) (5-7Feb) (5 Feb Cost of Living)	Actual: 41-1/2 hrs x $5.50p/h=$228.25 Difference: 16 hrs x $ .30p/h =$ 4.80 24 hrs x $ .55p/h =$ 13.20	$ 18.00
10-14 Feb	Actual: 28 hrs x $5.80p/h=$154.00 Difference: 28 hrs x $ .55p/h=$ 15.40 12 hrs x $6.05p/h=$ 72.60	$ 88.00
17-21 Feb 76	Actual: 39 hrs x $5.50p/h=$214.50 Difference: 39 hrs x $ .55p/h=$ 21.40 1 hr x $6.05p/h=$ 6.05	$ 27.45
24-26 Feb 76	Actual: 10 hrs x $5.50p/h=$55.00 Difference: 10 hrs x $ .55p/h=$ 5.50 14 hrs x $6.05p/h=$84.70	$ 90.20
	TOTAL-not including interest	$716.80

Restoration of all seniority rights including vacation pay as follows:

1975 Vacation - 40 hrs at $6.05 p/h	$242.00
1976 Vacation - 40 hrs at $6.75 p/h	270.00
TOTAL--not including interest	$512.00
GRAND TOTAL	$1228 80

Employment and Training Administration

INDIAN AND NATIVE AMERICAN ECONOMIC STIMULUS PROGRAM

Plans for Allocating Fiscal Year 1978 Funds

AGENCY: Employment and Training Administration, Labor.

ACTION: Notice.

SUMMARY: This notice provides the plans of the Employment and Training Administration for allocating funds for the Fiscal Year 1978 Native American Economic Stimulus Program (NAESP).

DATE: Proposals must be received in the manner indicated below, by 4:45 p.m. on October 17, 1977.

FOR FURTHER INFORMATION CONTACT:

Mr. Alexander S. MacNabb, Director, Division of Indian and Native American Programs, Room 6402, 601 D Street NW., Washington, D.C. 20213.

SUPPLEMENTARY INFORMATION: Pursuant to the Economic Stimulus Appropriations Act of 1977, the Division of Indian and Native American Programs (DINAP) of the Department of Labor announced on Tuesday, July 26, 1977, at 42 FR 38022 a program of new initiatives to support efforts to improve the internal strengths of Indian communities. That announcement described the plans for use of $14,000,000 in Fiscal Year 1977 funds for the Native American Economic Stimulus Program (NAESP). An additional $17,000,000 has been made available for the NAESP in Fiscal Year 1978 funds, and this announcement describes the plans for Fiscal Year 1978 programs to be funded with this money.

Like the Fiscal Year 1977 funds, this additional $17,000,000 will be utilized to fund special employment and training projects that will assist in the process of economic development on Federal and State Indian reservations; in Indian communities in the State of Oklahoma; and in Alaska Native Villages and communities. Fifteen program categories have been selected for Fiscal Year 1978 and will be funded by competitive process. Eligible title VI prime sponsors will be mailed copies of the Solicitation for Grant Applications (SGA), which includes instructions for completion and submission of the grant application package, the fifteen individual Statements of Work, and the criteria by which proposals will be evaluated. The Statements of Work include the program objectives and a description of specific tasks to be performed. Governing regulations will be those contained in 29 CFR Part 97 Subpart D.

The fifteen categories, and the amounts tentatively set-aside for each, are as follows: Paramedical Training, $1,000,000; Paralegal Training, $1,000,000; Management Training, $1,000,000; Agriculture Training, $1,000,000; Aquaculture Training, $1,000,000; Industrial Park Management Training, $1,000,000; Road Construction Training, $1,000,000; Domestic Fuel Development Training, $1,000,000; Vietnam-Era Veterans Training, $1,000,000; Hotel/Motel Management Training, $1,000,000; Waste Disposal Training, $1,000,000; Emergency Vehicle Operation Training, $1,000,000; Apprenticeship Outreach, $3,000,000; Telecommunications Training, $1,000,000, and Electric Power Training, $1,000,000.

Eligible applicants will be those DINAP prime sponsors who are eligible for CETA title VI funds. Additionally, fully accredited nonprofit medical institutions may submit proposals for paramedical training funds, fully accredited nonprofit law schools may submit proposals for paralegal training funds, nonprofit management organizations may submit proposals for management training funds, fully accredited universities or colleges having degree programs in hotel/motel management may submit proposals for hotel/motel management training funds, and trade unions may submit proposals for apprenticeship outreach funds. Eligible nonprofit organizations may request in writing or by telephone that copies of the SGA be mailed to them. Telephone requests should be made to Herman Narcho on 202-376-6011.

The deadline for proposal receipt by DINAP in all fifteen program categories, including the five for which certain nonprofit organizations are eligible to apply, is 4:45 p.m. on October 17, 1977. Proposals will be evaluated on the basis of objective criteria, which is contained in the SGA, by a panel composed of one employment and training specialist from the Department of Labor, representatives from other appropriate Federal agencies, and nonprofit national Indian and Native American organizations.

Signed in Washington, D.C., this 29th day of August 1977.

LAMOND GODWIN,
Administrator,
Office of National Programs.

Occupational Safety and Health Administration

ALASKA

Approval of Plan Supplement; Amended Legislation

AGENCY: Occupatinoal Safety and Health Administration.

ACTION: Notice of Approval of Alaska's Amended Legislation.

SUMMARY: This document gives notice of the approval of a State-initiated plan change necessitated by legislative amendments to the Alaska Occupational Safety and Health Act.

FOR FURTHER INFORMATION CONTACT:

Veronica Allen, Project Officer, Office of State Programs, Occupational Safety and Health Administration, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, D.C. 20210 (202-523-8031).

SUPPLEMENTARY INFORMATION:

BACKGROUND

Part 1953 of Title 29, Code of Federal Regulations, prescribes procedures under section 18 of the Occupational Safety and Health Act of 1970 (29 U.S.C. 677) (hereinafter referred to as the Act) for the review of changes and progress in States which have been approved in accordance with section 18(c) of the Act and 29 CFR Part 1902. On August 10, 1973, notice was published in the FEDERAL REGISTER (38 FR 21628) of the approval of the Alaska plan and the adoption of Subpart R to Part 1952 containing the decision and a description of the plan. On February 7, 1977, the State of Alaska submitted a supplement to the plan involving a State-initiated change to the Seattle Regional Office of the Occupational Safety and Health Administration. Following regional review, the supplment was forwarded to the Assistant Secretary of Labor for Occupational Safety and Health (hereinafter referred to as the Assistant Secretary) for her determination as to whether it should be approved. The supplement is described below.

DESCRIPTION OF THE SUPPLEMENT

Pursuant to 29 CFR Part 1953, Subpart E, the State submitted amendments to its enabling legislation (§§ 18.60.010 through 18.60.105, Alaska Statutes). The amended legislation (House Bill No. 588) was signed by Governor Jay S. Hammond on June 29, 1976, and became effective June 30, 1976. The legislation provides for the following:

(1) Additional requirements on the Alaska Department of Labor to publicize promulgation of regulations and standards and granting of variances (§ 18.60.020(b));

(2) Additional considerations for qualifications for safety inspectors (§ 18.60.055);

(3) Reporting of fatalities and hospitalizations in the event of an employment accident and restrictions on moving materials related to the accident (§ 18.60.058);

(4) An employer general duty provision § 18.60.075(a) identical to that in the Federal Act except for its provision that the hazard "in the opinion of the Commissioner" could cause death or serious physical harm. This language would appear to be as broad as § 5(a)(1). We do not think that this imposes any additional substantive requirements; it merely reflects the fact that the establishment of any violation is a determination of the Commission. Subject to evaluation it is approved.

(5) Additional provisions for employee and employee representative confidentiality and anonymity (§§ 18.60.087 and 18.60.088(b)); and

(6) Procedures for judicial review which include appeal right to the Alaska Superior Court for the Alaska Department of Labor (§ 18.60.097).

LOCATION OF THE PLAN AND ITS SUPPLEMENT FOR INSPECTION AND COPYING

A copy of the State's plan and its supplement may be inspected and copied during normal business hours at the following locations: Office of State Programs, Occupational Safety and Health Administration, U.S. Department of Labor, Room N-3112, 200 Constitution Avenue NW., Washington, D.C. 20210; Office of the Regional Administrator, Occupational Safety and Health Administration, Room 6048, Federal Office Building, Seattle, Washington 98174; and the Alaska Department of Labor, Juneau, Alaska 99801.

PUBLIC PARTICIPATION

Under § 1953.2(c) of this chapter the Assistant Secretary may prescribe alternative procedures to expedite the review process or for any other good cause which may be consistent with applicable law. The Assistant Secretary finds that the Alaska supplement described above is consistent with commitments contained in the approved plan, which were previously made available for public comment. Accordingly, it is found that further public comment and notice is unnecessary.

DECISION

After careful consideration, the Alaska plan supplement described above is hereby approved under Subpart E of Part 1953 of this chapter. This decision incorporates the requirements of the Act and implementing regulations applicable to State plans generally.

(Sec. 18, Pub. L. 91-596, 84 Stat. 1608 (29 U.S.C. 667).)

Signed at Washington, D.C., this 29th day of August 1977.

EULA BINGHAM,
Assistant Secretary of Labor.

NATIONAL SCIENCE FOUNDATION

STEERING COMMITTEE OF NSF ADVISORY COUNCIL

Meeting

In accordance with the Federal Advisory Committee Act, Pub. L. 92-463, the National Science Foundation announces the following meeting:

NAME: Steering Committee of the NSF Advisory Council.

PLACE: Room 321, National Science Foundation, 1800 G Street NW., Washington, D.C. 20550.

DATE: September 30, 1977.

TIME: 9 a.m.

TYPE OF MEETING: Open.

CONTACT PERSON: Ms. Margaret L. Windus, Executive Secretary, NSF Advisory Council, National Science Foundation, Room 518, Washington, D.C. 20550. Telephone: 202-632-4384.

PURPOSE OF STEERING COMMITTEE: The purpose of the Steering Committee, composed of members of the NSF Advisory Council, is to assist the Chairperson and Foundation staff in planning Council activity and related matters not requiring the formation of a separate task group.

SUMMARY MINUTES: May be obtained from the Committee Management Coordination Staff, Division of Personnel and Management, Room 248, National Science Foundation, Washington, D.C. 20550.

AGENDA: To review with cognizant NSF staff the issues being studied by the four task groups and other issues of general concern.

M. REBECCA WINKLER,
Acting Committee Management Officer.

SEPTEMBER 6, 1977.

OFFICE OF MANAGEMENT AND BUDGET

CLEARANCE OF REPORTS

List of Requests

The following is a list of requests for clearance of reports intended for use in collecting information from the public received by the Office of Management and Budget on September 6, 1977 (44 U.S.C. 3509). The purpose of publishing this list in the FEDERAL REGISTER is to inform the public.

The list includes the title of each request received; the name of the agency sponsoring the proposed collection of information; the agency form number(s), if applicable; the frequency with which the information is proposed to be collected; the name of the reviewer or reviewing division within OMB, and an indication of who will be the respondents to the proposed collection.

Requests for extension which appear to raise no significant issues are to be approved after brief notice through this release.

Further information about the items on this daily list may be obtained from the Clearance Office, Office of Management and Budget, Washington, D.C. 20503 (202-395-4529), or from the reviewer listed.

NEW FORMS

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

National Center for Education Statistics, Vocational Education Data System, NCES 2404, 1 through 6, single time, local educational agencies, postsecondary institutions, present and former students, Laverne V. Collins, 395-5867.

Center for Disease Control, Revised Compendium of Materials for Noise Control, single time, manufacturers of noise control materials, Eliett, C. A., 395-5867.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Federal Insurance Administration:
Application for Flood Insurance, Renewal Application, Change Endorsement and Cancellations, on occasion, residents and businesses in flood prone areas, housing, veterans and labor division, 395-3532.

Inspection and Estimate, Adjuster's Report, Worksheet, notice of loss, proof of loss, etc., on occasion, residents and businesses in flood prone areas, housing, veterans and labor divisions, 395-3532.

DEPARTMENT OF THE INTERIOR

Law Enforcement Assistance Administration, 1977 Census of Public and Private Juvenile Detention, Correctional and Shelter facilities, CJ-17, CJ-29, annually, public and private juvenile correctional facilities, Richard Eisinger, 395-6140.

DEPARTMENT OF THE INTERIOR

Bureau of Sport Fisheries and Wildlife, Recreation Use Survey: Arctic National Wildlife Range, single time, all recreationists 1977-78, Eliett, C. A. 395-5867.

REVISIONS

UNITED STATES INTERNATIONAL TRADE COMMISSION

Color Television Receivers and Subassemblies, (producers' survey), quarterly, U.S. producers of color TV receivers, C. Louis Kincannon, 395-3211.

DEPARTMENT OF AGRICULTURE

Packers and Stockyards Administration, Regulations Under the Packers and Stockyards Act, on occasion, meat packers, market agencies, and dealers, Eliett, C. A., 395-5867.

Food and Nutrition Service, Monthly Report of the Special Supplemental Food Program for Women, Infants, FNS 187, monthly, State agencies, Caywood, D. P., 395-3443.

DEPARTMENT OF COMMERCE

Bureau of Census:
Metal Cans (Shipments), M-34D, monthly, can manufacturers, C. Louis Kincannon, 395-3211.

Selected Instruments and Related Products—Annual Report, MA-38B, annually, manufacturers of instruments, C. Louis Kincannon, 395-3211.

Converted Flexible Packaging Products—Quarterly Report, MQ-26F, quarterly, plants which convert flexible packaging materials, C. Louis Kincannon, 395-3211.

Plastic Bottles, Monthly Report, M30E, monthly, manufacturers of plastic bottles, C. Louis Kincannon, 395-3211.

Construction Machinery and Reference List, MA35-D, annually, manufacturing establishment of construction machinery, C. Louis Kincannon, 395-3211.

Pharmaceutical Preparations, Except Biologicals, MA-28G, annually, drug manufacturers, C. Louis Kincannon, 395-3211.

Plumbing Fixtures (Production, Shipments, and Stocks), MQ-34E, quarterly, manufacturers of plumbing fixtures, C. Louis Kincannon, 395-3211.

Radio Receivers and Television Sets, Phonographs and Record Players, Speakers and Related Equipment, MA-36M, annually, manufacturing establishment of consumer electronics, C. Louis Kincannon, 395-3211.

Mattresses, Foundations, and Dual Purpose Sleep Furniture, M-25E, monthly, manufacturers, C. Louis Kincannon, 395-3211.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Office of Education, Foreign Language Graduate Fellowship Forms (NDEA), OE7632, annually, institutions of higher education, Laverne V. Collins, 395-5867.

DEPARTMENT OF THE TREASURY

Customs Service

NON-RUBBER FOOTWEAR FROM URUGUAY

Receipt of Countervailing Duty Petition and Initiation of Investigation

AGENCY: United States Customs Service, Treasury Department.

ACTION: Initiation of countervailing duty investigation.

SUMMARY: This notice is to advise the public that a satisfactory petition has been received and that a countervailing duty investigation has been initiated for the purpose of determining whether or not benefits are paid by the Government of Uruguay to manufacturers/exporters of non-rubber footwear which constitute the payment of a bounty or grant within the meaning of the U.S. Countervailing Duty Law.

A preliminary determination will be made not later than January 8, 1978, and a final determination no later than July 8, 1978.

EFFECTIVE DATE: On July 8, 1977, this investigation was initiated.

FOR FURTHER INFORMATION CONTACT:

Mr. Vincent P. Kane, Duty Assessment Division, Office of Operations U.S. Customs Service, Washington, D.C. 20229 (202–566–5492).

SUPPLEMENTARY INFORMATION: A petition in satisfactory form was received on July 8, 1977, alleging that benefits conferred by the Government of Uruguay upon the manufacture, production or exportation of non-rubber footwear from Uruguay constitute the payment or bestowal of a bounty or grant within the meaning of section 303, Tariff Act of 1930, as amended (19 U.S.C. 1303).

The non-rubber footwear specified in the petition is classified under items 700.05 through 700.85 inclusive of the Tariff Schedules of the United States Annotated (TSUSA), except items 700.28, 700.51, 700.52, 700.53, 700.54 and 700.60.

Pursuant to section 303(a)(4), Tariff Act of 1930, as amended (19 U.S.C. 1303(a)(4)), the Secretary of the Treasury is required to issue a preliminary determination as to whether or not any bounty or grant is being paid or bestowed within the meaning of that statute within six months of receipt, in satisfactory form, of a petition alleging the payment or bestowal of a bounty or grant. A final determination must be issued within 12 months of the receipt of such petition. Therefore, a preliminary determination on this petition will be made no later than January 8, 1978, as to whether or not the alleged payments or bestowals conferred by the Government of Uruguay upon the manufacture, production, or exportation of the merchandise described above constitute a bounty or grant within the meaning of section 303, Tariff Act of 1930, as amended. A final determination will be issued no later than July 8, 1978.

This notice is published pursuant to section 303(a)(3) of the Tariff Act of 1930, as amended (19 U.S.C. 1303(a)(3)).

Pursuant to Reorganization Plan No. 26 of 1950 and Treasury Department Order 190 Revision 14, July 1, 1977, the provisions of Treasury Department Order No. 165, Revised, November 2, 1954 and § 159.47(c) of the Customs Regulations (19 CFR 159.47(c)), insofar as they pertain to the initiation of a countervailing duty investigation by the Commissioner of Customs, are hereby waived.

ROBERT H. MUNDHEIM,
General Counsel of the Treasury.

SEPTEMBER 1, 1977.

INTERSTATE COMMERCE COMMISSION

[Notice No. 479]

ASSIGNMENT OF HEARINGS

SEPTEMBER 8, 1977.

Cases assigned for hearing, postponement, cancellation or oral argument appear below and will be published only once. This list contains prospective assignments only and does not include cases previously assigned hearing dates. The hearings will be on the issues as presently reflected in the Official Docket of the Commission. An attempt will be made to publish notices of cancellation of hearings as promptly as possible, but interested parties should take appropriate steps to insure that they are notified of cancellation or postponements of hearings in which they are interested.

MC 53965 (Sub 129), Graves Truck Line, Inc. now assigned November 10, 1977 at Kansas City, Mo. is cancelled and transferred to Modified Procedure.
MC 11207 (Sub-No. 387), Deaton, Inc., now being assigned December 8, 1977, at Jacksonville, Fla. (1 day), in a hearing room to be later designated.
MC 143167, Seyforth Express, Inc., now being assigned December 7, 1977 (1 day), at Jacksonville, Fla. in a hearing room to be later designated.
MC 109397 (Sub-No. 350), Tri-State Motor Transit Co., now being assigned December 8, 1977 (2 days), at Jacksonville, Fla. in a hearing room to be later designated.
MC 115162 (Sub-No. 350), Poole Truck Line, Inc. and MC 142610 (Sub-No. 4), Action Motor Express, Inc., now being assigned December 12, 1977, at Jacksonville, Fla. (2 days), in a hearing room to be later designated.
MC 115215 (Sub-No. 24), New Truck Lines, Inc., now being assigned December 14, 1977, (3 days), at Jacksonville, Fla. in a hearing room to be later designated.
MC 143112 Western Kansas Express, Inc., now being assigned November 28, 1977 (2 weeks) at Wichita, Kans., in a hearing room to be later designated.

H. G. HOMME, Jr.,
Acting Secrtary.

[Notice No. 36574]

DEMURRAGE CHARGES CAUSED BY SEVERE WINTER WEATHER

Petition of Railroads Seeking Authorization to Waive

SEPTEMBER 8, 1977.

In an order served August 12, 1977, the Commission granted specified rail carriers the right to waive a portion of demurrage charges caused by severe winter weather. (Published in the FEDERAL REGISTER, on August 19, 1977, 42 FR 41948.) In that order, the Commission stated that other carriers who want to participate in the proposal could, upon notifying the Commission in writing of their intent to do so. In letters filed August 23, 1977, by The Buffalo Terminal Railway Co., and August 29, 1977, by The South Buffalo Railway Co., these two carriers gave notice of their intent to participate in the approved proposal.

H. G. HOMME, Jr.,
Acting Secretary.

CIVIL AERONAUTICS BOARD.

[M–51]

SEPTEMBER 7, 1977.

TIME AND DATE: 10 a.m., September 12, 1977.

PLACE: Room 1027, 1825 Connecticut Avenue NW., Washington, D.C. 20428.

SUBJECT: Docket 25908 et al., Transatlantic Route Proceeding (OGC).

STATUS: Open.

PERSON TO CONTACT:

Phyllis T. Kaylor, The Secretary, 202–673–5068.

SUPPLEMENTARY INFORMATION: The President has requested that the Board submit its decision in the Transatlantic case to him in early October 1977. In order for the Board to have sufficient time to consider the matter and to be in a position to decide this case in a timely manner it is necessary that the Board meet on this matter on less than seven days' notice. Accordingly the following Members have voted that agency business requires that the Board meet on less than seven days' notice and that no earlier announcement was possible:

Chairman Alfred E. Kahn
Vice Chairman Richard J. O'Melia
Member G. Joseph Minetti
Member Lee R. West
Member Elizabeth E. Bailey

PART II

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Federal Insurance Administration

APPEALS FROM PROPOSED FLOOD ELEVATION DETERMINATIONS

Final Flood Elevation Determinations for Various Communities

V 42 177 SEP 13 77 UMI

Title 24—Housing and Urban Development

CHAPTER X—FEDERAL INSURANCE ADMINISTRATION

SUBCHAPTER B—NATIONAL FLOOD INSURANCE PROGRAM

[Docket No. FI-2952]

PART 1917—APPEALS FROM PROPOSED FLOOD ELEVATION DETERMINATIONS

Final Flood Elevation Determination, City of Cairo, Alexander County, Ill.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: Final base flood elevations (100-year flood) are listed below for selected locations in the City of Cairo, Alexander County, Ill. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

EFFECTIVE DATE: On publication of the Flood Insurance Rate Map for the City of Cairo, Alexander County, Ill.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations for the City of Cairo, Alexander County, Ill. are available for review at the City Hall, 1501 Washington, Cairo.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202–755–5581 or toll free line 800–424–8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of his final determinations of flood elevations for the City of Cairo, Alexander County, Ill.

This final rule is issued in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90–448), 42 U.S.C. 4001–4128, and 24 CFR Part 1917). An opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. No appeals of the proposed base flood elevations were received from the community or from individuals within the community.

The Administrator, to whom the Secretary has delegated the statutory authority, has developed criteria for flood plain management in flood-prone areas in accordance with 24 CFR Part 1910.

The final 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet above mean sea level
Local runoff within the levee.	Flooding contained within an area of the city between 21st St. and 40th St. and between Washington Ave. and Commercial St. Includes parts of Highland Ave., Magnolia Dr., Park Ave., and St. Mary's Place West. Ponding conditions also exist in the extreme northeast corner, along with some local ponding near the southwest corner of the levee system.	312
Mississippi River	Interstate 57	334
	U.S. 60/62	330
Ohio River	Illinois Central R.R.	332
	U.S. 51/60/62	330

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001–4128); and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: August 11, 1977.

PATRICIA ROBERTS HARRIS,
Secretary.

[FR Doc.77-25560 Filed 8-12-77;8:45 am]

[Docket No. FI-2890]

PART 1917—APPEALS FROM PROPOSED FLOOD ELEVATION DETERMINATIONS

Final Flood Elevation Determination, Town of Funkstown, Washington County, Md.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: Final base flood elevations (100-year flood) are listed below for selected locations in the Town of Funkstown, Washington County, Md. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

EFFECTIVE DATE: On publication of the Flood Insurance Rate Map for the Town of Funkstown, Washington County, Md.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations for the Town of Funkstown, Washington County, Md., are available for review in the fire hall, Westside and Baltimore Streets, Funkstown.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202–755–5581 or toll free line 800–424–8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of his final determinations of flood elevations for the Town of Funkstown, Washington County, Md.

This final rule is issued in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90–448), 42 U.S.C. 4001–4128, and 24 CFR Part 1917). An opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. No appeals of the proposed base flood elevations were received from the community or from individuals within the community.

The Administrator, to whom the Secretary has delegated the statutory authority, has developed criteria for flood plain management in flood-prone areas in accordance with 24 CFR Part 1910.

The final 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet above mean sea level
Antietam Creek	Interstate 70	459
	Downstream of Ridge Rd.	462
	Upstream of Baltimore St.	469

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001–4128); and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: August 11, 1977.

PATRICIA ROBERTS HARRIS,
Secretary.

PART 1917—APPEALS FROM PROPOSED FLOOD ELEVATION DETERMINATIONS

Final Flood Elevation Determination, City of Fenton, St. Louis County, Mo.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: Final base flood elevations (100-year flood) are listed below for selected locations in the City of Fenton, St. Louis County, Mo. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

EFFECTIVE DATE: On publication of the Flood Insurance Rate Map for the City of Fenton, St. Louis County, Mo.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations for the City of Fenton, St. Louis County, Mo., are available for review at the City Hall, 625 North Highway 141, Fenton, Mo.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202–755–5581 or toll free line 800–424–8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of his final determinations of flood elevations for the City of Fenton, St. Louis County, Mo.

This final rule is issued in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90–448), 42 U.S.C. 4001–4128, and 24 CFR Part 1917). An opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided, and the Administrator has resolved the appeals presented by the community.

The Administrator, to whom the Secretary has delegated the statutory authority, has developed criteria for flood plain management in flood prone areas in accordance with 24 CFR Part 1910.

The final 100-year flood elevations for selected locations are:

PART 1917—APPEALS FROM PROPOSED FLOOD ELEVATION DETERMINATIONS

Final Flood Elevation Determination, City of Lakewood, Cuyahoga County, Ohio

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: Final base flood elevations (100-year flood) are listed below for selected locations in the City of Lakewood, Cuyahoga County, Ohio.

These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

EFFECTIVE DATE: On publication of the Flood Insurance Rate Map for the City of Lakewood, Cuyahoga County, Ohio.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations for the City of Lakewood, Cuyahoga County, Ohio are available for review at the Bulletin Board in the City Hall, Lakewood, Ohio.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202–755–5581 or Toll Free Line 800–424–8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of his final determinations of flood elevations for the City of Lakewood, Cuyahoga County, Ohio.

This final rule is issued in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90–448), 42 U.S.C. 4001–4128, and 24 CFR Part 1917). An opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. No appeals of the proposed base flood elevations were received from the community or from individuals within the community.

The Administrator, to whom the Secretary has delegated the statutory authority, has developed criteria for flood plain management in flood-prone areas in accordance with 24 CFR Part 1910.

The final 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet above mean sea level
Rocky River	Upstream corporate limits.	607
	Abandoned Ford Park Dr.	603
	Sewer at sewage treatment plant.	595
	Park Dr.	586
	Detroit Ave.	579
	Lake Rd.	576

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001–4128; and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

[Docket No. FI-2611]

PART 1917—APPEALS FROM PROPOSED FLOOD ELEVATION DETERMINATIONS

Final Flood Elevation Determination, Township of Lower Merion, Montgomery County, Pa.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: Final base flood elevations (100-year flood) are listed below for selected locations in the Township of Lower Merion, Montgomery County, Pa.

These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

EFFECTIVE DATE: On publication of the Flood Insurance Rate Map for the Township of Lower Merion, Montgomery County, Pa.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202–755–5581 or Toll Free Line 800–424–8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of his final determinations of flood elevations for the Township of Lower Merion, Montgomery County, Pa.

This final rule is issued in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90–448), 42 U.S.C. 4001–4128, and 24 CFR Part 1917). An opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided, and the Administrator has resolved the appeals presented by the community.

The Administrator, to whom the Secretary has delegated the statutory authority, has developed criteria for flood plain management in flood-prone areas in accordance with 24 CFR Part 1910.

Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations for the Township of Lower Merion, Montgomery County, Pennsylvania are available for review at the Township Building, 75 East Lancaster Avenue, Ardmore, Pa.

The final 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet above mean sea level
Schuylkill River	East corporate limits.	38.0
	Reading RR bridge	44.0
	Belmont Ave.	47.0
	Flatrock Dam	55.0
	Young's Ford Rd. (extended).	58.0
	West corporate limits.	65.0
Mill Creek	River Rd.	56.0
	Rose Glen Rd.	67.0
	Conshohocken State Rd.	120.0
	Williamson Rd.	139.0
	Gulph Rd.	161.0
	Mill Creek Rd.	181.0
	Old Gulph Rd.	208.0
	Black Rock Rd.	229.0
	Morris Ave.	275.0
	Harriton Ave.	288.0
	Old Gulph Rd.	299.0
	Ivy Mont Rd.	351.0
	Montgomery Ave.	361.0

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968, effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001–4128; and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: June 24, 1977.

JAY JANIS,
Under Secretary.

GULF OF MEXICO FISHERY MANAGEMENT COUNCIL

Statement of Organization, Practices, and Procedures

Pursuant to section 302 (f) (6) of the Fishery Conservation and Management Act of 1976 (Pub. L. 94-265), each Regional Fishery Management Council is responsible for determining its organization and prescribing its practices and procedures for carrying out its functions under the Act in accordance with such uniform standards as are prescribed by the Secretary of Commerce. Further, each Council must publish and make available to the public a statement of its organization, practices, and procedures. As required by the Act, the Gulf of Mexico Fishery Management Council has prepared and is hereby publishing its Statement of Organization, Practices, and Procedures.

Dated: September 2, 1977.

JOSEPH W. SLAVIN,
Acting Associate Director, National Marine Fisheries Service.

ORGANIZATION, PRACTICES, AND PROCEDURES OF THE GULF OF MEXICO FISHERY MANAGEMENT COUNCIL

(1) *Name of Council:* Gulf of Mexico Fishery Management Council.

(2) *Location of Offices:* Lincoln Center, Suite 881, 5401 West Kennedy Boulevard, Tampa, Fla. 33609.

(3) *Legal Authority:* Legal authority for the Council is found in the Fishery Conservation and Management Act of 1976 (Pub. L. 94-265, Sec. 302 (a) (5) (16 U.S.C. 1852). The geographical area of authority of the Council includes the states of Texas, Louisiana, Mississippi, Alabama, and Florida, and has authority over the fisheries in the fishery conservation zone of the Gulf of Mexico seaward of such states.

(4) *Purposes:* (a) The Council shall prepare and submit to the Secretary of Commerce or his delegate (the "Secretary" hereinafter) a fishery management plan with respect to each fishery within its geographical area and, from time to time, such amendments to each plan as are necessary.

(b) The Council shall prepare comments on any application for foreign fishing transmitted to it under a governing international fishery agreement by the Secretary of State or his delegate under the terms of the Act.

(c) The Council shall prepare comments on any fishery management plan or amendments thereto prepared by the Secretary or his delegate which are transmitted to it under Section 304(c)(2) of the Act.

(d) The Council shall conduct public hearings at appropriate times and in appropriate locations in the Council's geographical area so as to allow all interested persons an opportunity to be heard in the development of fishery management plans and amendments thereto, and with respect to the administration and implementation of the provisions of the Act.

(e) The Council shall review on a continuing basis, and revise, as appropriate, the assessments and specifications contained in each fishery management plan for each fishery within its geographical area with regard to:

1. The present and probable future condition of the fishery;

2. The maximum sustainable yield from the fishery;

3. The optimum yield from the fishery;

4. The capacity and the extent to which fishery vessels of the United States will harvest the optimum yield on an annual basis;

5. The portion of such optimum yield which, on an annual basis, will not be harvested by fishing vessels of the United States and can be made available for foreign fishing.

(f) The Council shall submit to the Secretary or his delegate: (1) a report, before February 1 of each year, on the Council's activities during the preceding calendar year, (2) such periodic reports as the Council deems appropriate, and (3) any other relevant report which may be requested by the Secretary or his delegate.

(g) The Council may prepare any proposed regulations which it deems necessary to carry out any fishery management plan, or any amendment to a fishery management plan, which is prepared by it. Such proposed regulations shall be submitted to the Secretary or his delegate, together with such plan or amendment, for action by the Secretary or his delegate, pursuant to Sections 304 and 305 of the Act.

(h) The Council shall determine its organization and prescribe its practices and procedures for carrying out its functions in accordance with such uniform standards as the Secretary or his delegate may prescribe, and shall publish and make available to the public a statement of its organization, practices, and procedures.

(i) The Council shall conduct any other activities which are required by, or provided for in, the Act or which are necessary and appropriate to the foregoing functions.

(5) *Council Composition:* (a) The Gulf of Mexico Fishery Management Council shall have a total of 17 voting members, and four non-voting members, appointed pursuant to provisions of the Act.

(b) Eleven of the voting members (at least one of whom shall be appointed from each State) shall be appointed by the Secretary or his delegate, from a list of qualified individuals submitted by the Governor of each applicable constituent State.

(c) These eleven voting members shall be appointed for a term of three-years; except that, for initial appointments, the Secretary or his delegate shall designate up to one-third of the initial appointed members to serve for a term of one-year, up to one-third to serve for a term of two-years, and the remaining such members to serve for a term of three-years. Appointments thereafter shall be in the same manner as the original appointments. Vacancy appointments shall be for the remainder of the unexpired term of the vacancy.

(d) The six remaining voting Council members shall be:

1. The principal State official with marine fishery management responsibility and expertise in each of the five constituent States, as designated by the Governors of the States, so long as the official continues to hold such position, or the designee of such official; and

2. The Regional Director, Southeast Region, National Marine Fisheries Service, NOAA, for the Council's geographical area, or his designee.

(e) The Chairman shall be selected from among the voting members by majority vote of the voting members present and voting.

(f) Nonvoting members shall be:

1. The regional or area Director of the United States Fish and Wildlife Service for the Council's geographical area or his designee;

2. The Commander of the Eighth Coast Guard District or his designee;

3. The Executive Director of the Gulf States Marine Fisheries Commission;

4. One representative of the Department of State designated for such purpose by the Secretary of State, or his designee.

(6) *Officers and Terms of Office:* The Council elects during the first meeting after September each year, from among the voting members, a chairman and a vice chairman who serve for a one year term ending on September 30, until sooner replaced, or until their successors have been duly elected. Either the chairman or vice chairman may succeed themselves at the will of the Council.

(7) *Staff:* (a) The Council will determine needs and hire staff deemed necessary to carrying out the decisions and desires of the Council. The Council Executive Director has the responsibility to prepare lists of eligible candidates, as appropriate, for each position and to make recommendations accordingly to the Council. The Council may authorize the Executive Director to fill existing staff vacancies and to hire temporary personnel.

(b) Staff Functions:

1. Staff positions and functions are reported in Appendix I. Other positions may be authorized as deemed necessary by the Council. Experts, consultants and temporary personnel may be employed to provide additional Council staff support as required.

2. Temporary transfer of government employees. Authority is provided for temporary transfer of State, local, and Federal government employees to the Council staff. The Council may authorize requests for such personnel.

(c) Employment practices:

1. Nondiscrimination. All activities supported in whole or in part by Federal funds shall be operated under a policy of equal employment opportunity. Council staff positions shall be filled solely on the basis of merit, fitness, competence, and qualifications. Employment actions shall be free from discrimination based on race, religion, color, national origin, sex, age, or physical handicap.

2. Personnel Actions. Subject to these practices and procedures and according to personnel authority provided by the Secretary, the Council may establish positions, recruit, hire, compensate, and dismiss personnel. Involuntary separation shall be for cause alone, with reasonable advance notice given to the employee.

3. Salary and Wage Administrations. In setting rates of pay for Council staff, the principle of equal pay for substantially equal work shall be followed. Variations in basic rates of pay shall be in proportion to substantial differences in the difficulty and responsibilities of the work performed. The duties of any new position shall be contained in a brief description to be submitted to the National Oceanic and Atmospheric Administration Personnel Office servicing the National Marine Fisheries Service Regional Office assigned to the Council prior to the submission of a budget in which the salary of that position is requested. The Council will be provided a salary range appropriate to the position. The Council may fill the position at any salary level within that range, except that, unless recruitment of exceptionally qualified employees is hampered, the policy of hiring at the beginning rate shall be recognized. The annual pay for any staff position may not exceed the equivalent of the top step of GS-15 of the Federal General Schedule at any time. After a position has been filled, the employee may receive salary increases by annual step raises comparable to the Federal pay scale, and be recognized for superior performance within the specific salary ranges of the position. Such raises and salaries shall be subject to approval by the Council upon recommendation of the Executive Director.

(d) Duty Time: The usual work week is five, eight-hour days or 40 hours. This applies to all full-time, permanent employee. The hours worked by individual employees may vary depending on the needs and interests of the office and the individual. The Fair Labor Standards Act applies. The Council office will be open from 8 a.m. to 5:30 p.m. on official work days. An individual employee's workday may vary from the official office hours, but must be predetermined and approved by the individual's supervisor.

(e) Leave Policy: 1. Annual Leave.

a. Council full-time employees are granted paid leave annually in accordance with the following schedule or a share thereof prorated on the basis of days employed in a given calendar year.

Years of service:	Working days of leave per year
Under 3	13
3 to 15	20
15 and over	26

(Years of service refers to years of Council service except that up to 4 years of U.S. Federal military, state, or Federal government service may be applied to years of service in computing total years of creditable service for leave determination.)

b. New employees accrue annual leave from the beginning of the first full pay period of the employment period, but normally will not be granted leave until the completion of six months of service.

c. Earned annual leave may be taken in accordance with procedures and schedules approved by the Executive Director.

d. A maximum of 60 days of annual leave may be carried over into each new calendar year. All accumulated annual leave in excess of 60 days will be forfeited on the last pay period in effect at the end of each calendar year.

e. Upon termination of employment, an employee shall be compensated for unused annual leave at the hourly wage rate in effect at the time of termination.

a. Council full-time employees will be granted 13 days of paid sick leave, or a prorated share thereof, annually. Sick leave is accumulative throughout the Council tenure of the employee.

b. Earned sick leave may be used for illnesses, injury, temporary disability, other disabling or incapacitating disability, and for medical and dental appointments. Sick leave in excess of three consecutive days shall be supported by documentation of a medical doctor.

3. Compensatory Leave and Overtime Pay. Employees subject to the Fair Labor Standards Act (FLSA) shall receive overtime as specified therein. Exempt employees under FLSA may, at the discretion of the Executive Director of the Council, be granted one hour of compensatory leave for each overtime hour worked.

All overtime work must be authorized in advance by the employee's supervisor.

Travel time is not considered as overtime for pay or compensatory leave if it occurs during the normal work week (Monday through Friday).

Compensatory time must be used within a 30 day period or be forfeited.

4. The Council recognizes jury duty and military duty for training and shall compensate employees on a full wage rate basis for days absent from work in performance of such duty. Compensation for military leave for training shall not exceed 10 working days annually. Personnel on extended active duty in the armed forces shall be placed on leave without pay from the Council staff.

5. Holidays. The Council recognizes the following days as holidays and employees are granted the day off with pay when the holiday falls on a work day. If a holiday falls on either Saturday or Sunday, the respective Friday or Monday is recognized as a holiday.

New Year's Day, January 1.
Washington's Birthday, Third Monday in February.
Memorial Day, Last Monday in May.
Independence Day, July 4.
Labor Day, First Monday in September.
Columbus Day, Second Monday in October.
Veterans' Day, Fourth Monday in October.
Thanksgiving Day, Fourth Thursday in November.
Christmas Day, December 25.

(f) Administrative Leave: The Executive Director shall have authority to grant administrative leave in the event of emergency conditions affecting the office or well being of the staff.

(g) Employee Benefits: The Council provides medical insurance, life insurance, and retirement programs for full-time permanent employees. The Council pays the full costs of these programs within the budget limitations authorized by the Council. However, the retirement program which is provided by the Council may be supplemented by the employee. Details of each of these benefit programs are available in the Council's offices.

(h) Standards of Conduct: The Council is responsible for maintaining high standards of ethical conduct among themselves and their staff. Such standards include the following principles:

1. No employee of the Council shall use his or her official authority or influence derived from his or her position with the Council for the purpose of interfering with or affecting the result of an election to or a nomination for any national, State, county or municipal elective office.

2. No employee of the Council shall be deprived of employment, position, work, compensation, or benefit provided for or made possible by the Act on account of any political activity or lack of such activity in support of or in opposition to any candidate or any political party in any national, State, county, or municipal election or on account of his or her political affiliation.

3. No Council member or employee shall pay, or offer, or promise, or solicit, or receive from any person, firm, or corporation, either as a political contribution or a personal emolument any money, or anything of value in consideration of either support, or the use of influence, or the promise of support, or influence in obtaining for any person, any appointive office, place or employment under the Council.

4. No employee of the Council shall have a direct or indirect financial interest that conflicts with the fair and impartial conduct of his or her Council duties.

5. No Council member or employee of the Council shall use or allow the use, for other than official purposes, of information obtained through or in connection with his or her Council employment which has not been made available to the general public.

6. No Council member or employee of the Council shall engage in criminal, infamous, dishonest, notoriously immoral or disgraceful conduct prejudicial to the Council.

7. No Council member or employee of the Council shall use Council property for other than official business. Such property shall be protected and preserved from improper or deleterious operation or use.

(i) Personnel Files: A file for each Council member and employee containing appointment papers, security reports, biographical data and other official papers will be maintained in the Council's office under security and safeguard conditions required of files subject to the Privacy Act. Each member or employee may have access to his/her individual file; but files are otherwise available to others only pursuant to the Privacy Act and Freedom of Information Act in consultation with NOAA legal counsel.

(j) Security Investigations: It is necessary for some Council members, Scientific and Statistical Committee, Advisory Panel and Council staff to have access to classified information. Therefore, these individuals are provided security clearance as is necessary to the conduct of Council activities and in accordance with Federal standards. Security clearances are issued by the Office of Investigation and Security of the Department of Commerce.

(8) *Council Standing Committees:* (a) General.—The following listed committees, and other committees which the Council may appoint, are considered the standing committees of the Council:

ADMINISTRATIVE COMMITTEES

Budget Committee.
Personnel Committee.
Advisory Panel Selection Committee.
Scientific and Statistical Screening Committee.

MANAGEMENT COMMITTEES

ADVISORY COMMITTEE

Scientific and Statistical Committee.

(b) Committee Composition.—Copies of the Charters and lists of committee members are available in the Council office.

(c) Committee Functions.—Budget Committee: The Budget Committee, with the assistance of the Executive Director and Administrative Officer, develops budget and fiscal policy, prepares the Council budget, monitors budget and fiscal activities and as appropriate, makes recommendations to the Council.

Personnel Committee: The Personnel Committee, with the assistance of the Executive Director, develops personnel policy, reviews and determines staffing requirements, reviews eligible candidates for vacant staff positions and makes recommendations to the Council regarding personnel hiring, retention, separation, pay, benefits and other appropriate personnel matters.

Advisory Panel Selection Committee: The Advisory Panel Selection Committee determines the organizational structure, membership composition, functions, duties and responsibilities of advisory panels.

Scientific and Statistical Screening Committee: The Scientific and Statistical Screening Committee identifies, screens and recommends to the Council prospective individuals to serve as members of the Scientific and Statistical Committee.

Fishery Management Committees: Each Fishery Management Committee provides liaison between the respective fishery advisory panel and the Council; assists panels in assigned tasks; monitors work of each panel and monitors work of the contractors in the development and drafting of fishery management plans.

The Scientific and Statistical Committee: Provides expert scientific and technical advice to the Council on fishery management policies, fishery management plans, and the effectiveness of fishery management plans. The Committee aids the Council in identifying scientific resources available for the development of plans, in establishing goals and objectives, establishing criteria useful in evaluating the effectiveness of plans and in plans review.

(9) *Council Meetings:* (a) General.—The Council will meet at the call of the Chairman or upon request of a majority of its voting members. Meetings will ordinarily be held in plenary sessions, but may be in subgroups or in individual sessions. Advisory Panels and Council standing committees will meet with the approval of the Chairman or his designee.

V 42 I 177 SEP 13 77 UMI

(b) Meeting notices.—A notice containing the time, location and purpose of each meeting will be published in the FEDERAL REGISTER in accordance with Federal regulations.

(c) Frequency and Duration.—The Council will meet in plenary session at least once each quarter. Ordinarily a meeting will be held each month. The duration of each meeting will vary according to need.

(d) Location.—Council meetings will ordinarily be held within the five state geographical area. However, when in the best interests of the work of the Council, meetings may be held outside of the five state area. Public access will be given primary consideration in meeting plans .

(e) Agendas.—A suggested agenda will be prepared for each Council meeting by the Executive Director with the approval of the Chairman. Agenda items may be recommended to the Executive Director by other Council members and by staff members.

(f) Rules of Procedure.—1. Meetings will be conducted in a manner to permit the greatest possible participation by all Council members and the public. Decisions by consensus are permitted except where the issue is Council approval of:

(1) A Fishery Management Plan, (2) an amendment to a Fishery Management Plan, (3) a proposed regulation, (4) comments for the Secretary on foreign fishing applications or (5) on Secretarial prepared management plans.

2. Meetings will be conducted in accordance with Roberts Rules of Order Newly Revised unless otherwise specified in these Standard Operating Procedures.

3. The presiding officer at any meeting or hearing will be the Council Chairman, Vice Chairman, or in their absence, the Council Chairman or Vice Chairman's designee from among the Council voting members.

(g) Meeting Minutes.—Detailed minutes will be kept of each meeting and made available to the public upon request, except for minutes of closed sessions.

(10) *Hearings:* (a) Public hearings will be held by the Council so as to provide maximum participation by the public in the development of Fishery Management Plans, amendments thereto and other aspects of administering the Act. All such hearings will be held in the geographical area of concern. Interested parties may appear in person and present their views or submit them in written form to the Council Chairman.

(b) Hearing notices will be prepared and issued in the same manner as meeting notices (9) (b) above. In addition, local media will be used to publicize meetings so as to maximize public awareness.

(c) When it is determined by the Council that a hearing is appropriate, the Chairman of the Council will designate at least one voting member of the Council to officiate. The designated official in charge will provide for maximum participation and expression of viewpoints by all those present. All meetings will be conducted in an orderly, business manner.

(d) Records of the participants and their views, whether in person or written, will be made available to the Council and retained as official Council records.

(11) *Advisory panels:* (a) The Council has established an Advisory Panel, and will form such sub-advisory panels as it deems necessary or appropriate to assist in carrying out assigned functions under the Act. An advisory sub-panel shall normally be established for each fishery management unit identified by the Council.

(b) The panel and sub-panels shall generally be composed of members who are residents of the five-state geographical area. Each sub-panel shall be selected so as to provide for geographical, commercial, recreational marketing or other interests in accordance with functions and purposes of the panel.

(c) A chairman and vice chairman shall be designated by the Council for each sub-panel. The chairman or vice chairman shall preside at each sub-panel meeting. The Council may designate one or more voting members to meet with each sub-panel.

(12) *Fishery Management Plan Organization and Development Procedure:* (a) The Council initiates a request for management plan through the Executive Director. The Council staff prepares detailed documentation on the information requirements of a management plan for each management unit and sets of optional, tentative goals and objectives which are submitted to the Scientific and Statistical Comittee and Advisory Panel for review and comment to the Council. The Scientific and Statistical Committee comments to the Council on the data requirements and makes recommendations on the agencies, institutions or other entities which have the expertise to develop the draft management plan. The Council reviews, revises and adopts a set of goals and objectives and selects the group who will develop the draft.

(b) The Council staff negotiates a contractual agreement with the group(s) selected to prepare the draft plan, subject to approval of the Council. In some fisheries, the Council staff may be utilized to prepare a draft plan. The contractor or staff develops a draft management plan according to the requirements of Pub. L. 94-265, accompanying regulations and the goals and objectives as approved by the Council. The contractor may schedule reviews of the completed drafts for one or more tasks by the Scientific and Statistical Committee and Advisory Panel in accordance with contractual provisions. Development of a set of proposed management regulations with optional alternatives may be requested by the Council as appropriate.

(c) The contractor, staff or group(s) completes the plan draft using the format required by the regulations and that for environmental impact statements, and forwards the document to the Council through the Executive Director. The Executive Director distributes copies to the Council Management Committee for each fishery plan, the Council technical staff, and the state liaison officers with the request for a critical review of the document. Copies are distributed to Council members.

(d) The reviewers are allowed three to four weeks for critical review of the document. The state liaison officers provide particular review emphasis on management applicability and omission of available technical data as well as a general critical review. Staff reviews applicability to requirements of Pub. L. 94-265 and the interim regulations as well as a general critical review of scientific content.

(e) Review comments are returned to Council staff who summarize them by reference page number and by source. Important omissions and possible errors noted are forwarded to the contractor (if any) for comment and clarification. The plan may be revised to include this omitted information and the correction of errors by Council staff. Summarized comments and copies of the plan are forwarded to Scientific and Statistical Committee members three weeks prior to their scheduled meeting. The summarized comments are intended as a time-saving device to aid Scientific and Statistical Committee members in their own review.

(f) Scientific and Statistical Committee reviews draft plan and provides comment to Council. Representatives from the appropriate Advisory Panel may be invited to participate in the meeting as requested by the staff, the Council, or the Scientific and Statistical Committee.

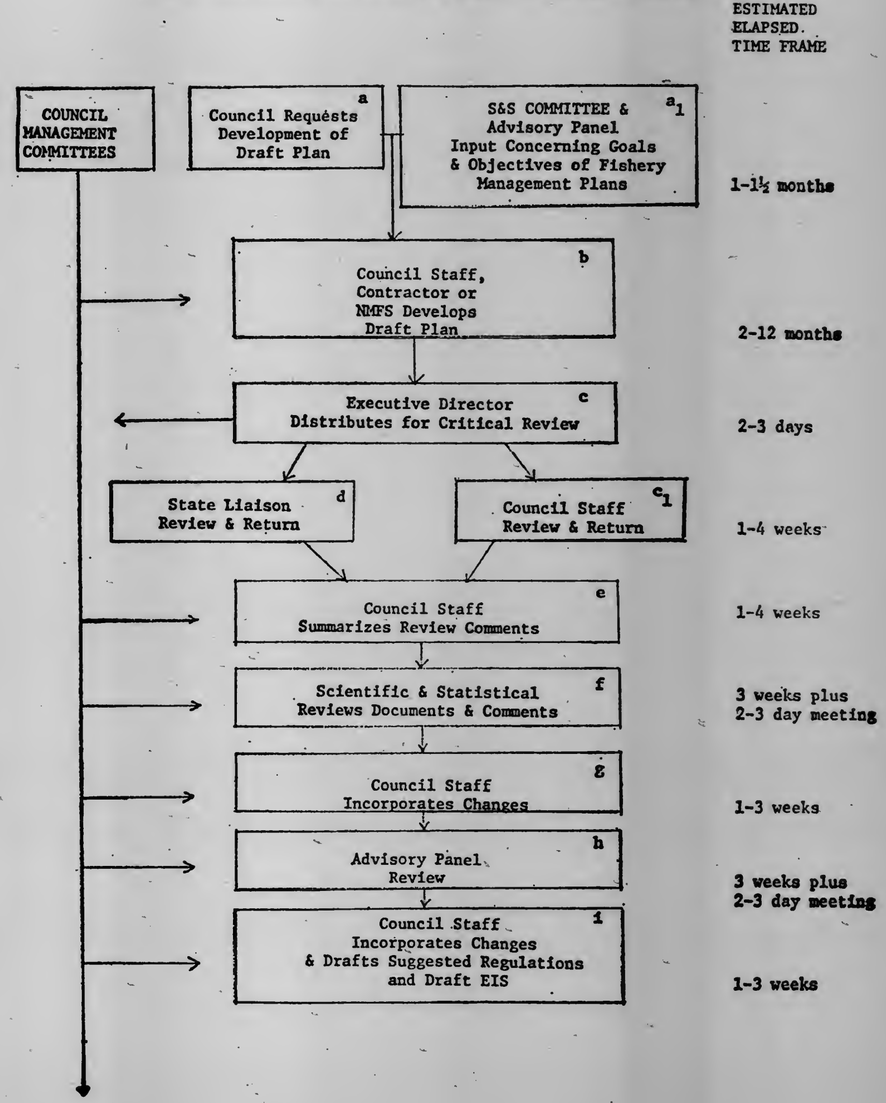
(g) The Council staff in cooperation with contractor, if any, the Scientific and Statistical Committee members and possibly specific consultants revise the plan considering Scientific and Statistical committee's comments. The revised document now contains the best available scientific knowledge and is transmitted to members of the respective advisory panel at least three weeks prior to their scheduled meeting along with summarized lists of comments and changes. Council Management Committee reviews document changes.

(h) Advisory Panel reviews document, as amended, and provides comments. Representatives from the Scientific and Statistical Committee may also be invited to participate in the meeting as requested by the staff, the Council or the Advisory Panel. Council Management Committee participates in discussion.

(i) Council staff prepares document for Council review and provides sets of alternative regulations, summarizes all comments and areas of disagreement on scientific or operational aspects and adds draft EIS, if necessary.

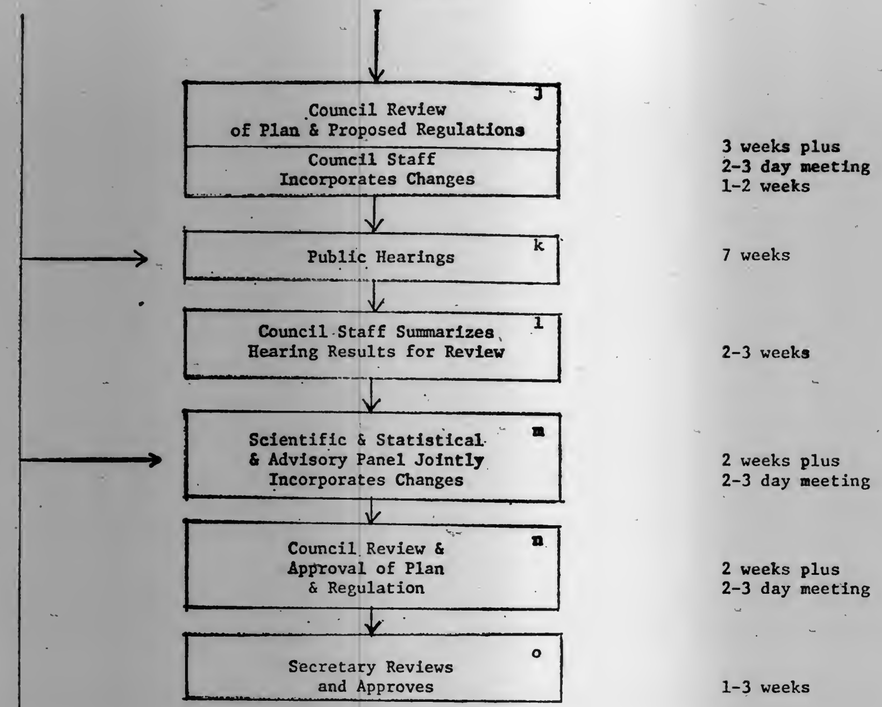
(j) Chairman of the Scientific and Statistical Committee and the Advisory Panel advise Council on their review of document content. Council reviews and adopts a revised document and adopts proposed regulations, if appropriate. Council staff revises the amended document according to the directives of the Council for public hearings. Appropriate distribution of the revised document will be made for the public hearings.

(k) Public hearings may be held at appropriate locations and times at the discretion of the Council. Management Committee members or other Council members designated by the Council Chairman chair these public hearings.



(l) Council staff forwards a summary of the public hearing results to Scientific and Statistical Committee and Advisory Panels and the Council three weeks prior to scheduled meetings. Copies are also provided to Management Committee members.

(m) The Scientific and Statistical Committee and the Advisory Panel meet jointly, in whole or in part, as directed by the Council Chairman to review public comments and recommend changes in plan or regulations.



NOTE.—If the public hearing comments are such that a review and the development of recommendations by either or both of the Scientific and Statistical Committee and the Advisory Panel are not necessary, then the Council Chairman may direct that some or all members of these bodies meet with the Council and eliminate procedure step "m" in the attached flow chart.

(n) The Council reviews the public comments and recommendations by the Advisory Panel and Scientific and Statistical Committee and instructs staff in revision of the plan. The approved revised plan is transmitted to the Secretary by the staff on instruction by the Council along with proposed regulations, if any.

FISHERY MANAGEMENT PLAN ORGANIZATION AND DEVELOPMENT DIAGRAM

V 42 177 SEP 13 77 UMI

FISHERY MANAGEMENT PLAN ORGANIZATION AND DEVELOPMENT PROCEDURE (PROVIDED SECRETARY DISAPPROVES PLAN)

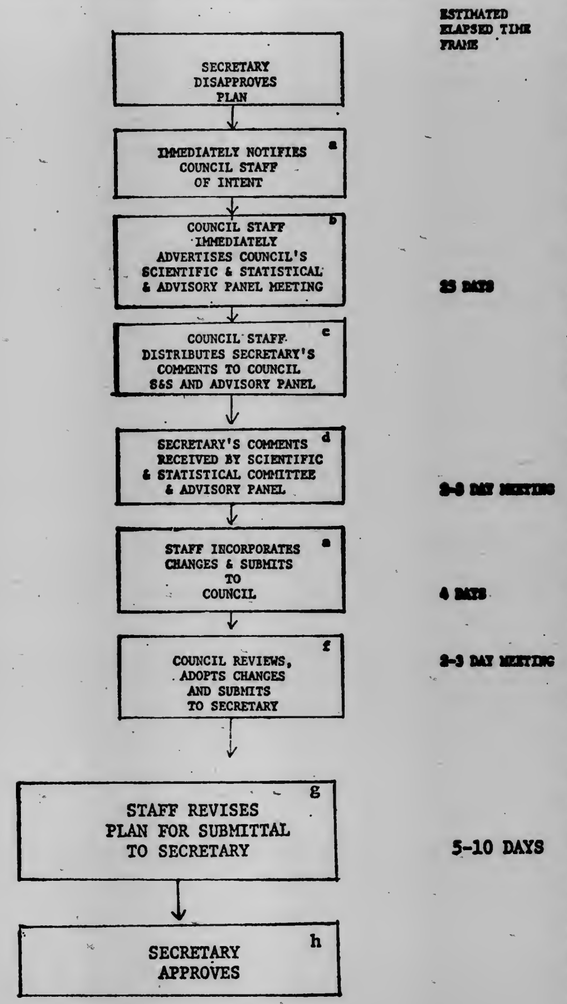
(a) Because of the statutory time constraints of 45 days for Council revision of a plan which the Secretary disapproves, the Secretary should immediately notify Council staff so that they can advertise meeting dates and agenda in the FEDERAL REGISTER.

(b) Council staff checks with Council Chairman and Chairman of the Scientific and Statistical Committee and the Advisory Panel and sets meeting dates and agenda which is transmitted to the FEDERAL REGISTER for publication.

(c) Council staff distributes copies of the Secretary's comments to all Council members and members of the Scientific and Statistical Committee and Advisory Panel during the advertisement period for their review.

(d) The Scientific and Statistical Committee and the Advisory Panel meet to review the Secretary's comments and recommend changes to the Council. Council Management Committee participates in the discussion.

NOTE.—If the Secretary's comments are such that a review by either or both the Scientific and Statistical Committee and the Advisory Panel are not necessary, then the Council Chairman may direct that all or some members of these bodies meet with the Council and eliminate procedure steps "c", "d" and "e" in the attached flow chart.



(e) Council staff summarizes the changes recommended by the Scientific and Statistical Committee and the Advisory Panel for presentation to Council.

(f) The Council meets and reviews the Secretary's comments and the recommendations of the Scientific and Statistical Committee and the Advisory Panel and revises the plan.

(g) The Council staff revises the management plan document according to the directives of the Council and submits to the Secretary.

(h) The Secretary approves the modified plan or disapproves it. If disapproved, the procedure steps return to item "a" in the attached flow chart and the process is repeated.

DIAGRAM OF PROCEDURE PROVIDED SECRETARY DISAPPROVES PLAN

(13) *Financial Management, Budget, Procurement and Property Management Procedures:* (a) Budget and Financial Manage ment System: The Budget and Financial Management System of the Gulf of Mexico Fishery Management Council provides procedures for and controls over the elements of: budget formulation and execution, fiscal management, procurement and property management. The management of this system is the responsibility of the Administrative Officer. The following describe the existing Budget and Financial Management System.

1. Budget Formulation and Execution:

a. Budget data shall be accumulated at various levels according to the breakdown in the chart of accounts, as well as by various accounting periods, to provide current and projected fund usage guidelines as needed.

b. Procedures will be implemented to make comparisons of actual obligations with budgeted amounts.

c. Whenever appropriate or required, budgeted fiscal information will be related to performance and unit cost data.

d. Budgets and work plans will be prepared in response to the budget call, about November–December each year or as required during the year. Justifications will be prepared to support any requests for increased funds made at this time.

e. Amendments to budgetary proposals will be made when necessary.

2. Fiscal Management: The financial management system will be maintained to conform with requirements of the Department of Commerce pursuant to the Fishery Conservation and Management Act of 1976 (Pub. L. 94-265), OMB Circular A-110, Treasury Department (IRS) regulations, and applicable local requirements (State, municipal, et cetera). The Council fiscal year shall be the same as that of the Federal Government.

a. A bank with Federal Deposit Insurance Corporation (FDIC) insurance coverage will be used as the depository for all Council funds advanced under grants and other agreements. Cash controls will be maintained over funds whether received by grant allowance checks, drawdowns against letters of credit, or as contributions for special projects.

b. Adherence will be made, as a minimum, to the principles in the accounting system accepted by the Gulf of Mexico Fishery Management Council.

c. Fiscal controls will be accomplished through a source document-supported cash accounting system capable of providing modified accrued expenditures as needed.

d. Records maintained will provide accurate, current and complete disclosure of awards, authorizations, income, obligations, unobligated balances, outlays and assets. Effective contol will be maintained over all funds, property and other assets to assure their use solely for authorized purposes.

e. An accurate checkbook and files of source documents will be maintained to provide a necessary audit trail.

f. All checks issued will bear two authorizing signatures, these being the signatures of the Executive Director, and Administrative Officer or Technical Support Specialist.

g. Financial records, supporting documents, statistical records and all other records pertinent to an agreement shall be retained for a period of three years and or

V 42 177 SEP 13 77 UMI

until they are either audited or approved for disposal under the authorities of the General Accounting Office, General Services Administration or the Department of Commerce.

h. A sequential numbering system will be used for the issuance of purchase orders. These documents will be maintained in a suspense file until service or merchandise is received and payment is made. Upon full liquidation of the obligation, purchase orders will be transferred to a completed documents file. Approval of purchase orders will be made by the Executive Director with delegated authority for approval to the Administrative Officer.

i. Travel authorizations will be issued prior to the performance of travel. These will be numbered sequentially and maintained in a file pending payment of the travel vouchers. Travel authorizations will be approved by the Executive Director with delegated authority for approval to the Administrative Officer. All travel as far as practicable, will be performed in accordance with government travel regulations.

j. Completed travel vouchers will be audited for conformance to current policies and compliance with existing travel allowances. Vouchers will be certified for payment by the Administrative Officer or the Executive Director.

k. Financial statements and reports shall be prepared as requested by the Council with at least one report submitted monthly, stating income and expenses and disclosing the cash balance. Other reports will be prepared as necessary to meet the requirements of other entities.

l. Payroll procedures will be established to assure prompt issuance of salary checks and to provide accurate and timely payroll information to employees and to Federal, State and local governments, as required. This will be accomplished by implementing the following:

Records of payroll compensation will be maintained in two categories: Council Members and Administrative Staff.

Pay records will indicate the number of hours worked, total earnings, deductions and net pay. Pay periods will be biweekly and pay records will be summarized each pay period.

Compensation checks will be issued from the Gulf of Mexico Fishery Management Council Office. They will be issued promptly to the members of the Administrative Staff at the close of each pay period, and promptly to Council members as valid salary-related data are received. A breakdown will be supplied with each salary check showing the hours and value of regular pay and premium pay earned, amounts for each of the deductions from gross pay, and the net pay. This information will be in a display of both biweekly and cumulative amounts.

m. Cash receipts and cash disbursements will be documented and kept current in a Cash Receipts and Disbursements Journal. Detailed transactions of income and expense and payroll summaries will be posted to these records. A running balance in the cash account will be maintained simultaneously.

When advances are made by a letter-of-credit method, the level of the cash on hand will be monitored to make drawdowns as close as possible to the time of making disbursements.

Detailed entries in the Journals will be summarized monthly by accounts as appearing in the Council's chart of accounts. This summary will provide the basic data for internal and external financial reporting.

An imprest fund will be maintained for small over-the-counter purchases up to $25.00.

Cash, currency, checks on hand, checkbooks, and other equally significant fiscal records and materials will be retained in a combination-lock type safe or security cabinet.

(b) Procurement: 1. Definitions.—a. *Business* means any corporation, partnership, joint stock company, joint venture, or any legal entity through which goods or services are provided.

b. *Change Order* means a written order signed by the Executive Director directing the contractor to make changes which the Changes clause of the contract authorizes the Executive Director to order without the consent of the contractor.

c. *Construction* means the erection, alteration, or repair of a building, structure, or other improvement to real property.

d. *Contract* means all types of agreements and orders for the procurement, or disposal, of supplies, services, construction, or any other item. It includes awards and notices of award; contracts of a fixed price, cost, cost-plus-a-fixed fee, or incentive types; letter contracts, and purchase orders. It also includes supplemental agreements with respect to any of the foregoing.

e. *Conspicuously* means written in such special or distinctive format, print, or manner that a reasonable person against whom it is to operate ought to have noticed it.

f. *Confidential Information* means any which is available to an employee only because of his status as an employee and is not a matter of public knowledge or available to the public on request.

g. *Contract Modification* means any written alteration on the specification, delivery point, rate of delivery, contract period, price, quantity, or other contract provisions of any existing contract.

h. *Contractor* shall mean any person having a contract with the Council.

i. *Debarment* means the disqualification of a person to receive invitations to bid or requests for proposals, or the award of a contract by the Council for a specified period of time.

j. *Employee* includes any individual other than council members drawing a salary from the Council and any nonsalaried or governmental employee performing services for the Council.

k. *Financial interest* shall mean:

Ownership of any interest or involvement in any relationship from or as a result of which the owner has, within the past three years, received or is presently or in the future entitled to receive more than $500.00 per year, or

Ownership of more than a 1 percent interest in any business, or holding a position in a business such as an officer, director, trustee, partner, employee or the like or holding any position of management.

l. *Gratuity* means a payment, loan, subscription, advance, deposit of money, services, offer of employment, or anything of more than nominal value, present or promised, unless consideration of substantially equal or greater value is received.

m. *Immediate Family* means a spouse, children, grandchildren, parents, and brothers, sisters, and in-laws.

n. *Person* means any business, individual, union, committee, club or other organization or group of people.

o. *Procurement* includes purchasing, renting, leasing, or otherwise obtaining supplies or services. It also includes all functions that pertain to the obtaining of such supplies, services, and items, including description of requirements, selection and solicitation of sources, preparation and award of contract, and all phases of contract administration.

p. *Purchase Request* means a document requesting that a contract be obtained for a described item.

q. *Subcontractor* means any business which holds an agreement or purchase order to perform any part of the work or to make or furnish any article or service required for the performance of a Council-funded contract, or subcontract thereunder.

r. *Suspension* means the disqualification of any person to receive invitations for bid or requests for proposals, or to be awarded a contract by the Council for a temporary period pending the completion of an investigation, and any legal proceedings that may ensue.

s. *Supplies* includes all property except land or interest in land.

2. *Competition*. All purchases and contracts except purchases from federal sources shall be made on a competitive basis to the maximum practicable extent. Purchases from nonfederal sources shall be made by formal advertising or by negotiation.

3. *Purchasing Procedures*. The following procedures shall be used by the Council for all procurements:

a. Procurements of $2,500 or more the Administrative Officer shall solicit a sufficient number of prospective bidders so as to elicit adequate competitive bids, open them simultaneously, and recommend award to the Executive Director of the responsible bidder whose bid is most advantageous to the Council, price and other factors considered.

b. Procurements ranging in value of less than $2,500 but of $500 or more, the Executive Director or his designee shall obtain quotations from at least two vendors and select the vendor whose quotation is most advantageous to the Council, price and other factors considered.

c. Procurements of less than $500 in value may be made directly by the Executive Director or his designee without quotations or bids.

d. A record of all formal and informal quotations on bids shall be maintained by the Executive Director.

4. *Sources of Supply*. Irrespective of whether the procurement of supplies or services from nonfederal sources is to be effected by formal advertising or negotiation, competitive proposals ("bids" in the case of procurement by formal advertising, "proposals" in the case of procurement by negotiation) shall be solicited from all such qualified sources as are deemed necessary by the Executive Director or his designee to assure such full and free competition as is consistent with procurement of types of supplies and services necessary to meet the requirements of the Council.

5. *Procurement from Government Sources*. Prior to the award of any contract for the purchase of supplies, federal sources which are available to the Council shall be considered and when such sources are most advantageous to the Council's needs, price and other factors considered, the procurement shall be made from federal supply sources. Competitive bids or letters are not required when the procurement list established by the Federal source is based upon a competitive bid procedure.

6. *Determination of Need*. When considering the necessity for a procurement (either goods or services), the Executive Director or his designee shall:

a. Validate the requirement with respect to need and extent.

b. Ensure that the procurement is not duplicating work already undertaken by another Council or governmental agency.

c. Be certain that the task cannot be accomplished by Council personnel.

7. *Lease v. Purchase*. Leasing will be used where it is in the Council's interest. The criteria to be considered in deciding to lease rather than purchase include the following:

a. The Council requirement is of a short duration, and purchase would be more costly than leasing.

b. The probability that the equipment will become obsolete and that replacement within a short period will be necessary; and

c. The equipment is special or technical, and the lessor will provide the equipment, as well as maintenance and repair services, at a lower cost than would otherwise be available to the Council.

Lease versus purchase decisions are based on an economic analysis and the Council's files are documented to support the final decision.

8. *Specifications*. The word "specification" means a clear and accurate description of the technical requirements for material, product, or service, including the procedure by which it will be determined that the requirements have been met. Specifications for items or materials contain also preservation, packing, and marking requirements.

a. Use of Federal Specifications. In all purchases of property by the Council, specifications promulgated by the General Services Administration or the United States Department of Commerce shall be used unless the Executive Director or his designee determines that such specifications are inappropriate for Council purposes.

b. Use of Council Specifications. In the purchase of services such as consultants or technical advice the Council shall devise specifications. Such specifications may be prepared by Council staff, advisory panels, committees, or other sources selected by the Council.

9. *Award*. Unless all bids are rejected, award may be made by the Executive Director or his designee by written notice, within the time for acceptance specified in the bid, to that responsible bidder whose bid, conforming to the invitation for bids, will be most advantageous to the Council, price and other factors considered. Award shall be made by mailing or otherwise furnishing to the successful bidder a properly executed award document or notice of award. All provisions of the invitations for bids, including any acceptable changes or additions made by the bidder in the bid, shall be clearly and accurately set forth in the award document.

10. *Non-Competitive Practices*. Non-competitive practices such as possible anti-trust violations and identical bids shall be reported by the Executive Director or his designee according to the procedures set out in Title 41 Code of Federal Regulations, Federal Procurement Regulations; Subpart 1–1.9 and 1–1.16.

11. *Use of Formal Advertising*. Contract for property and services are made by formal advertising in all cases in which the use of such method is feasible and practicable under the existing conditions and circumstances. Formal advertising is not required when government sources of supply are used, provided the procurement list established by the government source is based upon a competitive bid procedure.

12. *Formal Advertising Defined*. Formal advertising means procurement by competitive bids and award. It involves the following basic steps:

a. *Preparation of the Invitation for Bids*. Preparation of the invitation for bids, describing the requirements of the Council clearly, accurately, and completely, but avoiding unnecessarily restrictive specifications or requirements which might unduly limit the number of bidders. The term "invitation for bids" means the complete assembly of related documents furnished prospective bidders for the purpose of bidding.

b. *Publicizing the Invitation for Bids*. In procurement activities using formal advertising the Executive Director or his designee will select a means which will make information available to potential suppliers. Such means may include but is not limited to publication in local trade newspapers and journals and publications in the "Daily Journal of Commerce." When notice is given by publication, the Executive Director or his designee will publish the notice at least 30 days before the issuance of the invitation for bids or requests for proposals.

13. *Bid Processing*. a. *Receipt and Opening of Bids*.

Receipt. All bids received prior to the time set for opening shall be kept unopened in a locked receptacle. If a bid is opened by mistake, the person who opens the bid will immediately sign the envelope and deliver it to the Administrative Officer. The Administrative Officer shall immediately write on the envelope an explanation of the opening, the date and time opened, and sign the statement. No information shall be disclosed prior to the public bid opening.

Opening. The Administrative Officer shall decide when the set time for bid opening has arrived and shall so declare to those present. All bids received prior to the time set for opening shall then be publicly opened, recorded and when practicable, read aloud to the persons present. Bids may be examined by interested persons, but original bids may not be allowed to pass out of the hands of Council employees.

Awarding the Contract. After bids are publicly opened, they shall be tabulated and evaluated by the Executive Officer's designee and a recommendation shall be made to the Executive Director for award. Award shall be made to that responsible bidder whose bid conforms to the invitation for bids and will be most advantageous to the Council, price and other factors considered.

b. *Late Bids, Modification of Bids, or Withdrawal of Bids*.—Any bid received at the place designated in the solicitation after the exact time specified for receipt will not be considered unless it is received before award is made and either:

It was sent by registered or certified mail not later than the fifth calendar day prior to the date specified for the receipt of bids or

It was sent by mail or telegram (if authorized) and it is determined by the Executive Director or his designee that the late receipt was due solely to mishandling by the Council staff.

c. *Mistakes in Bids*.—Mistakes in bids shall be handled according to the provisions of Title 41, Code of Federal Regulations; Federal Procurement Regulations; part 1–2 S 1–2.406.

d. *Rejection of Bids*.—Bids may be rejected by the Executive Director or his designee as follows:

Nonconforming Bids. Any bid which fails to conform to the essential requirements of the invitation for bids shall be rejected as non-responsive.

Debarred or Ineligible Bidders. Bids received from any person or concern debarred or ineligible shall be rejected.

Rejection of All Bids. The Executive Director or his designee may reject any and all bids. Each bidder shall be notified and the reason for rejection shall be stated.

e. *Content of Invitation for Bids*.—For supply and service contracts, invitations for bids shall contain the following information if applicable to the procurement involved:

Name and address of Council.

Date of Issuance.

Date, hour, and place of opening.

Number of pages.

A description of supplies or services to be furnished in sufficient detail to permit full and free competition.

The time of delivery or performance.

A statement in the invitation that "Bids must set forth full, accurate, and complete information as required by this Invitation for Bids (including attachments)."

Bid guarantee, performance and payment bond requirements, if any.

A requirement that all bids must allow a period for acceptance by the Executive Director or his designee of not less than a minimum period stipulated in the invitation for bids and that bids offering less than the minimum stipulated acceptance period will be rejected.

In the cases where bidders are required to have special technical qualifications due to the complexity of the equipment or service being procured, a statement of such qualification.

Directions for obtaining copies of any documents, such as plans, drawings, and specifications which have been incorporated by reference.

A statement of Council Policy regarding late bids, modification of bids, and withdrawal of bids.

f. *Basis of Selection*.—Records of formal advertised procurements will reflect the following as a basis of selection: Adequacy of Competition; Responsiveness of Bidder; Responsibility of Bidder.

g. *Adequacy of Competition*.—Two or more capable sources must be available to assure full and free competition. Two sources are not adequate when there are more sources fully qualified to compete in the area.

14. *Price Analysis*. When bids are received, the Executive Director's designee will conduct price analyses to determine the reasonableness of the bid price. The price analysis consists of an examination and evaluation of the prospective price without evaluating the separate cost elements such as labor, materials, overhead, et cetera, and proposed profit.

15. *Cost Principles and Procedures*. Title 41 Code of Federal Regulation; Federal Procurement Regulations; part 15, serve as a guide for contract cost principles and procedures.

16. *Preaward Surveys*. A preaward survey is an evaluation of a prospective contractor's performance capability under the terms of a proposed contract. Such evaluation is used by the Council staff as an aid in determining responsibility. The evaluation is accomplished by use of the following:

a. Data on hand,

b. Data from another purchaser such as state and federal agencies,

c. On site inspections of facilities to be used for performance of the proposed contract, or

d. Any other means deemed advisable by the Council staff.

17. *Review by Executive Director or his Designee:* When a procurement will be noncompetitive (i.e., sole source), the Executive Director or his designee shall review the proposed action for assurance that competitive procurement is not feasible. This action includes both examination of the reasons for the procurement being non-competitive and steps to foster competitive conditions for subsequent procurements.

18. *Factors*. Factors considered in approving a sole source procurement include but are not limited to:

a. What capability does the proposed contractor have that is important to the specific effort and makes him clearly unique in comparison to another contractor in the same general field?

b. What prior experience of a highly specialized nature does the proposed contractor have that is vital to the proposed effort?

c. What facilities and equipment does the proposed contractor have that is specialized and vital to the effort?

V 42 177 SEP 13 77 UMI

d. Does the proposed contractor have a substantial investment of some kind that would have to be duplicated at the Council's expense by another source entering the field?

e. If schedules are involved, why are they critical and why can the proposed contractor best meet them?

f. If lack of drawings or specifications is a guiding factor, why is the proposed contractor best able to perform under those conditions? Why are drawings and specifications lacking? What is the leadtime required to get drawings and specifications suitable for completion?

g. Is the effort to be a continuation of a previous effort performed by the proposed contractor?

h. Is competition precluded because of the existence of patent rights, copyrights, or secret processes?

19. *Approval by NOAA.* Prior to the award of a sole source contract in excess of $5,000, the Executive Director or his designee shall forward this review and justification to the appropriate NOAA Grants Officer for approval as required by OMB Circular A–110.

20. *Responsiveness of Bidder.* To be responsive, a bid should comply in all material respects with the invitation for bids, both as to the method and timeliness of submission and as to the substance of any resulting contract.

21. *Responsible Bidder.* A determination will be made and documented prior to award as to the responsibility of the bidder. This will be included in the procurement file. A bidder is considered responsible when it has been established that he has the technical capability, financial capacity and manpower required to perform as he has bid. To be responsible an offeror should:

a. Have adequate financial resources, or the ability to obtain such resources as required during performance of the contract;

b. Be able to comply with the required or proposed delivery or performance schedule, taking into consideration all existing business commitments;

c. Have a satisfactory record of performance;

d. Have a satisfactory record of integrity and business ethics;

e. Be otherwise qualified and eligible to receive an award under applicable public policy laws and regulations.

22. *Sources of Information Regarding Responsibility of Prospective Contractors:*

a. Lists of debarred, suspended, or ineligible concerns or individuals;

b. Information existing within the Council's organization, including records on file and knowledge of personnel within the organization;

c. Other sources such as suppliers, subcontractors, and customers of the prospective contractor; banks and financing institutions; commercial credit agencies; state and Federal Government agencies; purchasing and trade associations; better business bureaus and chambers of commerce; and

d. The conduct of a preaward survey;

e. Where it is considered necessary, the Council staff may require prospective contractors to submit statements concerning their ability to meet any of the minimum standards.

23. *This section lists and prescribes the types of contracts and contract policies which will be used by the Council.*

a. *Firm Fixed Price Contract.* The firm fixed price contract is the type of contract that results from either public advertised procurements with sealed bids or negotiated procurements which have had adequate competition or consideration for the work to be performed by the state or quasi-public agency. The fixed price contract is particularly suitable for construction and for procurements of standard commercial items, modified commercial items, or for items when specifications are reasonably definite. Price competition should exist, and costs should be predictable with reasonable certainty when this type of contract is used.

b. *Fixed Price Contract with Escalation.* When delivery or performance extends over a period of time, a contractor may seek to protect himself against unusual risk by listing a number of circumstances under which his offered price may need adjustment. This type of contract is used in the procurement of items that are directly affected by industry-wide wage rates for example.

c. *Fixed Price Incentive Contract.* An incentive contract is aimed at motivating the contractor to increase his efficiency and reduce his costs while producing the best possible item. A fixed price incentive contract will provide for establishment of the final contract price by application of an agreed upon formula relating profit to total actual contract costs. This type of contract should not be used where there is insufficient cost experience with the item or services being produced and where insufficient competition exists to ensure competitive pricing.

d. *Cost Contract.* This is the simplest of the cost reimbursement type of contract. Under this type of contract, the contractor receives no fee but the buyer agrees to reimburse the contractor for allowable costs. Cost contracts are usually entered into for work done by educational and other nonprofit institutions and would include established indirect costs as determined acceptable for other federal contracts for each such entity.

e. *Letter Contracts.* A letter contract is a written preliminary contractual instrument which authorizes immediate commencement of manufacture of supplies, or performance of service, including but not limited to, planning and the procurement of necessary materials. This type of contract is intended to service one essential purpose—to get the contractor started without delay, for in emergencies time may not permit negotiation of a definitive contract. To protect the buyer's interest, letter contracts normally include agreement:

That the contractor will commence work without delay;

As to the extent and method of payment in case of contract termination for convenience or default;

That the contractor will not incur monetary obligations in excess of the limit set for them in the letter contract;

As to the anticipated type of definitive contract to be entered into at a later date;

As to certain definitive contract clauses;

That the contractor will be obligated to provide price and cost information that can be reasonably expected by the buyer within one month; and

That the contractor will enter into negotiations promptly and in good faith to arrive at a definitive contract with the buyer.

f. *Purchase Orders.* Purchase orders are a simplified form of a definitive contract that normally contains preprinted contractual provisions. They are normally used when supplies or services are bought on a fixed-price basis, and the price does not exceed $2,500.

g. *Cost-Plus-Percent-Of-Cost Contracts.* The cost plus a percentage of cost contract is prohibited by federal law and will not be used by the Council.

24. *Responsibility.* Contract administration is the responsibility of the Executive Director. The Executive Director may act for the Council to award, amend or modify a contract or take any action to change a contractual commitment on behalf of the Council. The Executive Director and the Council staff see that administrative functions are performed to achieve the desired results and to protect the Council's interest. The Executive Director is also responsible for maintaining a complete file of documentation related to each contract. The Executive Director shall designate a member of the Council staff to act as Contract Monitor upon the award of a contract.

25. *Council Staff.* The Council staff is responsible for the technical and project managerial aspects of contract administration. They ensure compliance with the technical requirements of the contract, determine the degree and acceptability of progress by the contractor, and when appropriate, certify to such progress by the contractor. All correspondence between the contract monitor and the contractor should be coordinated with the Executive Director and a copy provided for the contract file. Duties of a staff member assigned to monitor a contract include:

a. Familiarization with the terms and conditions of the contract in order to assure compliance with the provisions thereof.

b. After award, the holding of discussions with the contractor to arrive at a common understanding of individual responsibilities and working arrangements. Such discussions should occur immediately after award and as required throughout the period of the contract performance. Such meetings are not meant to be negotiations of tasks to be performed. Tasks and their scope must be decided during formal contract negotiations prior to award.

c. The arrangement of a schedule of operation in accordance with the contract requirements and certification, when appropriate, of satisfactory accomplishment on the contractor's requests for progress and final payments. Performance reports should show work actually accomplished. The Executive Director should be promptly informed of delays in progress of work and of any problems encountered that may require contract amendment or other administrative action.

d. Recommending to the Executive Director any proposed changes in specifications, extra work extensions in contract time or any other technical matter arising under the contract.

e. The initiation and acquisition of approvals that may be necessary for changes in the statement of work requirements which would require a contract modification.

f. Monitoring to assure that no work authorizations or orders to the contract, either oral or written, are issued unless authorized according to Council policy.

g. The furnishing of Council material to the contractor as may be provided in the contract and authorized by the Executive Director.

h. Obtaining and evaluating all technical and progress reports from the contractor required by the contract.

i. Evaluating contractor progress.

j. Reviewing the contract at least 90 days prior to scheduled completion date to determine any need for modification or renewal of the contract or extension of performance time. The Executive Director should be notified at least 60 days prior to scheduled completion of a contract if any extension of the contract period will be required or if a need for additional work under the contract is anticipated. The Executive Director should also be notified upon satisfactory completion of work under a contract.

k. Recommending the disposition of any problems which might arise in the areas of rights in data, patents, Council property, and other subjects addressed in the contract provisions.

l. Representing the best interests of the Council in all dealings with contractor.

26. *Post-Award Orientation.* Before performance of the contract begins, the Contract Monitor designated by the Executive Director shall call a post-award conference to ensure that the contractor fully understands every contractual provision. Subjects discussed should include as appropriate:

a. The statement of work content to ensure proper interpretation.

b. The specifications, when applicable.

c. The contractor's plan for the conduct of the contract.

d. The contractor's performance reports, content, and dates of submittal.

e. The contract provisions which are germane, for example, the key personnel clause, progress payments, et cetera.

f. Council furnished property.

(In less complex contracts, a post-award letter may be sufficient. When used, the letter is to identify the Contract Monitor and call attention to the reporting requirements.)

27. *Contractor Performance Reports and Requests for Payment.* The Contract Monitor should evaluate the contractor's performance at each interval when progress payments or performance reports are due. If the performance has been poor, or the contractor non-responsive, the Contract Monitor should arrange a discussion, in detail, with the contractor concerning performance shortcomings and proposed corrective action. Where contract requirements are not adequately met, final payment should be withheld until corrective action has been taken to the satisfaction of the Executive Director.

28. *Acceptance of Contract DeliverabIes.* It is the Contract Monitor's responsibility to determine that the work is complete and conforms with the technical requirements of the contract. Once formal acceptance has been accomplished, the contractor is normally excused from further performance or correction of unsatisfactory work. The Contract Monitor should provide written notification to the Executive Director when the contract work has been judged complete and technically acceptable.

29. *Delinquencies.* When a delinquency appears imminent, prompt action must be taken to protect the Council's rights. In administering a delinquent contract, Council staff should do nothing that might waive the Council's rights to terminate for default. In the event of a delinquency not of a minor nature, the Executive Director may take one of the following actions:

a. Extend the contract delivery schedule.

b. Terminate the contract for default.

c. Terminate the contract for the convenience of the Council.

d. Terminate the contract on the basis of agreement for a no-cost settlement.

e. Obtain a written agreement from the Contractor that the Council's consent to continued performance will not operate as a waiver of either its rights to terminate for the existing default, or any other of its rights.

30. *Contract Modification.* A contract modification is considered to be any written alteration of contract provisions, i.e., work statement, specification, period of performance, time and rate of delivery, quantity, price, cost, fee, or other provisions of an existing contract whether accomplished in accordance with a contract provision or by mutual actions of the parties to the contract.

31. *Approval Authority.* Only the Executive Director has the authority to approve a contract modification.

32. *Processing Contract Modifications.* The Contract Monitor is responsible for monitoring the contract and recommending changes in existing contracts. In such capacity, he will generally be responsible for initiating the necessary documents involving technical changes. In preparing the documents, he shall review the statement of work and the applicable specifications and then delineate the proposed changes thereto. The Contract Monitor should also evaluate whether these proposed changes are within the general scope of the contract or are considered new procurement and set forth the rationale supporting his position. If the Contract Monitor believes the changes to be in the general scope, the proposed changes, recommendations, and rationale are forwarded to the Executive Director for concurrence. If the modification is adjudged to be "new work" then the minimum standards for competition must be met as set forth in these regulations. New work cannot be added on to existing contracts without the appropriate considerations of procuring through competitive means.

33. *Contract Termination.* a. Types.

Completion. Most contracts are in force until satisfactory completion, or in the case of cost reimbursement contracts, until other satisfactory results are achieved or the funds allocated for their performance have been exhausted.

Termination for Convenience. The Executive Director may terminate for the convenience of the Council at any time during performance even though the contractor is performing properly; the contractor assumes this risk under the contract terms whenever he does business with a federal grantee. When the Council makes use of this right, however, it compensates the contractor for his cost and earned fee or profit for his preparations and for any completed and accepted work that relates to the terminated part of the contract. Termination for convenience would be used in cases where the Council has a change in requirements or a change in funding priority of projects. Other examples would be loss of key contractor scientific or engineering personnel; unsatisfactory progress; or changes in emphasis by the Council.

Termination for Default. The Council may terminate for default when the contractor fails to perform his part of the bargain properly.

b. *Procedures.* Generally, the provisions of the contract will govern procedures to be followed in termination. It is the duty of the Contract Monitor to recommend the termination of a contract to the Executive Director. The Executive Director shall instruct the Contract Monitor in the settlement process with the contractor.

c. *Closing Contracts.* Upon completion of the contract work, the Council shall close out the contract as rapidly and as effectively as possible and make final payment to the contractor. To this end, the Executive Director shall ensure that all work is promptly inspected to the extent necessary to determine acceptability. The Executive Director should also call upon the Contract Monitor to determine that the work is complete and conforms with the technical requirements of the contract, and that all items contractually required have been submitted and are acceptable.

34. *Procedures for processing claims arising out of contracts entered into by the Council.*

a. *Authority of the Executive Director.* The Executive Director is authorized to settle, compromise, pay or otherwise adjust any claim by or against, or any controversy with, a contractor or bidder relating to a contract entered into by the Council, including a claim or controversy initiated after award of a contract, based on breach of contract, mistake, misrepresentation or other cause for contract modification or recision. In the event a settlement or compromise involves or could involve adjustments and/or payments aggregating $10,000 or more, then the Executive Director shall prepare written justification and obtain approval in advance, from the full Council and its legal advisor. When a claim cannot be resolved by mutual agreement, the Executive Director shall promptly issue a decision in writing. A copy of that decision shall be mailed or otherwise furnished to the contractor and shall state the reasons for the action taken on the claim, and shall inform the contractor of his right to administrative relief as provided in this section. The decision of the Executive Director is final and shall be conclusive unless fraudulent, or the contractor appeals to the Council. If the Executive Director does not issue a written decision within one hundred and twenty (120) days after receipt of a claim, or within such longer period as might be established by the parties to the contract in writing, then the contractor may proceed as if an adverse decision has been received.

b. *Authority of the Administrative Officer.* The Administrative Officer is authorized subject to the approval of the Executive Director of any settlement, to negotiate with contractors in order to settle any claim which may arise under a contract entered into by the Council.

c. *Appeal to the Council.* The Council has jurisdiction over each controversy arising under, or in connection with, the interpretation, performance or payment of a contract of the Council provided that:

The contractor has not instituted action over such controversy in court, and

The contractor has mailed notice to the Council of his election to appeal within 90 days of his receipt of the decision from the Executive Director, or at the contractor's election, within a reasonable time after the Executive Director fails or refuses to issue a decision.

d. *Hearing before Council.* The Council shall hold appeal hearings to the fullest extent possible in an informal, expeditious, and inexpensive manner and shall issue a decision in writing or take other appropriate action on each appeal submitted and shall provide a copy of the decision to the contractor and the Executive Director to be included in the contract file.

e. *Bid Protests.* The Council shall have authority to determine protests and other controversies of prospective bidders, bidders or contractors in connection with the solicitation or selection for award of a contract.

f. *Filing of Protest.* Any prospective bidder, bidder or contractor who is aggrieved in connection with the solicitation of selection for award of a contract may file a protest with the Council. The protest or notice of other controversy must be filed promptly and in any event within two calendar weeks after such aggrieved person knows or should have known of the facts giving rise thereto. All protests or notices of other controversy must be in writing.

g. *Decision.* The Council shall promptly issue a decision in writing and in no case more than thirty (30) calendar days after receipt of such protest or notice of other controversy, unless the parties agree in writing to a longer period. A copy of that decision shall be mailed or otherwise furnished to the aggrieved party and shall state the reasons for the action taken.

h. *Effect of Decision.* The decision by the Council shall be final and conclusive.

35. *It is the policy of the Council to purchase goods and services in a fair and impartial manner.* Employees and Council members shall discharge their duties and responsibilities in a manner which will inspire confidence in the integrity of the Council. Any effort to realize personal gain through Council activities or employment beyond remuneration provided by the Council, is a violation of a public trust, as is any conduct which would create a justifiable impression in the public that such trust is being violated.

V 42 I 177 SEP 13 77 UMI

36. *Conflicts of Interests.* It shall be improper for any employee or Council member to participate directly or indirectly through decision, approval, disapproval, recommendations, preparation or any part of a purchase request, influencing the content of any specification or purchase standard, rendering of advice, investigation, auditing, or otherwise, in any:

a. Proceeding or application;

b. Request for ruling or other determination;

c. Claim or controversy; or

d. Other matter pertaining to any contracts, grant, subcontract, or subgrant, and any solicitation or proposal therefor, where to his knowledge there is a financial interest possessed by:

Himself or his immediate family;

A business other than a public agency in which he or a member of his immediate family serves as an officer, director, trustee, partner, or employee; or

Any person or business with whom he or a member of his immediate family is negotiating or has an arrangement concerning prospective employment. (Notice of this prohibition shall be conspicuously set forth in every contract, and solicitations therefor.)

37. *Any employee or council member who has or obtains any* benefit from any contract with a business in which the employee or Council member has a financial interest, shall report such benefit to the full Council. In the event that such employee or Council member knows or should have known of such benefit, and fails to report such benefit to the full Council, he shall be in violation of the ethical standards of this section. However, this provision shall not apply to a contract with a business where the employee's or Council's interest in the business has been placed in an independently managed trust.

(Notice of this prohibition shall be conspicuously set forth in every contract or solicitation therefor.)

38. *Gratuities.* It is improper for any person to offer, give or agree to any employee or Council member or for any employee or Council member to solicit, demand, accept or agree to accept from another person, anything of a pecuniary value for or because of:

a. An official action taken or to be taken, or which could be taken; or

b. A legal duty violated or to be violated, or which could be violated by such employee or former employee.

39. *Kickbacks.* It is improper for any payment, gratuity, or benefit to be made by or on behalf of a subcontractor under a contract to the prime contractor or higher tier subcontractor or any person associated therewith as an inducement for the award of a subcontract or order.

(The prohibition against gratuities and kickbacks shall be conspicuously set forth in every contract, and solicitations therefor.)

40. *Represenation of Contractor.* Every person, before being awarded a contract with this Council, shall represent that he has not retained a person to solicit or secure the contract with this Council upon an agreement or understanding for a commission, percentage, brokerage or contingent fee, excepting for bona fide employees or bona fide established commercial, selling agencies maintained by the person so representing for the purpose of securing business or an attorney rendering professional legal services, employed, consistent with applicable canons of ethics.

41. *Intentional Violation Unlaeful.* The intentional violation of the representation specified in Subsection 40 above is cause for termination of a contract.

(The representation prescribed in Subsection 40 shall be conspicuously set forth in all contracts, and solicitations therefore.)

42. *Restriction on Employment of Present and Former Council Employees.*

a. Contemporaneous Employment Prohibited. It shall be improper for any Council employee or member to become or be an employee of a party contracting with the Council, while in the service of the Council. Notice of this provision shall be conspicuously set forth in every contract, and solicitations therefor. This does not apply to nonprofit organizations such as State governmental agencies and educational institutions.

b. Permanent Disqualification of Former Employees. For a period of two years after Council employment, it shall be improper for a former employee to knowingly act as agent or attorney for anyone other than the Council in connection with any judicial or other proceeding, application, request for a ruling, or other determination, contract, grant, claim, controversy, charge, or other particular matter involving a contract, where the Council is a party or has a direct and substantial interest and in which he participated personally and substantially as an employee, through decision, approval, disapproval, recommendation, the rendering of advice, investigation, or otherwise while so employed.

c. Post-Employment Restriction on Representation. It shall be improper for a person having been an employee of the Council, within one year after his emploment has ceased, to appear personally before the Council or its committees or membership in connection with any proceeding, application, claim, request or other particular matter involving a contract where the Council is a party or directly and substantially interested and which was under his official responsibility as an employee, or member of the Council at any time within a period of one year prior to the termination of such responsibility.

The term "official responsibility" as used herein, means the direct administrative or operating authority whether intermediate or final, and either exercisable alone or with others, and either personally or through subordinates, to approve, disapprove, or otherwise direct Council actions.

d. Disqualification of Partners. It shall be unlawful for a person, being a partner of an employee, Council member, former employee or former Council member, to act as agent or attorney for anyone other than the Council, in connection with any judical or other proceeding, application, request for a ruling or other determination, contract, claim, controversy, charge, or other particular matter involving a contract where the Council is a part or has a direct and substantial interest and in which such employee or Council member participates or has participated personally and substantially as a Council employee or member through decision, approval, disaproval, recommendation, the rendering of advice, investigation or otherwise, or which is or was the subject of his official responsibility.

e. Use of Confidential Information. It shall be improper for any employee, Council member, former employee, or former Council member of this Council to use confidential information for his actual or anticipated personal gain, or the actual or anticipated personal gain of any other person.

43. *Procurements may be negotiated if it is impracticable and unfeasible to use formal advertising.* Generally, procurements may be negotiated by the Council through the Executive Director if:

a. The public exingency will not permit the delay incident to advertising;

b. The material or service to be procured is available from only one person or firm (sole-source);

c. The aggregate amount does not exceed $10,000;

d. The contract is for personal or professional services or for any service to be rendered by a state or quasi-public agency including a university, college, or other educational institution;

e. The material or services are to be procured and used outside the limts of the United States and its possessions;

f. No acceptable bids have been received after formal advertising;

g. The purchases are for highly perishable materials or medical supplies, for material or services where the prices are established by law, for technical items or equipment requiring standardization and interchangeability of parts with existing equipment, for experimental, developmental, or research work, for supplies purchased for authorized resale, or for technical or specialized supplies requiring substantial initial investment for manufacture; or

h. The procurements are otherwise authorized by law, rules, or regulations.

(Notwithstanding the existence of circumstances justifying negotiation, competition shall be obtained to the maximum extent practicable.)

44. *Property Management.* All durable or capitalized equipment will be accounted for by an inventory system.

a. A property number will be assigned to all capitalized equipment and property inventory cards maintained on all such equipment.

b. A physical inventory of all property and equipment will be made at least once every two years.

c. The leasing, renting and acquisition of all property and space will be done in a manner consistent with customary practices observed in contracts by public entities.

d. All requests for capital equipment will be transmitted to the NOAA Grants Office for review and approval before commitment of grant funds for this purpose.

e. Fire and theft insurance will be carried on all property, capitalized and non-capitalized, in an amount equal to at least the replacement value of the equipment.

Appendix I: Gulf of Mexico Fishery Management Council Staff Functions

Executive Director

The Executive Director's duties shall involve the implementation of the Council's business, policies, and determinations of fishery management activities as they directly affect the public.

While technical, scientific and statistical advice to the Council will be furnished through advisory committees, the Executive Director will manage all Council programs and technical teams authorized by the Council and will coordinate input to the Council from advisory, scientific, technical and other committees.

The Executive Director shall also direct an administrative support staff whose tasks will be that of assisting the Executive Director in carrying out functions.

The Executive Director will be responsible for accounting for and controlling resources allocated to the Council and at the direction of the Council. He/she shall be responsible for the financial management system of the Council, effective control over the accountability for all funds, property and other assets, and for complying with the provisions of OMB Circular A-110 for grants and grant proposals.

He/she will be responsible for developing agendas for public meetings; preparing reports; acting as official spokesperson for the Council, when delegated; establishing, maintaining and supervising the administrative support staff to carry out support functions; maintaining an understanding of the program and presenting that view to the public when necessary; carrying out decisions of the Council; and any other assignments received from the Council. As the principal full-time employee of the Council, the Executive Director will be the primary contact with the public and will have extensive responsibilities for preparation of news releases, in the name of the Chairman, on programs and achievements of the Council.

Administrative Officer

Assists the Executive Director in the formulation and development of policy, procedures and programs and in initiating actions and making and implementing decisions involved in the overall management of the Council's operations. Responsible for providing effective administrative services in support of the Council's program activities, involving planning, implementing, directing and evaluating all of the administrative service activities in coordination with the Executive Director.

Duties

1. Directs and coordinates the work of the administrative staff. Responsible for the development and implementation of policies, methods and procedures involving specialties and activities as follows:

a. *Budget and Finance.*—Development of budgets and justifications. Establishment and operation of accounting system, including appropriation and fund control, cost, accrued expenditure and business-type features as necessary to the needs of the Council.

b. *Personnel Management.*—All phases of personnel management, including position classification, wage administration, recruitment, placement, performance evaluation, employee development, employee management relations and services and personnel records.

c. *Property Management.*—The acquisition and disposition of all personal property and services of competitive bid contracting, negotiated contract and the procedures for the maintenance and care of personal property and records; the maintenance of property accountability records and development of cost and custody reports; the operation of a records management program, including creation and disposal; the acquisition and release of office space for office, and other purposes; the obtaining of transportation and communications services; and the provision of mail, messenger, filing and other general office services. Also included are safety activities.

d. *General.*—Serves as the principal assistant and advisor to the Executive Director on administrative management matters. Assists and advises him/her through positive recommendations in the executive implementation of Council-wide policies and guidelines; participates in conferences and meetings with the Council members, other Federal agencies, and State or other public and private organizations to explain, negotiate and defend administrative management policies and programs of the Council; and frequently represents the Executive Director with authority to make firm commitments on matters within the sphere of his/her responsibility, including tht employment and training or personnel, direction of travel and overtime, financial adjustments and contract awards. Contracts with State fishery agencies, educational institutions, and others. Aids in all phases of management plan development as directed by the Executive Director.

e. *Supervisory Responsibility.*—Directly supervises the Office Manager and one or more clerical personnel. Through the Office Manager, normally supervises all clerical personnel.

f. *Technical Monitoring.*—May be directed by the Executive Director to monitor progress of contractural agreements for the development of technical data and documents.

g. *Supervision Received.*—Under direct supervision of the Executive Director. In the absence of the Executive Director is under direct supervision of the Technical Support Specialist.

Technical Support Specialist

Is charged with formulation and development of fisheries management plans in coordination with the Executive Director. Is responsible for direct coordination of management plans development with the Council, Council Subcommittees, Scientific and Statistical Committee, Advisory Panels, Federal agencies, contractors and subcontractors, task groups and the Executive Director. Is in charge of drafting final management plans and environmental impact statements in the format required by the Secretary under P. L. 94-265 in coordination with the Executive Director and staff. Serves as staff officer in charge in the absence of the Executive Director.

Duties

1. Directs the development of management plans and the work of the staff in this development task under the supervision of the Executive Director.

a. Develops and maintains the mechanism for acquisition of the data base required for the management plans through the available sources, such as National Marine Fisheries Service laboratories, State and university laboratories, and other agencies of institutions.

b. Coordinates and directs the compilation of these data into a management plan format through staff assignments, use of contractors and subcontractors, task force groups, support by NMFS laboratories and other groups.

c. Coordinates all phases of plan development with the Scientific and Statistical Committee, the Advisory Panels, the Council and the Executive Director.

d. Attends public hearings on plan development to present scientific data.

e. Monitors management plan effectiveness and reports to the Executive Director with proposed modifications.

f. Determines the research needed to strengthen the management data base for each fishery and develops and presents research proposals in coordination with the Executive Director.

g. *General.*—Assists and advises the Executive Director on technical matters relating to management plan development and monitoring and on policy matters relating to Council operations, policies and guidelines; participates in conferences and meetings with Council members, State and Federal agencies, public and private organizations and associations; explains and defends programs of the Council; frequently represents the Executive Director with authority to make commitments. Directs and coordinates the work of the staff in developing management plans and compiling data.

h. *Supervisory Responsibility.*—Serves as staff officer in charge of all staff personnel in the absence of the Executive Director. Serves as immediate supervisor to the Assistant Technical Support Specialist and through him/her the Office Manager. Directly supervises one or more clerical personnel.

i. *Technical Monitoring.*—Monitors contractual agreements for the development of technical data and documents by contractors, subcontractors, task force groups and the progress of federal technical support groups in the development of such data and documents.

Assistant Technical Support Specialist

Assists the Technical Support Specialist in preparation, review and coordination of fisheries management plan development. Compiles and analyzes socio-economic and other technical data. Coordinates and reviews manuscript preparation. Meets with Scientific and Statistical Committee and Advisory Panels at direction of Technical Support Specialist. Monitors work and progress of contractors, subcontractors, task groups and National Marine Fisheries Service technical support groups in preparation of fisheries management plans.

Duties

1. Assists and advises Technical Support Specialist and Executive Director on fishery management plan development.

2. Physically compiles and analyzes socio-economic and other technical data for management plans according to directions of the Technical Support Specialist.

3. Confers with consultants, Advisory Panels, Scientific and Statistical Committee members, state, university and federal scientists on socio-economic and other aspects of plan development and summarizes their input for inclusion in the plans.

4. Supports all aspects of plan development, analysis, review and monitoring as directed.

5. General: Assists and advises the Technical Support Specialist and the Executive Director on socio-economic and technical matters relating to management plan development and monitoring. Serves as chief officer in charge of technical support in absence of Technical Support Specialist. Participates in meetings and conferences with Council members, State and Federal agencies, University groups, the public and fisheries associations at the direction of the Technical Support Specialist.

Supervisory Responsibility.—Serves as staff officer in charge of all staff personnel in the absence of the Executive Director, Technical Support Specialist and the Administrative Officer.

Administrative Assistant to Executive Director

Serves as secretary to the Executive Director and office assistant to the Administrative Officer. Ensures that clerical work and secretarial staff are organized to be responsive and provide efficient use of staff. Directs daily routines of clerical personnel and supervises purchase of office materials and supplies. Attends Council and committee meetings (when required) and prepares and transmits all pertinent documents to Council.

Duties

1. Performs accounting and bookkeeping duties as required and prepares pertinent accounting reports.

2. Receives supervisor's telephone and personal callers and screens those which in his/her judgment can be handled by the supervisor's subordinates or other offices and tactfully refers them as appropriate. Personally takes care of many matters and questions including answering substantive questions not requiring research or technical knowledge.

3. Keeps supervisor's calendar and makes necessary arrangements for conferences (including all travel arrangements). Assembles background material for supervisor. Attends the meetings and prepares reports of the proceedings.

4. Receives and reads incoming correspondence, reports, instructions, etc. Screens out those items which can be handled personally, forwarding the rest to supervisor or

V 42 I 177 SEP 13 77 UMI

subordinates together with necessary background material.

5. Prepares replies personally for inquiries such as requests for instruction concerning the correct procedure in filing job applications or securing consideration of special cases when these are matters over which supervisor has control and when these are matters not involving controversial questions, drafts replies to general inquiries not requiring a technical knowledge of the program or programs under his/her supervisor's control.

6. Reviews outgoing correspondence which is being submitted to supervisor for signature or clearance for format, typographical accuracy, conformance with procedural instructions, to determine that all necessary background material is attached to the file, etc.

7. Maintains records of incoming and outgoing correspondence and action documents and follows up on work in process.

8. Assembles and summarizes information from files and documents in the office or other available soures for use of supervisor on the basis of general instructions as to the nature of the information wanted and its purpose. Obtains documents, files and background information for supervisor on the basis of general instructions as to the nature of the subject matter.

9. Procures supplies, equipment, repair and maintenance services and the like through agency channels.

10. Other duties as assigned.

Supervisory Responsibility.—Coordinates and directs clerical personnel under the supervision of the Administrative Officer and other executive offices.

SECRETARY

Serves as Secretary to the Administrative offices of Council staff. Relieves supervisor of routine administrative and miscellaneous clerical work. Based upon a good working knowledge of the organization, programs and services, resolves problems associated with the administrative and clerical work of the office.

Duties

1. Receives supervisor's calls and greets visitors and directs to supervisor's attention only those contacts needing his attention or action. Takes care of routine matters, and on the basis of knowledge of the programs and operations, refers other inquires to appropriate personnel. Personally responds to routine and non-technical requests for information such as status reports, suspense data for matters requiring compliance, travel order requests and similar information.

2. Maintains supervisor's calendar and schedules appointments.

3. Composes correspondence on administrative and clerical functions for the staff and routine correspondence on other subjects as requested by the supervisor. Reads outgoing correspondence for procedural and grammatical accuracy. Maintains suspense records on all correspondence and action documents and follows up to ensure timely reply or action.

4. Takes and transcribes dictation of correspondence, reports and telephone conversations involving both technical and specialized terminology.

5. Prepares in final form all types of documentation and forms incident to the staff and office management.

6. Reads directives and instructional material pertaining to administrative practices and clerical procedures in order to be aware of new, revised or amended procedures for such matters as preparation and processing of travel orders, forms, filing, mail procedures, security forms and procedures, etc. Provides guidance and assistance on applicable procedures, instructions and regulation to other clerical personnel assigned to the staff.

7. Other duties as assigned.

CLERK-TYPIST

1. Serves as office receptionist; greats visitors; answers telephone; transfers calls and takes messages.

2. Receives and reviews mail (except classified mail); distributes mail to appropriate party; handles outgoing mail for office.

3. Transcribes, from tapes, reports, correspondence, other as assigned involving both technical and specialized terminology. Types intermediate drafts when requested. Uses reference sources such as dictionaries, correspondence manuals, travel handbooks, etc.

4. Prepares travel orders, special travel orders, blanket travel orders for Council and staff. Assists in travel arrangements and accommodations. Assists in the preparation of travel vouchers; types all travel vouchers and xeroxes all pertinent data for records.

5. Maintains mailing lists: addresses, phone numbers and social security numbers (if required).

6. Assembles and prepares time and attendance cards; maintains general files.

7. Other duties as assigned.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration

■

MEDICAL DEVICES

Classification Procedures

V 42 177 SEP 13 77 UMI

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration

[21 CFR Parts 16, 20, 860]

[Docket No. 77N-0155]

MEDICAL DEVICES

Classification Procedures

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

SUMMARY: This document proposes criteria and procedures for classifying devices intended for human use into classes of regulatory control sufficient to provide reasonable assurance of the safety and effectiveness of such devices. The proposal is made under provisions of sections 513 and 701(a) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360c, 371(a)). The proposal would add a new Part 860 (21 CFR Part 860) to prescribe criteria and procedures for the classification of devices into classes of regulatory control, the consideration of evidence of safety and effectiveness of devices, and the submission and review of petitions for reclassification of devices. It also prescribes the circumstances under which information and data associated with the classification or reclassification of devices will be released to the public.

DATE: Comments by November 14, 1977. The Commissioner proposes that final regulations based on this proposal shall be effective on the date of their publication in the FEDERAL REGISTER.

ADDRESS: Written comments (preferably four copies) to the Hearing Clerk (HFC-20), Food and Drug Administration, Room 4-65, 5600 Fishers Lane, Rockville, Md. 20857.

FOR FURTHER INFORMATION CONTACT:

Joseph Sheehan, Bureau of Medical Devices (HFK-122), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, Md. 20910 (301-427-7114).

SUPPLEMENTARY INFORMATION: The Medical Device Amendments of 1976 (Pub. L. 94-295), amending the Federal Food, Drug, and Cosmetic Act (52 Stat. 1040 et seq. (21 U.S.C. 201 et seq.)), hereinafter referred to as "the act," became law on May 28, 1976. Section 513(c) of the act (21 U.S.C. 360c(c)) requires the Secretary of Health, Education, and Welfare to prescribe, by regulation, procedures for review and recommendations by classification panels regarding the classification of medical devices into regulatory control classes.

As stated in an FDA notice (FEDERAL REGISTER of June 4, 1976 (41 FR 22620)), concerning the implementation of the amendments, authority under the act is vested in the Commissioner under § 5.1 (21 CFR 5.1). The notice also stated that among the proposed implementing regulations to be published in the future in the FEDERAL REGISTER would be proposed regulations concerning procedures for the classification of medical devices.

The agency has been following and will continue to follow the procedures for device classification contained in this proposal until final regulations are published. The agency will proceed with publication of proposed regulations classifying devices before promulgating the final classification procedures regulations. There is no requirement that the final classification procedures regulations be promulgated before the publication of panel recommendations and proposed regulations classifying devices, especially because the regulations proposed here essentially codify the procedures FDA has been following since enactment of the amendments.

PRE-ENACTMENT CLASSIFICATION RECOMMENDATIONS

Anticipating eventual enactment of medical device legislation, FDA initiated in 1973 a preliminary classification of medical devices. A list of approximately 8,000 devices had been compiled in 1971, and 13 classification panels, plus a Diagnostic Products Advisory Committee, had been established by 1975. The panels made recommendations for classifying medical devices into different classes of regulatory control using criteria contained in legislative proposals before Congress during this period. The procedures that finally evolved during this preliminary classification process were published in a FEDERAL REGISTER notice on May 19, 1975 (40 FR 21848).

The panels were organized according to the various fields of clinical medicine and fundamental sciences in which devices intended for human use are used. The panels were composed of experts of diverse backgrounds, skilled in the use of, or experienced in the development, manufacture, or use of, medical devices.

Under section 513(b) of the act, the Commissioner may either establish classification panels or use panels established before the date of enactment of the amendments. The Commissioner finds that the objectives of the 13 classification panels established before enactment satisfy the requirements of the amendments. He has, however, rechartered each panel and directed it to reconsider its previous recommendations in light of the statutory classification criteria and other requirements of the legislation. In determining what recommendation to make to the Commissioner with respect to the classification of a device, a panel may use information obtained, findings developed, and judgments reached before enactment of the amendments (Ref. 1, at p. 39).

As noted above, the Commissioner decided to retain the 13 medical device classification panels that were established before enactment of the amendments and rechartered them by a notice published in the FEDERAL REGISTER of August 25, 1976 (41 FR 35877). In addition, the six subcommittees of the Diagnostic Products Advisory Committee were chartered as separate classification panels (41 FR 35878, August 25, 1976). As a result, there are now 19 chartered classification panels. This number may be reduced in the future. The titles of the classification panels and names of members have been filed with and are available for review at the office of the Hearing Clerk (HFC-20), Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

SUMMARY OF STATUTORY REQUIREMENTS

Section 513 of the act establishes three classes of regulatory control for medical devices and requires FDA to classify all devices intended for human use into one of those classes. They are: Class I, General Controls; class II, Performance Standards; and class III, Premarket Approval.

Section 513(a)(1)(A) of the act defines class I devices as those devices (1) for which there is sufficient information to determine that the provisions of the act with respect to adulteration; misbranding; registration; banning; defect notification; repair, replacement, or refund; records and reports; and good manufacturing practices (referred to as "general controls" hereafter) will provide reasonable assurance of the safety and effectiveness of the device or (2) for which there is insufficient information to determine that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device or to establish a performance standard to provide such assurance but which are not purported or represented to be for a use in supporting or sustaining human life or for a use which is of substantial importance in preventing impairment of human health and do not present a potential unreasonable risk of illness or injury. Class I devices are to be regulated under the general controls provisions of the act.

Section 513(a)(1)(B) of the act defines class II devices as those devices for which general controls alone are insufficient to provide reasonable assurance of safety and effectiveness and for which there is sufficient information to establish a performance standard to provide such assurance. Class II devices will be subject to performance standards to be established under section 514 of the act. The policy that FDA intends to develop and apply with respect to performance standards was the subject of a FEDERAL REGISTER notice on August 12, 1976 (41 FR 34099). A proposed procedural regulation governing section 514 of the act will be published in the FEDERAL REGISTER in the near future.

Section 513(a)(1)(C) of the act defines class III devices as those devices for which there is insufficient information to determine that general controls will assure their safety and effectiveness and for which there is insufficient information to establish a performance standard to provide such assurance, and which are purported or represented to be for a use in supporting or sustaining human life or for a use which is of substantial importance in preventing impairment of human health, or which present a potential unreasonable risk of illness or injury.

Class III devices are subject, under section 515 of the act, to premarket approval. The requirements of the act with respect to premarket approval procedures and requirements will be the subject of a proposed regulation, which will be published in the FEDERAL REGISTER in the future.

Under section 513(a)(2) of the act, the safety and effectiveness of a device are to be determined with respect to the persons for whose use the device is represented or intended; with respect to the conditions of use prescribed, recommended, or suggested in the labeling of the device; and weighing any probable benefit to health from the use of the device against any probable risk of illness or injury from such use. The effectiveness of a device is to be determined on the basis of well-controlled investigations, including clinical investigations where appropriate, by experts qualified by training and experience to evaluate the effectiveness of a device. The Commissioner may authorize the effectiveness of a device to be evaluated on the basis of other valid scientific evidence if he determines such evidence to be sufficient.

Section 513(b) of the act requires the Commissioner to establish panels of experts or use panels of experts already established to make recommendations with respect to the classification of devices. These panels must consist of persons who are qualified by training and experience to evaluate the safety and effectiveness of the devices and who, to the extent feasible, possess skill in the use of, or experience in the development, manufacture, or utilization of, the devices. Each panel must consist of members with adequately diversified expertise in clinical and administrative medicine, engineering, biological and physical sciences, and other related professions. Each panel must also include, as nonvoting members, a representative of consumer interests and a representative of interests of the device manufacturing industry.

Section 513(c)(1) of the act provides that the panels are to be organized according to the various fields of clinical medicine and fundamental sciences in which devices are used. The Commissioner must refer a device to the appropriate panel for its review and recommendation with respect to the classification of the device. In making their reviews, the panels are required to provide an opportunity, to the maximum extent practicable, for interested persons to submit data and views on the classification of devices.

Section 513(c)(2) of the act provides that a panel recommendation on the classification of a device must include a summary of the reasons for the recommendation; a summary of the data upon which the recommendation is based; an identification of the risks to health (if any) presented by the device; and, to the extent practicable, a recommendation for the assignment of a priority for the application to the device of the requirements of section 514 of the act, regarding performance standards, or section 515 of the act, regarding premarket approval, if recommended to be classified in class II or class III, respectively.

Further, section 513(c)(2) of the act provides that a panel recommendation for the classification of a device in class I must include a recommendation on whether the device should be exempted from one or more of the requirements of section 510 of the act (registration), section 519 of the act (records and reports), or section 520(f) of the act (good manufacturing practices). Under section 513(d) of the act, the Commissioner, when promulgating a regulation classifying a device in class I, must state which, if any, of these requirements will be made inapplicable and his reasons for making such requirement(s) inapplicable.

Section 513(c) of the act contains special provisions for panel recommendations on the classification of a device that is intended to be implanted in the human body or is purported or represented to be for a use in supporting or sustaining human life. The panel must recommend that such a device be classified in class III unless it determines that such classification is not necessary to assure the safety and effectiveness of the device, in which case it must set forth the reasons in its classification recommendation. Similarly, under section 513(d) of the act, the Commissioner is required to classify implants and life-supporting and life-sustaining devices in class III, unless he determines that such classification is not necessary to assure the safety and effectiveness of the device. A proposed regulation classifying such a device in a class other than class III must be accompanied by a full statement of the Commissioner's reasons for not classifying it in class III and an identification of the risks to health (if any) presented by the device.

Section 513(d) of the act requires the Commissioner to publish in the FEDERAL REGISTER panel recommendations and proposed classification regulations. After providing an opportunity for comment, the Commissioner must by final regulation classify the device. This subsection also authorizes the Commissioner, in his discretion, to establish priorities to be used in promulgating a performance standard or requiring premarket approval for class II and class III devices, respectively.

Section 513(e) of the act provides that, based upon new information relevant to the classification of a device, the Commissioner may, upon his own initiative or upon petition of any interested person, change the classification of a device and revoke any performance standard or premarket approval requirement with respect to the device. The Commissioner is authorized, but not required, to obtain classification panel review and recommendations with respect to a proposed change in classification under this subsection. If he does obtain panel review, the resulting panel recommendations must be published in the FEDERAL REGISTER. A regulation changing the classification of a device from class III to class II may provide that the classification will not take effect until the effective date of a performance standard for the device.

The classification procedures contained in section 513(b)—(d) of the act, and discussed above, apply to the initial classification of "old" devices, i.e., those which either were in commercial distribution before the date of enactment of the amendments or are substantially equivalent to devices in commercial distribution before that date. Section 513(f) of the act contains special provisions for the classification of "new" devices, i.e., those which were not in commercial distribution before the date of enactment and are not substantially equivalent to any which were in distribution. Such a device is automatically classified in class III unless it is substantially equivalent to another new device that has been reclassified to class I or II.

Section 513(f) of the act also contains provisions allowing the manufacturer or importer of a device classified by statute in class III to petition for reclassification in class I or class II. Within 30 days after the filing of such a petition, the Commissioner must notify the petitioner of any deficiencies in the petition that prevent him from making a decision on it. After it has been determined that the petition contains no such deficiency, the Commissioner must refer the petition to the appropriate classification panel for review. The panels must provide an opportunity for interested persons to submit data and views. A panel recommendation for the classification of a device in class I must include a recommendation whether the device should be exempted from any of the requirements of section 510, 519, or 520(f) of the act and, where appropriate and practicable, priorities for the application of sections 514 and 515 of the act to class II and class III devices, respectively. Under section 513(f) of the act, if a petitioner seeks the reclassification of a device that is intended to be implanted or is purported or represented to be for a life-supporting or life-sustaining use, the panel must recommend that the petition be denied unless the panel finds that classification in class III is not necessary to provide reasonable assurance of the safety and effectiveness of the device. The panel must make its recommendation to the Commissioner within 90 days of the date of referral of a petition to reclassify. Panel recommendations on petitions to reclassify under section 513(f) of the act must be published for comment in the FEDERAL REGISTER. Within 90 days after receipt of the panel recommendation, and no more than 210 days after the filing of the petition, the Commissioner must by order deny or approve the petition. If the Commissioner approves the petition, he must reclassify the device by order in class I or class II. An order under this section reclassifying a device in class I must state whether the devise is to be exempted from any of the requirements of section 510, 519 or 520(f) of the act. The Com-

V 42 I 177 SEP 13 77 UMI

missioner must deny any petition for reclassification of a device that is intended to be implanted or is purported or represented to be for a use in supporting or sustaining human life, unless the Commissioner determines that classification in class III is not necessary to provide reasonable assurance of the safety and effectiveness of the device.

Section 513(g) of the act provides that any person seeking information respecting the class in which a device has been classified or the requirements applicable to a device under the act is entitled to receive a written statement of the information sought within 60 days of receipt by the Commissioner of a written request.

The regulations proposed herein also implement other sections of the act that affect classification, i.e., sections 514(b), 515(b) and 520(1) of the act. Section 514(b) of the act requires the Commissioner, when initiating a proceeding for the development of a performance standard for a class II device, to publish in the FEDERAL REGISTER a notice of an opportunity to request a change in classification of the device based on new information relevant to the classification of the device. Section 515(b) of the act requires that the same type of notice be included in a notice of proposed rulemaking initiating a proceeding to require premarket approval of a class III device. A request to change classification of a device in response to a notice issued pursuant to section 514(b) or 515(b) of the act must be filed within 15 days of publication of the notice. The Commissioner must then consult with the appropriate classification panel and, within 60 days of publication of the notice, by order published in the FEDERAL REGISTER, either deny the request or give notice of his intention to initiate a change in classification under section 513(e) of the act.

Section 520(1) provides that any device intended for human use that (1) had an approved or pending new drug application (NDA) on the date of enactment; (2) had in effect an investigational new drug exemption (IND) under section 505(i) of the act on the date of enactment; (3) is substantially equivalent to a device that had an approved or pending NDA or an effective IND; (4) had been declared by the Commissioner to be a new drug before the date of enactment; or (5) had legal actions pending with respect to it in a United States court on the date of enactment for an alleged violation of new drug requirements is automatically classified in class III. The manufacturer or importer of a device classified in class III by subsection 520(1) of the act may petition for reclassification of the device. Within 30 days after the filing of such a petition, the Commissioner must notify the petitioner of any deficiencies in the petition that prevent him from making a decision on it. After receipt of a petition adequate for review, the Commissioner must afford the petitioner an opportunity for an informal hearing and consult with the appropriate classification panel. Within 180 days after the filing of that petition, the Commissioner must, by order, either deny the petition or order the classification of the device in class I or class II.

ADMINISTRATIVE PRACTICES AND PROCEDURES REGULATIONS APPLICABLE TO CLASSIFICATION PANELS

In addition to the regulations proposed for Part 860, classification panels, as advisory committees, have been and will continue to be subject to the regulations at 21 CFR Part 14, which prescribe administrative practices and procedures for public advisory committees, including rules for conducting meetings and hearings before advisory committees. These regulations became final by publication in the FEDERAL REGISTER of November 26, 1976 (41 FR 52148), were recodified in the FEDERAL REGISTER of March 22, 1977 (42 FR 15553), and, with the May 19, 1975 notice concerning interim classification, essentially satisfy the requirement in section 513(c) of the act for procedural regulations governing the review and recommendations made by device classification panels. As described above, the 19 existing classification panels have been chartered and are operating in accordance with these regulations and the applicable requirements of section 513 of the act and will so continue in carrying out their functions under the proposed Part 860.

CONFORMING CHANGES IN OTHER FDA REGULATIONS

The new procdures for classification proposed in Part 860 would require corresponding changes in other existing agency regulations in Title 21 of the Code of Federal Regulations. A brief summary of these changes follows.

Hearings under section 520(1) of the act. Section 16.1 (21 CFR 16.1) would be amended to provide that the opportunity for an informal hearing in connection with petitions for reclassification under § 860.136 would be conducted in accordance with the procedures governing regulatory hearings. The Commissioner believes that the regulatory hearing procedures in 21 CFR Part 16 are consistent with the intent of Congress that an informal hearing regarding medical devices belance differing needs (Ref. 1 at p. 53).

Public disclosure of data and information. Section 20.100(c) (21 CFR 20.100 (c)) would be amended to add a new sentence establishing the special rules of § 860.5 governing the disclosure and the use by the Commissioner of any data and information submitted either to him or to classification panels in connection with classification or reclassification of devices.

PROPOSED REGULATION

Scope. Proposed § 860.1 defines the scope of Part 860. Generally, Part 860 prescribes the criteria and procedures to be used by classification panels and the Commissioner in the classification and reclassification of devices under sections 513, 514(b), 515(b) and 520(1) of the act. In addition, it supplements Part 14 (21 CFR Part 14) by providing procedures for participation by interested persons in proceedings to classify and reclassify devices, prescribes the kinds of data acceptable for determining safety and effectiveness of devices, and prescribes rules governing use and release of information submitted to classification panels.

Definitions. Proposed § 860.3 defines terms used in Part 860. The proposed definitons of the three classes of regulatory control at proposed § 860.3(c) are adapted from section 513(a)(1) of the act. Consistent with the legislative history, the Commissioner considers the class definitions to be flexible guides permitting placement of a device in the class which provides controls adequate to reasonably assure safe and effective use of the device in actual practice (Ref. 1 at pp. 15–17, 34–36). In evaluating a device for safety and effectiveness for purposes of determining the appropriate class of regulatory control, classification panels and the Commissioner may consider the actual uses to which a device is put as well as those which are described in the labeling or promotional material for the device. Further, a device which has more than one use may be classified in one class for one of its uses and another for a second use. Although no device can be regulated adequately in Class I or class II unless there are adequate data and information establishing its safety and effectiveness, a device for which there are such data and information may nevertheless require regulation in class III because of the public health concerns posed by its use. In determining whether the controls provided by class I or class II are adequate to provide reasonable assurance of the safe and effective use of a device in actual practice, classification panels and the Commissioner may consider such practical matters as, for example, the degree of difficulty of enforcing general controls with respect to the particular device through judical action and the length of time required to develop and promulgate a performance standard for the particular device. Such practical matters are relevant to the determination of whether the controls provided by class I or class II are adequate in light of the particular health concerns posed by a particular device. Finally, if the manufacturer or importer of a class III device believes that the device can be regulated adequately by a performance standard, he may submit a proposed standard to FDA and petition for reclassification of the device to class II in accordance with proposed Subpart C of Part 860.

The proposed definition of "implant" provides that devices not intended to remain in the human body for 30 days or more will not be regarded as implants for purposes of the act's special provisions regarding implants, unless necessary to protect human health. This is consistent with the intent of Congress as expressed in the legislative history (Ref. 2, at p. 58).

The proposed definition of "life-supporting or life-sustaining device" was adapted from the legislative history (Ref. 2, at p. 58). Generally, a device must be used in the restoration or continuation

of a bodily function important to life to be a life-supporting or life-sustaining device.

In § 860.3(f), the Commissioner is also proposing a definition of "classification questionnaire." In the May 19, 1975 notice concerning classification, an 18-question classification logic system was included which has since been conformed to the classification provisions in the act as enacted. The classification questionnaire is intended only to assist in determining the proper device classification by facilitating the application of the criteria in proposed § 860.3(c).

Besides the 18-question classification questionnaire that will be used for most devices, a seperate six-question questionnaire has been developed for use in classifying in vita diagnostic products, which are a kind of device. This seperate questionnaire is desirable because of the different characteristics of invitro diagnostic products.

The current classification questionnaires read as follows:

GENERAL DEVICE CLASSIFICATION QUESTIONNAIRE

Question 1: Is the device custom made?

Answer: Yes—Go to question 2. No—Go to question 3.

Question 2: Although the device is custom made, can standards be applied?

Answer: Yes or No—Go to question 17.

Question 3: Is the device life-sustaining or life-supporting?

Answer: Yes—Go to question 5. No—Go to question 4.

Question 4: Is the device or diagnostic information derived from use of the device potentially hazardous to life or good health when properly used?

Answer: Yes—Go to question 5. No—Go to question 7. Do not know—Go to question 5.

Question 5: Is the device of such a nature that: (a) Sufficient scientific and medical data exist from which adequate standards governing the device safety and efficacy could not be established; and, (b) development and application of such a standard would be adequate to control the device?

Answer: Yes—Go to question 7. No—Go to question 6. Do not know—Go to question 6.

Question 6: Is the device currently in use and marketed in the United States?

Answer: Yes or No—Go to question 7.

Question 7: When the device is used, is it remote from the body? (Remote means no physical or energy connection to the body, nor is it used as a part of a delivery system for gases, fluids, or other materials to or from the body.)

Answer: Yes—Go to question 14. No—Go to question 8. (Device is not remote if it is: (1) Associated with the body through some form of energy transmission or conduction or used as a delivery system for gases, fluids or other materials to or from the body; (2) used on surface of the body; (3) used in contact with an internal body surface or cavity or used as a short-term implant; and/or (4) used as a long-term implant that is desgned to be inserted into the body and reside indefinitely within the body.) Do not know—Go to question 8.

Question 8: Is the device powered by a nonmanual external or internal source (such as electrical, pneumatic, nuclear, etc.)?

Answer: Yes—Go to question 9. No—Go to question 13.

Question 9: Will the use of the device or failure of power or device power source present a potential hazard to the patient?

Answer: Yes or No—Go to question 10. Do not know—Go to question 10.

Question 10: Does the device emit and/or inject any form of energy to or into the body?

Answer: Yes—Go to question 11. No—Go to question 13.

Question 11: Have the energy levels used been shown to be acceptable?

Answer: Yes or No—Go to question 12.

Question 12: Will malfunction of the device result in safe energy levels?

Answer: Yes or No—Go to question 13. Do not know—Go to question 13.

Question 13: Does the device use material for contact with the body which is generally acceptable or has known and acceptable properties which can be provided with no additional control requirements?

Answer: Yes or No—Go to question 14. Do not know—Go to question 14.

Question 14: Does the device have any known hazards, limitations, or shortcomings which can be avoided by promulgation of Federal regulations applicable to the device in question?

Answer: Yes or No—Go to question 15.

Question 15: If the device performs some measurement function, should the accuracy, reproducibility, or limitations of the information supplied be clearly indicated to the user by appropriate labeling, instructions, or precautions?

Answer: Yes—Go to question 16. Special labeling may be required to indicate the accuracy, reproducibility, or limitations of the information supplied by the device. No—Go to question 16.

Question 16: Does the device have performance characteristics which should be maintained at a satisfactory level, such level having general agreement among the user groups?

Answer: Yes or No—Go to question 17.

Question 17: Is the device used with other devices in such a way that the system in which it is used can be hazardous if the system is not assembled, used, or maintained in a satisfactory fashion?

Answer: Yes or do not know—Special labeling may be required to warn the user that the device may be hazardous if the system is not assembled, used, or maintained in a satisfactory fashion.

Question 18: Is the device potentially hazardous to the fetus or the gonads when properly used?

Answer: Yes or do not know—The device will be reviewed by the obstetrical and gynecological panel and the classifying panel jointly for further classification.

IN VITRO DIAGNOSTIC PRODUCT CLASSIFICATION QUESTIONNAIRE

Question 1: Is the in vitro diagnostic product or information derived from the use of the diagnostic product potentially hazardous to life, health, or well being when put to its intended use?

Answer: Yes or No—Go to question 2.

Question 2: Are general controls (class I), adequate to ensure the safe and effective use of the product?

Answer: Yes—Go to question 5. No—Go to question 3.

Question 3: Considering the nature and complexity of the product and available scientific and medical data, is it possible to develop a standard or set of standards to control the safety or effectiveness of the diagnostic product?

Answer: Yes—Go to question 5. No—Go to question 4.

Question 4: Can some components or characteristics of the product be adequately controlled by standards? Specify.

Answer: Yes or No—Go to question 5.

Question 5: Are there any special problems relating to the product that require special attention: (For example, special labeling requirements including areas such as warnings)? Identify the problem.

Answer: Yes—Go on to question 6.

Question 6: Does the product require some form of certification? Define.

The Commissioner is also proposing a definition of "supplemental data sheet." The supplemental data sheet has been prepared to gather together and report information relevant to the classification and reclassification of a device and is to be used by classification panels and may be used in petitions for reclassification to satisfy the requirements of proposed § 860.123(a)(3).

The classification questionnaire and supplemental data sheet may be changed from time to time as the agency gains experience in their use. Current copies may be obtained from the Classification Coordinator (HFK-400), Bureau of Medical Devices, Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910.

The proposed definition of "generic type of device" is intended to identify those device products that are so similar that they can be considered the same type of device for purposes of applying the regulatory controls provided by the act. The definition of "generic type of device" is important for proposed Part 860 because actions taken on both classification and reclassification apply to all devices which are within the same generic type of device and which are substantially equivalent. This approach is necessary to enable the Commissioner to provide similar regulatory treatment for essentially identical products of different manufacturers or importers.

Confidentiality and use of data and information submitted in connection with classification and reclassification. Proposed § 860.5 governs the availability for public disclosure and the use by the Commissioner of any data and information submitted to the classification panels or the Commissioner in connection with the classification and reclassification of devices under proposed Part 860.

The policy expressed in § 860.5(c) concerning the availability for public disclosure of safety and effectiveness data submitted in connection with clasification codifies rules announced in the May 19, 1975, notice on interim medical device classification procedures and is consistent with the legislative history of the amendments (Ref. 1, at pp. 48–50).

Proposed § 860.5(d) governs the availability for public disclosure of the contents of reclassification petitions submitted under proposed Subpart C of Part 860. The general rule is that both the fact of its existence and the entire contents of any petition for reclassification are available for public disclosure upon filing. The exception to this general rule applies to the disclosure of the contents of reclassification petitions submitted under proposed § 860.134 or § 860.136. The contents of such petitions will not be available for public disclosure during the period following submission in which

V 4 2 1 7 7 SEP 1 3 7 7 UMI

the petition is reviewed for deficiencies. At such time as such petiton is determined to contain no deficiencies which prevent the Commissioner from making a decision on it, the contents of the petition will become available for public disclosure without further notice to the petitioner. Because the Commissioner gives a narrow construction to the term "deficiency," it is expected that the contents of the great majority of petitions submitted under § 860.134 and § 860.136 will be available for disclosure promptly after submission. If deficiencies are found, the contents of the petiton nevertheless will become available for public disclosure 20 days following notice to petitoner of the deficiencies unless within that 20 days the petitoner satisfies the Commissioner that any or all of the petition's contents are exempt from disclosure under 21 CFR Part 20 or withdraws the petition from consideration.

The general rule that the contents of reclassification petitions are disclosable upon submission is based, in part, on the need to comply with the requirements for provision of opportunity for public comment deriving from several sources: (1) contained in section 513(f)(2)(B)(ii) and (C)(ii) of the act; (2) applicable to section 513(e) rulemaking proceedings by the Administrative Procedure Act; and (3) made applicable to section 520(1)(2) reclassification proceedings by virtue of the applicability of reclassification decisions to the entire generic type of device as well as the particular device for which a petitioner seeks reclassification. Further, the Commissioner has determined that a petitioner necessarily surrenders the confidentiality of any otherwise confidential data and information submitted in support of his argument that adequate information exists to regulate a current class III device by means of general controls or a performance standard. The exception to this general rule, which temporarily protects from public disclosure all data and information in petitons submitted under § 860.134 or § 860.136 while the petition is reviewed for deficiencies, is intended only to protect the otherwise confidential data and information of a petitioner whose petition is never considered on its merits due to deficiencies in it. As noted above, the entire contents of such petitions become available immediately upon a determination that the petition contains no deficiencies. For this reason, petitioners should not include in their petitions any data or information that is unnecessary to a decision on the petition, especially if it is information or data the petitioner would wish to keep confidential. An example of such information might be secret manufacturing methods when the method of manufacture is not relevant to the safety and effectiveness of the device.

Proposed § 860.5(e) sets forth the provision in section 520(c) of the act which prohibits the Commissioner from using as a basis for reclassification of a device from class III to class II information that is reported to or otherwise obtained by him under certain provisions of the act and falls within the exemption from public disclosure for trade secrets and other confidential commercial information contained in § 20.61 (21 CFR 20.61). Proposed § 860.5(e) also states the Commissioner's determination that a petitioner voluntarily surrenders the confidentiality of all data and information contained in any petition filed under § 860.130 and § 860.132 and in nondeficient petitions filed under § 860.134 and § 860.136 and that, therefore, the prohibition in section 520(c) of the act does not apply to such data and information.

Determination of safety and effectiveness. Proposed § 860.7 prescribes the rules to be followed by FDA and classification panels in reviewing evidence concerning the safety and effectiveness of devices in connection with classification and related activities. This section recognizes that rules in this area must be flexible because of the variety of devices.

Proposed § 860.7(b) requires determinations of the safety and effectiveness of devices to include consideration of certain factors: the persons who are to use a device, the conditions of use for the device, the probable benefits and probable risks from use of the device, and the reliability of the device. This paragraph implements section 513(a)(2) of the act, as explained in the legislative history (Ref. 1, at pp. 16–17).

Proposed § 860.7 (c) through (e) explains the evidence that FDA will regard as valid scientific evidence to show whether a device is safe and effective. These proposed requirements are stated in general terms because of the difficulty of prescribing specific rules that are appropriate for all devices. In appropriate cases, FDA may issue guidelines under § 10.90(b) (21 CFR 10.90(b)) to set forth principles to be followed in investigations of particular types of devices to provide reasonable assurance that a device is safe and effective. In the future, the product development protocol provisions of the act may also be used by FDA and product sponsors to identify with more particularity the types of investigations required to demonstrate safety or effectiveness.

Proposed § 860.7(f) would implement the requirement in section 513(a)(3)(A) of the act that the effectiveness of a device, for purposes of classification, performance standards, and premarket approval, is "to be determined, in accordance with regulations promulgated by the Secretary, on the basis of well-controlled investigations, including clinical investigations where appropriate, by experts qualified by training and experience to evaluate the effectiveness of the devices, from which investigations it can fairly and responsibly be concluded by qualified experts that the device will have the effect it purports or is represented to have under the conditions of use prescribed, recommended, or suggested in the labeling of the device." The act authorizes the Commissioner to allow use of valid scientific evidence other than well-controlled investigations to establish effectiveness, a provision that is implemented in proposed § 860.7(e)(2). The principles of well-controlled investigations are adapted from regulations applicable to new drugs in 21 CFR 314.-111(a)(5)(ii), implementing section 505(d) of the act (21 U.S.C. 355(d)). The Commissioner recognizes that certain of these principles may not be applicable to many devices, such as the provisions concerning placebo control.

Proposed § 860.7(g) explains that it is the responsibility of device manufacturers and importers to assure that the panels and FDA have adequate information to provide reasonable assurance that their devices are safe and effective for their conditions of use. The failure of a manufacturer or importer of a device to present to FDA adequate valid scientific evidence to show there is reasonable assurance of the safety and effectiveness of the device, if regulated in class I or class II, may be supportive of a determination that the device should be classified in class III (Ref. 1, at p. 40).

Proposed § 860.7(g) would also enable the Commissioner to require that a manufacturer, importer, or distributor of a device make reports or provide other information bearing upon a device's classification and whether there is reasonable assurance of the safety and effectiveness of a device or whether it is adulterated or misbranded under the act. This provision is authorized by section 519 of the act, and any requirement under § 860.7(g) for a report or other information must be issued in accordance with the restrictions of that section. Thus, requests for submission of a report or other information concerning a device shall state the reason or purpose for the request, must identify to the fullest extent practicable the desired report or information, may not require identification of individual patients in most cases, and may not be directed to a person exempt from such a requirement under section 519(b) of the act.

The Commissioner does not believe that proposed § 860.7(g) imposes requirements unduly burdensome to device manufacturers, importers, or distributors taking into account the cost of complying with such requirements and the need for protection of the public health and the implementation of the act. The Commissioner intends to implement this provision on a selective basis and use it only when other sources of information do not permit him to make a sound decision on classification or otherwise to determine the safety or effectiveness of a device. In addition, section 519(a)(5) of the act places statutory restrictions on the application of reporting requiremennts to manufacturers, importers, and distributors of devices that have been classified in class I. The Commission advises that the classification regulations placing certain devices in class I may provide for a class I device to be exempt from some or all of the recordkeeping and reporting requirements. These are additional assurances that the authority in section 519 of the act, implemented in part in proposed § 860.7(g), is used fairly and in a manner that is not unduly burdensome.

Classification—Subpart B. Proposed Subpart B sets forth the procedures for classification of devices. Certain provisions of proposed Subpart B, i.e., § 860.93 regarding classifications of implants, life-saving or life-supporting devices and § 860.95 regarding exemptions from sections 510, 519, and 520(f) of the act, apply also to reclassification of devices.

Classification procedures for "old devices". Proposed § 860.84 explains the procedures and criteria to be applied in the original classification of "old devices" into one of the three classes of regulatory control (class I, class II, and class III). The procedures apply to the classification of devices that either were in commercial distribution before May 28, 1976, or are substantially equivalent to devices in commercial distribution before that date. Section 860.84 does not apply to devices classified by statute in class III because they are either "new" and not substantially equivalent to an old device or were regarded formerly as new drugs, in accordance with sections 513(f) and 520(1) of the act, respectively. The procedures in proposed § 860.84 are based on the provisions of section 513 (b) through (d) of the act, described above in this preamble. The Commissioner notes that final determinations on the classification of devices are for the Commissioner alone to make and advises that persons should not rely upon panel recommendations in determining their course of action with respect to particular devices in which they have an interest.

The panel recommendation includes all the information listed in proposed § 860.84(d)(1) through (6) and, when submitted to the Commissioner in final form, will be published in its entirety together with a proposed classification regulation. The summary of data to be included with the recommendation in accordance with proposed § 860.84(d)(2) need not be an exhaustive recitation of all the data considered by the panel, but shall include a brief statement of the most important facts justifying the recommendation. The summary is, however, to be accompanied by a list of references to sources containing the data considered by the panel and used as a basis for its recommendation.

Classification of implants, life-supporting or life-sustaining devices. Proposed § 860.93 sets forth special requirements with respect to the classification and reclassification of implants and life-supporting or life-sustaining devices. Section 513 of the act requires that such devices be classified or, in the case of a petition for reclassification, remain in class III unless it is specifically determined that such classification is not necessary to assure the safety and effectiveness of the device and that determination is documented by scientific evidence.

Exemptions from sections 510, 519, and 520(f) of the act. Proposed § 860.95 provides that a class I device may be exempted from the requirements of the act under section 510 (registration, product listing, and premarket notification) section 519 (records and reports), and section 520(f) (good manufacturing practice regulations) if such requirements are not necessary to provide reasonable assurance of the safety and effectiveness of the device, in accordance with section 513 of the act. A device may be exempted from these sections in whole or in part. Thus, a device may be subject to only part of the good manufacturing practices requirements or only to certain records and reports requirements; and, though a device may be exempted from the registration requirements, the manufacturing establishment nevertheless may be required to register if it manufactures another device that is not exempt from the registration requirements.

Reclassification—Subpart C. Proposed Subpart C sets forth requirements for the reclassification of devices in accordance with sections 513 (e) and (f), 514(b), and 520(1) of the act.

General. Proposed § 860.120 explains that proposed Subpart C sets forth procedures for the implementation of the reclassification provisions of the Act. It is important to note that the criteria for determining the proper class for a device are the same when considering reclassification of a device as when considering the initial classification under proposed § 860.84. These criteria are set forth in proposed § 860.3(c). It should be noted further that the reclassification of a particular device results in the reclassification of all substantially equivalent devices within that generic type, as defined in proposed § 860.3(l). This is to ensure that the devices that are of the same generic type which are also substantially equivalent will be subject to the same level of regulatory control and that no manufacturer will gain reclassification only of his device when there are no significant differences between his device and a competitor's device that relates to safety and effectiveness. The consideration of a reclassification petition may result in the creation of new generic types of devices.

Petitions for reclassification. Proposed § 860.123 prescribes the form and content of petitions for reclassification, including requests for change in classification submitted under sections 514(b) and 515(b) of the act. Petitions that are not in accordance with proposed § 860.123 may be considered by the Commissioner to be deficient and not acceptable for consideration. Petitioners will be provided opportunity to supplement a deficient petition. A petition will be considered deficient only in those unusual circumstances in which the Commissioner is unable to make any decision on it, as, for example, when one of the elements set forth in proposed § 860.123(a)(1)–(6) is inadvertently ommitted from the petition. The failure of a petitioner to provide acceptable valid scientific evidence establishing the safety and effectiveness of the device is not a reason to consider a petition deficient, but usually will be a reason for denying a petition. Petitions for reclassification are not considered to be citizen petitions and, thus, are not subject to the requirements applicable to such petitions contained in 21 CFR 10.30.

Reclassification petitions must include a completed classification questionnaire and supplemental data sheet. The Commissioner believes that the types of information required for these forms are necessary in considering the reclassification of a device. The information contained in these forms will be compared by a panel with the information contained in the completed forms that the panels used as a basis for the original classification recommendation, if the device was classified under a procedure requiring a panel recommendation.

Sections 513(e), 514(b), and 515(b) of the act require reclassification petitions to be based on new information. A petition filed under any of these sections of the act must clearly state the new information upon which the petition is based. It is intended that this requirement will isolate the issues raised by such petitions and will assure that the petition is based upon new information in accordance with the act. The petition must also be accompanied by copies of the source documents from which the new information is derived.

Consultation with panels. Proposed § 860.125 prescribes the methods by which the Commissioner may consult with a classification panel with respect to reclassification of a device. Though a preference is stated for having consultation occur in the context of discussion at a panel meeting, the Commissioner retains the prerogative to choose another method when he considers it appropriate under the circumstances. The more important and complex the subject matter, the more likely it will be that the Commissioner will choose to have consultation through discussion at a panel meeting.

General procedures under section 513(e) of the act. Proposed § 860.130 governs the procedures for reclassification under section 513(e) of the act. Petitions for reclassification under this section must be based upon new information respecting the classification of the device that suggests that some different level of regulatory control is required to provide reasonable assurance of the safety and effectiveness of the device. The Commissioner may initiate a reclassification proceeding under this section if he determines that the controls applicable to another regulatory class are more appropriate for a device and the device meets the classification criteria for that other class. Reclassification under proposed § 860.130 will be effected by regulation.

Procedures when the Commissioner initiates a performance standard or premarket approval proceeding under section 514(b) or 515(b) of the act. Proposed § 860.132 governs the procedures for requesting a change in classification after the Commissioner initiates a proceeding to develop a performance standard or to require premarket approval for a device under section 514(b) or 515(b) of the act. If the Commissioner grants the request, the proceeding to effect reclassification will be conducted in ac-

FILM MEAK 0
V 42 177 SEP 13 77 UMI

cordance with proposed § 860.130, and reclassification will be effected by a regulation. A request for a change in classification under this section must meet the requirements of proposed § 860.123 with respect to form and content of petitions for reclassification. The Commissioner believes that the information required by that section is necessary to act on requests for change in classification in the short period of time allowed by the act.

Procedures for "new devices" under section 513(f) of the act. Proposed § 860.134 prescribes procedures for reclassification of devices classified in class III by statute in accordance with section 513(f) of the act, as described above in this preamble. The Commissioner stresses that the determination that a new device is or is not substantially equivalent to a pre-enactment device for purposes of the application of section 513(f) of the act and proposed § 860.134 is one left to FDA subjects to judicial review. The panel's review of devices for safety and effectiveness under proposed § 860.134 will follow the same procedures applicable to reviews under proposed § 860.84(c) for the original classification of "old" devices, including the preparation of a recommendation in accordance with proposed § 860.84(d). Reclassification under this proposed section is effected by order in the form of a letter to the petitioner. The Commissioner anticipates that reclassification effected by order under this section will be codified periodically by regulation to facilitate the public's access to the decision.

Procedures for transitional products under section 520(l) of the act. Proposed § 860.136 establishes procedures for the reclassification of devices that had been regarded as new drugs before the date of enactment and are considered to be automatically in class III under section (520(l) of the act. The informal hearing provided for in section 520(l)(2) of the act in connection with petitions for reclassification under this section will be conducted in accordance with the procedures governing regulatory hearings before the Food and Drug Administration (21 CFR Part 16). The Commissioner considers the procedures provided there to satisfy the procedural requirements for an informal hearing in section 201(y) of the act (21 U.S.C. 321(y)). Reclassification under this proposed section will be effected by order in the form of a letter to the petitioner. As with reclassifications effected by order under proposed § 860.134 for "new devices," the Commissioner anticipates that reclassifications effected by order under this section will be codified periodically by regulation to facilitate access by the public.

REFERENCES

Background data and information on which the Commissioner relies in proposing this regulation have been placed on file for public review in the office of the Hearing Clerk, Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, Md. 20857. The following is a list of these documents:

1. House Report No. 94-853, Medical Device Amendments, February 20, 1976 (Committee on Interstate and Foreign Commerce).

2. House Report No. 94-1090, Medical Device Amendments, May 6, 1976 (Committee of Conference).

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 514, 515, 519, 520, and 701(a), 52 Stat. 1055, 90 Stat. 540-559, 564-575 (21 U.S.C. 360c, 360d, 360e, 360i, 360j, and 371(a))) and under authority delegated to the Commissioner (21 CFR 5.1), it is proposed that Parts 16 and 20 be amended and Part 860 be added, to read as follows:

PART 16—REGULATORY HEARING BEFORE THE FOOD AND DRUG ADMINISTRATION

1. Part 16 is amended in § 16.1 by redesignating paragraph (b)(26) as (b)(30) and adding new paragraph (b)(26), and designating paragraph (b)(27)-(29) "reserved," to read as follows:

§ 16.1 Scope.

* * * * * * *

(b) * * *

(26) Section 860.136, relating to petitions for reclassification of a medical device currently in class III by operation of section 520(l)(1) of the Federal Food, Drug, and Cosmetic Act.

(27)-(29) [Reserved]

(30) Any other provision in the regulations in this chapter under which a party who is adversely affected by regulatory action is entitled to an opportunity for a hearing, and no other procedural provisions in this part are by regulation applicable to such hearing.

PART 20—PUBLIC INFORMATION

2. Part 20 is amended in § 20.100 by adding new paragraph (c)(29), to read as follows:

§ 20.100 Applicability; cross-reference to other regulations.

* * * * * * *

(c) * * *

(29) Data and information submitted for medical device products, in § 860.5 of this chapter.

3. Part 860 is added to read as follows:

PART 860—MEDICAL DEVICE CLASSIFICATION PROCEDURES

Subpart A—General

Sec.
860.1 Scope.
860.3 Definitions.
860.5 Confidentiality and use of data and information submitted in connection with classification and reclassification.
860.7 Determination of safety and effectiveness.

Subpart B—Classification

860.84 Classification procedures for "old devices."
860.93 Classification of implants, life-supporting or life-sustaining devices.
860.95 Exemptions from sections 510, 519, and 520(f) of the act.

Subpart C—Reclassification

860.120 General.
860.123 Reclassification petition: content and form.
860.125 Consultation with panels.
860.130 General procedures under section 513(e) of the act.
860.132 Procedures when the Commissioner initiates a performance standard or premarket approval proceeding under section 514(b) or 515(b) of the act.
860.134 Procedures for "new devices" under section 513(f) of the act.
860.136 Procedures for transitional products under section 520(l) of the act.

AUTHORITY: Secs. 513, 514, 515, 519, 520, and 701(a), 52 Stat. 1055, 90 Stat. 540-559, 564-574 (21 U.S.C. 360c, 360d, 360e, 360i, 360j, and 371(a)) unless otherwise noted.

Subpart A—General

§ 860.1 Scope.

(a) This part implements sections 513, 514(b), 515(b), and 520(l) of the act with respect to the classification and reclassification of devices intended for human use.

(b) This part prescribes the criteria and procedures to be used by classification panels in making their recommendations and by the Commissioner in making his determinations regarding the class of regulatory control (class I, class II, or class III) appropriate for particular devices. This part also supplements the general Food and Drug Administration procedures concerning advisory committees (Part 14 of this chapter), providing procedures for manufacturers, importers, and other interested persons to participate in proceedings to classify and reclassify devices. This part also provides information with respect to the kind of data acceptable for determination of the safety and effectiveness of devices and prescribes the circumstances under which information submitted to classification panels and to the Commissioner in connection with classification and reclassification proceedings will be released to the public.

§ 860.3 Definitions.

§ 860.3 *Definitions.*

For the purposes of this part, the following definitions are set:

(a) "Act" means the Federal Food, Drug, and Cosmetic Act.

(b) "Commissioner" means the Commissioner of Food and Drugs, Food and Drug Administration, United States Department of Health, Education, and Welfare, or his designee.

(c) "Class" means one of the three categories of regulatory control for medical devices, defined below:

(1) "Class I" means the class for a device that is subject only to the general controls authorized by or under sections 501 (adulteration), 502 (misbranding), 510 (registration), 516 (banned devices), 518 (notification and other remedies), 519 (records and reports), and 520 (general provisions) of the act. A device is in class I if (i) general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device, or (ii) there is insufficient information to determine that the general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device or to establish a performance

standard to provide such assurance, but the device is not life-supporting or life-sustaining or for a use which is of substantial importance in preventing impairment of human health and does not present a potential unreasonable risk of illness or injury.

(2) "Class II" means the class for a device that is or will eventually be subject to the requirements of a performance standard promulgated in accordance with section 514 of the act. A device is in class II if the general controls by themselves are insufficient to provide reasonable assurance of its safety and effectiveness and there is sufficient information to establish a performance standard to provide such assurance.

(3) "Class III" means the class for a device for which premarket approval is or will be required in accordance with section 515 of the act. A device is in class III if insufficient information exists to determine that general controls are sufficient to provide reasonable assurance of its safety and effectiveness and if insufficient information exists to establish a performance standard to provide such assurance and, in addition, the device is life-supporting or life-sustaining, or for a use which is of substantial importance in preventing impairment of human health, or the device presents a potential unreasonable risk of illness or injury.

(d) "Implant" means a device that is placed into surgically or naturally formed cavities of the human body. Unless otherwise determined by the Commissioner on the basis of the need to protect human health, a device is regarded as an implant for the purpose of this part only if it is intended to remain implanted continuously for a period of 30 days or more.

(e) "Life-supporting or life-sustaining device" means a device that is intended to be used for restoration, maintenance, or continuation of a bodily function(s) important to the continuation of human life or yields information that is to be used for restoration, maintenance, or continuation of such function.

(f) "Classification questionnaire" means a specific series of questions prepared by the Commissioner for use by classification panels in preparing recommendations to the Commissioner regarding classification and by petitioners who submit petitions for reclassification. The questions relate to the safety and effectiveness characteristics of a device and the answers are intended to assist in determining the proper classification for a device.

(g) "Supplemental data sheet" means information which is compiled by classification panels and submitted in petitions for reclassification and which consists of:

(1) A summary of the reasons for the recommendation (or petition);

(2) A summary of the data upon which the recommendation (or petition) is based;

(3) An identification of the risks to health (if any) presented by the device;

(4) To the extent practicable, a recommendation for the assignment of a priority for the application of the performance standards or premarket approval provisions of the act to a class II or class III device;

(5) A recommendation whether the device should be exempted from any of the requirements of registration, recordkeeping and reporting, or good manufacturing practice regulations;

(6) In the case of an implant or life-supporting or life-sustaining device for which classification in class III is not recommended, a statement of the reasons for not recommending classification in Class III;

(7) Identification of any needed restrictions on the use of the device, e.g., whether the device requires special labeling, should be banned, or should be used only upon authorization of a physician; and

(8) Any existing standards applicable to the device, device subassemblies, or device materials.

(h) "Classification panel" means one of the several advisory committees established by the Commissioner under section 513 of the act and Part 14 of this chapter for the purpose of making recommendations to the Commissioner on the classification and reclassification of devices and for other purposes prescribed by the act or the Commissioner.

(i) "Generic type of device" means a grouping of devices that do not differ significantly in purpose, design, materials, energy source, function, or any other feature related to safety and effectiveness, and for which similar regulatory controls will be sufficient to provide reasonable assurance of safety and effectiveness.

§ 860.5 Confidentiality and use of data and information submitted in connection with classification and reclassification.

(a) This section governs the availability for public disclosure and the use by the Commissioner of data and information submitted to classification panels or to the Commissioner in connection with the classification or reclassification of devices under this part.

(b) In general, data and information submitted to classification panels in connection with the classification of devices under § 860.84 shall be available immediately for public disclosure upon request. However, except as provided by the special rules in paragraph (c) of this section, this provision does not apply to data and information exempt from public disclosure in accordance with Part 20 of this chapter which data and information shall only be available in accordance with Part 20.

(c) (1) Safety and effectiveness data submitted to classification panels or to the Commissioner in connection with the classification of a device under § 860.84 and not previously disclosed to the public, as defined in § 20.81 of this chapter, shall be regarded as confidential if the device is classified in class III. Because it is not known whether a device is classified in class III until publication of a final regulation under § 860.84, all such safety and effectiveness data that have not been previously disclosed are not available for public disclosure unless and until the device is classified in class I or II, in which case the procedure in paragraph (c)(2) of this section applies.

(2) Thirty days after publication of a final regulation under § 860.84 classifying a device is class I or class II, safety and effectiveness data submitted for that device that has been regarded as confidential under paragraph (c)(1) of this section will be available for public disclosure and placed on public display in the office of the Hearing Clerk, Food and Drug Administration unless, within that 30 day period, the person who submitted the data demonstrates that the data still fall within the exemption for trade secrets and confidential commercial information described in § 20.61 of this chapter. Safety and effectiveness data submitted for a device that has been classified in class III by regulation in accordance with § 860.84 shall remain confidential and unavailable for public disclosure, so long as such data have not been disclosed to the public as defined in § 20.81 of this chapter.

(3) Because device classification affects generic types of devices, the classification panels and the Commissioner may consider safety and effectiveness data developed concerning a particular device in making determinations under § 860.84 concerning the initial classification of any other device that is in the same generic type or that otherwise possesses similar characteristics, regardless of whether such data currently are regarded as confidential under paragraph (c)(1) of this section.

(d)(1) The fact of its existence and the contents of a petition for reclassification filed in accordance with § 860.130 or § 860.132 are available for public disclosure at the time the petition is filed.

(2) The fact of the existence of a petition for reclassification filed in accordance with § 860.134 or § 860.136 is available for public disclosure at the time the petition is filed. The contents of such a petition are not available for public disclosure for the period of time following receipt (not longer than 30 days) during which the petition is reviewed for any deficiencies that prevent the Commissioner from making a decision on it. When, within that 30 days, it is determined that the petition contains no deficiencies that prevent the Commissioner from making a decision on it, the entire contents of the petition will be available for public disclosure and subject to consideration by classification panels and by the Commissioner in making a decision on the petition. If during this 30-day period of time the petition is found to contain deficiencies that prevent the Commissioner from making a decision on it, the petitioner will be so notified and provided an opportunity to correct the deficiencies. The contents of the petition will become available for public disclosure 20 days after notice to the petitioner of deficiencies in the petition except to the extent the petitioner, within that 20 days, satisfies the Commissioner that any or all of the petition's contents are exempt from disclo-

V 42 1177 SEP 13 77 UMI

sure under Part 20 of this chapter. At such time as the deficiencies have been corrected by the petitioner, the entire contents of the petition will be available for public disclosure and subject to consideration by classification panels and by the Commissioner in making a decision on the petition.

(e) No information reported to or otherwise obtained by the Commissioner under sections 513, 514, 515, 516, 518, 519 520(f), 520(g), or 704 of the act that falls within the exemption described in § 20.61 of this chapter for trade secrets and confidential commercial information may be disclosed by the Commissioner or used as the basis for reclassification of a device from class III to class II. The exemption described in § 20.61 does not apply to any data or information contained in any petition for reclassification submitted in accordance with § 860.130 or § 860.132, or in a petition submitted in accordance with § 860.134 or § 860.136 that has been determined to contain no deficiencies that prevent the Commissioner from making a decision on it. Accordingly, all data and information contained in such petitions may be disclosed by the Commissioner and used as the basis for reclassification of a device from class III to class II.

(f) For purposes of this section, safety and effectiveness data include data and results derived from all studies and tests of a device on animals and humans and from all studies and tests of the device itself intended to establish or determine its safety and effectiveness.

§ 860.7 Determination of safety and effectiveness.

(a) Because of their great variety, there is no single standard of safety and effectiveness, or of evidence to show device safety or effectiveness, that is applicable to all devices. The classification panels, in reviewing evidence concerning the safety and effectiveness of a device and in preparing advice to the Commissioner, and the Commissioner, in making determinations concerning the safety and effectiveness of a device, shall apply the rules in this section.

(b) For purposes of classification, establishment of performance standards for a class II device, and premarket approval of a class III device, determination of the safety and effectiveness of a device shall include consideration of the following, among other relevant factors:

(1) The persons for whose use the device is represented or intended;

(2) The conditions of use for the device, including conditions of use prescribed, recommended, or suggested in the labeling of the device and other intended conditions of use, including those prescribed, recommended, or suggested in the advertising for the device;

(3) The probable benefit to health from the use of the device weighed against any probable injury or illness from such use; and

(4) The reliability of the device.

(c) (1) Although any form of evidence may be submitted to the Food and Drug Administration to show whether a device is safe and effective, the agency relies only on valid scientific evidence to determine that there is reasonable assurance that a device is safe and effective. The Commissioner, in his discretion, after considering the nature of the device and the rules in this section, shall determine whether particular evidence submitted or otherwise available to him is valid scientific evidence for the purpose of determining the safety or effectiveness of a particular device and whether available evidence taken as a whole is adequate to determine that there is reasonable assurance that a device is safe and effective for its conditions of use.

(2) Valid scientific evdence is evidence from which it can fairly and responsibly be concluded by qualified experts that there is reasonable assurance of the safety and effectiveness of a device under its conditions of use. The evidence required may vary according to the characteristics of the device, its conditions of use, the existence and adequacy of warnings and other restrictions, and the extent of experience with its use. Valid scientific evidence includes well-controlled investigations, partially controlled and uncontrolled studies, well-documented case histories by qualified experts, and, in some cases, reports of significant human experience of a marketed device. Isolated case reports, random experience, reports lacking the details to permit scientific evaluation, or unsubstantiated opinion are not regarded as valid scientific evidence to show safety or effectiveness, although such information may be considered if relevant to a determination that a device is not safe or effective.

(d) (1) There is reasonable assurance that a device is safe when it can be determined, based on valid scientific evidence, that the benefits from the use of the device for its intended uses and conditions of use, with adequate directions for use and warnings against unsafe use, outweigh the risks. The valid scientific evidence used to determine the safety of any device shall include adequate efforts to demonstrate the absence of unreasonable risk of illness or injury associated with the use of the device under its intended uses and conditions of use.

(2) Among the types of evidence that may be required, when appropriate, to determine that there is reasonable assurance that a device is safe are investigations using laboratory animals, other nonclinical investigations, including in vitro studies, and investigations involving human subjects.

(e) (1) There is reasonable assurance that a device is effective when it can be determined based on valid scientific evidence that, in a significant portion of the target population, the use of the device for its intended uses and conditions of use, with adequate directions for use and warnings against unsafe use, will provide clinically significant results.

(2) The valid scientific evidence used to determine the effectiveness of a device shall include well-controlled investigations, as defined in paragraph (f) of this section, unless the Food and Drug Administration determines that other valid scientific evidence exists that is sufficient to determine the effectiveness of a device and authorizes reliance on such other valid scientific evidence, without well-controlled investigations. The Commissioner may make such a determination where the requirement of well-controlled investigations in paragraph (f) of this section is not reasonably applicable to the device or essential to the validity of the evidence of effectiveness.

(f) The following principles have been developed over a period of years and are recognized by the scientific community as the essentials of well-controlled clinical investigations. They provide the basis for the determination whether there is reasonable assurance that a device is effective based on well-controlled investigations and are also useful in assessing the weight to be given to other valid scientific evidence permitted under this section.

(1) The plan or protocol for the study and the report of the results of a well-controlled investigation shall include the following:

(i) A clear statement of the objectives of the study.

(ii) A method of selection of the subjects that:

(a) Provides adequate assurance that the subjects are suitable for the purposes of the study, provides diagnostic criteria of the condition to be treated or diagnosed, provides confirmatory laboratory tests where appropriate, and, in the case of a device to prevent a disease or condition, provides evidence of susceptibility and exposure to the condition against which prophylaxis is desired.

(b) Assigns the subjects to test groups, if used, in such a way as to minimize bias.

(c) Assures comparability in test and any control groups of pertinent variables, such as sex, severity or duration of the disease, and use of therapy other than the test device.

(iii) An explanation of the methods of observation and recording of results, including the variables measured, quantitation, assessment of any subject's response, and steps taken to minimize bias regarding subjects and observers.

(iv) A comparison of the results of treatment or diagnosis with a control in such a fashion as to permit quantitative evaluation. The precise nature of the control must be stated and an explanation given of the methods used to minimize bias on the part of the observers and the analysts of the data. Level and methods of "blinding," if appropriate and used, are to be documented. Generally, four types of comparisons are recognized:

(a) *No treatment.* Where objective measurements of effectiveness are available and placebo effect is negligible, comparison of the objective results in comparable groups of treated and untreated patients.

(b) *Placebo control.* Where there may be a placebo effect with the use of a device, comparison of the results of use of the device with an ineffective device under conditions of use designed to resemble the conditions of use of the device under investigation as far as possible.

(c) *Ative treatment control.* An effective regimen of therapy may be used for comparison, e.g., where the condition treated is such that no treatment or use of a placebo would be inappropriate or contrary to the interest of the patient.

(d) *Historical control.* In certain circumstances, such as those involving diseases with high and predictable mortality, with signs and symptoms of predictable duration of severity, or in the case of prophylaxis, where morbidity is predictable, the results of use of the device may be compared quantitatively with prior experience historically derived from the adequately documented natural history of the disease or condition in comparable patients or populations with not treatment or with a regimen (therapeutic, diagnostic, prophylactic) the effectiveness of which is established.

(v) A summary of the methods of analysis and an evaluation of data derived from the study, including any appropriate statistical methods.

(2) A well-controlled investigation shall involve use of a test device that is standardized in its composition or design and performance, to give significance to the results of the investigation.

(g) (1) It is the responsibility of each manufacturer and importer of a device to assure that adequate information exists to provide reasonable assurance that the device is safe and effective for its intended uses and conditions of use. The failure of a manufacturer or importer of a device to present to the Food and Drug Administration adequate, valid, scientific evidence showing that there is reasonable assurance of the safety and effectiveness of the device, if regulated by general controls alone, or by general controls and performance standards, may be supportive of a determination that the device should be classified in class III.

(2) The Commissioner may require that a manufacturer, importer, or distributor make reports or provide other information bearing upon a device's classification and whether there is reasonable assurance of the safety and effectiveness of a device or whether it is adulterated or misbranded under the act.

(3) A requirement for a report or other information under this paragraph shall comply with section 519 of the act; shall state the reason or purpose for such request and identify to the fullest extent practicable the needed report or information; shall not be imposed on a manufacturer, importer, or distributor of a classified device that has been exempted from such a requirement in accordance with § 860.95; shall prescribe time for compliance with the requirement; may be issued in the form of a general regulation or notice published in the FEDERAL REGISTER or an order to a particular manufacturer, importer, or distributor; and may prescribe the form and manner in which the report or information is to be provided.

(4) Whenever required information has been previously submitted to the Food and Drug Administration, that information need not be resubmitted, but may be incorporated by reference.

Subpart B—Classification

§ 860.84 Classification procedures for "old devices."

(a) This subpart sets forth procedures for the original classification of a device that either was in commercial distribution before May 28, 1976, or is substantially equivalent to a device that was in commercial distribution before that date. Such device shall be classified by regulation in either class I (general controls), class II (performance standards), or class III (premarket approval), depending on the level of regulatory control required to provide reasonable assurance of the safety and effectiveness of the device (§ 860.3(c)). This subpart does not apply to a product that is classified in class III by statute under section 520(1) (1) through (3) of the act because it was previously regarded as a new drug, but does apply to any product subject to section 520(1)(4) of the act that was previously regarded as an antibiotic drug. The procedures for classification of a device under this section are described in paragraphs (b) through (f) below.

(b) The Commissioner refers the device to the appropriate classification panel organized and operated in accordance with section 513 (b) and (c) of the act and Part 14 of this chapter.

(c) In order to make recommendations to the Food and Drug Administration on the class of regulatory control (class I, class II, or class III) appropriate for the device, the panel reviews the device for safety and effectiveness. In so doing, the panel:

(1) Considers the factors described in § 860.7 relating to determinations of safety and effectiveness;

(2) Determines the safety and effectiveness of the device on the basis of the types of scientific evidence described in § 860.7;

(3) Answers the question in the classification questionnaire that are appropriate for the device;

(4) Completes a supplemental data sheet for the device;

(5) Provides, to the maximum extent practicable, an opportunity for interested persons to submit data and views on the classification of the device in accordance with Part 14 of this chapter.

(d) Based on its review for safety and effectiveness and applying the definitions for each class in § 860.3(c), the panel makes a recommendation regarding the classification of the device and submits it to the Commissioner. The recommendation includes:

(1) A summary of the reasons for the recommendation;

(2) A summary of the data upon which the recommendation is based, accompanied by references to sources containing such data;

(3) An identification of the risks to health (if any) presented by the device with respect to which the recommendation is made;

(4) In the case of a recommendation for classification in class I, a recommendation as to exemption of the device from the requirements of one or more of the following sections of the act: section 510 (registration, product listing, and premarket notification); section 519 (records and reports); and section 520(f) (good manufacturing practice regulations) in accordance with § 860.95;

(5) In the case of a recommendation for classification in class II or class III, to the extent practicable, a recommendation for the assignment of a priority to the device for the promulgation of a performance standard for, or application of a premarket approval requirement to, the device;

(6) In the case of a recommendation for classification of an implant or a life-supporting or life-sustaining device into class I or class II, a statement of why premarket approval is not necessary to provide reasonable assurance of the safety and effectiveness of the device, accompanied by references to supporting documentation and data that meet the requirements of § 860.7, and an identification of the risks to health, if any, presented by the device.

A panel recommendation is regarded as preliminary until the Food and Drug Administration has reviewed the proposed panel recommendation, discussed it with the panel if appropriate, and published a proposed regulation classifying the device. Preliminary panel recommendations are filed in the Hearing Clerk's office upon receipt and are available to the public upon request.

(e) The Commissioner publishes the panel's recommendation in the FEDERAL REGISTER, together with a proposed regulation classifying the device, and provides an opportunity for interested persons to submit comments on the recommendation and proposed regulation.

(f) The Commissioner reviews the comments and issues a final regulation classifying the device, which shall:

(1) If classifying the device in class I, prescribe which of the requirements of sections 510, 519, and 520(f) of the act shall not apply to the device and state the reasons for making the requirements inapplicable, in accordance with § 860.95;

(2) If classifying the device in class II or class III, at the discretion of the Commissioner, establish priorities to be used for the promulgation of a performance standard for, or application of a premarket approval requirement to, the device;

(3) If classifying an implant, or life-supporting or life-sustaining device, be in accordance with § 860.93(b).

§ 860.93 Classification of implants, life-supporting or life-sustaining devices.

(a) The classification panel shall recommend classification in class III of any implant or life-supporting or life-sustaining device unless the panel determines that classification in class III is not necessary to provide reasonable assurance of the safety and effectiveness

V 42 177 SEP 13 77 UMI

of the device. If the panel recommends classification or reclassification of such a device in a class other than class III, it shall set forth in its recommendation the reasons for so doing together with references to supporting documentation and data that meet the requirements of § 860.7, and an identification of the risks to health, if any, presented by the device.

(b) The Commissioner shall classify any impant or life-supporting or life-sustaining device in class III unless he determines that such classification is not necessary to provide reasonable assurance of the safety and effectiveness of the device. If the Commissioner proposes to classify or reclassify the device in a class other than class III, the regulation or order effecting such classification or reclassification shall be accompanied by a full statement of the reasons for not classifying or not retaining the device in class III, which may be in the form of concurrence with a panel's reasons for its recommendation, together with supporting documentation and data that meet the requirements of § 860.7, and an identification of the risks to health, if any, presented by the device.

§ 860.95 Exemptions from sections 510, 519, and 520(f) of the act.

(a) If a panel recommends that a device be classified or reclassified in class I, it shall recommend to the Commissioner whether the device should be exempted from the requirements of one or more of the following sections of the act: section 510 (registration, product listing, and premarket notification), section 519 (records and reports), and section 520(f) (good) manufacturing practice regulations).

(b) A regulation or an order classifying or reclassifying a device in class I shall state the requirements of sections 510, 519, and 520(f) of the act from which the device is to be exempted, if any, together with the reasons for granting such exemption.

(c) Exemptions will be granted under this section only upon a determination that the requirements from which the device is exempted are not necessary to provide reasonable assurance of the safety and effectiveness of the device.

Subpart C—Reclassification

§ 860.120 General.

Sections 513(e), 513(f), 514(b), 515(b), and 520(l) of the act provide for reclassification of a device and prescribe procedures for effecting reclassification. The purposes of Subpart C are to:

(a) Set forth the requirements as to form and content of petitions for reclassification;

(b) Describe the circumstances in which each of the five reclassification provisions apply; and

(c) Explain the procedures for reclassification prescribed in the five reclassification sections of the act.

The criteria for determining the proper class for a device are set forth in § 860.3(c). The reclassification of any specific device within a generic type of device causes the reclassification of all substantially equivalent devices within that generic type. Accordingly, a petition for the reclassification of any specific device shall be regarded as a petition for reclassification of all substantially equivalent devices within the same generic type.

§ 860.123 Reclassification petition: content and form.

(a) Unless otherwise provided in writing by the Commissioner, all petitions for reclassification of a device, regardless of the section of the act under which they are filed, shall include the following:

(1) A specification of the generic type of device for which reclassification is requested.

(2) A statement of the action requested by the petition, e.g., "it is requested that _____ device(s) be reclassified from class III to class II."

(3) A completed supplemental data sheet applicable to the device for which reclassification is requested.

(4) A completed classification questionnaire applicable to the device for which reclassification is requested.

(5) A statement of the basis for disagreement with the present classification status of the device.

(6) A full statement of the reasons and supporting data meeting the requirement of § 860.7 demonstrating why the device should not be classified in its present classification and how the proposed classification will provide reasonable assurance of the safety and effectiveness of the device.

(7) Representative data and information known to the petitioner which are unfavorable to the petitioner's position.

(8) If the petition is based on new information under section 513(e), 514(b), or 515(b) of the act, a summary of the new information upon which the petition is based.

(9) Copies of source documents from which new information used to support the petition have been obtained (attached as appendices to the petition).

(b) Each petition submitted pursuant to this section shall be:

(1) Addressed to the Food and Drug Administration, Bureau of Medical Devices, Document Control Center (HFK-20), 8757 Georgia Ave., Silver Spring, Md. 20910;

(2) Marked clearly with the section of the act under which the petition is being submitted, i.e., "513(e)," "513(f)," "514(b)," "515(b)," or "520(l) Petition";

(3) Bound into a volume or volumes, where necessary; and

(4) Submitted in quintuplicate.

§ 860.125 Consultation with panels.

(a) When the Commissioner is required to refer a reclassification petition to a classification panel for its recommendation under § 860.134, or is required or chooses to have consultation with a panel concerning a reclassification petition, such as under § 860.132 and § 860.136, the Food and Drug Administration shall distribute a copy of the petition to each panel member and shall consult with the panel in one of the following ways:

(1) Consultation by telephone with a majority of current voting panel members;

(2) Consultation by mail with a majority of current voting panel members;

(3) Discussion at a panel meeting with or without the issuance of a formal recommendation by the panel.

(b) The method of consultation chosen by the Commissioner will depend on the importance and complexity of the subject matter involved and the need for rapid action. When time and circumstances permit, the Commissioner will consult with a panel through discussion at a panel meeting.

(c) When a petition is submitted under § 860.134 for a "new device," the Commissioner's consultation with the panel shall include obtaining a recommendation that includes the information set forth in § 860.84(d).

§ 860.130 General procedures under section 513(e) of the act.

(a) Section 513(e) of the act applies to all reclassification proceedings under the act except those initiated by a manufacturer or importer for reclassification of a device currently in class III by operation of either section 513(f) or 520(l) of the act. See §§ 860.134 and 860.136, respectively.

(b) A proceeding to reclassify a device under section 513(e) may be initiated:

(1) On the initiative of the Commissioner alone;

(2) On the initiative of the Commissioner in response to a request for change in classification based on new information, under section 514(b) or 515(b) of the act (see § 860.132); or

(3) In response to the petition of an interested person, based on new information, filed in accordance with § 860.123.

(c) A proceeding to reclassify a device under section 513(e) shall be conducted in accordance with the rule making procedures in § 10.40 of this chapter, except that the Commissioner may secure a recommendation with respect to a proposed reclassification from the classification panel to which the device was last referred. If a proposed reclassification is submitted to a panel for its recommendation, the panel will consider it in accordance with the consultation procedures of § 860.125. Any recommendation submitted to the Commissioner by the panel shall be published in the FEDERAL REGISTER.

(d) If a device is reclassified under this section, the regulation effecting the reclassification may revoke any performance standard or premarket approval requirement that is no longer applicable to the device because of the change in classification.

(e) A regulation under this section changing the classification of a device from class III to class II may provide that such classification shall not take effect until the effective date of a performance standard established under section 514 of the act for the device.

§ 860.132 Procedures when the Commissioner initiates a performance standard or premarket approval proceeding under section 514(b) or 515(b) of the act.

(a) Sections 514(b) and 515(b) of the act require the Commissioner to provide, by notice in the FEDERAL REGISTER, the opportunity for interested parties to request a change in the classification of a device based on new information relevant to its classification when, for that device, the Commissioner initiates a proceeding either to develop a performance standard for a class II device or to promulgate a regulation requiring premarket approval for a class III device. In either case, if the Commissioner agrees that the new information warrants a change in classification, he will give notice of his intent to initiate a proceeding under section 513(e) of the act and § 860.130 to effect such a change.

(b) The procedures for effecting a change in classification under sections 514(b) and 515(b) of the act are as follows:

(1) Within 15 days after publication of the Commissioner's notice referred to in paragraph (a) of this section, a petition for reclassification is filed by an interested person in accordance with § 860.123.

(2) The Commissioner has consultation regarding the petition with the appropriate classification panel in accordance with § 860.125.

(3) Within 60 days after publication of the notice referred to in paragraph (a) of this section, the Commissioner, by order published in the FEDERAL REGISTER, either denies the petition or gives notice of his intent to initiate a change in classification in accordance with § 860.130.

§ 860.134 Procedures for "new devices" under section 513(f) of the act.

(a) Section 513(f)(2) of the act applies to reclassification proceedings initiated by a manufacturer or importer for reclassification of a device currently in class III by operation of section 513(f)(1) of the act. This category includes any device that was first introduced or delivered for introduction into interstate commerce for commercial distribution after May 28, 1976, unless:

(1) It is substantially equivalent to another device that was in commercial distribution before that date and had not been regulated before that date as a new drug; or

(2) It is substantially equivalent to another device that was not in commercial distribution before such date but has been classified in class I or class II; or,

(3) The Commissioner has classified the device in class I or class II in response to a petition for reclassification under this section.

The determination that a device is not "substantially equivalent" for purposes of the application of this section is made by the Food and Drug Administration. If the manufacturer or importer believes that a device is not "substantially equivalent" but that it should not be in class III under the criteria in § 860.3(c), it may petition for reclassification under this section. If the manufacturer or importer believes that a device is "substantially equivalent" and desires to proceed to market the device, the Food and Drug Administration will have an opportunity to determine whether the device is "substantially equivalent" on the basis of the premarket notification the manufacturer or importer is required to submit in accordance with Part 807 of this chapter.

(b) The procedures for effecting reclassification under section 513(f) of the act are as follows:

(1) The manufacturer or importer of the device petitions for the reclassification of the device in accordance with § 860.123.

(2) Within 30 days after the filing of a petition, the Commissioner notifies the petitioner of any deficiencies in the petition that prevent him from making a decision on it, allowing the petitioner to supplement a deficient petition. If the supplementary material or explanation of the petition is deemed sufficient to permit the Commissioner to make a decision on the petition, the petitioner is so notified.

(3) After determining that the petition has no deficiencies that preclude a decision on it, the Commissioner refers the petition to the appropriate classification panel for its review and recommendation respecting approval or denial of the petition.

(4) Within 90 days after the date of referral of the petition, the panel, after following the same review procedures set forth in § 860.84(c) for the original classification of an "old" device, submits its recommendation to the Commissioner containing the information set forth in § 860.84(d). A panel recommendation is regarded as preliminary until the Food and Drug Administration has reviewed the proposed panel recommendation, discussed it with the panel if appropriate, and developed a proposed reclassification order. Preliminary panel recommendations are filed in the Hearing Clerk's office upon receipt and are available to the public upon request.

(5) The panel recommendation is published in the FEDERAL REGISTER as soon as practicable and opportunity is provided for interested persons to provide comments on the recommendation.

(6) Within 90 days after receiving the panel's recommendation (and no more than 210 days after the date of filing of the petition), the Commissioner denies or approves the petition by order in the form of a letter to the petitioner. If the Commissioner approves the petition, the order will classify the device into class I or class II, as appropriate under the criteria set forth in § 860.3(c) and subject to the applicable requirements of § 860.93 relating to the classification of implants, life-supporting or life-sustaining devices and § 860.95 relating to exemptions from certain requirements of the act.

(7) Within a reasonable time after issuance of an order effecting reclassification under this section, the Commissioner announces the reclassification by notice published in the FEDERAL REGISTER.

§ 860.136 Procedures for transitional products under section 520(l) of the act.

(a) Section 520(l)(2) of the act applies to reclassification proceedings initiated by a manufacturer or importer for reclassification of a device currently in class III by operation of section 520(l)(1) of the act. This applies to any device that was regarded as a "new drug" before May 28, 1976.

(b) The procedures for effecting reclassification under section 520(l) are as follows:

(1) The manufacturer or importer of the device files a petition for the reclassification of the device in accordance with § 860.123.

(2) Within 30 days after the filing of the petition, the Commissioner notifies the petitioner of any deficiencies in the petition that prevent him from making a decision on it, allowing the petitioner to supplement a deficient petition. If the supplementary material or explanation of the petition is deemed acceptable, the petitioner is so notified.

(3) The Commissioner provides the petitioner an opportunity for an informal hearing conducted in accordance with Part 16 of this chapter.

(4) The Commissioner has consultation regarding the petition with the appropriate classification panel in accordance with § 860.125.

(5) Within 180 days after the filing of the petition (where the Commissioner has determined it to be adequate for review), the Commissioner by order in the form of a letter to the petitioner either denies the petition or classifies the device in class I or class II, in accordance with the criteria set forth in § 860.3(c).

(6) Within a reasonable time after issuance of an order effecting reclassification under this section, the Commissioner announces the reclassification by notice published in the FEDERAL REGISTER.

Interested persons may, on or before November 14, 1977, submit to the Hearing Clerk (HFC–20), Food and Drug Administration, Room 4–65, 5600 Fishers Lane, Rockville, Md. 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

NOTE.—The Food and Drug Administration has determined that this document does not contain a major proposal requiring preparation of an inflation impact statement under Executive Order 11821 and OMB Circular A–107. A copy of the inflation impact assessment is on file with the Hearing Clerk, Food and Drug Administration.

Dated: September 1, 1977.

DONALD KENNEDY,
Commissioner of Food and Drugs.

COMMODITY FUTURES TRADING COMMISSION

[17 CFR Part 1]

MINIMUM FINANCIAL AND RELATED REPORTING REQUIREMENTS

Public Hearings

AGENCY: Commodity Futures Trading Commission.

ACTION: Public hearings.

SUMMARY: The Commodity Futures Trading Commission will hold public hearings on Wednesday, October 5, and Thursday, October 6, 1977, to receive oral statements on its proposed revisions to its minimum financial and related reporting requirements.

DATES: Hearings: 10 a.m. October 5, and 10 a.m. October 6, 1977.

ADDRESS: 5th Floor Hearing Room, Commodity Futures Trading Commission, 2033 K Street NW., Washington, D.C.

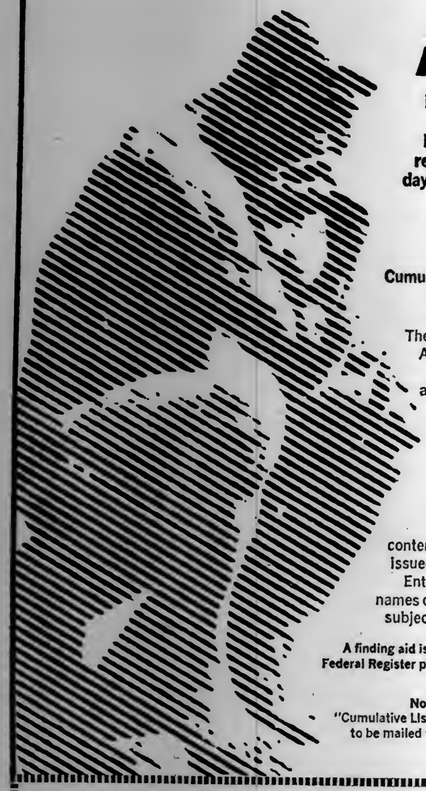
FOR FURTHER INFORMATION CONTACT:

Mrs. Jane Stuckey, Office of the Secretariat, Commodity Futures Trading Commission, 2033 K Street NW., Washington, D.C. 20581 (202–254–6126).

SUPPLEMENTARY INFORMATION: The Commission's proposed revisions to its minimum financial and related reporting requirements were publicly announced in the FEDERAL REGISTER on October 15, 1976 (41 FR 45706), May 26, 1977 (42 FR 27166), June 22, 1977 (42 FR 31740), and August 1, 1977 (42 FR 39036).

Persons who wish to appear at the hearings should forward an outline of their proposed statement to Mrs. Stuckey at the above address in time for it to be received by September 30, 1977.

Persons making statements before the Commission may be accompanied by persons of their own choosing, who may advise or assist the speaker in responding to questions or otherwise assure that full information is developed for the use of the Commission. Oral presentations will be limited to 15 minutes. During and subsequent to any person's oral presentation, questions may be asked either by members of the Commission or the Commission staff.



The Commission recognizes that members of the public may have questions. Therefore, provision will be made for persons having questions to submit those questions in an informal written form to a member of the Commission staff who will have discretion whether or not to pose those questions to the person making the presentation.

Issued in Washington, D.C., on September 7, 1977, by the Commission.

WILLIAM T. BAGLEY,
Chairman, Commodity Futures Trading Commission.

would you like to know

If any changes have been made in certain titles of the CODE OF FEDERAL REGULATIONS without reading the Federal Register every day? If so, you may wish to subscribe to the "Cumulative List of CFR Sections Affected," the "Federal Register Index," or both.

Cumulative List of CFR Sections Affected
$10.00
per year

The "Cumulative List of CFR Sections Affected" is designed to lead users of the Code of Federal Regulations to amendatory actions published in the Federal Register, and is issued monthly in cumulative form. Entries indicate the nature of the changes.

Federal Register Index $8.00
per year

Indexes covering the contents of the daily Federal Register are issued monthly, quarterly, and annually. Entries are carried primarily under the names of the issuing agencies. Significant subjects are carried as cross-references.

A finding aid is included in each publication which lists Federal Register page numbers with the date of publication in the Federal Register.

Note to FR Subscribers: FR Indexes and the "Cumulative List of CFR Sections Affected" will continue to be mailed free of charge to regular FR subscribers.

Mail order form to:
Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The six-month trial period ended August 6. The program is being continued on a voluntary basis (see OFR notice, 41 FR 32914, August 6, 1976). The following agencies have agreed to remain in the program:

Monday	Tuesday	Wednesday	Thursday	Friday
NRC	USDA/ASCS		NRC	USDA/ASCS
DOT/COAST GUARD	USDA/APHIS		DOT/COAST GUARD	USDA/APHIS
DOT/NHTSA	USDA/FNS		DOT/NHTSA	USDA/FNS
DOT/FAA	USDA/REA		DOT/FAA	USDA/REA
DOT/OHMO	CSC		DOT/OHMO	CSC
DOT/OPSO	LABOR		DOT/OPSO	LABOR
	HEW/ADAMHA			HEW/ADAMHA
	HEW/CDC			HEW/CDC
	HEW/FDA			HEW/FDA
	HEW/HRA			HEW/HRA
	HEW/HSA			HEW/HSA
	HEW/NIH			HEW/NIH
	HEW/PHS			HEW/PHS

Documents normally scheduled on a day that will be a Federal holiday will be published the next work day following the holiday.

Comments on this program are still invited. Comments should be submitted to the Day-of-the-Week Program Coordinator, Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408.

ATTENTION: For questions, corrections, or requests for information please see the list of telephone numbers appearing on opposite page.

federal register

Area Code 202 Phone 523-5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $5.00 per month or $50 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

rules and regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title 7—Agriculture

CHAPTER IX—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; FRUITS, VEGETABLES, NUTS), DEPARTMENT OF AGRICULTURE

[Amdt. 2]

PART 967—CELERY GROWN IN FLORIDA

Subpart—Rules and Regulations

ELIGIBILITY REQUIREMENTS AND NOMINATION PROCEDURES FOR PUBLIC MEMBERS OF THE FLORIDA CELERY COMMITTEE

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: A recent amendment of the Florida Celery Marketing Order provides that a public member and alternate be added to the Florida Celery Committee, the local administrative agency for the program. This rule specifies the eligibility requirements of the persons to be nominated and procedures for nominating public members.

EFFECTIVE DATE: September 14, 1977.

FOR FURTHER INFORMATION CONTACT:

Charles R. Brader, Deputy Director, Fruit and Vegetable Division, AMS, U.S. Department of Agriculture, Washington, D.C. 20250. Phone: 202–447–3545.

SUPPLEMENTARY INFORMATION: Marketing Agreement No. 149 and Order 967, both as amended, regulate the handling of celery grown in Florida. It is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). The Florida Celery Committee established under the order is responsible for its local administration. The Secretary's Decision (42 FR 25872) specifies that the Secretary will issue rules or regulations which set forth the eligibility requirements for public member nominees and the nomination procedures to be followed.

Notice was published in the August 2 FEDERAL REGISTER (42 FR 39108) inviting written comment by August 16, 1977. None was received.

Findings. On the basis of all considerations it is believed that these rules will tend to effectuate the declared policy of the act.

It is hereby further found that good cause exists for not postponing the effective date of this section until 30 days after publication in the FEDERAL REGISTER (5 U.S.C. 553) in that (1) notice was given of the rules set forth in this section through publicity in the production area and by publication in the August 2 FEDERAL REGISTER, (2) prompt issuance of these rules will be beneficial to all interested persons because it should afford the committee additional time to publicise, seek candidates and select the public member and alternate nominees and (3) no useful purpose will be served by postponing such issuance.

The rules are as follows:

Amend Subpart—Rules and Regulations (7 CFR 967.100–967.166) by adding a new § 967.140 and § 967.141 to read as follows:

PUBLIC MEMBERS

§ 967.140 Eligibility requirements.

(a) Public members shall be neither producers nor handlers of celery and shall have no direct financial interest in the production or marketing of celery except as consumers of agricultural products.

(b) Public members should be able to devote sufficient time and express a willingness to attend committee activities regularly and to familiarize themselves with the background and economics of the industry.

(c) Public members must be residents of Florida.

(d) Public members shall be nominated by the Florida Celery Committee and shall serve a one-year term which coincides with the term of office of producer or handler members of the committee.

§ 967.141 Nomination procedures.

(a) Names of candidates together with evidence of qualification for public membership on the Florida Celery Committee shall be submitted to the committee at its business office, 4401 East Colonial Drive, or P.O. Box 20067, Orlando, Fla. 32814, no later than April 15.

(b) Questionnaires may be sent by the committee to those persons submitted as candidates, to determine their eligibility and interest in becoming a public member.

(c) The names of persons nominated for the public member and alternate positions shall be submitted by the incumbent committee to the Secretary by July 1 with such information as deemed pertinent by the committee or as requested by the Secretary.

(d) Nomination of the initial public member may be made later than July 1 but as soon as practical thereafter. Such member's term shall end July 31, 1978.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674).

Dated: September 9, 1977, to become effective September 14, 1977.

CHARLES R. BRADER,
Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

Title 8—Aliens and Nationality

CHAPTER I—IMMIGRATION AND NATURALIZATION SERVICE, DEPARTMENT OF JUSTICE

PART 236—EXCLUSION OF ALIENS

PART 299—IMMIGRATION FORMS

Redesignation of Title of Special Inquiry Officer to Immigration Judge

AGENCY: Immigration and Naturalization, Justice.

ACTION: Final rule.

SUMMARY: This is an amendment of the regulations of the Immigration and Naturalization Service which is intended only to substitute the title "Immigration Judge" for the title "Special Inquiry Officer" in the revision to the regulations set forth below. This amendment is necessary because the Service officers presently referred to as "Special Inquiry Officers" who conduct various hearings and proceedings under the immigration and nationality laws have been designated as immigration judges for over two years. The title reference will be changed in other sections of the regulations as they are amended for other reasons.

EFFECTIVE DATE: September 14, 1977.

FOR FURTHER INFORMATION CONTACT:

James G. Hoofnagle, Jr., Instructions Officer, Immigration and Naturalization Service, 425 Eye Street NW., Washington, D.C. 20536. Telephone: 202–376–8373.

1. Part 236 of Chapter I of Title 8 of the Code of Federal Regulations is hereby revised to read as follows:

Sec.
236.1 Authority of immigration judges.
236.2 Hearing.
236.3 Decision of the immigration judge; notice to the applicant.
236.4 Finality of order.
236.5 Appeals.
236.6 Fingerprinting of excluded aliens.

AUTHORITY: Secs. 103, 212, 234, 235, 236, 292, 66 Stat. 173, 182, as amended, 198, 200, 238; 8 U.S.C. 1103, 1182, 1224, 1225, 1226, 1362.

V 42 178
SEP 14 77
UMI

§ 236.1 Authority of immigration judges.

In determining cases referred for further inquiry as provided in section 235 of the Act, immigration judges shall have the powers and authority conferred upon them by the Act and this chapter. Subject to any specific limitation prescribed by the Act and this chapter, immigration judges shall also exercise the discretion and authority conferred upon the Attorney General by the Act as is appropriate and necessary for the disposition of such cases.

§ 236.2 Hearing.

(a) *Opening.* Exclusion hearings shall be closed to the public, unless the alien at his own instance requests that the public, including the press, be permitted to attend; in that event, the hearing shall be open, provided that the alien states for the record that he is waiving the requirement in section 236 of the Act that the inquiry shall be kept separate and apart from the public. When the hearing is to be open, depending upon physical facilities, reasonable limitation may be placed upon the number in attendance at any one time, with priority being given to the press over the general public. The immigration judge shall ascertain whether the applicant for admission is the person to whom Form I–122 was previously delivered by the examining immigration officer as provided in Part 235 of this chapter; enter a copy of such form in evidence as an exhibit in the case; inform the applicant of the nature and purpose of the hearing; advise him of the privilege of being represented by an attorney or other representative qualified under Part 292 of this chapter, and request him to state then and there whether he desires representation; advise him that he will have a reasonable opportunity to present evidence in his own behalf, to examine and object to evidence against him, and to cross-examine witnesses presented by the Government; and place the applicant under oath.

(b) *Procedure.* The immigration judge shall receive and adduce material and relevant evidence, rule upon objections, and otherwise regulate the course of the hearing.

(c) *Trial attorney.* The district director shall assign a trial attorney to every case in which the appellant's nationality is in issue or in which the immigration judge requests such assignment. In his discretion the district director may assign a trial attorney to any case in which he deems such assignment necessary or advantageous. The duties of the trial attorney shall include, but are not limited to, the presentation of evidence and the interrogation, examination, and cross-examination of the applicant and other witnesses. Nothing contained herein shall be construed to diminish the authority conferred upon the immigration judge in conducting proceedings under this part.

(d) *Depositions.* The procedures specified in § 242.14(e) of this chapter shall apply.

(e) *Record.* The hearing before the immigration judge, including the testimony and exhibits, the immigration judge's decision, and all written orders, motions, appeals, and other papers filed in the proceeding shall constitute the record in the case. The hearing shall be recorded verbatim except for statements made off the record with the permission of the immigration judge.

§ 236.3 Decision of the immigration judge; notice to the applicant.

(a) *Contents.* The decision of the immigration judge may be oral or written. It shall include a discussion of the evidence and findings as to excludability; the formal enumeration of findings is not required. The decision shall be concluded with the order of the immigration judge.

(b) *Oral decision.* An oral decision shall be stated for the record by the immigration judge at the conclusion of the hearing and in the presence of the applicant. When entitled to appeal from an adverse decision of the immigration judge, the applicant shall be so advised and shall be required to state then and there whether he wishes to appeal. At his request, the applicant shall be furnished with a typewritten transcript of the oral decision of the immigration judge.

(c) *Written decision.* When the decision of the immigration judge is in writing, the district director shall serve a signed copy thereof on the applicant, together with the notice referred to in § 3.3 of this chapter.

(d) *Advice to alien ordered excluded.* An alien ordered excluded shall be furnished with Form I–296, Notice to Alien Ordered Excluded by Immigration Judge, at the time of an oral decision by the immigration judge or upon service of a written decision.

(e) *Holders of refugee travel documents.* Aliens who are the holders of valid unexpired refugee travel documents may be ordered excluded only if they are found to be inadmissible under section 212(a) (9), (10), (12), (23), (27), (28), (29), or (31) of the Act, and it is determined that on the basis of the acts for which they are inadmissible there are compelling reasons of national security or public order for their exclusion. If the immigration judge finds that the alien is inadmissible but determines that there are no compelling reasons of national security or public order for exclusion, the immigration judge shall remand the case to the district director for parole.

§ 236.4 Finality of order.

The order of the immigration judge shall be final except when a case has been certified as provided in Part 3 or Part 103 of this chapter, or when an appeal is taken to the Board of Immigration Appeals. An immigration judge shall have authority to certify his decision in any case to the Board of Immigration Appeals when it involves an unusually complex or novel question of law or fact. When the order of the immigration judge is to admit the applicant, the immigration judge shall place him on notice that the decision is subject to appeal by the district director as provided in § 236.5(c).

§ 236.5 Appeals.

(a) *In general.* Pursuant to Part 3 of this chapter, an appeal shall lie to the Board of Immigration Appeals from a decision of the immigration judge under this part, except as limited by section 236(d) of the Act.

(b) *By applicant.* When the applicant states that he wishes to appeal from the immigration judge's oral decision, he shall be required then and there to submit completed Form I–290A. At his request, the applicant shall be allowed 10 days from the date of the oral decision in which to file a brief. An appeal from the immigration judge's written decision shall be taken within 13 days after mailing.

(c) *By district director.* The district director may, within 5 days from date of decision, appeal from an order of the immigration judge to admit the applicant. The applicant shall be notified in writing when an appeal is taken by the district director and advised that he will be allowed 5 days from receipt of notification in which to submit written representations for transmittal to the Board with the record in the case.

§ 236.6 Fingerprinting of excluded aliens.

Every alien 14 years of age or older who is excluded from admission to the United States by an immigration judge shall be fingerprinted, unless during the preceding year he has been fingerprinted at an American consular office.

* * * * *

2. Part 299 of Chapter I of Title 8 of the Code of Federal Regulations is hereby revised to read as follows:

§ 299.1 is revised to read as follows:

§ 299.1 Prescribed forms.

* * * * *

Form No., title, and description
* * * * *
I–296 (3–15–76) Notice to Alien Ordered Excluded by Immigration Judge.
* * * * *

(Sec. 103; 66 Stat. 173; (8 U.S.C. 1103).)

The above amendments are issued pursuant to section 552 of Title 5 of the United States Code (80 Stat. 383), as amended by Pub. L. 93–502 (88 Stat. 1561) and the authority contained in section 103 of the Immigration and Nationality Act (8 U.S.C. 1103), 28 CFR 0.105(b) and 8 CFR 2.1. The title "immigration judge" is used in the above amendments in lieu of "special inquiry officer" pursuant to 8 CFR 1.1(l). Compliance with section 553 of Title 5 of the United States Code as to notice of proposed rulemaking and delayed effective date is unnecessary in this instance because the amendments contained in this order are editorial in nature.

Effective date: The amendments prescribed in this order become effective on September 14, 1977.

Dated: September 7, 1977.

LEONEL J. CASTILLO,
Commissioner of Immigration and Naturalization.

Correction

In FR Doc. 77–24805 appearing at page 43058 in the issue for Friday, August 26, 1977, the following correction should be made.

The effective date on page 43508 is not applicable, and should be deleted.

Title 45—Public Welfare

CHAPTER I—OFFICE OF EDUCATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

PART 178a—INCENTIVE GRANTS FOR STATE STUDENT FINANCIAL ASSISTANCE TRAINING PROGRAM

AGENCY: Office of Education, HEW.

ACTION: Final regulation.

SUMMARY: The Commissioner is issuing regulations to implement the State Student Financial Assistance Training Program. The regulations establish rules and procedures by which the Commissioner will make incentive grants available to States for the purpose of carrying out training programs, in consultation with Statewide financial aid administrator organizations, to increase the proficiency of financial aid administrators.

EFFECTIVE DATE: Pursuant to Section 431(d) of the General Education Provisions Act, as amended (20 U.S.C. 1232(d)), this regulation has been transmitted to the Congress concurrently with its publication in the FEDERAL REGISTER. That section provides that rules subject thereto shall become effective on the 45th day following the date of such transmission, subject to the provisions therein concerning Congressional action and adjournment.

FOR FURTHER INFORMATION CONTACT:

Richard L. McVity, Director, State Student Incentive Grant Program, Regional Office Building 3, Room 3674, 7th and D Streets SW., Washington, D.C. Telephone 202–245–2201.

SUPPLEMENTARY INFORMATION: A notice of proposed rulemaking was published in the FEDERAL REGISTER on April 8, 1977 (45 FR 18750–18752) proposing regulations governing the operation of the State Student Financial Assistance Training Program. The Commissioner invited interested persons to submit comments concerning the proposed regulations. Additionally, six public meetings were held from May 2–6, 1977, in various locations throughout the country for the purpose of soliciting public comment. The following is a summary of the comments received and the Office of Education's response.

DISCUSSION OF MAJOR COMMENTS

BENEFICIARIES OF TRAINING PROGRAMS

Comments. Several commenters suggested that institutional admissions and guidance staff, bank loan officers, high school guidance counselors, and students at institutions should be eligible for training through the program, in addition to "institutional and State financial aid administrators."

Response. The statute limits persons to be trained to institutional and State financial aid administrators. A definition of the term "institutional and State financial aid administrators" has been added in § 178a.2.

The Commissioner also points out that a State agency may consult with various groups in carrying out its program but that, if the expenditure of Federal program funds is involved, the consultation must be related to improving the proficiency of aid administrators.

RESPONSIBILITY FOR PROGRAM ADMINISTRATION

Comments. Several commenters made suggestions regarding the extent to which financial aid administrator organizations should participate in the administration of the program. Generally, institutional personnel and representatives of financial aid administrator organizations suggested that the Commissioner issue additional regulations to ensure their having a direct, participatory role in the program's administration. Commenters from State agencies felt there was no need to change significantly the regulation as it was proposed.

Response. The statute places in the State agencies the responsibility of administering the grants made under this part. Therefore, the State agencies have the final authority and responsibility for program administration. The Commissioner has, however, amended § 178a.4 to require agencies to consult the organizations on a regular basis and has included several means by which the consultation may be carried out.

PROGRAM SCOPE

Comments. Several commenters suggested that the scope of the training program should be expanded to include the conduct of programs.

Response. The statute authorizes the expenditure of funds for the purpose of designing and developing training programs. However, the Commissioner views "development" to include both the conduct and evaluation of the programs and components developed with funds under this part. Thus a State may develop a training program or component and carry out and evaluate that activity as part of the development process. It may not, however, take the money received under this part and use it simply to conduct an existing training program.

Comments. Several commenters suggested that the training program not be required to achieve all objectives listed in § 178a.4(c).

Response. The Commissioner believes that all the objectives must be attained in order to increase the proficiency of aid administrators, and that they should be achieved sequentially. If funds are inadequate to attain each objective during each award period, however, the agencies should select the objectives they believe they can achieve and plan their activities accordingly. The Commissioner emphasizes that the achievement by the States of all the objectives set forth in § 178a.4 (c) must also be a recurring process. For example, if a State has an adequate amount of funds during an award period, it must plan to perform activities to achieve all the objectives during that period. During the following period, if adequate funding is available, the State must perform activities to update, revise or expand:

(1) Its identification of needs, (2) its assessment of current strengths and weaknesses of other training programs, (3) its instructional design, and (4) the actual conduct of training developed with program funds.

It would then evaluate again the extent to which the activities that were most recently performed to achieve the four previous objectives were successful in increasing the proficiency of aid administrators. For States with limited funds, of course, performing activities to achieve the full sequence of objectives may have to occur over longer periods of time, e.g., 1½ to 2 years.

TRAINING PROGRAM COMPONENTS

Comments. Several commenters requested that the Commissioner not require that all components listed in § 178a.5 be included in each State's training program; they felt the program administrators should be allowed more flexibility in responding to identified needs in the States.

Response. The Commissioner agrees and has changed the introductory wording of that section to state that "the components may include, but are not limited to," those which appear in § 178a.5. Similar components have been included in § 178a.4(c)(2) to guide

V 42 I 178 SEP 14 77 S UMI

States in the conduct of a needs assessment.

GRANT RECIPIENTS

Comment. One commenter suggested that the Commissioner provide for the submission of applications for the program by combinations of States.

Response. The Commissioner has made no such provision in this regulation. The authorizing legislation specifies that the grants are to be made available to individual States—not to combinations of States. The regulations do not, however, prohibit a State from entering into a contract or an agreement with another State for the provision of services. Each State will, nonetheless, be responsible for applying for a grant and will be accountable for the expenditure of its own program funds.

INFLATIONARY IMPACT

NOTE.—The Office of Education has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A-107.

(Catalog of Federal Domestic Assistance Number 13.582, State Financial Assistance Training Program.)

Dated: July 19, 1977.

ERNEST L. BOYER,
U.S. Commissioner of Education.

Approved: September 2, 1977.

HALE CHAMPION,
Acting Secretary of Health, Education, and Welfare.

1. Chapter I of Title 45 of the Code of Federal Regulations is amended by adding a new Part 178a, which reads as follows:

Sec.
178a.1 Purpose.
178a.2 Definitions.
178a.3 Allotments.
178a.4 Student Financial Assistance Training Program requirements.
178a.5 Training program components.
178a.6 State applications.
178a.7 Review of State applications.
178a.8 State matching requirements.
178a.9 Use of funds.
178a.10 Reporting requirements.

AUTHORITY: Sec. 493C of Title IV of the Higher Education Act of 1965, as added by sec. 131(b) of Pub. L. 94-482, 90 Stat. 2149-2150 (20 U.S.C. 1088b-3), unless otherwise noted.

§ 178a.1 Purpose.

(a) The purpose of this part is to make incentive grants available to the States to be administered, in consultation with statewide financial aid administrator organizations, for the purpose of designing and developing programs to increase the proficiency of institutional and State financial aid administrators in all aspects of student financial aid.

(b) Assistance provided under this part is subject to the applicable provisions of Subchapter A of this chapter relating to fiscal, administrative and other matters (General Provisions for Office of Education Programs (45 CFR Part 100a)).

(20 U.S.C. 1088b-3.)

§ 178a.2 Definitions.

"Act" means the Higher Education Act of 1965, as amended.

"Award period" means the period of time beginning July 1 of one year and ending June 30 of the following year.

"Institution of postsecondary education" means an institution of higher education, as defined in section 1201(a) of the Act, a proprietary institution of higher education, as defined in section 491(b) of the Act, a vocational school as defined in section 435 of the Act, or an area vocational school, as defined in section 195(2) of the Vocational Education Act of 1963.

"Institutional and State financial aid administrators" means full- and part-time employees of institutions of postsecondary education and State governments who participate in the administration of student financial aid programs. The term may include, but is not limited to, student financial aid directors, officers and counselors, institutional loan collection staff and those business office personnel who deal with student financial aid programs.

"State" means, in addition to the several States of the Union, the District of Columbia, the Commonwealth of Puerto Rico, Guam, American Samoa, the Trust Territory of the Pacific Islands, and the Virgin Islands.

(20 U.S.C. 1141(b), 1088(a), and 1085.)

§ 178a.3 Allotments.

(a) Funds appropriated pursuant to section 493C(b) of the Act will be divided equally among States submitting approvable applications by the announced closing date.

(b) The Commissioner will transfer to each State which has been awarded a grant under this part amounts equal to .05 percent of the funds allotted to that State under each of the Supplemental Educational Opportunity Grant, College Work-Study, and National Direct Student Loan Programs, except that the amount transferred from each program may not exceed $10,000. This amount will be added to the amount received by each State under paragraph (a) of this section.

(20 U.S.C. 1088b-3.)

§ 178a.4 Student Financial Assistance Training Program requirements.

(a) Each State agency which administers the State Student Incentive Grant Program authorized by Title IV, Part A, Subpart 3 of the Act is responsible for the design and development, and to the extent related to development, for the conduct and evaluation of training programs under this part. If such an agency does not exist in any State, an agency or organization designated by the State will be responsible for the design and development of the program. States may subcontract some program activities to other organizations, including financial aid administrator organizations.

(b) The State agency must administer the programs in consultation with statewide financial aid administrator organizations. Consultation, that is, conferring with or seeking advice from statewide organizations, must occur on a regular basis. The State agency may consult with those organizations by:

(1) Involving organization representatives as consultants; or

(2) Working with advisory groups from organizations.

(c) The training programs under this part must, to the extent of available funds, perform activities to achieve sequentially the following objectives:

(1) The identification of:

(i) The current and future need for financial aid administrators at State agencies and institutions of postsecondary education throughout the State, and

(ii) The professional needs of those administrators in terms of such areas as those listed in § 178a.5;

(2) The assessment of the strengths and weaknesses, in light of the needs identified in paragraph (c)(1) of this section, of any current programs in the State which provide training in State and institutional financial aid policies and procedures;

(3) The design and development of training materials, methods and programs to meet the needs identified in paragraph (c)(1) of this section and to overcome the weaknesses identified in paragraph (c)(2) of this section;

(4) The provision of training to financial aid administrators based on the materials, methods and programs designed and developed under the requirements of paragraph (c)(3) of this section; and

(5) An evaluation of the effectiveness of the training materials, methods, and programs developed under this part.

(20 U.S.C. 1088b-3.)

§ 178a.5 Training program components.

Each training program developed under this part may include such components as the State determines necessary as a result of its identification of needs under § 178a.4(c)(1) and (2). The components may include, but are not limited to, the following areas:

(a) The principles upon which student financial aid is based;

(b) The theory, methodology, and forms of the principal systems of need analysis used for awarding student financial aid, such as the systems of the College Scholarship Service, the American College Testing Program, and the Basic Educational Opportunity Grant Program; the system used to determine eligibility for the receipt of a Guaranteed Student Loan; and the State needs analysis system;

(c) Methods of constructing student budgets;

(d) The statutes, regulations, handbooks, and any other applicable administrative materials pertaining to the student financial aid programs authorized under Title IV of the Act and to all student financial aid programs administered by that State;

(e) Strategies for packaging Federal, State, private, and institutional programs of student financial aid;

(f) Requirements for maintaining student records, State and institutional accounts, and disbursement systems;

(g) Student and institutional rights and responsibilities pertaining to financial aid programs;

(h) Management practices and procedures designed to eliminate institutional and student fraud and abuse in the operation of student financial aid programs;

(i) Instruction in the administration of Federal, State, institutional, and private programs of financial aid available to students in the State; and

(j) Any other subjects determined by the State agency to be necessary to carry out the purposes of this part.

(20 U.S.C. 1088b-3.)

§ 178a.6 State applications.

(a) Any State desiring to obtain a grant under this part shall annually file an application with the Commissioner, through the State agency administering its State Student Incentive Grant Program. If no such agency exists in the State, the application shall be filed through an agency or organization designated by the State for this purpose. The application shall include the name of the State agency administering the program, shall describe the activities to be undertaken, and shall contain sufficient information to enable the Commissioner to determine that the State program will meet the provisions of § 178a.4.

(b) As part of its application, each State must provide assurances that the Federal funds received under this part for any award period will be matched by an amount at least equal to the Federal funds reserved for that State under § 178a.3, or, if the State cannot make such an assurance, the amount of Federal funds that the State will match for that award period.

(c) The Commissioner will from time to time establish cut off dates for the filing of applications.

(20 U.S.C. 1088b-3.)

§ 178a.7 Review of State applications.

The Commissioner will review each State's application to insure that it meets the requirements of §§ 178a.4 and 178a.6. The Commissioner will not disapprove any State's application without giving the State agency an opportunity to remedy the deficiencies in its application within a reasonable time period.

(20 U.S.C. 1088b-3.)

§ 178a.8 State matching requirements.

The Federal funds expended under this part must be matched by an equal amount of State funds. In satisfying this matching requirement, the State is subject to §§ 100a.90 through 100a.94 of the Office of Education General Provisions (45 CFR 100a.90-100a.94). The matching must be from non-federal sources and may be cash or in kind. The State shall maintain supporting records to indicate the amount and sources of such matching.

(20 U.S.C. 1088b-3.)

§ 178a.9 Use of funds.

Funds received by a State under this part plus the matching State funds must be used to pay the costs of performing activities to meet the provisions of §§ 178a.4 and 178a.5 to increase the proficiency of institutional and State financial aid administrators.

178a.10 Reporting requirements.

At the end of each award period for which a State receives a grant under this part, the State must provide a report containing such information as the Commissioner determines necessary to insure that the State is adequately performing its responsibilities under this part.

(20 U.S.C. 1088b-3.)

[FR Doc.77-26323 Filed 9-13-77;8:45 am]

PART 192—STATE STUDENT INCENTIVE GRANT PROGRAM

AGENCY: Office of Education, HEW.

ACTION: Final regulation.

SUMMARY: This document makes minor technical amendments to the regulations governing administration of the State Student Incentive Grant Program. These regulations provide rules and criteria governing the award of incentive grants to the States for grants to students with substantial financial need, to enable the students to attend postsecondary educational institutions.

EFFECTIVE DATE: Under section 431(d) of the General Provisions Act, as amended (20 U.S.C. 1232(d)), this regulation has been transmitted to the Congress concurrently with the publication in the FEDERAL REGISTER. Regulations subject to that section become effective on the forty-fifth day following the date of transmittal, subject to Congressional action or adjournment.

FOR FURTHER INFORMATION CONTACT:

Richard L. McVity, Director, State Student Incentive Grant Program, Regional Office Building 3, Room 3674, 7th and D Streets SW., Washington, D.C. Telephone: 202-245-2201.

SUPPLEMENTARY INFORMATION:

PARTIAL WAIVER OF PROPOSED RULEMAKING

On April 7, 1977, the Commissioner published a Notice of Proposed Rulemaking establishing special procedures for the allotment of Fiscal Year 1977 State Student Incentive Grant Program funds among the States (42 FR 18407). Similar allotment procedures were used in Fiscal Year 1975 and Fiscal Year 1976. No public comments were received on the proposed rule, the substance of which has been incorporated as sections 192.3 (f) and (g) of this final rule. Since the remainder of this final rule consists of purely technical amendments to the State Student Incentive Grant Program regulations, conforming it without elaboration to changes made by the Education Amendments of 1976 (Pub. L. 94-482), the Commissioner has determined that further resort to proposed rulemaking would be impracticable and contrary to the public interest (5 U.S.C. 553(b)). The Commissioner also wishes to note that, in the interest of assuring the clarity and understandability of the regulations governing the State Student Incentive Grant Program, he is republishing them in their entirety in this issue of the FEDERAL REGISTER with minor editorial corrections. The amendments noted above have been incorporated into the full text as indicated below.

CHANGES IN REGULATIONS REQUIRED UNDER THE EDUCATION AMENDMENTS OF 1976 (PUB. L. 94-482)

1. *§ 192.2 Definitions.* The statutory definition of "nonprofit institution" found in 20 U.S.C. 1141(c) has been added.

2. *§ 192.3 Allotment and reallotment.* (a) Funds appropriated in one year remain available until the end of the succeeding fiscal year (Sec. 415A(b)(3), HEA), (b) bonus payments are provided to States with guaranteed student loan programs in any year when the SSIG appropriation exceeds $75,000,000 (Sec. 415E, HEA).

3. *§ 192.4 State program requirements.* (a) All nonprofit institutions of higher education must be eligible to participate in the State program for any academic year that begins on or after October 1, 1978 (Sec. 415C(b)(4), HEA). (The Education Amendments of 1976 provided that this requirement would take effect on July 1, 1977. However, the Higher Education Technical Amendments (Pub. L. 95-43) postponed the effective date of this provision until October 1, 1978.) (b) The general provisions governing student eligibility for assistance under Title IV, HEA programs (satisfactory academic progress; not owing grant refunds; and not being in default on loans) are added to the SSIG regulations.

(Section 497, HEA, as added by Section 132 of Pub. L. 94-482, 20 U.S.C. 1088f(e).)

OTHER TECHNICAL ADJUSTMENTS TO STATE STUDENT INCENTIVE GRANT PROGRAM REGULATIONS

1. Editorial changes have been made throughout these regulations to simplify or clarify the language.

2. *§ 192.3 Allotment and reallotment.* Special procedures were established in FY 1975, FY 1976, and FY 1977, for allotment of lump sum appropriations for the SSIG Program. Since Congress has customarily appropriated a lump sum for the authorizations for initial and continuation student awards, these allotment procedures have been incorporated into program regulations. (These procedures, as they affect FY 1977 State allotments, were published as proposed rules in the FEDERAL REGISTER on April 7, 1977 (42 FR 18407).)

V 42 1178 SEP 14 77 UMI

3. § 192.5 *State applications.* This section has been simplified to avoid unnecessary duplication of information by States in their first and subsequent applications.

4. § 192.7 *State standards for determining substantial financial need.* The income tax method of need analysis has been adjusted to agree with that in use in other Federal student assistance programs (see, e.g., 45 CFR Part 176.-13(b)(ii), 41 F.R. 51978).

5. § 192.10 *Use of funds.* Blanket coverage under 45 CFR Part 100b (General Provisions Regulations), formerly in effect, no longer appears appropriate in the case of the State Student Incentive Grant Program; a specific citation to 45 CFR 100b.92 (State matching procedures) has been added to the regulation (Sec. 192.10(b)), however.

Based on these considerations, Title 45 of the Code of Federal Regulations is amended by adding a revised Part 192, to read as set forth below.

NOTE.—The Office of Education has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A-107.

Dated: July 7, 1977.

ERNEST L. BOYER,
U.S. Commissioner of Education.

Approved: September 3, 1977.

HALE CHAMPION,
Acting Secretary of Health, Education, and Welfare.

(Catalog of Federal Domestic Assistance Number 13.548; State Student Incentive Grant Program.)

1. Section 100b.10 of Title 45 of the Code of Federal Regulations is amended by deleting paragraph (1) to remove the reference to the State Student Incentive Grant Program.

2. Part 192 of Chapter I of Title 45 of the Code of Federal Regulations is amended to read as follows:

Sec.
192.1 Purpose.
192.2 Definitions.
192.3 Allotment and reallotment.
192.4 State program requirements.
192.5 State applications.
192.6 Student eligibility.
192.7 State standards for determining substantial financial need.
192.8 Approval of State criteria for determining expected family contribution.
192.9 Maintenance of effort.
192.10 Use of funds.
192.11 Disapproval of State applications.
192.12 Audit—record retention.

AUTHORITY: Section 415A-415E of Title IV of the Higher Education Act of 1965, as amended by section 123 of Pub. L. 94-482, 90 Stat. 2094, and by Pub. L. 95-40 (20 U.S.C. 1070c-1070c-4), unless otherwise noted.

§ 192.1 Purpose.

The purpose of this program is to make incentive grants available to the States to assist them in providing grants to eligible students with substantial financial need to enable them to attend institutions of higher education. States may develop new student grant programs or may expand existing ones by enlarging the class of eligible grant recipients or by increasing the size of the grants previously awarded.

(20 U.S.C. 1070c.)

§ 192.2 Definitions.

"Academic year" means a period of time, usually eight or nine months, during which a full-time student would normally be expected to complete the equivalent of two semesters, two trimesters, three quarters or 900 clock hours of instruction.

"Act" means Title IV, Part A, Subpart 3 of the Higher Education Act of 1965, as amended (20 U.S.C. 1070c–1070c–4).

"Clock hour" means a period of time which is the equivalent of either: (1) a 50 to 60 minute class, lecture, or recitation, or (2) a 50 to 60 minute period of faculty-supervised laboratory, shop training, or internship.

"Continuation award" means an award of funds to a student who previously received an award under this program.

"Cost of education" means the cost of education as defined by each State.

"Dependent student" is a student who does not qualify as an independent or self-supporting student as defined in § 192.2.

"Expected family contribution of a dependent student" means the sum of the amounts which reasonably may be expected from the student and the student's spouse to meet the student's cost of education and the amount which reasonable may be expected to be made available to him by his parents for this purpose.

"Expected family contribution of an independent or self-supporting student" means the amount which reasonably may be expected from the student and the student's spouse to meet the student's cost of education.

"Full-time student" means a student who is carrying a full-time academic workload other than by correspondence measured in terms of: (1) course work or other required activities as determined by the institution in which the student is enrolled, or by the State whose agency is administering the program authorized by the Act, which amounts to the equivalent of a minimum of 12 semester hours or 12 quarter hours per academic term for institutions utilizing trimesters, semesters, or quarter hour systems, or which consists of a program requiring a minimum of 24 clock hours per week for those institutions that do not utilize such systems, and (2) the tuition and fees customarily charged for full-time study by the institution.

(20 U.S.C. 1088(c)(2).)

"Half-time student" means a student who is carrying a half-time academic workload measured in terms of: (1) Course work or other required activities as determined by the institution in which the student is enrolled, or by the State whose agency is administering the program authorized by the Act, which amounts to a minimum of 6 semester hours or 6 quarter hours for institutions utilizing trimesters, semesters or quarters, or which consists of a program requiring a minimum of 12 clock hours per week for those institutions which do not utilize these systems and (2) the tuition and fees customarily charged for half-time study by the institution.

(20 U.S.C. 1088(c)(2).)

"Independent or self-supporting student" means an independent or self-supporting student as defined by each State.

"Initial award" means the student's first award made under this program.

"Institution of higher education" means an educational institution in any State which: (1) admits as regular students only: (i) persons having a certificate of graduation from a school providing secondary education, or the recognized equivalent of such a certificate, or (ii) persons who are beyond the age of compulsory school attendance in the State in which the institution is located and who have the ability to benefit from the training offered by the institution, (2) is legally authorized within the State to provide a program of education beyond secondary education, (3) provides an educational program for which it awards a bachelor's degree or provides not less than a two-year program which is acceptable for full credit toward the degree, (4) is a public or other nonprofit institution, and (5) is accredited by a nationally recognized accrediting agency or association or, if not so accredited (i) is an institution with respect to which the Commissioner has determined that there is satisfactory assurance, considering the resources available to the institution, the period of time, if any, during which it has operated, the effort it is making to meet accreditation standards, and the purpose for which this determination is being made, that the institution will meet the accreditation standards of the agency or association within a reasonable time, or (ii) is an institution whose credits are accepted, on transfer, by not less than three institutions which are so accredited, for credit on the same basis as if transferred from an institution so accredited. The term also includes any school which provides not less than a one-year program of training to prepare students for gainful employment in a recognized occupation and which meets the provision of paragraphs (1), (2), (4), and (5) of this section unless the school is a public institution in which case it may also be accredited by the State agency in that State which has been listed by the Commissioner as a reliable authority as to the quality of public postsecondary vocational education in that State. For purposes of this part, a one-year program of training for institutions using a semester, trimester or quarter system means a program of at least 24 semester or trimester hours or 36 quarter hours. For institutions not using those academic terms, a one year program of training means a program of study in which a student will receive supervised training totalling at least 900 clock hours of instruction. The term also includes any proprietary institution of higher education, as defined in § 192.2, which has an agreement with the Commissioner containing the terms and conditions which the Commissioner determines to be necessary to insure that the availability of assistance to students at the school under this program has not resulted, and will not result, in an increase in tuition, fees, or other charges to students.

(20 U.S.C. 1087-1(b), 1141(a).)

"National of the United States" means (1) a citizen of the United States, or (2) a person who though not a citizen of the United States owes permanent allegiance to the United States.

(8 U.S.C. 1101(a)(22).)

"Nonprofit" as applied to a school, agency, organization, or institution means a school, agency, organization, or institution owned and operated by one or more nonprofit corporations or associations no part of the net earnings of which may lawfully inure to the benefit of any private shareholder or individual.

(20 U.S.C. 1141.)

"Parent" means the mother or father of the student, unless any other person, except the student's spouse, provides more than one-half of the student's support and claims or is eligible to claim the student as an exemption for Federal income tax purposes, in which case that person will be considered the parent.

"Proprietary institution of higher education" means a school (1) which provides not less than a six-month program of training to prepare students for gainful employment in a recognized occupation, (2) which admits as regular students only persons having a certificate of graduation from a school providing secondary education or the recognized equivalent of the certificate, (3) which is legally authorized by the State in which it is located to provide a program of education beyond secondary education, (4) which is accredited by a nationally recognized accrediting agency or association approved by the Commissioner for this purpose, (5) which is not a public or other nonprofit institution, and (6) which has been in existence for at least two years. For purposes of this part, a six-month program of training means for institutions using a semester, trimester or quarter system, a program of study of at least 16 semester or trimester hours, or 24 quarter hours. For institutions not using those systems a program of training means a program of study in which a student will receive supervised training totalling at least 600 clock hours of instruction.

(20 U.S.C. 1088(b)(3).)

"State" means, in addition to the several States of the Union, the District of Columbia, the Commonwealth of Puerto Rico, Guam, American Samoa, the Trust Territory of the Pacific Islands, and the Virgin Islands.

"Undergraduate student" means a student who (1) is in attendance at an institution of higher education and (2) has not earned a first baccalaureate or professional degree. A student who has not earned a first baccalaureate or professional degree and who is enrolled in a program of study at the postsecondary level which is designed to extend for more than four academic years will not be considered an undergraduate student beyond the fourth academic year unless that program leads to a first degree and is designed to extend for a period of five academic years.

(20 U.S.C. 1070c–1070c–4, unless otherwise noted.)

§ 192.3 Allotment and reallotment.

(a) *Allotment of funds for initial awards.* From the sums appropriated under section 415A(b)(1) of the Act for any fiscal year, the Commissioner will allot to each State an amount which bears the same ratio to these sums as the number of students in attendance as at least half-time students at institutions of higher education in the State bears to the total number of students in attendance in all the States.

(b) *Reallotment of funds for initial awards.* The amount of any State's allotment for any fiscal year under paragraph (a) of this section which the Commissioner determines will not be required for that State's grant program for that fiscal year will be available for reallotment from time to time, on dates during the year which the Commissioner may fix, to other States in proportion to the original allotments to those States under paragraph (a) of this section. The proportionate amount for any of these States shall be reduced to the extent it exceeds the sum the Commissioner estimates the State needs and will be able to use for the year for carrying out the State plan. The total of the reductions will be similarly reallotted among the States whose proportionate amounts were not reduced.

(c) Any amount reallotted to a State under pargaraph (b) of this section during a year will be considered part of its allotment under paragraph (a) of this section for that year.

(d) For the purposes of this section, the number of students in attendance as at least half-time students at institutions of higher education in a State and in all the States will be determined by the Commissioner for the most recent year for which satisfactory data are available.

(e) *Allotment of funds for continuation awards.* The Commissioner will allot the sums appropriated for each fiscal year for continuation grants pursuant to § 415A(b)(2) of the Act among the States so that each State will receive the same percentage of its request for continuation grant funds for that fiscal year submitted in accordance with § 192.5(b).

(f) Notwithstanding paragraph (e) of this section, in any year when the Congress appropriates a single lump sum for both initial and continuation awards, funds will be allotted to the States on the basis of the formula used for initial awards set forth in paragraph (a) of this section and States will divide their allotments among initial and continuation awards according to their individual requirements, assuring that the needs of continuation students have priority.

(g) Each State receiving an allotment of funds under this program in a fiscal year will submit a report before September 1 of that year projecting any portion of the allotment that will not be needed to make awards. These unused funds may be redistributed among the other States in proportion to the original allotments to those States, but no States may receive more than its request.

(h) Whenever the sum appropriated for this program for any fiscal year exceeds $75,000,000, the Commissioner will allot one-third of the amount above $75,000,000 to those States currently operating State Student Loan Insurance programs under Section 428(b) of the higher Education Act of 1965, either through an agency of the State or through a nonprofit private institution or organization designated by the State. The one-third bonus will be apportioned among qualified States so that the amount which each State receives bears the same ratio to one-third of the excess funds over $75,000,000 as the number of students in attendance on at least a half-time basis in institutions of higher education in that State bears to the total number of students in attendance on at least a half-time basis in institutions of higher education in all of the States qualifying for the bonus.

(i) Sums appropriated for incentive grants to States for any fiscal year will remain available for payments to States for the award of student grants under this program until the end of the fiscal year succeeding that fiscal year.

(20 U.S.C. 1070c-1.)

§ 192.4 State program requirements.

A State may receive funds allotted to it under § 192.3 for any fiscal year only if funds will be expended under a State program which:

(a) Is administered by a single State agency;

(b) Awards grants only to students who meet the eligibility requirements of § 192.6;

(c) Provides for the selection of recipients of the grants on the basis of substantial financial need determined annually on the basis of criteria established by the State and approved by the Commissioner;

(d) Provides that no payment may be made to a student under this program unless the student (1) is maintaining satisfactory progress in a course of study, according to the standards and practices of the institution at which the student is enrolled, (2) does not owe a refund on a grant previously received at that institution under the Basic Educational Opportunity Grant, Supplemental Educa-

V 42 1178 SEP 14 77 UMI

tional Opportunity Grant, or State Student Incentive Grant programs, or (3) is not in default on a loan made, insured, or guaranteed under the National Direct Student Loan or Guaranteed Student Loan programs for attendance at the institution at which the student is enrolled;

(e) Provides that grants will be in amounts not in excess of $1,500 per academic year for attendance on a full-time basis at an institution of higher education;

(f) Provides that all nonprofit institutions of higher education in the State are eligible to participate in the State program, effective with respect to any academic year beginning on or after October 1, 1978;

(g) Provides for the payment of the non-Federal share of grants awarded under this program from funds supplied by the State;

(h) Meets the maintenance of effort requirement of § 192.9;

(i) Provides for fiscal control and fund accounting procedures necessary to assure proper disbursement of and accounting for Federal funds paid to the State under this program; and

(j) Provides for the reporting which is reasonably necessary to enable the Commissioner to perform his functions under this program.

(20 U.S.C. 1070c–2.)

§ 192.5 State applications.

(a) Any State wishing to obtain a payment under this program which has not previously received funds under the Act must file with the Commissioner, through the State agency administering its program of student grants, in a form specified by the Commissioner, an application containing the following information:

(1) A description of the applicable State grant program, including:

(i) The name of the State agency administering the program,

(ii) A certification by an appropriate State official that this State agency is the single State agency responsible for the administration of this grant program,

(iii) The maximum grant permitted under the program,

(iv) The program's definition of substantial financial need,

(v) The criteria and procedures used in determining financial need under Sec. 192.7, in selecting grant recipients, and in determining the amount of student grants,

(vi) The need analysis system used, if any,

(vii) The eligibility criteria for students to receive grants, and

(viii) The type of schools students receiving grants under the program may attend.

(2) The amount of funds to be spent by the State in the fiscal year for which funds are requested under this part for grants to all students attending institutions of higher education, including grants to undergraduate students awarded funds on the basis of substantial financial need;

(3) The number of undergraduate students who received need-based State grants and the number who were eligible for grants but did not receive them, during the current and the preceding academic year;

(4) An assurance that the State will match the amount of funds allotted or reallotted to it under § 192.3 for the fiscal year, or if the State cannot make this assurance, the amount of Federal funds that the State can match for that fiscal year;

(5) Assurance of compliance with State program requirements specified in Section 192.4;

(6) The amount of funds, if any, expended by the State for grants to all students attending institutions of higher education, including grants to undergraduate students awarded these funds on the basis of substantial financial need, during the second fiscal year preceding the fiscal year in which the State will first receive funds under this program.

(b) If a State has previously received funds under this act, it must file an application annually with the Commissioner, through the State agency administering its program of student grants, which includes any changes in the information provided in paragraphs (a) of this section, plus the following:

(1) The amount of funds requested for initial and continuation awards;

(2) The amounts of funds the State received for initial and continuation awards for the current academic year;

(3) The number of students who have previously received initial and continuation awards under this program who will be eligible to receive continuation awards during the next academic year;

(4) The average initial award and the average continuation award made under this program for the current academic year;

(5) If available, the projected attrition rate for students receiving assistance under this program for the current academic year.

(c) The Commissioner will from time to time establish cutoff dates for the filing of applications.

(20 U.S.C. 1070c–2.)

§ 192.6 Student Eligibility.

In order to receive a grant in this program, a student must (a) be a national of the United States, be in the United States for other than a temporary purpose and intend to become a permanent resident thereof, or be a permanent resident of the Trust Territory of the Pacific Islands; (b) be enrolled or accepted for enrollment as at least a half-time undergraduate student at an institution of higher education; and (c) have substantial financial need as determined annually in accordance with § 192.7.

(20 U.S.C. 1070c–2.)

§ 192.7 State standards for determining substantial financial need.

(a) A State program must define substantial financial need and establish standards for determining whether an applicant for a grant has such need. These standards may include, but are not limited to:

(1) A student's expected family contribution; or

(2) The student's relative need, defined as the difference between a student's cost of education and his expected family contribution; or

(3) The student's or, where relevant, the student's parents' income.

(b) A student will be considered by the Commissioner to have substantial financial need under a State program (1) which determines need by evaluating only the student's expected family contribution if that student's expected family contribution is not more than $2,800; or (2) which determines relative need by evaluating the difference between the studeint's cost of education and his expected family contribution if that difference is at least $90; or (3) which determines need by evaluating the student's and, where relevant, the student's parents' income, if the student's net income does not exceed $20,000, or where relevant, if the parents' net income does not exceed $20,000; or (4) which determines need in accordance with standards other than those specifically listed in paragraph (a) of this section if the amount of need determined in accordance with the standard is reasonably comparable to the amount of need that would be determined under the standards listed in paragraph (a).

(c) A State program which provides for the selection of recipients on the basis of criteria which do not qualify under the provisions of paragraph (b), may, nevertheless, be approved under section 415C (b) (4) of the Act, if the State demonstrates, to the satisfaction of the Commissioner, that the program provides for selecion of recipients on the basis of substantial financial need.

(20 U.S.C. 1070c–2.)

§ 192.8 Approval of State criteria for determining expected family contribution.

(a) *Dependent students.* The Commissioner will approve the criteria of a State program which uses an expected family contribution in determining whether a dependent student has substantial financial need if the State takes into consideration at least the following factors in determining the amount of income and net assets that should reasonably be made available to the student, the student's spouse and the student's parents for meeting the student's cost of education:

(1) Any serious family illness;

(2) The number of dependent children of the student's parents;

(3) The number of these dependent children attending institutions of higher education; and

(4) Other circumstances which may affect the ability of the student and the student's parents to contribute toward the cost of the student's education.

(b) *Independent or self-supporting student.* The Commissioner will approve the criteria of a State program which utilizes an expected family contribution in determining whether an independent or self-supporting student has substantial financial need if the State takes into consideration at least the following factors when calculating that portion of the income and net assets of the student and the student's spouse which should reasonably be made available for meeting the student's cost of education:

(1) Any serious illness in the student's family;

(2) The number of dependent children of the student;

(3) The number of those dependent children attending institutions of higher education; and

(4) Other circumstances which may affect the ability of the student or the student's spouse to contribute toward the cost of the student's education.

(c) The Commissioner has determined that the following need analysis systems or methods of calculation meet the criteria set forth in paragraphs (a) and (b) of this section:

(1) Systems of need analysis published by the American College Testing Program and the College Scholarship Service,

(2) The method of calculating an expected family contribution used in the Basic Educational Opportunity Grant Program (45 CFR 190), or

(3) For dependent students only, the expected family contribution may be determined according to the Income Tax System. This is calculated as an amount equal to the sum of (i) the income tax paid by the parents of the student, (ii) 5 percent of the parent's net assets in excess of $12,500, or $25,000 if such assets include farm or business assets, except that no more than $12,500 may be deducted from non-farm and non-business assets, and (iii) any amount the student is reasonably able to contribute.

(d) The Commissioner will approve any other need analysis system or method of calculation which produces an expected family contribution reasonably comparable to a system described in paragraph (c) of this section.

(20 U.S.C. 1070c–2.)

§ 192.9 Maintenance of effort.

The amount of funds expended by the State for the non-Federal portion of awards made under this program for each fiscal year shall represent an additional expenditure for that year by that State over the amounts, if any, expended by the State for grants to all students attending institutions of higher education during the second fiscal year preceding the fiscal year in which the State initially received funds under this program.

(20 U.S.C. 1070c–2(b) (4).)

§ 192.10 Use of funds.

(a) Funds paid to a State under this program may be used by that State only to pay 50 percent of the amount of individual student grants made under this program.

(20 U.S.C. 1070c–2.)

(b) Matching funds may be made available by the State from State appropriations or from other non-Federal resources, including cash contributions permitted under 45 CFR 100b.92(a)(2).

§ 192.11 Disapproval of State applications.

The Commissioner will comply with the provisions of § 415D of the Act (regarding notice, opportunity for a hearing, and judicial review) before finally disapproving any application of a State.

(20 U.S.C. 1070c–3.)

§ 192.12 Audit—record retention.

Each State receiving funds under this program is subject to Section 100a.477 of the Office of Education General Provisions (45 CFR 100a.477) regarding audit and retention of records.

(20 U.S.C. 1070c–2.)

Title 45—Public Welfare

CHAPTER X—COMMUNITY SERVICES ADMINISTRATION

PART 1005—FREEDOM OF INFORMATION ACT REGULATIONS

FOIA Appeals Officer

AGENCY: Community Services Administration.

ACTION: Final rule.

SUMMARY: This rule changes the official who determines Freedom of Information Act appeals for the Agency. The Assistant Director for Management was recently confirmed by the Senate and is taking over the management functions of the agency including those of the Associate Director for Administration whose position is now vacant. Thus, the Assistant Director for Management will make the final decision on all appeals of agency denials of requests for documents under the Freedom of Information Act.

EFFECTIVE DATE: September 14, 1977.

FOR FURTHER INFORMATION CONTACT:

John Meyer, Office of General Counsel, Community Services Administration, 1200 19th Street NW., Washington, D.C. 20506 (202–254–5690).

SUPPLEMENTARY INFORMATION: This rule is a rule of agency procedure not requiring an opportunity for public comment. Any appeals addressed to the Associate Director for Administration will be forwarded to the Assistant Director for Management and decided according to agency Freedom of Information Act procedures as set forth in this Part.

§ 1005.11 [Amended]

Accordingly, 45 Code of Federal Regulations, § 1005.11(b) is amended as set forth below: In lines 2 and 3 the words "Assistant Director for Management" are substituted for the words "Associate Director for Administration."

(5 U.S.C. 552, Freedom of Information Act.)

GRACIELA (GRACE) OLIVAREZ,
Director.

[FR Doc.77–26630 Filed 9–13–77;8:45 am]

PART 1069—GRANTEE PERSONNEL MANAGEMENT

Subpart—Prohibition of Salary Checkoff for Political Activities

AGENCY: Community Services Administration.

ACTION: Final rule—Interpretative rule.

SUMMARY: This is an interpretation of the CSA regulation prohibiting payroll deductions from grantee employees' salaries which extends this prohibition to national groups involved in political activity. The National Community Action Trust Fund is presently receiving contributions through payroll deductions from CSA grantees' employees' salaries on the basis of a letter from former CSA Director Martinez allowing this practice. This rule will eliminate the National Community Action Trust Fund or any similar organization from receiving these contributions through such payroll deductions.

EFFECTIVE DATE: This interpretation shall take effect November 5, 1977.

FOR FURTHER INFORMATION CONTACT:

John C. Meyer, Office of General Counsel, Community Services Administration, 1200 19th Street NW., Washington, D.C. 20506; phone 202–254–5690.

SUPPLEMENTARY INFORMATION: Shortly after 45 CFR § 1069.8–5(e) was issued, CSA received two letters dated May 20 and June 2, 1976, from the National Community Action Agency Executive Directors' Association expressing concern that payroll deduction contributions to the National Community Action Trust Fund would be considered in violation of this regulation. By letter of June 23, 1976, then Director Martinez assured them that contributions to the Trust Fund were not intended to be covered. Upon reconsideration of this question, CSA finds that the language of the regulation does clearly cover the Trust Fund and similar organizations. As CSA does not wish as a matter of policy to encourage even the indirect channelling of CSA grant funds to the Trust Fund or other such organizations, this interpretation is reversed.

Interpretative regulations do not require public comment and are normally effective immediately; however, in this

V 42 178 SEP 14 77 UMI

instance, CSA is delaying the effective date until November 5, 1977, to give grantees time to adjust their systems to the reinterpretation of this regulation by terminating these payroll deductions.

Therefore, the following interpretation of 45 Code of Federal Regulations 1069.8-5(e) is adopted; the prohibition in that paragraph, "no contribution may be collected for any political activity through any deducation from the paycheck of any grantee, if that employee is paid with CSA funds", is hereby interpreted to prohibit the use of such deductions for voluntary contributions to the National Community Action Trust Fund or any other national entity which engages in such political activities.

(Sec. 602, 78 Stat. 530, 42 U.S.C. 2942.)

GRACIELA (GRACE) OLIVAREZ,
Director.

Title 47—Telecommunication

CHAPTER I—FEDERAL COMMUNICATIONS COMMISSION

[Docket No. 20920; RM-2514]

PART 73—RADIO BROADCAST SERVICES

Television Broadcast Station in Columbia, Mo.; Changes Made in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Report and Order.

SUMMARY: This action assigns and reserves Channel *23+ at Columbia, Mo., for noncommercial educational use. This action, initiated by a petition for rulemaking by the New Wave Corp., would provide a first reserved channel to this sizable community.

EFFECTIVE DATE: October 17, 1977.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Mark N. Lipp, Broadcast Bureau, 202-632-7792.

SUPPLEMENTARY INFORMATION:

Adopted: September 2, 1977.

Released: September 9, 1977.

By the Acting Chief, Broadcast Bureau.

In the matter of Amendment of §73.-606(b), Table of Assignments, Television Broadcast Stations. (Columbia, Mo.). Report and Order (Proceeding terminated) (41 FR 41929).

1. The Commission has before it the Notice of Proposed Rule Making, adopted September 17, 1976, in response to a petition filed by the New Wave Corp., licensee of educational FM Station KOPN, Columbia, Mo., proposing to assign and reserve television Channel *23+ at Columbia, as a first noncommercial assignment. The only comments submitted were from the petitioner in support of the proposal. Although these comments were received late, no oppositions to the proposal were filed and it appears that no prejudice would result from acceptance of these comments.

2. Columbia (pop. 58,804) [1] is the seat of Boone County (pop. 80,935), and is located approximately 43 kilometers (27 miles) north of Jefferson City in the central portion of the state.

3. The notice indicated that the proposed assignment to Columbia would meet the Commission's minimum mileage separation requirements and other technical criteria. No other changes in the Television Table of Assignments would be required.

4. New Wave, in its comments, states that it supports the proposal and will apply for the channel if assigned to Columbia, Mo. The Commission finds that the public interest would be served by adopting the New Wave Corp. proposal to enable it to provide a first noncommercial educational television service to this sizable community which includes the University of Missouri.

5. Accordingly, *it is ordered*, That, effective October 17, 1977, the Television Table of Assignments (sec. 73.606(b) of the Commission's rules) is amended, with respect to the city listed below to read as follows:

City	*Channel No.*
Columbia, Mo.	8+, 17-, *23+.

6. Authority for the action taken herein is found in sections 4(i), 5(d)(1), 303 (g) and (r) and 307(b) of the Communications Act of 1934, as amended, and section 0.281 of the Commission's rules.

7. *It is further ordered*, That this proceeding is terminated.

(Secs. 4, 5, 303, 48 Stat., as amended, 1066, 1068, 1082; 47 U.S.C. 154, 155, 303.)

FEDERAL COMMUNICATIONS COMMISSION,
MARTIN I. LEVY,
Acting Chief, Broadcast Bureau.

[Docket No. 21254; RM-2850]

PART 73—RADIO BROADCAST SERVICES

FM Broadcast Station in Rice Lake, Wis.; Changes Made in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Report and Order.

SUMMARY: This action assigns FM Channel 249A to Rice Lake, Wis. The channel assignment provides for an FM station which would render a second local aural broadcast service to the community.

EFFECTIVE DATE: October 17, 1977.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Mildred B. Neslerak, Broadcast Bureau, 202-632-7792.

SUPPLEMENTARY INFORMATION:

Adopted: September 2, 1977.

Released: September 9, 1977.

By the Acting Chief, Broadcast Bureau:

In the matter of amendment of § 73.-202(b), Table of Assignments, FM Broadcast Stations (Rice Lake, Wis.). Report and order (Proceeding Terminated) (42 FR 27973).

1. The Commission has before it the Notice of Proposed Rule Making, adopted May 18, 1977, 42 FR 27973, proposing the assignment of Channel 249A to Rice Lake, Wis., as its second FM assignment. The proceeding was instituted on the basis of a petition filed by Red Cedar Broadcasting, Inc. ("petitioner"). Supporting comments were filed by petitioner. Opposing comments were filed by WJMC, Inc., licensee of Station WJMC and WJMC-FM, Rice Lake, Wis.

2. Rice Lake (pop. 7,278), in Barron County (pop. 33,955),[1] is located approximately 80 kilometees (50 miles) north of Eau Claire, Wis. It presently receives local service from full-time AM Station WJMC (Class IV) and Station WJMC-FM (Channel 242), both licensed to WJMC, Inc.

3. Petitioner states that, although the 1970 Census shows the population of Rice Lake to be 7,278, the current Chamber of Commerce figures is 7,900. It asserts that the community serves a prime retail trade area of more than 2,000 square miles. Petitioner adds that Rice Lake is the livestock auction and purchasing center of northwestern Wisconsin, in addition to being the location of various manufacturers.

4. Preclusion would occur only on the proposed co-channel. Three communities are located in the precluded area: Durand (pop. 2,103); Spooner (pop. 2,444); and Shell Lake (pop. 928). Durand and Shell Lake each has an FM station and Spooner, which is located about 10 kilometers (6 miles) from Shell Lake, has no aural broadcast service.

5. In opposing comments, WJMC argues that making the proposed assignment would be contrary to the Commission's general policy against intermixture of classes of FM channels. It notes that an exception to this policy will occasionally be made when petitioner is willing to apply for the proposed Class A channel in spite of the intermixture situation. However, it adds, that a clear showing by a petitioner of its intention to apply for such a channel is a prerequisite to the channel's being assigned. WJMC asserts that in this case petitioner has publicly stated that it intends to apply for an AM/FM combination, not merely for an FM station. It questions whether a person contemplating filing an application for an AM station may legitimately petition for an assignment of an FM channel in a rule making in which ultimate utilization of the channel may well depend upon successful prosecution of the AM facility. WJMC further contends that there is no need for an additional FM channel in Rice Lake since the area immediately surrounding Barron County has a number of radio stations which serve Barron County and the Rice Lake area.

6. In response, petitioner states it is well-established Commission policy that intermixture of classes of FM channels is permitted when no Class C channel is available and the petitioner is willing to apply for the proposed Class A channel in spite of the intermixture situation. Petitioner contends that WJMC's argument that the area immediately surrounding Barron County has a number of radio stations serving Barron County and Rice Lake rests upon unsupported speculation, for the only operating full-time stations are Class A FM stations at Hayward and Shell Lake and each of these two communities is more than 15 miles from Rice Lake. Petitioner argues that the important consideration here is that Rice Lake, a growing community, should be afforded an opportunity for a first choice of local service.

7. Upon careful consideration of the comments filed by petitioner and WJMC, Inc., we believe it would be in the public interest to assign Channel 249A to Rice Lake, Wis. Petitioner has reiterated its intention to apply for the proposed channel, if assigned, and build a station promptly if granted, regardless of the outcome of its seeking authority to operate another facility. It is true that the proposed assignment would contravene our usual policy by intermixing a Class A with a Class C channel at Rice Lake. However, we have deviated from this policy where there is no Class C channel available, where there is a demand for a Class A channel, and where there is someone willing to compete under such circumstances. Yakima, Wash., 42 F.C.C. 2d 548, 550 (1973). In this instance there is no Class C channel that could be assigned to Rice Lake. Moreover, petitioner has expressed a desire to apply for Channel 249A at Rice Lake in spite of the intermixture situation. We note that other aural services emanating from other communities is not determinative for only a Rice Lake station could be expected to meaningfully respond to the local needs of that community. The proposed assignment would provide a second local nighttime service and a first competitive outlet in a growing community.

8. The Canadian government has given its concurrence to the proposed assignment of Channel 249A to Rice Lake, Wis.

9. Authority for the adoption of the amendment contained herein appears in Sections 4(i), 5(d)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and section 0.281 of the Commission's rules.

10. In view of the foregoing, *it is ordered*, That effective October 17, 1977, § 73.202(b) of the Commission's rules, the FM Table of Assignments, as regard Rice Lake, Wis., is amended to read as follows:

City	*Channel No.*
Rice Lake, Wis.	242,249A.

11. *It is further ordered*, That this proceeding is terminated.

(Secs. 4, 5, 303, 48 Stat., as amended, 1066, 1068, 1082; 47 U.S.C. 154, 155, 303.)

Title 49—Transportation

CHAPTER X—INTERSTATE COMMERCE COMMISSION

SUBCHAPTER A—GENERAL RULES AND REGULATIONS

[Service Order No. 1273]

PART 1033—CAR SERVICE

Distribution of Freight Cars

AGENCY: Interstate Commerce Commission.

ACTION: Emergency Order (Service Order No. 1273).

SUMMARY: Service Order No. 1273 authorizes the Chicago, Rock Island, and Pacific to substitute two smaller 40-ft. plain boxcars for each 50-ft. or larger boxcar ordered. The Rock Island has surplus 40-ft. boxcars stored while at the same time it is encountering shortages of 50-ft. and larger plain boxcars.

DATES: Effective 12:01 a.m., September 12, 1977. Expires 11:59 p.m., October 31, 1977.

FOR FURTHER INFORMATION CONTACT:

C. C. Robinson, Chief, Utilization and Distribution Branch, Interstate Commerce Commission, Washington, D.C. 20423, Telephone 202-275-7840. Telex 89-2742.

SUPPLEMENTARY INFORMATION: The order is printed in full below.

At a Session of the Interstate Commerce Commission, Railroad Service Board, held in Washington, D.C., on the 8th day of September, 1977.

There is an acute shortage of plain boxcars in excess of 40-ft. 6-in., 110,000 lbs. capacity on the lines of the Chicago, Rock Island, and Pacific Railroad Co. (RI) for transportation of shipments subject to tariff provisions that require the use of plain boxcars having lengths in excess of 40-ft. 6-in.; or capacities of 4,000 cu. ft. or more, or in excess of 110,000 lbs. The RI has a surplus of 40-ft. 6-in., plain boxcars of 110,000 lbs. or less capacity, and of less than 4,000 cu. ft. capacity, that could be substituted for larger cars if minimum quantity tariff provisions permitted. The economic loss suffered by shippers dependent on the RI for their car supplies can be alleviated by the substitution of sufficient smaller cars for the larger cars ordered to transport the shipments offered.

In the opinion of the Commission, present regulations and practices with respect to the use and supply of boxcars are ineffective to overcome these shortages of boxcars and an emergency exists requiring immediate action. Accordingly, the Commission finds that notice and public procedure are impracticable and contrary to the public interest, and that good cause exists for making this order effective upon less than thirty days' notice.

It is ordered, That:

§ 1033.1273 Distribution of freight cars.

(a) Subject to the concurrence of the shipper the Chicago, Rock Island, and Pacific Railroad Co. (RI) may substitute two plain boxcars listed in the Official Railway Equipment Register, ICC-RER No. 404, issued by W. J. Trezise, or successive issues thereof, as having mechanical designation "XM" or "XF" with inside length 40-ft. 6-in. or less, or with cubical capacity of less than 4,000 cu. ft., or with weight carrying capacity of 110,000 lbs. or less for each plain boxcar of greater capacity and of the same type ordered by a shipper. (See exceptions (b), (c), and (d).)

(b) *Exception.* This order shall not apply to shipments subject to tariff provisions requiring the use of twenty-five or more cars per shipment.

(c) *Exception.* This order shall not apply to shipments subject to tariff provisions which require that cars be furnished by the shipper.

(d) *Exception.* Smaller cars of mechanical designation "XF" furnished for larger boxcars ordered may be used only to the extent authorized in Association of American Railroads Revised Car Service Directive No. 155 or revisions thereof, published on page 1109 of the Official Railway Equipment Register, ICC-RER No. 404.

(e) *Rates and Minimum Weights Applicable.* The rates to be applied and the minimum weights applicable to shipments for which cars smaller than those ordered have been furnished and loaded as authorized by Section (a) of this order shall be the rates and minimum weights applicable to the larger cars ordered.

(f) *Billing to be Endorsed.* The carrier substituting smaller cars for larger cars as authorized by Section (a) of this order shall place the following endorsement on the bill of lading and on the waybills authorizing movement of the car:

Car of (_____) in length, or of (_____) cu. ft. or of (_____) lbs. or greater capacity ordered. Smaller cars furnished authority ICC Service Order No. 1273.

(g) *Concurrence of Shipper Required.* Smaller cars shall not be furnished in

V 421178
SEP 14 77
UMI

lieu of cars of greater capacity without the consent of the shipper.

(h) *Exceptions.* Exceptions to this order may be authorized to railroads by the Railroad Service Board, Washington, D.C., 20423. Requests for such exception must be submitted in writing, or confirmed in writing, and must clearly state the points at which such exceptions are requested and the reason therefor.

(i) *Rules and Regulations Suspended.* The operation of all rules, regulations, or tariff provisions is suspended insofar as they conflict with the provisions of this order.

(j) *Application.* The provisions of this order shall apply to intrastate, interstate, and foreign commerce.

(k) *Effective date.* This order shall become effective at 12:01 a.m., September 12, 1977.

(l) *Expiration date.* This order shall expire at 11:59 p.m., **October 31, 1977,** unless otherwise modified, changed, or suspended by order of this Commission.

(49 U.S.C. 1, 12, 15 and 17(2).)

It is further ordered, That copies of this order shall be served upon the Association of American Railroads, Car Service Division, as agent of the railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association; and that notice of this order shall be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D.C., and by filing it with the Director, Office of the Federal Register.

By the Commission, Railroad Service Board, members Joel E. Burns, Robert S. Turkington, and John R. Michael.

H. G. HOMME, JR.,
Acting Secretary.

Title 50—Wildlife and Fisheries

CHAPTER I—UNITED STATES FISH AND WILDLIFE SERVICE, DEPARTMENT OF THE INTERIOR

PART 32—HUNTING

Opening of Ouray National Wildlife Refuge, Utah, to Migratory Game Bird Hunting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulation.

SUMMARY: The Director has determined that the opening to migratory game bird hunting of Ouray National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

DATES: October 1, 1977 through January 1, 1978, inclusive.

FOR FURTHER INFORMATION CONTACT:

Refuge Manager, Ouray National Wildlife Refuge, 447 East Main Street, Suite 4, Vernal, Utah 84078, telephone: 801-789-0351.

SUPPLEMENTARY INFORMATION:

§ 32.12 Special regulations; migratory game birds; for individual wildlife refuge areas.

Migratory game bird hunting is permitted on the Ouray National Wildlife Refuge, Utah, only on the areas designated by signs as being open to hunting. These areas, comprising 1,375 acres, are delineated on maps available at the refuge headquarters and from the office of the Regional Director, U.S. Fish and Wildlife Service, 10597 West 6th Avenue, P.O. Box 25486, Denver, Colo. 80215. Migratory game bird hunting shall be in accordance with all applicable State regulations subject to the following conditions:

1. Ducks, mergansers, and coots only may be hunted. Goose hunting is not permitted.
2. Vehicle travel within the refuge will be restricted to designated routes and parking areas.

The provisions of this special regulation supplement the regulations which govern fishing on wildlife refuge areas generally which are set forth in Title 50 Code of Federal Regulations, Part 33. The public is invited to offer suggestions and comments at any time.

The U.S. Fish and Wildlife Service had determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107.

HERBERT G. TROESTER,
Refuge Manager, Ouray National Wildlife Refuge, Vernal, Utah.

SEPTEMBER 6, 1977.

PART 32—HUNTING

Opening of Ouray National Wildlife Refuge, Utah, to Upland Game Hunting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulation.

SUMMARY: The Director has determined that the opening to upland game hunting of Ouray National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

DATES: November 5, 1977, through December 4, 1977, inclusive.

FOR FURTHER INFORMATION CONTACT:

Refuge Manager, Ouray National Wildlife Refuge, 447 East Main Street, Suite 4, Vernal, Utah 84078, telephone: 801-789-0351.

SUPPLEMENTARY INFORMATION:

§ 32.22 Special regulations; upland game; for individual wildlife refuge areas.

Upland game hunting is permitted on the Ouray National Wildlife Refuge, Utah, only on the areas designated by signs as being open to upland game hunting. These areas, comprising 7,500 acres, are delineated on maps available at the refuge headquarters and from the office of the Regional Director, U.S. Fish and Wildlife Service, 10597 West 6th Avenue, P.O. Box 25486, Denver, Colo. 80215. Upland game hunting shall be in accordance with all applicable State regulations subject to the following conditions:

1. Pheasants only may be hunted.

The provisions of this special regulation supplement the regulations which govern upland game hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comments at any time.

The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107.

HERBERT G. TROESTER,
Refuge Manager, Ouray National Wildlife Refuge, Vernal, Utah.

SEPTEMBER 6, 1977.

[FR Doc.77-26638 Filed 9-13-77;8:45 am]

PART 32—HUNTING

Opening of Waterfowl Production Areas in Minnesota to Hunting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Hunting regulations.

SUMMARY: The Director has determined that hunting on Waterfowl Production Areas in Minnesota is compatible with the objectives for which the areas were established, will utilize a renewable resource, and provide added recreational opportunity to the public.

DATES: October 1, 1977 through November 14, 1977.

FOR FURTHER INFORMATION CONTACT:

Norrel Wallace, Wetland Program Manager, P.O. Box 26A, Route 1, Fergus Falls, Minn. 56537, telephone number 218-739-2291.

SUPPLEMENTARY INFORMATION:

§ 32.12 Special regulations; migratory game birds; for individual wildlife refuge areas.

Public hunting of ducks, geese, and coots on Waterfowl Production Areas in Minnesota is permitted only on areas designated as open to hunting. These areas are identified on maps available from WPA Management Headquarters in Benson, Ortonville, Fergus Falls, and Detroit Lakes and from the Regional Director, U.S. Fish and Wildlife Service, Department of the Interior, Federal Building, Fort Snelling, Twin Cities, Minn. 55111.

Hunting shall be in accordance with state regulations subject to the following special regulations:

1. Steel shot ammunition will be required when hunting ducks, geese, and coots with 12 gauge shotguns in the following areas:

All waters within the boundaries of Federal Waterfowl Production Areas in Minnesota and within a 150-yard zone of land adjacent to the margins of these waters. This includes lakes, ponds, marshes, swamps, rivers, streams, and seasonally flooded areas of all types. Drainage ditches and temporary sheet water more than 150 yards from the water areas described above are excluded from the steel shot requirement.

2. Hunters taking waterfowl and coots with 12 gauge shotguns may not possess ammunition containing lead or other toxic shot.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50 Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comment at any time.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 OMB Circular A-107.

Dated: September 6, 1977.

CHARLES A. HUGHLETT,
Acting Regional Director.

PART 32—HUNTING

Opening of Upper Souris National Wildlife Refuge, North Dakota to Deer Hunting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulation.

SUMMARY: The Director has determined that the opening to deer hunting of Upper Souris National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

DATES: November 11, 1977 through November 20, 1977.

FOR FURTHER INFORMATION CONTACT:

Refuge Manager, Upper Souris National Wildlife Refuge, RR No. 1, Foxholm, N. Dak. 58738 (701-468-5634).

SUPPLEMENTARY INFORMATION:

§ 32.32 Special regulations; big game; for individual wildlife refuge areas.

Deer hunting is permitted on the Upper Souris National Wildlife Refuge, North Dakota, on all areas except those designated as closed. The open areas comprising 31,800 acres are delineated on maps available at headquarters, Foxholm, North Dakota and from the office of the Area Manager, U.S. Fish and Wildlife Service, P.O. Box 1897, Bismarck, N. Dak. 58501. Hunting shall be in accordance with all applicable State regulations covering the hunting of deer subject to the following conditions:

(1) Only bucks may be taken by a special National Wildlife Refuge deer gun permit through the first weekend; November 11, 12, and 13, 1977. The remainder of the season hunters with a valid III A2 permit may take deer of the sex specified in that permit.

(2) All hunters must exhibit their special National Wildlife Refuge permit hunting license, deer tag, and vehicle contents to Federal and State Officers upon request.

(3) The refuge shall be closed to all vehicular travel except the main public roads and refuge recreation area parking areas.

(4) Deer are the only species that may be taken. It is unlawful to carry firearms after the deer tag is used.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50 Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comments at any time.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107.

Dated: September 6, 1977.

MAURICE B. WRIGHT,
Refuge Manager.

FEDERAL HOME LOAN BANK BOARD

[12 CFR Parts 541, 545, and 563]

[No. 77-552]

TWO FAMILY DWELLINGS

Loans in Excess of 80 Percent of Value

SEPTEMBER 8, 1977.

AGENCY: Federal Home Loan Bank Board.

ACTION: Proposed rule.

SUMMARY: The proposed amendments would (1) liberalize the Board's regulations regarding loans in excess of 80 percent of value by permitting such loans to be made on the security of two-family dwellings and (2) increase the percent of assets that a Federal association may hold in over-80-percent loans. The Board believes that these changes are needed to encourage home ownership, principally in inner-city areas where low and moderate income families may use the rental income from the second units to make their mortgage payments. The proposed amendments are intended to make home ownership available to such families who may be presently renting their dwelling units because they cannot afford to buy the property.

DATES: Comments must be received on or before: October 20, 1977.

ADDRESS: Send comments to the Office of the Secretary, Federal Home Loan Bank Board, 320 First Street NW., Washington, D.C. 20552. Comments will be available for public inspection at this address.

FOR FURTHER INFORMATION CONTACT:

Harry W. Quillian, Associate General Counsel, Federal Home Loan Bank Board (202-376-3556) at the above address.

SUPPLEMENTARY INFORMATION: Present Rules and Regulations for the Federal Savings and Loan System permit over-80-percent-of-value loans on the security of single-family dwellings, subjet to certain conditions (§§ 545.6-1(a) (4) and (5); 12 CFR 545.6-1(a)(4) and (5)). The proposed amendments would, in part, define the term "two-family dwelling" and permit such loans on the security of two-family dwellings if the borrower is occupying, or in good faith intends to occupy, one unit of the property as his principal dwelling. The amount of such loans on the security of two-family dwellings could not exceed the maximum amounts allowable in or pursuant to section 207(c)(3) of the National Housing Act (12 U.S.C. 1713) regarding maximum values applicable to the Department of Housing and Urban Development's rental housing insurance. Also, the proposed amendments would, in part, increase from 30% to 50% the percent of assets that a Federal association may hold in over-80%-of-value loans and increase from 15% to 25% the percent of assets that a Federal association may hold in over-90%-of-value loans (as part of the limitation regarding over-80%-of-value loans). Conforming amendments are proposed to numerous sections of the regulations.

There have been no "Chapter E" associations for some time and the last Federal association operating under a "Charter K" recently converted to another form of Federal Charter. The Board therefore proposes the following amendments: § 545.6-2 (12 CFR 545.6-2) entitled "Lending powers under sections 11 and 12 of Charter E" is to be deleted; and § 545.6-1 (12 CFR 545.6-1) entitled "Lending powers under sections 13 and 14 of Charter K" and § 545.6-3 (12 CFR 545.6-3) entitled "Lending powers under other charter provisions" are to be revised by changing the headings, deleting the reference to "Charter K", and changing the reference therein to include the lending authority in all of §§ 545.6 through 545.6-26. Additional changes to simplify the regulations will be proposed later to take advantage of the fact that now there are only "Charter K (rev.)", "Charter N", and "Charter S" Federal savings and loan associations.

Accordingly, the Board proposes to amend Parts 541 and 545 of the Rules and Regulations for the Federal Savings and Loan System (12 CFR Parts 541 and 545) by adding a new § 541.10-5, deleting § 545.6-2, and revising the headings and the text prior to the lettered subdivisions of § 545.6-1 and § 545.6-3, subdivisions (i), (ii), (iv), (vii), and (viii) of § 545.6-1(a)(4), subdivisions (i), (ii), (iii), and (iv) of § 545.6-1(a)(5), § 545.6-1(b)(1)(iii), § 545.6-3(a), § 545.6-7(a)(1), §545.6-7(a)(3), § 545.6-7(b) § 545.6-7(c)(1)(iii)(a), § 545.6-7(c)(2)(ii), and § 545.6-7(c)(3)(ii)(a) to read as set forth below. The Board also proposes to amend Part 563 of the Rules and Regulations for Insurance of Accounts (12 CFR Part 563) by revising the text prior to the numbered subdivisions of § 563.9-7(a) and all of § 563.9-7(b) to read as set forth below.

PART 541—DEFINITIONS

§ 541.10-5 Two-family dwelling.

The term "two-family dwelling" means a structure designed for two dwelling units.

* * * * *

PART 545—OPERATIONS

§ 545.6-1 Lending powers.

Any Federal association may make the following types of loans on the security of first liens on improved real estate and the use by such an association of loan plans, practices, and procedures which comply with the applicable provisions of §§ 545.6 through 545.6-26 are hereby approved by the Board:

(a) *Homes or combination of homes and business property—*

(1) *Monthly installment loans; flexible payment loans.* Subject to the limitations of § 545.6-7, monthly installment loans and flexible payment loans may be made on homes or combination of homes and business property for an amount not in excess of 75 percent of the value thereof, repayable monthly within 30 years or, if an insured or guaranteed loan, within the period acceptable to the insuring or guaranteeing agency: *Provided*, That, when the members of such an association have authorized loans to be made for an amount exceeding 75 percent of the value, such loans may be made up to the percentage of value authorized by the members but not in excess of:

(i) 80 percent of the value, if the loan is not an insured or guaranteed loan;

* * * * * *

(4) *Loans in excess of 80 percent of value.* The limitation of 80 percent set forth in (a)(1)(i) of this section shall be 90 percent in the case of any monthly installment loan or flexible payment loan meeting the following requirements:

(i) The loan is made upon the security of a first lien upon a single-family or two-family dwelling; the amount by which such a loan exceeds 80 percent of the value of the improved real estate shall not be disbursed until construction has been completed, and, if such dwelling is being constructed for sale, until the property has been sold and titile has been conveyed to a purchaser who has executed an agreement with the association assuming and agreeing to pay the loan;

(ii) The amount of the loan does not exceed the lessor of: (a) with respect to single-family dwellings, $55,000 ($68,750 in Alaska, Guam and Hawaii) and, with respect to two-family dwellings, the amount allowable in or pursuant to section 207(c)(3) of the National Housing Act, (b) 90 percent of the value of the real estate securing the loan, or (c) 90 percent of the purchase price of such security property;

* * * * *

(iv) The borrower, including a purchaser who assumes the loan, has executed a certification in writing stating

(a) that no lien or charge upon such property, other than the lien of the association or liens or charges which will be discharged from the proceeds of the loan, has been given or executed by the borrower or has been contracted or agreed to be so given or executed, and (b) that the borrower is actually occupying at least one of the dwelling units of the property as the borrower's principal dwelling or that the borrower in good faith intends to do so;

* * * * *

(vii) The aggregate of the principal amount of any such loan and of the association's investment in the principal amount of all other loans under this subparagraph and subparagraph (5) of this paragraph (exclusive of loans with respect to which the unpaid principal balance has been reduced to an amount not in excess of 80 percent of the value or purchase price of the real estate, which is less, determined at the time the loans were made) does not exceed 50 percent of the association's assets; and

(viii) The aggregate of the principal amount of the association's investment in flexible payment loans under this subparagraph and paragraph (a)(5) of this section (exclusive of loans with respect to which the unpaid principal balance has been reduced to an amount not in excess of 80 percent of the value or purchase price of the real estate, whichever is less, determined at the time the loans were made) does not exceed 5 percent of the association's assets, which 5 percent shall be included in the 50 percent of assets limitation set forth in paragraph (a)(4)(vii) of this section; and

* * * * *

(5) *Loans in excess of 90 percent of value.* The limitation of 80 percent set forth in subdivision (i) of subparagraph (1) of this paragraph shall be 95 percent in the case of any loan meeting the requirements set forth in subdivisions (i), (iii), (iv), (v), (vi), and (viii) of subparagraph (4) of this paragraph and the following additional requirements:

(i) The amount of the loan does not exceed the lessor of: (a) with respect to single-family dwellings, $42,000 ($50,000 in Alaska, Guam and Hawaii) and, with respect to two-family dwellings, the amount allowable in or pursuant to section 207(c)(3) of the National Housing Act, (b) 95 percent of the value of the real estate securing the loan, or (c) 95 percent of the purchase price of such security property;

(ii) The aggregate of the principal amount of such loan and of the association's investment in the principal amount of all other loans made under this subparagraph (exclusive of loans with respect to which the unpaid principal balance has been reduced to an amount not in excess of 90 percent of the value or purchase price of the real estate, whichever is less, determined at the time the loans were made) does not exceed 25 percent of the association's assets;

(iii) The aggregate of the principal amount of any such loan and of the association's investment in the principal amount of all other loans under this subparagraph and subparagraph (4) of this paragraph (exclusive of loans with respect to which the unpaid principal balance has been reduced to an amount not in excess of 80 percent of the value or purchase price of the real estate, whichever is less, determined at the time the loans were made) does not exceed 50 percent of the association's assets;

(iv) The aggregate of the principal amount of the association's investment in flexible payment loans under this paragraph and paragraph (a)(4) of this section (exclusive of loans with respect to which the unpaid principal balance has been reduced to an amount not in excess of 80 percent of the value or purchase price of the real estate, whichever is less, determined at the time the loans were made) does not exceed 5 percent of the association's assets, which 5 percent shall be included in the 25 percent of assets limitation set forth in paragraph (a)(5)(ii) of this section and in the 50 percent of assets limitation set forth in paragraphs (a)(5)(iii) of this section; and

* * * * *

(b) *Other dwelling units; combination of dwelling units, including homes, and business property involving only minor or incidental business use;* (1) *Monthly installment loans.* * * *

(iii) the amounts authorized in paragraphs (a)(4) and (5) of this section, and the repayment periods authorized in those paragraphs, in the case of cooperative housing project loans where dwelling units equalling 90 percent of the value or purchase price of the project, whichever is greater, are presold to bona fide purchasers: *Provided*, That all the requirements of such paragraphs are met; and *Provided* further, that such cooperative housing projects shall be required to maintain at least such reserves as are required for comparable cooperative housing projects insured by the Federal Housing Administration. For purposes of compliance with this paragraph (b)(1)(iii), the term "single-family or two-family dwelling" in paragraph (a)(4)(i) of this section shall read "cooperative housing project"; the words "borrower is", in paragraph (a)(4)(iv)(b) of this section, shall read "members of the cooperative housing project are"; and the loan limits of $55,000, or $68,750 in Alaska, Guam and Hawaii, in paragraph (a)(4)(ii)(a) of this section, and $42,000 or $50,000 in Alaska, Guam and Hawaii in paragraph (a)(5)(i)(a) of this section shall read "$55,000, or $68,750 with respect to dwelling units in Alaska, Guam and Hawaii, multiplied by the number of dwelling units" and "$42,000, or $50,000 with respect to dwelling units in Alaska, Guam and Hawaii, multiplied by the number of dwelling units", respectively: *Provided*, That the amount of the loan to be applied to any one dwelling unit may not exceed the applicable limitation per dwelling unit.

* * * * *

§ 545.6-2 [Removed]

§ 545.6-3 Additional lending powers.

Except as otherwise provided in paragraph (c) of this section, any Federal association may, upon authorization by its Board of Directors and without further action by its members, make the following types of loans and the use by any such association of the applicable loan plans, practices, procedures, and maximum lending percentages is hereby approved by the Board;

(a) *General.* Any loan that a Federal association may make under § 545.6-1;

* * * * *

§ 545.6-7 Percentage limitations on real estate loan investments.

(a) *Loan investments not subject to percentage limitations.* The following investments by a Federal association in loans on the security of real estate shall not be subject to any percentage-of-assets or percentage-of-savings-accounts limitation:

(1) A loan on the security of a single-family or two-family dwelling, or on the security of a home or combination of home and business property except, however, any such loan which is:

(i) On the security of any such property located beyond the association's regular lending area;

(ii) in excess of $55,000 for any single-family dwelling;

(iii) in excess of the amount allowable in or pursuant to section 207(c)(3) of the National Housing Act for any dwelling unit in a home or combination of home and business property which is not a single-family dwelling;

(iv) a loan to facilitate trade-in or exchange of homes made under § 545.6-1(a)(3)(ii);

(v) a loan on a single-family or two-family dwelling made under § 545.6(a)(4) or (b), as long as such loan is in excess of 80 percent of the value or purchase price of the security property, whichever is less, determined at the time the loan was made;

* * * * *

(3) An insured loan which is purchased (without regard to the location of the security property) and which does not exceed (i) $55,000 on the security of a single-family dwelling, or (ii) the amount allowable in or pursuant to section 207(c)(3) of the National Housing Act for any dwelling unit in any home or combination of home and business property which is not a single-family dwelling;

* * * * *

(b) *Percentage limitations for specific types of loans.* Real estate loan investments made under the authority of sections which contain specific percentage limitations shall be subject to those limitations. Sections which contain specific limitations are: § 545.6-14 (land acquisition and development loans), § 545.6-16 (loans for housing for the aging), § 545.6-18 (urban renewal loans), § 545.6-20 Foreign Assistance Act loans), § 545.6-3(c) (developed building lot loans), § 545.6-1(a)(4) and (5) (loans

V 42 I 178 SEP 14 77 UMI

on single-family or two-family dwellings in excess of 80 percent of value), § 545.6-1(a)(3)(ii) (loans to facilitate trade-in or exchange of homes), and § 545.6-26 (non-conforming secured loans). However, whenever the terms of a loan investment under §§ 545.6-16, 545.6-18, or 545.6-26 meet the requirements for a loan under § 545.6-1, the loan may be released from the percentage-limitation category in §§545.6-16, 545.6-18, or 545.6-26 and allocated within an applicable percentage-limitation category in paragraph (c) of this section or released from allocation to any percentage-limitation category if it is a loan specified under paragraph (a) of this section. A loan investment under § 545.6-1(a) (4) or (5 (a loan on a single-family or two-family dwelling in excess of 80 percent of value) within the association's regular lending area may be released from its percentage-limitation category when the loan balance has been reduced to not more than 80 percent of value.

A loan investment under § 545.6-1(b)(1)(iii) on a cooperative housing project may be released from the percentage-limitation categories of § 545.6-1(a) (4) or (5) when the loan balance has been reduced to not more than 80 percent of value, but shall at all times be included in an appropriate percentage-limitation category of paragraph (c) of this section.

(c) *Percentage limitations for other loans.* • • •

(1) *General 20-percent-of-assets category.* The following investments, not to exceed at any one time an amount equal to 20 percent of the association's assets, are allocable to this category:

• • • • •

(iii) Any loan on the security of a home or combination of home and business property if either—

(a) The amount of such loan exceeds, for any dwelling unit in any such security property which is not a single-family dwelling, an amount allowable in or pursuant to section 207(c)(3) of the National Housing Act; or

• • • • •

(2) *Special 20-percent-of-assets category.* The following investments, not to exceed at any one time an amount equal to 20 percent of the association's assets, are allocable to this category: any loan, or participation interest in a loan, on the security of other dwelling units or a combination of dwelling units, including homes, and business property involving only minor or incidental business use, if—

• • • • •

(ii) The amount of such loan does not exceed, for any dwelling unit therein, an amount allowable in or pursuant to section 207(c)(3) of the National Housing Act; and

• • • • •

(3) *Participation 20-percent-of-assets category.* The following investments, not to exceed at any one time an amount equal to 20 percent of the association's assets, are allocable to this category:

• • • • •

(iii) Any participation interest in a loan on the security of a home or combination of home and business property, if either—

(a) Such loan exceeds, for any dwelling unit in any such security property which is not a single-family dwelling, an amount allowable in or pursuant to section 207(c)(3) of the National Housing Act, or

• • • • •

PART 563—OPERATIONS

§ 563.9-7 Loans in excess of 90 percent of value.

(a) An insured institution which is authorized to make loans, other than insured loans or guaranteed loans, on the security of "single-family dwellings" (as defined in § 541.10 of this chapter) or a "two-family dwelling" (as defined in § 541.10-5) in excess of 90 percent of value of such real estate may do so only if:

• • • • •

(b) This section does not apply to single-family-dwelling or two-family dwelling loans to facilitate the sale of real estate owned described in § 561.15(d) of this subchapter.

• • • • •

(Sec. 5, 48 Stat. 132, as amended; 12 U.S.C. 1464, secs. 402, 403, 407, 48 Stat. 1256, 1257, 1260, as amended; 12 U.S.C. 1725, 1726, 1730. Reorg. Plan No. 3 of 1947, 12 FR 4981, 3 CFR, 1943-48 Comp., p. 1071.)

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

[23 CFR 655]

[FHWA Docket No. 77-6]

NATIONAL STANDARDS FOR SPECIFIC INFORMATION SIGNS

AGENCY: Federal Highway Administration, DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Federal Highway Administration has existing standards for specific information signs on Interstate highways and freeways on the Primary Highway System. FHWA issues this notice of proposed rulemaking to solicit comments on suggested revision to these existing standards which will include standards for additional classes of highways as authorized by section 122(a) of the Federal-Aid Highway Act of 1976. Amendments to existing regulations were necessitated by passage of the Federal-Aid Highway Act of 1976.

DATES: Comments must be received on or before October 31, 1977.

ADDRESS: Comments should be addressed to: Federal Highway Administration, Room 4230, Docket No. 77-6, 400-7th Street SW., Washington, D.C. 20590.

FOR FURTHER INFORMATION CONTACT:

Mr. J. J. Crowley, Director, Office of Traffic Operations, 202-426-0372; or Mr. D. E. Timmons, Office of the Chief Counsel, 202-426-0800, 400-7th Street SW., Washington, D.C. 20590. Hours are from 7:45 a.m. to 4:15 p.m. ET, Monday through Friday.

SUPPLEMENTARY INFORMATION: Existing Regulations appear as Subpart C, Part 655, Chapter I, Code of Federal Regulations and codify material contained in Volume 6, Chapter 8, Section 3, Subsection 8, of the Federal-Aid Highway Program Manual.

Section 122(a) of the Federal-Aid Highway Act of 1976, Pub. L. 94-280, May 5, 1976, 90 Stat. 425, amended section 131(f) of Title 23, United States Code. Section 131(f) previously had authorized the Secretary, in consultation with the States, to provide areas within the Interstate System rights-of-way on which specific information signs could be erected. The amendment extends this authorization to permit the erection of such signs within the rights-of-way of primary system highways as well.

Separate standards covering such items as location, composition, and size for specific information signs have been developed for public comment for Interstate highways and other freeways, expressways, and conventional primary highways.

Those desiring to comment on these suggested standards are asked to submit their views, data, and arguments in writing. Communications should identify the docket number (FHWA Docket No. 77-6). Comments will be available for public inspection both before and after the closing date at the above address. It is the intention of the Federal Highway Administration to issue regulations in this matter after the program under the suggested standards has been reviewed and comments received pursuant to this notice have been analyzed.

NOTE.—The Federal Highway Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Orders 11821 and 11949 and OMB Circular A-107.

This Notice of Proposed Rulemaking is issued under the authority of 23 U.S.C. § 315 and 49 CFR 1.48(b).

Issued on: September 7, 1977.

KARL S. BOWERS,
Deputy Administrator.

Chapter I of Title 23 of the Code of Federal Regulations is amended by revising Subpart C, Part 655, to read as follows:

Subpart—National Standards for Specific Information Signs

Sec.
655.301 Purpose.
655.302 Definitions.
655.303 Location.
655.304 Criteria for specific information permitted.
655.305 Color, symbols, and reflectorization.
655.306 Special requirements for specific information signs on interstate highways and other freeways.
655.307 Special requirements for specific information signs on expressways.
655.308 Special requirements for specific information signs on conventional roads.
655.309 Procedures to be followed by the States.

AUTHORITY: 23 U.S.C. §§ 109(d), 131(f), 315, 402(a) and 49 CFR 1.48(b).

§ 655.301 Purpose.

To establish standards for signs, displays, and devices giving specific information in the interest of the traveling public to the erected within the rights-of-way of freeways, expressways, and conventional primary highways.

§ 655.302 Definitions.

Except as defined in this section, the terms used in this subpart shall be defined in accordance with the definitions and usage of the Manual on Uniform Traffic Control Devices, 1971 edition.[1]

(a) *Specific information sign.* A rectangular sign panel with:

(1) The words "Gas," "Food," "Lodging," or "Camping,"

(2) Directional information, and

(3) One or more business signs.

(b) *Business sign.* A separately attached sign mounted on the rectangular sign panel to show the brand, or trademark and name, or both, of a motorist service available on a crossroad at or near an interchange or an intersection.

(c) *Conventional primary highway.* A road other than a freeway or expressway which has been designated as a part of the system of highways included in the State's policy for specific information signing.

(d) *Freeway.* A divided highway with full control of access.

(e) *State.* Any one of the 50 States, the District of Columbia, Puerto Rico, the Virgin Islands, Guam, or American Samoa.

§ 655.303 Location.

(a) *Intended for rural areas.* Specific information signs are intended for use in rural areas. They may be installed within suburban or urban areas only where the roadside development does not appear to the motorist to be urban in character.

(b) *Lateral Location.* The specific information signs should be located near the right-of-way line and shall be readable from the main traveled way. They should be located so as to take advantage of natural terrain, to have the least impact on the scenic environment, and to avoid visual conflict with other signs. Unprotected sign panel supports located less than 30 feet from the edge of the traveled way shall be of a breakaway type of design.

(c) *Relative location.* In the direction of traffic, successive specific information signs shall be those of "Camping," "Lodging," "Food," and "Gas" in that order.

§ 655.304 Criteria for specific information permitted.

(a) *Conformity with laws.* Each business identified on a specific information sign shall have given written assurance to the State of its conformity with all applicable laws concerning the provision of public accommodations without regard to race, religion, color, sex, or national origin, and shall not be in continuing breach of that assurance.

(b) *Distance to services.* The maximum distance that service facilities can be located from the main traveled way to qualify for a business sign shall be in accordance with State standards, but may not exceed 3 miles in either direction; except that, if within that 3-mile limit a service of the type being considered is not available, the limit of eligibility may be extended in 3-mile increments until one service of the type being considered, or 15 miles, is reached. Services beyond the 15-mile limit shall not qualify for signing.

(c) *Types of services permitted.* To qualify for display on a specific information sign:

(1) "Gas" shall include:

(i) Vehicle services such as fuel, oil, lubrication, tire repair, and water,

(ii) Restroom facilities and drinking water,

(iii) Continuous operations at least 16 hours per day, 7 days a week, and

(iv) Telephone.

(2) "Food" shall include:

(i) Licensing or approval, where required,

(ii) Continuous operation to serve three meals a day, 7 days a week, and

(iii) Telephone.

(3) "Lodging" shall include:

(i) Licensing or approval where required,

(ii) Adequate sleeping accommodations, and

(iii) Telephone.

(4) "Camping" shall include:

(i) Licensing or approval where required,

(ii) Adequate parking accommodations,

(iii) Modern sanitary facilities and drinking water, and,

(iv) Provisions for removal or covering of the business signs during off-seasons if operated on a seasonal basis.

§ 655.305 Colors, symbols and reflectorization.

(a) *Sign panels.* The background color of the sign panels shall be blue with a white reflectorized border. The panels may be illuminated.

(b) *Business signs.* The background color of the business signs shall be blue with a white legend and border. The principal legend shall be at least equal in height to the directional legend on the sign panel. Business identification symbols or trademarks may be used alone for a business sign, the border may be omitted, the symbol or trademark shall be reproduced in the colors and general shape consistent with customary use, and any integral legend shall be in proportionate size. Messages, symbols and trademarks which interfere with, imitate, or resemble any official control device are prohibited.

(c) *Legends.* The words "gas," "food," "lodging," and "camping," the exit number, and the exit direction messages shall be white reflectorized capital letters.

§ 655.306 Special requirements for specific information signs on interstate highways and other freeways.

(a) *Location.*—(1) *Separate sign panels.* Except as provided in § 655.306(b)(3), a separate sign panel shall be provided for each type of motorist service for which business signs are displayed.

(2) *Relationship to exit gore.* The specific information signs shall be erected between the previous interchange and ½ mile in advance of the theoretical gore for the approaching interchange. There shall be at least 1,000-foot spacing between the signs. Excessive spacing is not desirable.

(3) *Convenient re-entry required.* Specific information signs shall not be erected at an interchange where the motorist cannot conveniently re-enter the freeway and continue in the same direction of travel.

(4) *Exit ramp signs.* At single-exit interchanges where service facilities are not visible from a ramp terminal, ramp signs shall be installed along the ramp or at the ramp terminal, and may be provided along the crossroad. These signs shall be duplicates of the corresponding specific information signs, but reduced in size and with service information for visible facilities omitted. They shall include directional arrows in lieu of words and, where needed, the distances to the service installations. The minimum letter height shall be 4 inches except that any legend on a symbol shall be proportional to the size of the symbol. Ramp signing may be used on ramps and crossroads at double-exit interchanges.

(b) *Composition.*—(1) *Single-exit interchanges.* The name of the type of service followed by the legend next right (left) shall be displayed in one line above the business signs. At numbered interchanges, the directional legend shall be omitted and the exit number shall be displayed on a separate plaque at the top of the sign panel. The "GAS" specific information sign shall be limited to six business signs; the "food," "lodging," and "camping," specific information signs shall be limited to four business signs each.

(2) *Double-exit interchanges.* The specific information signs shall consist of two sections, one for each exit. The top section shall display the business sign for the first exit and the lower section shall display the business signs for the second exit. The name of the type of service followed by the exit number shall

[1] The Manual on Uniform Traffic Control Devices is available for inspection and copying as prescribed in 49 CFR 7, App. D. It may be purchased from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402 (Stock No. 5001-0021).

V 42 I 178 SEP 14 77 UMI

be displayed in a line above the business signs in each section. At unnumbered interchanges, the legends next right (left) and second right (left) shall be substituted for the exit numbers. Where a type of motorist service is to be signed for at only one exit, one section of the specific information sign may be omitted. The number of business signs on the sign panel (total of both sections) shall be limited to six for "gas," and four each for "food," "lodging," and "camping."

(3) *Remote rural interchanges.* In remote rural areas, where not more than two qualified facilities are available for each of two or more types of services, business signs for two types of services may be displayed on the same sign panel. The name of each type of service shall be displayed above its respective business sign(s), and the exit number shall be displayed on a separate plaque at the top of the panel. At unnumbered interchanges, the legend next right (left) shall be displayed below the business signs. Not more than four business signs shall be displayed on a panel. Not more than two business signs for each type of service shall be displayed on each approach to the interchange. Business signs shall not be combined on a panel when it is anticipated that additional service facilities will become available in the near future. When it becomes necessary to display a third business sign of a type of service displayed in combination, the business signs involved shall then be displayed in compliance with paragraphs (b)(1) and (b)(2) of this section.

(c) *Size.*—(1) *Sign panels.* The maximum size for sign panels, including borders, shall be: (i) 16 feet wide and 10 feet high at single-exit interchanges; (ii) 15 feet wide and 12 feet high at double-exit interchanges; and (iii) 13 feet wide and 13 feet high at remote rural interchanges.

(2) *Business signs.* (i) The business signs displayed on the "gas" specific information sign shall be contained within a 48-inch wide and 36-inch rectangular background area, including border. (ii) The business signs on the "food," "lodging," and "camping" specific information signs shall be contained on a 60-inch wide and 36-inch high rectangular background area, including border.

(3) *Legends.* All letters used in the name of the type of service, the exit number, and the directional legend shall be 10-inch capital letters.

§ 655.307 Special requirements for specific information signs on expressways.

(a) *Location.*—(1) *Interchanges.* The location of specific information signs and exit ramp signs erected at interchanges shall be in accordance with the provisions of § 655.306(a).

(2) *Intersections.* The specific information signs shall be erected between the previous intersection and 300 feet in advance of the approaching intersection. There shall be at least 300 feet spacing between the signs and at least 200 feet spacing between any specific information sign and any other type of traffic control sign. Business signs shall not be displayed for a type of service for which a qualified facility is visible from a point on the traveled way 300 feet from the intersection.

(b) *Composition.*—(1) *Interchanges.* The composition of specific information signs and exit ramp signs erected for interchanges shall be in accordance with § 655.306(b), except that all signs shall be limited to a maximum of four business signs each.

(2) *Intersections.* Business signs for different types of services may be combined on the same sign panel. Not more than two business signs for each type of service shall be displayed along each approach to the intersection. Not more than four business signs shall be displayed on each sign panel. The name of each type of service shall be displayed above its respective business sign(s), and the legend next right (left) shall be displayed at the bottom of the panel below the business signs.

(c) *Size.*—(1) *Sign panels.* The maximum size for the sign panels, including border, shall be 8 feet wide and 9 feet high.

(2) *Business signs.* The business signs shall be contained within a 36-inch wide and 24-inch high rectangular background area, including border.

(3) *Legends.* All letters used in the name of the type of service, the exit number, and the directional legend shall be 6-inch capital letters.

§ 655.308 Special requirements for specific signs on conventional roads.

(a) *Location.* The location of the specific information signs shall be as specified in § 655.307(a)(2).

(b) *Composition.* The composition of the specific information signs shall be as specified in § 655.307(b)(2).

(c) *Size.*—(1) *Sign panels.* The maximum size for the sign panels, including border, shall be 5 feet wide and 6 feet high.

(2) *Business signs.* The business signs shall be contained within a 24-inch wide and 18-inch high rectangular background area, including border.

(3) *Legends.* All letters used in the name of the type of service and the directional legend shall be 4-inch capital letters.

§ 655.309 Procedures to be followed by the States.

(a) *State's prerogative.* Specific information signs may be erected at the option of the State. All signs erected pursuant to 23 U.S.C. 131(f) shall conform to the standards of this subpart.

(b) *State signing policy.* Prior to the installation of specific information signs, the State shall develop a policy for specific information signing. This policy, as a minimum, shall include criteria for:

(1) Distances to eligible service,

(2) Selection of eligible businesses,

(3) Determining the costs to businesses for initial permits, installation, annual maintenance, removal, etc. of business signs, and

(4) Designating conventional roads as "conventional primary highways for specific information signing purposes" when the State's policy permits this type of signing on conventional roads.

(c) *Eligibility of funds.* Federal-aid funds are eligible to participate in the cost and erection of these signs in the same manner that such funds are eligible for other highway traffic control devices on the Federal-aid highway systems except that Federal-aid funds are not eligible to participate in the cost of procuring and installing the business signs as defined in § 655.302(b).

(d) *Approvals.* The procedures for obtaining approval for programing, project authorizations, and other actions for Federal-aid projects which include these signs shall follow the same procedures as other Federal-aid projects. States desiring to erect these signs on Federal-aid highway systems without Federal-aid fund participation shall submit the plans to the Division Administrator for prior approval.

(e) *Consultation between the State and the Secretary.* The State's request and Division Administrator's approval of plans, specifications, and estimates in the case of a Federal-aid project, and approval of the plans in the case of a project without participating Federal-aid funds but on a Federal-aid highway system shall constitute the consultation between the State and the Secretary of Transportation as required by law.

Internal Revenue Service

[26 CFR Part 1]

INCOME TAX

Total Distributions From Employee Retirement Plans (1970–1973); Withdrawal of Notice of Proposed Rulemaking

AGENCY: Internal Revenue Service, Treasury.

ACTION: Withdrawal of notice of proposed rulemaking.

SUMMARY: The purpose of this document is to withdraw notices of proposed rulemaking relating to the tax treatment of total distributions from employee retirement plans made in 1970 through 1973. A notice of proposed rulemaking under sections 402(a)(5) and 403(a)(2)(C) of the Internal Revenue Code of 1954 appeared in the FEDERAL REGISTER on June 12, 1971 (36 FR 11442). A correction notice was published in the FEDERAL REGISTER on June 22, 1971 (36 FR 11864). A notice of proposed rulemaking under section 72(n)(4) of the Internal Revenue Code of 1954 appeared in the FEDERAL REGISTER on May 4, 1973 (38 FR 11087). All three notices are being withdrawn.

FOR FURTHER INFORMATION CONTACT:

Richard Johnson of the Legislation and Regulations Division, Office of the Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue NW., Washington, D.C. 20224, attention: CC:LR:T (202–566–3603).

SUPPLEMENTARY INFORMATION:

BACKGROUND

The notices of proposed rulemaking that are being withdrawn proposed amendments to the Income Tax Regulations (26 CFR Part 1) under sections 72(n)(4), 402(a)(5), and 403(a)(2)(C), as added to the Internal Revenue Code of 1954 by section 515 of the Tax Reform Act of 1969 (83 Stat. 643). These three provisions were repealed by section 2005 of the Employee Retirement Income Security Act of 1974 (88 Stat. 987), which substantially changed the tax law relating to total (lump sum) distributions from employee retirement plans. The changes in the tax law made by the Employee Retirement Income Security Act of 1974 apply to lump sum distributions made in taxable years of the recipient beginning after December 31, 1973.

The Internal Revenue Service does not anticipate issuing a new notice of proposed rulemaking under the repealed sections. In the case of taxpayers who have prepared and filed returns on the basis of the withdrawn notices, the Internal Revenue Service will not assess a deficiency on the basis of a computational method different from the method in the withdrawn regulations.

WITHDRAWAL OF PROPOSED AMENDMENTS

Accordingly, the notices of proposed rulemaking relating to total distribution from employee retirement plans which were published in the FEDERAL REGISTER on June 12, 1971 (36 FR 11442), June 22, 1971 (36 FR 11864), and May 4, 1973 (38 FR 11087), are hereby withdrawn.

JEROME KURTZ,
Commissioner of Internal Revenue.

DEPARTMENT OF AGRICULTURE

Forest Service

[36 CFR Part 221]

LIMITATIONS ON TIMBER REMOVAL

AGENCY: Forest Service, USDA.

ACTION: Advance notice of proposed rulemaking.

SUMMARY: The Secretary of Agriculture plans to develop rules that would establish limitations on the sale of timber from each National Forest. The National Forest Management Act of 1976 requires the Secretary of Agriculture to limit the sale of timber from each national forest to a quantity which can be removed from such forest on a sustained-yield basis.

DATES: Comments should be received on or before October 31, 1977:

ADDRESS: Submit comments to: John R. McGuire, Chief, Forest Service, Department of Agriculture, P.O. Box 2417, Washington, D.C. 20013.

SUPPLEMENTARY INFORMATION: The National Forest Management Act of 1976 (Pub. L. 94–588) requires the Secretary of Agriculture to limit the sale of timber from each National Forest to a quantity equal to or less than a quantity which can be removed from such forest annually in perpetuity on a sustained yield basis. The Secretary may exceed the quantity limitation from time to time so long as the average sales of timber from each forest over any 10-year period do not exceed such limitation. In ases where a forest contains less than 200,000 acres of commercial forest land the Secretary may use two or more forests for purposes of determining the sustained yield. The Secretary would, however, not be prohibited from salvaging timber stands which are substantially damaged by fire, windthrow or other catastrophe.

The Secretary may, in order to meet overall multiple use objectives, establish an allowable sale quantity for any decade which departs from the projected long-term average sale quantity that would otherwise be established. Such planned departures must be consistent with the multiple use management objectives of the land management plan for such forest and must be made with public participation.

The provision of Pub. L. 94–588 involved follows:

Sec. 11. The Forest and Rangeland Renewable Resources Planning Act of 1974 is amended by adding at the end thereof new sections 13 through 16 as follows:

"Sec. 13. Limitations on Timber Removal.—(a) The Secretary of Agriculture shall limit the sale of timber from each national forest to a quantity equal to or less than a quantity which can be removed from such forest annually in perpetuity on a sustained-yield basis: Provided, That, in order to meet overall multiple-use objectives, the Secretary may establish an allowable sale quantity for any decade which departs from the projected long-term average sale quantity that would otherwise be established, *Provided further,* That any such planned departure must be consistent with the multiple-use management objectives of the land management plan. Plans for variations in the allowable sale quantity must be made with public participation as required by section 6(d) of this Act. In addition, within any decade, the Secretary may sell a quantity in excess of the annual allowable sale quantity established pursuant to this section in the case of any national forest so long as the average sale quantities of timber from such national forest over the decade covered by the plan do not exceed such quantity limitation. In those cases where a forest has less than two hundred thousand acres of commercial forest land, the Secretary may use two or more forests for purposes of determining the sustained yield.

"(b) Nothing in subsection (a) of this section shall prohibit the Secretary from salvage or sanitation harvesting of timber stands which are substantially damaged by fire, windthrow, or other catastrophe, or which are in imminent danger from insect or disease attack. The Secretary may either substitute such timber for timber that would otherwise be sold under the plan or, if not feasible, sell such timber over and above the plan volume."

As an aid to drafting regulations covering the provision described above, comments are hereby solicited on its interpretation and as to the situations where, with public participation, the Secretary may depart from the projected long-term average sale quantity that would otherwise be established.

In order to be most helpful in the development of the regulation, comments should fully develop the rationale as to why proposed departures would meet overall multiple use objectives.

Following receipt and consideration of these comments, a proposed regulation will be drafted and published in the FEDERAL REGISTER. There will be an opportunity for comments on the resulting proposal.

Among the issues which may be addressed in drafting the regulation are:

1. What are the "overall multiple use objectives" referred to in the first proviso of Section 13? Do they concern only resource situations such as fire or insect damage, or do they also include socio-economic factors such as jobs, community stability, and local Government revenues?

2. How can we identify those situations where the interplay of two or more uses or resources will result in a departure?

3. How do we make the tradeoffs between timber and other resources in a way which is understandable and acceptable to managers and the public?

SEPTEMBER 8, 1977.

M. RUPERT CUTLER,
Assistant Secretary.

COMMUNITY SERVICES ADMINISTRATION

[45 CFR Part 1068]

GRANTEE FINANCIAL MANAGEMENT

Grantee Payment of Professional Dues

AGENCY: Community Services Administration.

ACTION: Proposed rule.

SUMMARY: This proposed rule codifies a Community Services Administration policy on payment of dues to professional associations with grant funds. This amendment will require that CSA approve all professional organizations which receive such dues out of grant funds. This change is to control payments in excessive amounts and for purposes which would be contrary to CSA regulations if carried out directly by CSA grantees. This rule is intended to give CSA the authority to determine which professional organizations may benefit from such indirect CSA funding.

DATES: Comments on this proposed rule must be received on or before October 20, 1977. It is proposed to make the rule effective November 5, 1977.

V 42 1178 SEP 14 77 UMI

ADDRESS: Comments should be addressed to Ms. Faye Rattner, Chief, Policy Development and Review Division, Community Services Administration, Office of Community Action, 1200 19th Street NW., Washington, D.C. 20506.

FOR FURTHER INFORMATION CONTACT:

Faye Rattner, phone 202-254-5670.

SUPPLEMENTARY INFORMATION: Previous to September 19, 1972, when Section 623 of the Economic Opportunity Act of 1964, as amended, was enacted, CSA (then OEO) was not required to publish its regulations in the FEDERAL REGISTER. OEO Instruction 6710-02 was promulgated in 1971 and includes a provision governing professional dues which is modified by this rule.

AUTHORITY: Sec. 602, 78 Stat 530, 42 U.S.C. 2942.

GRACIEL (GRACE) OLIVAREZ,
Director.

45 CFR 1068 is proposed to be amended by adding new sections 1068.30-1 and 1068.30-2 as follows, effective November 5, 1977:

Sec
1068.30-1 Applicability.
1068.30-2 Restrictions on charging professional dues to grant funds.

§ 1068.30-1 Applicability.

This subpart is applicable to all grantees receiving financial assistance from the Community Services Administration.

§ 1068.30-2 Restrictions on charging professional dues to grant funds.

Professional dues that may be charged to grant funds (including non-Federal share) are limited to a single membership for the grantee in any appropriate professional organizations; memberships may not be purchased for any individual or delegate agency. Such proposed expenditures of funds for professional memberships must be included as an attachment to the "other cost category" on the budget form in an application for funding or refunding. The attachment must identify the name of the professional organization, the amount of the proposed membership and include a brief description of the purpose of that organization.

FEDERAL COMMUNICATIONS COMMISSION

[47 CFR Part 64]

[Docket No. 20828]

COMPUTER INQUIRY

Order Extending Time for Filing Reply Comments

AGENCY: Federal Communications Commission.

ACTION: Extension of time.

SUMMARY: In response to a motion for an extension of time, the Commission is extending the date for the filing of reply comments in the computer inquiry. (Docket No. 20828 published at 42 FR 34896, July 7, 1977.)

DATES: Reply comments must be received on or before October 17, 1977.

ADDRESSES: Send reply comments to: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

James K. Smith, Common Carrier Bureau (632-9342).

Adopted: September 2, 1977.

Released: September 6, 1977.

By the Chief, Common Carrier Bureau.

In the matter of amendment of § 64.702 of the Commission's rules and regulations (computer inquiry). Order (42 FR 34896).

1. On August 31, 1977, International Business Machines Corp. (BM) filed a request for an extension of time for the filing of reply comments in Docket No. 20828. IBM has requested that the date for filing reply comments be extended from September 12, 1977, to October 14, 1977, a period of 32 days.

2. IBM indicates that it intends to submit as an appendix to its reply comments in Docket No. 20828 an expert study on "the effects of public utility regulation in a competitive environment." It states, however, that it is not possible to complete the preparation of the study by the September 12 deadline for the filing of reply comments. Thus, IBM seeks to have the date for reply comments extended in order that it may file the completed study with its reply comments.

3. Extensions of time for the filings of comments and reply comments previously have been granted in this Docket to allow participants to this proceeding an adequate opportunity to present their views. In particular, we note that an extension of time for filing initial comments was granted previously to American Telephone and Telegraph Company (AT&T) in order to allow for the completion of a study that it was having prepared. In view of the latitude that has been extended in the past in granting requests for extension of time, and the complexity of the issues involved, it would be in the public interest to grant, in this instance, IBM's request for additional time to allow for the completion of its study. The additional time requested by IBM is relatively short in comparison with the overall length of this proceeding and the grant of the request will not prejudice other participants in this Inquiry. Due to the closeness of the existing deadline for filing reply comments in this proceeding, this action is being taken without waiting for responsive pleadings to be filed, pursuant to section 1.45(e) of the Commission's Rules and Regulations.

4. Accordingly, the motion for extension of time filed by IBM is granted. The time for all parties to file reply comments in Docket No. 20828 is hereby extended from September 12, 1977, to Monday, October 17, 1977.

5. This action is being taken under delegated authority pursuant to § 0.303 (c) of the Commission's rules and regulations.

PHILIP V. PERMUT,
Acting Deputy Chief,
Common Carrier Bureau.

[Docket No. 21387; RM-2897]

TELEVISION BROADCAST STATION IN GALVESTON, TEX.

Proposed Changes in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Notice of proposed rule making.

SUMMARY: Federal Communications Commission proposes to substitute TV Channel 48 for the presently unoccupied and unapplied for TV Channel 47 assignment in Galveston, Tex. Petitioner has acquired the land, building, and tower site of a station that formerly operated on a Channel 16 assignment at Galveston. The proposed substitution would eliminate the short-spacing to a Houston Channel 39 assignment if the Galveston station were to operate on Channel 48.

DATES: Comments must be filed on or before October 18, 1977, reply comments on or before November 8, 1977.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Thomas L. McCrickard, Broadcast Bureau (202-632-9660).

SUPPLEMENTARY INFORMATION:

Adopted: September 2, 1977.

Released: September 9, 1977.

By the Acting Chief, Broadcast Bureau.

In the matter of amendment of § 73.606 (b), Table of Assignments, Television Broadcast Stations (Galveston, Tex.). Notice of proposed rule making.

1. The Commission, by the Chief, Broadcast Bureau, has for its consideration a petition for rule making filed by The Old Time Religion Hour, Inc. ("O.T.R.H., Inc."). This petition seeks amendment of the Television Table of Assignments (section 73.606(b) of the Commission's Rules and Regulations) by the substitution of Channel 48 for the presently unoccupied and unapplied for Channel 47 assignment in Galveston, Tex.

2. Galveston (pop. 61,809) is the seat of Galveston County (pop. 169,812) [1] Located on the Gulf of Mexico, Galveston is approximately 72 kilometers (45 miles) southeast of Houston, Tex.

[1] All population figures are taken from the 1970 U.S. Census.

3. Petitioner states that it has acquired the land, building, and tower site of a station that formerly operated on a Channel 16 assignment at Galveston. The Channel 16 station ceased operation in 1969, and the channel assignment was later moved to Corpus Christi, Tex. The Channel 16 assignment was replaced with Channel 47 in Galveston. To operate the Channel 47 assignment in Galveston at the former Channel 16 site would result in short-spacing to Channel 39, Station KHTV at Houston, Tex. Substitution of Channel 48 for Channel 47 would eliminate this short-spacing.

4. The Channel 48 assignment may be made in compliance with the Commission's distance separation requirements and other technical criteria, without requiring changes of assignments at other communities listed in the Table of Assignments. Petitioner states its intention to file an application for the use of Channel 48 should the Commission approve the channel substitution.

5. The Commission believes that the consideration of this channel substitution would be in the public interest since it could permit a more prompt commencement of commercial television service to the area than otherwise would be possible. Thus, based on petitioner's showing, the Commission is persuaded that a rule making proceeding should be instituted to obtain comments on the instant proposal, and therefore, we propose to consider the following revision in the Television Table of Assignments (§ 73.606(b) of the Commission's Rules) with respect to the city listed below:

City	Channel No.	
	Present	Proposed
Galveston, Tex.	*22, 47+	*22, 48-

6. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are set forth below and are incorporated by reference herein.

NOTE.—A showing of continuing interest is required by paragraph 2 below before a channel will be assigned.

7. Interested parties may file comments on or before October 18, 1977, and reply comments on or before November 8, 1977.

FEDERAL COMMUNICATIONS COMMISSION,
MARTIN I. LEVY,
Acting Chief, Broadcast Bureau.

1. Pursuant to authority found in sections 4(i), 5(d)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and section 0.281 (b)(6) of the Commission's rules, it is proposed to amend the TV Table of Assignments, section 73.606(b) of the Commission's rules and regulations, as set forth in the Notice of Proposed Rule Making to which this Appendix is attached.

2. *Showings required.* Comments are invited on the proposal(s) discussed in the notice of proposed rulemaking to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build the station promptly. Failure to file may lead to denial of the request.

3. *Cut-off procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of Commission rules.)

(b) With respect to petitions for rulemaking which conflict with the proposal(s) in this notice, they will be considered as comments in the proceeding, and public notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If filed later than that, they will not be considered in connection with the decision in this docket.

4. *Comments and reply comments; service.* Pursuant to applicable procedures set out in Sections 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may filed comments and reply comments on or before the dates set forth in the notice of proposed rule making to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. See § 1.420 (a), (b) and (c) of the Commission rules.)

5. *Number of copies.* In accordance with the provisions of section 1.420 of the Commission's rules and regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public inspection of filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street NW., Washington, D.C.

[FR Doc.77-26677 Filed 9-13-77;8:45 am]

[47 CFR Part 73]

[Docket No. 21386; RM-2858]

TELEVISION BROADCAST STATION IN LOWRY, S. DAK.

Proposed Changes in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Notice of proposed rulemaking.

SUMMARY: Federal Communications Commission proposes to assign TV Channels 56, 62, and 68 to Lowry, S. Dak. This action would make it possible to establish translator stations to provide commercial television service from the three major networks to the residents of the counties of Campbell, Edmunds, McPherson, Potter, and Walworth, S. Dak. This action was initiated by a petition for rule making filed by South Dakota Five County Television Translator District.

DATES: Comments must be received on or before October 18, 1977, and reply comments on or before November 8, 1977.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Thomas L. McCrickard III, Broadcast Bureau, 202-632-9660.

SUPPLEMENTARY INFORMATION:

Adopted: September 2, 1977.

Released: September 9, 1977.

In the matter of amendment of § 73.606 (b), Table of Assignments, Television Broadcast Stations (Lowry, S. Dak.). Notice of proposed rulemaking.

By the Acting Chief, Broadcast Bureau:

1. The Commission has under consideration a petition for rulemaking filed by South Dakota Five County Television Translator District ("South Dakota Five"). The petition seeks amendment of section 73.606(b) of the Commission's rules and regulations, the Television Table of Assignments, by the assignment of UHF television Channels 56, 62, and 68 to Lowry, S. Dak.

2. Lowry (pop. 35; Walworth County, pop. 7,842 [1]), is located in north central South Dakota, approximately 108 kilometers (67 miles) north of Pierre.

3. Petitioner indicates that its purpose is to apply for and construct television translator [2] stations on these channels to

[1] All population figures are taken from the 1970 U.S. Census.

[2] Section 74.732(b) of the Commission's rules states, "More than one television broadcast translator station may be licensed to the same applicant, whether or not such stations serve substantially the same area, upon an appropriate showing of need for such additional stations."

V 42 178 SEP 14 77 UMI
SAFETY FILM KODAK

bring commercial television service from the three major networks to the residents of the counties of Campbell (pop. 2,866), Edmunds (pop. 5,548), McPherson (pop. 5,022), Potter (pop. 4,449), and Walworth, S. Dak. The majority of these residents presently receive minimal television reception. The Commission notes that there are numerous other television channels available for assignment not only in Lowry, but also in the surrounding communities. Consequently, there appears to be no reason not to consider assigning three television channels to this small town.

4. The Channel 56, 62, and 68 assignments to Lowry, S. Dak., may be made in compliance with the Commission's mileage separation requirements and other technical criteria, without requiring changes at other communities listed in the Table of Assignments. The Commission feels that these channel assignments could be in the public interest by making possible better quality television reception in the area.

5. Consequently, the Commission is persuaded that a rulemaking proceeding should be instituted to obtain comments on the South Dakota Five proposal. We propose to consider the following revisions in the Television Table of Assignments (§ 73.606(b) of the Commission's rules) with respect to the city listed below:

City	Channel No.	
	Present	Proposed
Lowry, S. Dak.	*11—	*11—, 56, 62+, 68—

6. The Commission's authority to institute rulemaking proceedings, showings required, cut-off procedures, and filing requirements are set forth below and are incorporated by reference herein.

NOTE.—A showing of continuing interest is required by paragraph 2 below before a channel will be assigned.

7. Interested parties may file comments on or before October 18, 1977, and reply comments on or before November 8, 1977.

FEDERAL COMMUNICATIONS COMMISSION,
MARTIN I LEVY,
Acting Chief, Broadcast Bureau.

1. Pursuant to authority found in sections 4(i), 5(d)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and section 0.281 (b)(6) of the Commission's rules, it is proposed to amend the TV Table of Assignments, section 73.606(b) of the Commission's Rules and Regulations, as set forth in the Notice of Proposed Rule Making to which this Appendix is attached.

2. *Showings required.* Comments are invited on the proposal(s) discussed in the Notice of Proposed Rule Making to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build the station promptly. Failure to file may lead to denial of the request.

3. *Cut-off procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of Commission Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this Notice, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for the filing initial comments herein. If filed later than that, they will not be considered in connection with the decision in this docket.

4. *Comments and reply comments; service.* Pursuant to applicable procedures set out in sections 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the Notice of Proposed Rule Making to which this Appendix is attached. All submissions by parties to this proceeding, or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420 (a), (b), and (c) of the Commission Rules.)

5. *Number of copies.* In accordance with the provisions of section 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public inspection of filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street NW., Washington, D.C.

FM BROADCAST STATION IN GORDONVILLE, MO.

Proposed Changes in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Notice of proposed rulemaking.

SUMMARY: Action taken herein proposes the assignment of a first Class A FM assignment to Gordonville, Mo. Petitioner, Rainbow Broadcasting Co., Inc., states that an FM station is needed in Gordonville in light of the present and planned growth in that community.

DATES: Comments must be received on or before October 18, 1977, and reply comments on or before November 8, 1977.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Mildred B. Nesterak, Broadcast Bureau (202-632-7792).

SUPPLEMENTARY INFORMATION

Adopted: September 2, 1977.

Released: September 9, 1977.

By the Acting Chief, Broadcast Bureau.

In the matter of amendment of § 73.202(b), Table of Assignments, FM Broadcast Stations, (Gordonville, Mo.). Notice of proposed rule making.

1. *Petitioner, proposal and comments.* (a) Petition for rule making,[1] filed on May 16, 1977, by Rainbow Broadcasting Co., Inc. ("petitioner"), licensee of AM daytime-only Station KJAS, Jackson, Mo., proposing Channel 257A as a first FM assignment to Gordonville, Mo.

(b) The channnel could be assigned in conformity with the minimum distance separation requirements if the transmitter site were to be located 11 kilometers (7 miles) south of the community.

(c) Petitioner states that, if the channel is assigned, it will apply promptly for authorization to construct and operate a station.

2. *Community data.* (a) *Location.* Gordonville, situated in Cape Girardeau county, is located approximately 217 kilometers (135 miles) south-southeast of St. Louis, Mo., and 8 kilometers (5 miles) south of Jackson, Mo.

(b) *Population.* Gordonville—125; Cape Girardeau County—49,350.[2]

(c) *Local broadcast service.* There is no local broadcast service in Gordonville.

3. *Economic data.* Petitioner states that Gordonville is a community with a mayor-town board system of government. It notes that several major industries have located in Cape Girardeau County and Gordonville is located in the heart of this rapidly growing area. Petitioner adds that it is expected that Gordonville will increasingly become more and more of an integral part of the southeast Missouri industrial and residential complex. It claims that an FM station located in Gordonville is clearly needed in light of the present and planned growth in that community and surrounding area.

4. We believe that consideration of the proposed FM assignment in a rule making proceeding would be in the public interest. This will enable us to obtain the information necessary to determine whether a community of this size, which is acknowledged to be a residential location for people working in nearby Jackson and Cape Girardeau, has its own needs. Petitioner should respond with information more directed to the transmission needs of Gordonville itself.[3]

5. Accordingly, it is proposed to amend the FM Table of Assignments, § 73.202(b) of the Commission's Rules, with respect to Gordonville, Mo., as follows:

City	Channel No.	
	Present	Proposed
Gordonville, Mo.		257A

6. Authority to institute rule making proceedings; showings required; cut-off procedures; and filing requirements are set forth below, and are incorporated herein.

NOTE.—A showing of continuing interest is required by paragraph 2 below before a channel will be assigned.

7. Interested parties may file comments on or before October 18, 1977, and reply comments on or before November 8, 1977.

FEDERAL COMMUNICATIONS COMMISSION,
MARTIN I. LEVY,
Acting Chief, Broadcast Bureau.

1. Pursuant to authority found in sections 4(i), 5(d)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and section 0.281(b)(6) of the Commission's Rules, it is proposed to amend the FM Table of Assignments, section 73.202(b) of the Commission's Rules and Regulations, as set forth in the Notice of Proposed Rule Making to which this Appendix is attached.

2. *Showings required.* Comments are invited on the proposal(s) discussed in the Notice of Proposed Rule Making to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build the station promptly. Failure to file may lead to denial of the request.

3. *Cut-off procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of Commission Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this Notice, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If filed later than that, they will not be considered in connection with the decision in this docket.

4. *Comments and reply comments; service.* Pursuant to applicable procedures set out in sections 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the Notice of Proposed Rule Making to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420 (a), (b), and (c) of the Commission Rules.)

5. *Number of copies.* In accordance with the provisions of section 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commisson.

6. *Public inspection of filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street NW., Washington, D.C.

[47 CFR Part 73]

[Docket No. 20418; RM-2346; RM-2727]

ADDING NEW VHF STATIONS IN THE TOP 100 MARKETS

Order Extending Time for Filing Comments and Reply Comments

AGENCY: Federal Communications Commission.

ACTION: Order.

SUMMARY: On the Commission's own motion, the time for filing comments, and reply comments in Docket 20418, published at 42 FR 40003, August 8, 1977, the VHF-Drop-In proceeding, has been extended. This will allow all parties to file comments on studies submitted by ITS relative to the Johnstown/Altoona and Knoxville markets.

DATES: Comments must be received on or before November 1, 1977, and reply comments on or before December 1, 1977.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Carol Fox Foelak, Broadcast Bureau, 202-632-7792.

SUPPLEMENTARY INFORMATION:

In the matter of petition for rulemaking to amend television table of assignments to add new VHF stations in the top 100 markets and to assure that the new stations maximize diversity of ownership, control and programming. Order extending time for filing comments and reply comments to the memorandum opinion and order and notice of proposed rule making (42 FR 40003).

Adopted: September 7, 1977.

Released: September 9, 1977.

By the Chief, Broadcast Bureau:

1. In the Memorandum Opinion and Order and Notice of Proposed Rule Making in Docket No. 20418, released March 18, 1977, at paragraph 146, the Commission stated: "We shall propose Channel 12 and Channel 8 as alternatives to serve the Johnstown-Altoona market. While awaiting comments in the rule making proceeding, we shall study with the help of ITS [Institute of Telecommunications Sciences] the terrain shielding effects on both channels. Materials developed in that study will be added to the docket and an opportunity for comment on them will be provided." ITS had already completed a similar study for Knoxville. Pursuant to subsequent orders, released May 13, 1977, and August 4, 1977, the times for filing comments and reply comments in this proceeding were extended to October 1, 1977, and November 1, 1977, respectively. Further, in the Order released May 13, 1977, the Commisson acknowledged that "at least 30 days is required after the ITS report [concerning the Johnstown-Altoona drop-in] is placed in the docket" for preparation of comments addressing that report.

2. In the course of reviewing the ITS Johnstown-Altoona report to ascertain its acceptability, the Commission determined that addenda for both the Johnstown-Altoona and Knoxville reports were needed. Specifically, it was found necessary to request supplemental showings regarding ITS' depiction of adjacent channel interference. These supplemental showings are now completed and all pertinent material developed by ITS has been inserted in the docket record in this proceeding.

3. In light of these developments, we find it to be appropriate to further extend the time for filing comments and reply comments in this proceeding to allow parties sufficient time to prepare comments relating to this new material. For administrative convenience, we will extend the time for all comments in this proceeding, whether or not specifically related to the ITS reports, so that all comments and reply comments will be due on the same dates.

4. Accordingly, *It is ordered*, That the time for filing comments to the notice of proposed rule making in Docket No.

[1] Public Notice of the filing of the petition was given on June 15, 1977, Rept. No. 1053.

[2] Population figures are taken from the 1970 U.S. Census.

[3] Alternatively, we could consider use of the channel at nearby Chaffee, Mo., population 2,793, if interest in such use were expressed.

V 42 I 178 SEP 14 77 UMI

20418 is extended through November 1, 1977, and the time for filing reply comments is extended through December 1, 1977.

5. This action is taken pursuant to authority found in sections 4(i), 5(d)(1), 303 (g) and (r) of the Communications Act of 1934, as amended, and section 0.281 of the Commission's rules.

FEDERAL COMMUNICATIONS COMMISSION,
WALLACE E. JOHNSON,
Chief, Broadcast Bureau.

DEPARTMENT OF THE TREASURY

Customs Service

[19 CFR Part 4]

COASTWISE TRANSPORTATION OF MERCHANDISE

Proposed Amendment to The Effect of Manufacturing or Processing at an Intermediate Port or Place

AGENCY: United States Customs Service, Department of the Treasury.

ACTION: Proposed rulemaking.

SUMMARY: Merchandise ordinarily may not be transported between coastwise points, either directly or via a foreign port, or for any part of the transportation, in a vessel not qualified for the coastwise trade. However, the Customs Service has ruled that if merchandise is laden at a coastwise point, transported to an intermediate port or place not subject to the coastwise laws for manufacturing or processing into a new or different product, and thereafter transported to a coastwise point, either leg (or both legs) of the transportation may be accomplished by a vessel not qualified for the coastwise trade. It is proposed to incorporate these principles into the Customs Regulations and to provide for interested parties to obtain advice as to whether a contemplated undertaking would result in a new and different product.

DATE: Comments must be received on or before October 14, 1977.

ADDRESS: Comments may be addressed to the Commissioner of Customs, Attention: Regulations and Legal Publications Division, U.S. Cusoms Service, 1301 Constitution Avenue, NW., Washington, D.C. 20229.

FOR FURTHER INFORMATION CONTACT:

Charles W. Hart, Attorney, Carriers, Drawback and Bonds Division, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, D.C. 20229 (202-566-5706).

SUPPLEMENTARY INFORMATION:

BACKGROUND

Section 27 of the Merchant Marine Act, 1920 (46 U.S.C. 883), in general provides that no merchandise shall be transported between points embraced within the coastwise laws of the United States ("coastwise points"), directly or by way of a foreign port, or for any part of the transportation, except in a vessel built in the United States, owned by a citizen of the United States, and documented under the laws of the United States.

The Customs Service and the former Bureau of Marine Inspection and Navigation, its predecessor agency in the administration of the coastwise laws, have ruled since 1938 that if merchandise is transported from a coastwise point to a port or place not subject to the coastwise laws, such as a port or place in Canada or the Virgin Islands of the United States (to which the coastwise laws expressly do not apply—Executive Order No. 9170 of May 21, 1942), where it is manufactured or processed into a new and different product which thereafter is transported to a coastwise point, either segment (or both segments) of the overall transportation may be accomplished by vessels not qualified to engage in the coastwise trade. The rationale is that the continuity of the transportation is broken at the intermediate port or place and that the new and different product resulting from the manufacturing or processing is not the same as that laden at the initial coastwise point.

For example, in a ruling abstracted as Treasury Decision 56272(2), the Customs Service held that there was no violation of 46 U.S.C. 883 where partially-milled rice was transported by a foreign vessel from California to the Virgin Islands, where it was brushed, screened, coated, polished, and fortified, and then transported by foreign vessel to Puerto Rico.

Similarly, the Customs Service ruled that where oil was transported from the U.S. Gulf Coast to Aruba, Netherlands Antilles, for blending with oil of foreign origin to produce low-sulphur fuel oil, the initial transportation terminated in Aruba and the subsequent transportation of the finished product to East Coast United States ports was a separate transportation. The processing of the oil at Aruba was considered not as a mere commingling, but as a blending designed to produce an end product significantly different from any of the component oils in such characteristics as specific gravity, viscosity, pour and, especially, sulphur content.

The Customs Service has been asked to rule whether it would be a violation of the coastwise laws if crude oil were to be transported by foreign vessel from Valdez, Alaska, to the Virgin Islands for refining, and if the refined products, including gasoline and fuel oil, thereafter were transported to a coastwise point.

Because the Customs Regulations do not address this issue, it is proposed to insert a new § 4.80b (19 CFR 4.80b) to incorporate the principles outlined above and to establish a procedure, similar to that in § 4.80a (19 CFR 4.80a), applicable to the coastwise transportation of passengers by foreign vessels, by which interested parties may apply for a ruling as to whether a contemplated undertaking would result in a new different product.

COMMENTS

The Customs Service invites comments from all interested parties on the proposed amendment. While, as stated above, the proposed regulation would merely codify existing rulings, comments will also be entertained as to whether existing rulings should be modified in the light of recent legislative enactments or other changes in relevant circumstances. Comments submitted will be available for public inspection in accordance with § 103.8(b) of the Customs Regulations (19 CFR 103.8(b)) during regular business hours at the Regulations and Legal Publications Division, Headquarters, U.S. Customs Service, Room 2335, 1301 Constitution Avenue, NW., Washington, D.C. 20229.

DRAFTING INFORMATION

The principal author of this document was Alfred G. Scholle, Attorney, U.S. Customs Service. However, other personnel in the Customs Service and in the Department of the Treasury participated in developing the document, both on matters of substance and style.

PROPOSED AMENDMENT TO THE CUSTOMS REGULATIONS

It is proposed to amend Part 4 of the Customs Regulations by inserting a new § 4.80b to read as follows:

§ 4.80b Coastwise transportation of merchandise.

(a) *Effect of manufacturing or processing at intermediate port or place.* A coastwise transportation of merchandise takes place, within the meaning of the coastwise laws, when merchandise laden at a point embraced within the coastwise laws ("coastwise point") is unladen at another coastwise point, regardless of the origin or ultimate destination of the merchandise. However, merchandise is not transported coastwise if at an intermediate port or place other than a coastwise point (that is, at a foreign port or place, or at a port or place in a territory or possession of the United States not subject to the coastwise laws), it is manufactured or processed into a new and different product, and the new and different product thereafter is transported to a coastwise point.

(b) *Request for ruling.* Interested parties may request an advisory ruling from Headquarters, United States Customs Service, Attention: Carriers, Drawback and Bonds Division, as to whether a specific action taken or to be taken with respect to merchandise at the intermediate port or place will result in its becoming a new and different product for purposes of this section. The request shall be filed in accordance with the provisions of Part 177 of this chapter.

(R.S. 251, as amended, sec. 27, 41 Stat. 998, as amended (5 U.S.C. 301, 19 U.S.C. 66, 46 U.S.C. 883).)

ROBERT E. CHASEN,
Commissioner of Customs.

Approved: September 9, 1977.

BETTE B. ANDERSON,
Under Secretary of the Treasury.

Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Forest Service

OUACHITA TIMBER MANAGEMENT PLAN

Availability of Draft Environmental Statement

Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969, the Forest Service, Department of Agriculture, has prepared a draft environmental statement for the Ouachita Timber Management Plan, National Forest, USDA-FS-R8-DES (Adm.) 77-11.

This unit covers 1,575,291 acres of National Forest land located in Sebastian, Logan, Vell, Perry, Saline, Garland, Hot Spring, Pike, and Scott Counties in Arkansas, and in LeFlore and McCurtain Counties, Okla. Major actions proposed are the management of the timber resources enviromental protection, and coordination of timber management activities with other resources. This consists of harvesting, regenerating, thinning, construction, and reconstruction of roads. This draft environmental statement was transmiteed to CEQ September 2, 1977. Copies are available for inspection during regular working hours at the following locations:

USDA, Forest Service, South Agriculture Bldg., Rm. 3210, 12th St. and Independence Ave. SW., Washington, D.C. 20250.
USDA, Forest Service, 1720 Peachtree Road NW., Rm. 804, Atlanta, Ga. 30309.
USDA, Forest Service, Ouachita National Forest, P.O. Box 1270, Federal Building, Hot Springs, Ark. 71901.

A limited number of single copies are available upon request to Forest Supervisor, Ouachita National Forest, P.O. Box 1270, Federal Building, Hot Springs, Ark. 71901.

Comments are invited from the public, and from State and local agencies which are authorized to develop and enforce environmental standards, and from Federal agencies having jurisdiction by law or special expertise with respect to any environmental impact involved for which comments have not been requested specifically.

Comments concerning the proposed action and requests for additional information should be addressed to Forest Supervisor, Ouachita National Forest, P.O. Box 1270, Federal Building, Hot Springs, Ark. 71901. Comments must be received by November 1, 1977, in order to be considered in the preparation of the final environmental statement.

Dated: September 2, 1977.

GEORGE H. COOK,
Acting Regional Environmental Coordinator.

CIVIL AERONAUTICS BOARD

[Order 77-9-27; Dockets 30513, 30511, 30512, 30510, 30693, 30694, 30725, 30726, 30711, 30741]

AMOS E. HEACOCK ET AL.

Order on Reconsideration

Applications of Amos E. Heacock, d.b.a. Air Transport Associates; Richard D. Neumann, California Air Charter & Holiday Airways, d.b.a. Air United States; Shields B. Craft & N.Y. Craft, d.b.a. Standard Airways; Ralph W. E. Cox, Jr. d.b.a. U.S.O.A. for certificates of public convenience and necessity. Applications of Shields B. Craft and N.Y. Craft, d.b.a. Standard Airways; Richard D. Neumann, California Air Charter and Holiday Airways d.b.a. Air United States; Amos E. Heacock, d.b.a. Air Transport Associates; Ralph W. E. Cox, Jr. d.b.a. U.S.O.A.; U.S. Aircoach, Inc.; Virgin Islands Air Services, Inc. for exemptions from 401(d)(3) of the Act to perform Supplemental Air Transportation.

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 8th day of September, 1977.

By Order 77-7-147, July 29, 1977, the Board denied petitions for stay filed by the applicants in the above-captioned dockets. The applicants had requested a stay, pending judicial review, of Board orders denying them waivers of filing fees. The Board denied their requests since they had failed to make the requisite showing, as determined by Board and court precedent, to entitle them to a stay. Petitioners were given 10 days to pay the required fees.

On August 11, 1977, the applicants filed a petition for reconsideration of Order 77-7-147. The petitioners do not dispute the criteria relied upon by the Board in denying their petitions, but contend that the Board did not properly apply these criteria. Generally the petitioners contend that their status as former supplemental air carriers entitles them to a stay of the Board's orders requiring payment of the fees. They allege that the Board, through past actions and now through its denial of their petitions for stay, has refused to recognize their grandfather rights as nonscheduled airlines.

The Board has had repeated opportunities in the past several months to consider the issue of filing fees, and, in particular, their application to former nonscheduled air carriers seeking to provide air transportation services which they have operated in the past.[1] We have consistently found that an applicant's status as a former nonscheduled air carrier does not entitle it to a waiver of the Board's filing fee regulations.[2] After careful consideration of this issue, in Order 77-7-147, we determined that the petitioners were unlikely to succeed on the merits of their appeal from the Board's orders requiring payment of the fees. We also found that payment of the required fees pending judicial review would not cause irreparable injury to the petitioners, and that the public interest would be best served by requiring their payment. Accordingly, the petitions for stay were denied.

Upon consideration of the petition for reconsideration, we see no reason to reverse the findings made in Order 77-7-147. Our decision, however, does not in any way reflect our opinion with respect to the merits of petitioners' applications. Upon payment of the required fees, these applications will receive complete and fair consideration.[3]

Accordingly, *it is ordered*, That the petition for reconsideration be denied.

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board:

PHYLLIS T. KAYLOR,
Secretary.

for evidence; (4) statements of positions; and (5) proposed procedural dates. The Bureau of Operating Rights will circulate its material on or before September 12, 1977, and the other parties on or before September 19, 1977. The submissions of the other parties shall be limited to points on which they differ with the Bureau of Operating Rights, and shall follow the numbering and lettering used by the Bureau to facilitate cross-referencing.

Dated at Washington, D.C., September 6, 1977.

HENRY M. SWITKAY,
Acting Chief
Administrative Law Judge.

[FR Doc 77-26706 Filed 9-13-77;8:45 am]

[Order 77-9-26; Dockets 30821, 30893, 30894]

BLATZ AIRLINES, INC., ET AL.

Application of Blatz Airlines, Inc. for an exemption from section 401(d)(3) of the Act to perform Supplemental Air Transportation. Application of Paramount Airlines for an exemption from section 401(d)(3) of the Act to perform Supplemental Air Transportation. Application of Central Air Transport, Inc. for an exemption from section 401(d)(3) of the Act to perform Supplemental Air Transportation.

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 8th day of September, 1977.

Order Denying Motions for Stay

By Order 77-7-64, July 15, 1977, the Board affirmed decisions of the Managing Director denying the applicants in the above-captioned dockets waivers of filing fees. In accordance with the Board's rules, section 389.23(b), payment of the prescribed fees was to be made within 10 days of the Board's decision. In the absence of such payment, the rules provide that the applications are to be returned to the filing party, and are to be deemed to have been dismissed or withdrawn.

On August 4, 1977, Paramount Airlines and Central Air Transport filed Notices of Appeal and Petitions for Stay of Order 77-7-64 pending appeal. Blatz Airlines filed a similar petition on August 8, 1977.

We shall deny the petitions for stay. Petitioners have not made the requisite showing to entitle them to a stay of the Board's order. In fact, the petitions do not contain any allegations whatsoever, of fact or law, to support the requests for a stay.

As we indicated in Order 77-7-147, July 29, 1977, in ruling on similar requests for stay of Board orders requiring the payment of filing fees, the Board considers three factors:

(1) The probability of the movant's success on the merits upon judicial review; (2) irreparable injury to the movant, should the stay be denied, balanced against injury to other parties, should the stay be granted; and (3) the public interest.[1] Inasmuch as the petitioners have not even attempted to support their request for a stay in the present case, our ruling will be the same as in Order 77-7-147. Specifically, we find that there is little probability of petitioners' success on the merits, that there will be no irreparable injury to the petitioners should the stay be denied, and that it is not in the public interest to grant a stay of Order 77-7-64.

We will give petitioners 10 days from the date of service of this order to pay the required filing fees. In the absence of such payment, the subject applications will be returned in accordance with rule 389.23(b).

Accordingly, *it is ordered*, That:

1. The petitions for stay in Dockets 30821, 30893, and 30894 be denied; and
2. The petitioners be given 10 days from the service date of this order to pay the required fees.

This order shall be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.[2]

PHYLLIS T. KAYLOR,
Secretary.

[FR Doc 77-26709 Filed 9-13-77;8:45 am]

[Order 77-9-25; Docket 30132]

NORTHWEST AIRLINES, INC.

Order

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 8th day of September, 1977.

On November 30, 1976, Northwest Airlines filed an application in Docket 30132 for amendment of its certificate of public convenience and necessity for Route 3 so as to authorize it to perform one-stop single-plane service between Milwaukee, Wisconsin, on the one hand, and Los Angeles/Long Beach/Ontario and San Francisco/Oakland/San Jose Calif., on the other hand.[1] The application was accompanied by a motion for issuance of an order to show cause why the above request should not be granted without hearing.

In support of its motion, Northwest alleges, *inter alia*, that in 1969 it was awarded Twin Cities-Los Angeles and San Francisco authority;[2] that under ordinary circumstances the award of that authority would have permitted the tacking of Northwest's preexisting Milwaukee-Twin Cities authority so as to permit one-stop single-plane service between Milwaukee and the California cities; that a pretrial restriction in the *Twin Cities-California* case, however, prohibits the operation of this service; that removal of the restriction will still leave Northwest with Milwaukee-California authority inferior to the nonstop authority of United Air Lines and will not cause any significant diversion; and that the grant of the authority requested will permit Northwest to link preexisting flights so that the public would be benefited by improved service, while the carrier would be benefited by its ability to garner additional traffic without the incurrence of additional direct operating expenses. In support of the proposition that the use of show-cause procedures is appropriate in this instance, Northwest relies upon *Application of North Central Airlines*, Order 76-10-34, October 7, 1976, in which the Board invited North Central to file a motion for issuance of a show-cause order requesting modification of that carrier's single-plane restriction between Denver and Milwaukee to that of one-stop authority.

Answers in opposition to Northwest's motion were filed by North Central and United. In its pleading, North Central notes that the authority sought here by Northwest is identical to that which Northwest seeks as part of its realignment application in Docket 29449. Thus, North Central argues, the matter of Northwest's certificate restrictions in the Milwaukee-California markets is more properly addressed in Docket 29449 where it can be considered in the broader context of Northwest's total realignment proposal.

United, in its answer, asserts that it would suffer significant adverse competitive consequences should the Board grant the expanded authority which Northwest seeks. In light of the competitive implications of Northwest's request, United argues that show-cause procedures are inappropriate and that, if Northwest wishes to pursue its request further, a full evidentiary hearing is the proper vehicle.

Northwest filed a motion for leave to file an unauthorized document, accompanied by a reply directed solely to the answer of North Central.[3]

Subsequently, on June 3, 1977, Northwest filed a petition for expedited action. Asserting that its request for single-plane Milwaukee California authority

[1] See *Alaska Service Investigation*, Order 72-1-94, January 26, 1972; *Virginia Petroleum Jobbers Ass'n. v. F.P.C.*, 259 F. 2d 921 (D.C. Cir., 1958).

[2] All Members concurred except Chairman Kahn and Member Bailey who did not participate.

[1] Condition (12) of Northwest's certificate for route 3 currently provides: "The holder shall not provide single-plane service over segments 11 and 12 between Los Angeles-Ontario-Long Beach or San Francisco-Oakland-San Jose, Calif., on the one hand, and any point east of Minneapolis-St. Paul, Minn., on the other hand."

[2] *Twin Cities-California Service Investigation*, Order 69-8-14, August 4, 1969.

[3] We have decided to deny Northwest's motion. We are becoming increasingly concerned about the number of unauthorized replies which are filed by applicants merely because they want to have the last word. In this period of intensive route activity, these replies only increase the Board's workload and where, as here, adequate justification for receiving the reply has not been shown (for example, Northwest has not demonstrated that the answers contained new material which Northwest could not have anticipated), we will not accept it.

stands unopposed, Northwest contends that equity demands that it be accorded similar treatment to that given North Central by Order 77-3-13, March 2, 1977, in which the Board directed all interested persons to show cause why North Central's certificate should not be amended so as to authorize one-stop services between Milwaukee and Denver. The Rochester Area Chamber of Commerce filed a petition in support of Northwest's petition, likewise emphasizing the asserted fact that the Northwest's request stands unopposed.

United answered Northwest's petition. Noting that it had filed an answer in opposition to Northwest's motion for issuance of an order to show cause, United characterizes as "unfounded" Northwest's claim that its request is unopposed.

Finally, Northwest filed another motion for leave to file an unauthorized document, accompanied by a reply to United's answer.[4] Apparently conceding that United has contested its motion, Northwest continues to argue that the use of show-cause procedures is warranted.

We have decided to deny Northwest's motion for issuance of an order to show cause and its petition for expedited action. Although we agree with Northwest that its request is of the type which may be properly addressed by show-cause procedures, it appears that this application can be handled in a more orderly and efficient manner within the context of our consideration of Northwest's route realignment application, rather than on an individual basis.[5] The Board's treatment of North Central's request for removal of its single-plane restriction in the Milwaukee-Denver market is readily distinguishable. Our invitation to North Central to employ show-cause procedures to consider removal of its single-plane restriction was extended well after that carrier's realignment application had been finally determined by the Board.[6] Moreover, unlike Northwest's motion, North Central's was unopposed. We have, on occasion, considered individual requests for route authority through the use of show-cause procedures even when such requests properly fell within the scope of pending realignment applications.[7] However, we have not accelerated consideration of such particular requests in the face of opposition by other interested persons.

Accordingly, action will be deferred on the subject application with a view toward considering the relief requested in Northwest's realignment proceeding.

[4] We will grant the second motion of Northwest for leave to file an unauthorized document. This reply contains important new information in explanation of Northwest's previous assertion that its motion for issuance of an order to show cause had been unopposed.

[5] Applications of United Air Lines, Inc., and Trans World Airlines, Inc., Order 76-8-3, August 2, 1976.

[6] Application of North Central Airlines, Inc., Order 75-2-22, February 5, 1975.

[7] See, e.g., Application of Ozark Air Lines, Inc., Order 77-3-175, March 31, 1977.

Accordingly, *it is ordered*, That: 1. Action be deferred on the application of Northwest Airlines in Docket 30132 until further order of the Board;

2. The motion of Northwest Airlines for issuance of an order to show cause be denied;

3. The respective petitions for expedited action of Northwest Airlines and the Rochester Area Chamber of Commerce be denied;

4. The motion of Northwest Airlines for leave to file an unauthorized document, filed December 16, 1976, be denied; and

5. The motion of Northwest Airlines for leave to file an unauthorized document, filed July 7, 1977, be granted.

This order shall be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board:[8]

PHYLLIS T. KAYLOR,
Secretary.

[Order 77-9-21; Docket 29123; Agreement C.A.B. 26826 and 26847]

INTERNATIONAL AIR TRANSPORT ASSOCIATION

Order

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 8th day of September 1977.

Agreements have been filed with the Board pursuant to section 412(a) of the Federal Aviation Act of 1958 (the Act) and Part 261 of the Board's Economic Regulations between various air carriers, foreign air carriers and other carriers embodied in the resolutions of the Joint Traffic Conferences of the International Air Transport Association (IATA). The agreements, adopted by mail vote, have been assigned the above C.A.B. agreement numbers.

Agreement C.A.B. 26826 would revalidate the existing Board-approved South Pacific fare structure, currently due to expire September 30, 1977, through March 31, 1978, as well as adjust currency-related surcharges on fares sold in Australia and Canada for transportation over the Pacific. Agreement C.A.B. 26847 amends the resolution governing Japan-originating group 30/40 inclusive-tour fares to provide a special arbitrary from Okinawa.

We will approve the agreements. Revalidation of the South Pacific fare structure should provide stability in that market through March 1978, and the changes to the currency surcharges should bring fares sold in the local currencies involved more into line with fluctuating foreign exchange values

The Board, acting pursuant to sections 102, 204(a), and 412 of the Act, does not find the following resolutions, incorporated in the agreements as indicated, to be adverse to the public interest or in violation of the Act, provided that approval is subject, where applicable, to conditions previously imposed by the Board:

Agreement CAB:	*IATA resolution*
26826	JT31(Mail 154)0021j.
26847	JT31(Mail 156)0044.

Accordingly, *it is ordered*, That:

Agreements C.A.B. 26826 and C.A.B. 26847 be approved subject, where applicable, to conditions previously imposed by the Board.

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.[9]

PHYLLIS T. KAYLOR,
Secretary.

DEPARTMENT OF COMMERCE

Domestic and International Business Administration

DEPUTY ASSISTANT SECRETARY FOR DOMESTIC COMMERCE

Delegation of Authority

Notwithstanding delegations contained in Domestic and International Business Administration Organization and Function Orders 46-1 and 46-2 (40 FR 59764, 59761; December 30, 1975) regarding delegations of authority to exercise and perform powers and functions provided by the Export Administration Act of 1969, as amended (50 U.S.C. App. 2401 et seq.), and pursuant to Section 5.03 of Department Order 10-3, as amended (41 FR 24202, June 15, 1976; 41 FR 28334, July 9, 1976; 41 FR 52220, December 17, 1976; 42 FR 44829, September 7, 1977) authority is hereby delegated to the Deputy Assistant Secretary for Domestic Commerce to issue Export Administration Regulations regarding foreign boycotts under authority of the Export Administration Act of 1969, as amended.

Effective: September 8, 1977.

FRANK A. WEIL,
Assistant Secretary for Domestic and International Business.

National Oceanic and Atmospheric Administration

MARINE FISHERIES ADVISORY COMMITTEE

Public Meetings

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act, 5 U.S.C., Appendix I, notice is hereby given of meetings of the Marine Fisheries Advisory Committee (MAFAC) and subcommittees. The committee meeting (MAFAC XVIII) will be held on Wednesday and Thursday, October 5 and 6, 1977, in Room 4830 of the Department of Commerce Building, 14th Street between E Street and Constitution Avenue NW., Washington, D.C., with meetings start-

V 42 178 SEP 14 77 UMI

ing at 8:30 a.m. Adjournment is planned for noon Thursday.

Three subcommittees will meet Tuesday afternoon, October 4, 1977, in the Conference Room, 4th Floor, Page Building 2, 3300 Whitehaven Street NW., (NMFS headquarters); the Subcommittee on Joint Ventures at 1 p.m.; the Subcommittee on Consumer Affairs at 2:30 p.m.; and the Subcommittee on Recreational Fisheries at 4 p.m.

Agenda items include: Extended Jurisdiction Status Report (TALFF, Fees, Fishery Management Plans, and issues related to discard or retention of nonsurplus species); joint ventures; National Workshop on Limited Entry; fishery legislation; NMFS budget; implementation of the National Plan and the Eastland Survey; U.S. fishery development; and reports by the Subcommittees and the Regional Fishery Management Councils.

The Committee meeting and the subcommittee meetings are open to the public and there will be seating for approximately 20 public members available on a first come, first served basis. Members of the public having an interest in specific items for discussion are advised that agenda changes are at times made prior to the meeting. To receive information on changes, if any, made to the agenda, interested members of the public should contact:

Mr. Kess Cannon, Marine Fisheries Advisory Committee, National Oceanic and Atmospheric Administration, National Marine Fisheries Service, Washington, D.C. 20235, Telephone Area Code 202–634–7270.

At the discretion of the chairman, interested members of the public may be permitted to speak at times which allow an orderly conduct of committee business, and a reasonable time relationship between the committee's discussion of a given subject, and comments to that same subject by a member of the public.

Interested members of the public who wish to submit written comments should do so at the address noted above. To receive due consideration and facilitate their inclusion in the record of the meeting, written statements should be received within 10 days after the close of the committee meeting.

Dated: September 8, 1977.

JOSEPH W. SLAVIN,
Acting Associate Director, National Marine Fisheries Service.

[FR Doc.77-26650 Filed 9-13-77;8:45 am]

Office of the Secretary

NATIONAL PUBLIC ADVISORY COMMITTEE ON REGIONAL ECONOMIC DEVELOPMENT

Renewal of Charter

In accordance with the provisions of the Federal Advisory Committee Act, 5 U.S.C. App. I and Office of Management and Budget Circular A–63, revised, notice is hereby given of the renewal of the Charter for the National Public Advisory Committee on Regional Economic Development (NPAC). Rechartering has been approved until August 26, 1979.

The NPAC was established as directed by section 602 of the Public Works and Economic Development Act of 1965, as amended, 42 U.S.C. 3202. The original purpose of NPAC was to make recommendations from time to time to the Secretary relative to the carrying out of his or her duties under the Act. This objective continues as a result of a large number of major economic and operational questions that require policy decisions. Many of these policy decisions result from extending the Economic Development Administration's authorization for the Agency's established programs, Title IX, funding of new business development tools, section 302 planning grants, and section 304 grants.

Since the last rechartering of NPAC on October 27, 1976, the Committee has completed deliberations on the following five topics:

(1) Establishment of a National Development Bank.

(2) Policies and programs dealing with the impact of environmental Standards on economically distressed areas.

(3) Conflicts in Federal subnational development programs.

(4) The relationship between Federal legislation and economic development districts.

(5) The impact of vocational and technical education on manpower and economic development.

The recommendations by NPAC on the above topics have been published and widely distributed to officials in the public and private sectors which are influential in economic development activities.

The Committee will continue as it was originally directed by statute with a balanced representation of 25 members from labor, management, agriculture, State and local governments and the public in general. The Secretary will maintain these requirements in filling any future vacancies to NPAC along with those imposed by applicable Civil Rights statutes and the provisions of the Federal Advisory Committee Act.

Copies of the Committee's revised charter will be filed with appropriate committees of the Congress and with the Library of Congress.

Inquiries or comments may be addressed to the National Public Advisory Committee for Regional Economic Development, Mr. Louis J. Phillips, Room 7812, U.S. Department of Commerce, Washington, D.C. 20230, telephone 202–377–4615.

Dated: September 7, 1977.

ELSA A. PORTER,
Assistant Secretary for Administration.

CONSUMER PRODUCT SAFETY COMMISSION

GAS-FIRED SPACE HEATERS

Decision

AGENCY: Consumer Product Safety Commission.

ACTION: Notice of decision.

SUMMARY: This document sets forth Commission decisions relating to regulatory action to address possible hazards of gas-fired space heaters, both vented and unvented. Because voluntary standards on vented gas-fired space heaters aimed at mitigating and reducing risks of injury such as asphyxiation, contact burns and fabric ignition have been substantially upgraded, the Commission has decided, at this time, that it is not necessary to develop a mandatory safety standard addressed to those risks. The Commission will review this decision in May, 1978. In addition, the Commission believes that it may be necessary to ban unvented gas-fired space heaters because of hazards such as carbon monoxide poisoning and anoxia, and has directed its staff to prepare a briefing package to be used as a basis for proposing a ban of unvented gas-fired space heaters.

FOR FURTHER INFORMATION CONTACT:

George Anikis, Office of Program Management, Consumer Product Safety Commission, Washington, D.C. 20207 (301–492–6453).

SUPPLEMENTARY INFORMATION: The Commission began to review possible hazards associated with space heaters as a result of a petition from the Missouri Public Interest Research Group (CP 74–10), filed on January 15, 1974, requesting the development of safety standards and labeling requirements regarding proper use of space heaters. The Commission examined possible hazards associated with several different types of space heaters, including space heaters fueled by wood, kerosene, electricity, and gas. Based on information then available, the Commission preliminarily concluded that only gas-fired space heaters presented unreasonable risks of injury to the public, such as the dangers of carbon monoxide poisoning and anoxia.

Therefore, on September 5, 1975, the Commission issued a partial denial of the petition as to space heaters fueled by energy sources other than gas (40 FR 41172). The Commission then directed its staff to develop technical information on gas-fired space heaters, and to develop draft documents to begin proceedings to develop a mandatory safety standard for gas-fired heaters. In addition, the Commission staff were also monitoring existing voluntary standards to determine how those standards addressed possible hazards of gas-fired space heaters such as asphyxiation, contact burns and fabric ignition. Analysis of the voluntary standards by the Commission's Division of Engineering as well as a technical report entitled, Investigation of Safety Standards for Flame-Fired Heaters by an independent contractor, Calspan, indicated that there had been significant improvements in the voluntary standards. The staff presented information on voluntary activity regarding these products for Commission consideration and also provided specific information on unvented gas-fired space heaters, such as a study of the possible

socio-economic effects of banning unvented gas-fired space heaters and a survey of states and municipalities which have regulated such heaters.

On May 19, 1977, the staff briefed the Commission on the extensive information developed on these matters. In addition, the staff stated that a review of the voluntary standards for vented wall heaters and wall furnaces (ANSI Z21.11.1, Z21.44, and Z21.49) indicated that most concerns of the Commission on vented gas heaters are dealt with in those standards. Provisions for reduced surface temperatures, prevention of fabric ignition, safe lighting of heaters, and minimizing the asphyxiation hazard, are included. In addition to these significant improvements the Commission also noted that conformance by manufacturers to voluntary standards is very high because certification by industry associations of gas appliances (such as heaters) installed in homes, is widely recognized in state and local building codes and safety regulations.

Therefore, the Commission concluded that a mandatory standard on vented gas-fired space heaters does not appear to be needed at this time. However, the Commission has directed the staff to closely monitor the current development phases of the voluntary standard and report back to it after 12 months on the progress toward completion and subsequent implementation by industry of the voluntary standards. The Commission is particularly interested in and encourages the developers of the voluntary standards to work toward progressively lower surface temperatures for vented gas-fired space heaters. The Commission will decide if further action is needed after staff reports on its 12-month monitoring effort of the voluntary standard and conformance to it by the affected industry.

In addition, based on materials reviewed at the meeting of May 19, 1977, the Commission expressed its concern as to the safety of unvented gas-fired space heaters. A majority of the Commission believe that the public can be protected from the hazards of asphyxiation associated with such heaters only by removing unvented gas-fired space heaters from the marketplace. Therefore, the Commission directed the staff to analyze information available to it and prepare for Commission review and decision a proposal to ban unvented gas-fired space heaters under section 8 of the CPSA (15 U.S.C. 2057). Accordingly, the matter of unvented gas-fired space heaters will be further discussed in a subsequent FEDERAL REGISTER notice.

The materials referred to in this notice may be seen in or obtained from the Office of the Secretary Consumer Product Safety Commission, 3rd floor, 1111 18th Street NW., Washington, D.C. 20207 (202–634–7700), during working hours Monday through Friday.

Dated: September 9, 1977.

RICHARD E. RAPPS,
Secretary, Consumer Product Safety Commission.

[FR Doc.77-26690 Filed 9-13-77;8:45 am]

HOME INSULATION PETITION CP 77–1

Extension of Written Comment Period

In the FEDERAL REGISTER of July 28, 1977 (42 FR 38421), the Commission announced that it would hold a public meeting on August 22, 1977, to allow interested persons an opportunity to make oral presentations concerning a petition the Commission has received (CP 77–1) regarding certain home insulation products. The Commission also announced that interested persons could submit written comments on this matter by August 22, 1977. The purpose of this notice is to announce that the Commission has decided to extend the written comment period 60 days, until October 21, 1977. Written comments should be submitted by October 21, 1977, to the Secretary, Consumer Product Safety Commission, Washington, D.C. 20207.

The petition submitted by the Metropolitan Denver District Attorney's Consumer Office on October 20, 1976, requested the Commission to initiate proceedings to develop a mandatory consumer product safety standard under § 7 of the Consumer Product Safety Act, 15 U.S.C. 2056, for certain types of home insulation products.

The petition set forth the relevant facts which it is claimed establish that a mandatory standard is necessary to eliminate or reduce the following alleged risks of injury:

(1) The risk of injury from fires associated with cellulose home insulation.

(2) The risk of injury of cancer in the respiratory and gastrointestinal tracts due to the inhalation and ingestion of particles from fibrous glass home insulation.

(3) The risk of injury from fires associated with fibrous glass home insulation.

(4) The risk of injury from fires associated with plastic foam/resin home insulation (insulation made of polyurethane, polystyrene, or urea formaldehyde).

(5) The risk of injury of irritation and poisoning associated with the use of plastic foam/resin insulation by consumers during installation.

Persons submitting written comments should confine their comments to the issues raised by the petition in order to assist the Commission in determining whether or not the petition should be granted.

A copy of the petition and a package prepared by the staff evaluating and analyzing available information concerning the issues raised by the petition may be examined in the Commission's Office of the Secretary.

A copy of the transcript of the August 22, 1977, public meeting may also be examined in the Commission's Office of the Secretary.

Dated: September 9, 1977.

RICHARD E. RAPPS,
Secretary, Consumer Product Safety Commission.

DEPARTMENT OF DEFENSE

Department of the Navy

ACADEMIC ADVISORY BOARD

Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (5 U.S.C. App. 1), notice is hereby given that the Academic Advisory Board to the Superintendent, United States Naval Academy, will meet on November 21, 1977. The meeting will commence at 8:00 a.m. in Room 301, Rickover Hall at the United States Naval Academy, Annapolis, Maryland.

The purpose of the meeting is to advise and assist the Superintendent of the Naval Academy concerning the education of midshipmen. To accomplish this objective, the Board will review academic policies and practices of the Naval Academy and will submit their proposals to the Superintendent to aid him in improving educational standards and in solving academy problems.

For further information concerning this meeting contact Lieutenant Commander M. Kazanowska, USN, Secretary to the Academic Advisory Board, Oceanography Department, United States Naval Academy, Annapolis, Md. 21402, telephone number 301–267–3561.

Dated: September 7, 1977.

DOD ADVISORY GROUP ON ELECTRON DEVICES

Advisory Committee Meeting

The DOD Advisory Group on Electron Devices (AGED) will meet in closed session at 201 Varick Street, 9th Floor, New York, N.Y. 10014 on October 14, 1977.

The purpose of the Advisory Group is to provide the Director, Defense Research and Engineering, the Director, Defense Advanced Research Projects Agency and the Military Departments with technical advice on the conduct of economical and effective research and development programs in the area of Electron Devices.

The meeting will be limited to review of research and development programs which the Military Departments propose to initiate with industry, universities or in their laboratories. The AGED will review programs on microwave devices, night vision devices, lasers, infrared systems and microelectronics. The review will include classified program details throughout.

In accordance with Section 10(d) of Appendix I, Title 5, United States Code, it has been determined that this Advisory Group meeting concerns matters listed in Section 552b(c) of Title 5 of the United States Code, specifically Subparagraph (1) thereof, and that accordingly this meeting will be closed to the public.

MAURICE W. ROCHE,
Director, Correspondence and Directives, Office of the Assistant Secretary of Defense (Comptroller).

FEDERAL COMMUNICATIONS COMMISSION

[Report No. 874]

COMMON CARRIER SERVICES INFORMATION

Applications Accepted for Filing

SEPTEMBER 6, 1977.

The applications listed herein have been found, upon initial review, to be acceptable for filing. The Commission reserves the right to return any of these applications, if upon further examination, it is determined they are defective and not in conformance with the Commission's Rules and Regulations or its policies.

Final action will not be taken on any of these applications earlier than 31 days following the date of this notice, except for radio applications not requiring a 30 day notice period (See § 309(c) of the Communications Act), applications filed under Part 68, applications filed under Part 63 relative to small projects, or as otherwise noted. Unless specified to the contrary, comments or petitions may be filed concerning radio and Section 214 applications within 30 days of the date of this notice and within 20 days for Part 68 applications.

In order for an application filed under Part 21 of the Commission's Rules (Domestic Public Radio Services) to be considered mutually exclusive with any other such application appearing herein, it must be substantially complete and tendered for filing by whichever date is earlier: (a) the close of business one business day preceding the day on which the Commission takes action on the previously filed application; or (b) within 60 days after the date of the public notice listing the first prior filed application (with which the subsequent application is in conflict) as having been accepted for filing. In common carrier radio services other than those listed under Part 21, the cut-off date for filing a mutually exclusive application is the close of business one business day preceding the day on which the previously filed application is designated for hearing. With limited exceptions, an application which is subsequently amended by a major change will be considered as a newly filed application for purposes of the cutoff rule. [See § 1.227(b)(3) and 21.30(b) of the Commission's Rules.]

FEDERAL COMMUNICATIONS COMMISSION,
VINCENT J. MULLINS,
Secretary.

APPLICATIONS ACCEPTED FOR FILING

DOMESTIC PUBLIC LAND MOBILE RADIO SERVICE:

21950-CD-MP-77 Mobilfone Service, Inc. (KWU486). Modification of CP to replace transmitter, change antenna system and relocate facilities operating on 152.24 MHz located at 1100 Milam, Houston, TX.

22023-CD-P-77 Cambridge Radio Telephone Services, Inc. (new), C.P. for a new 1-way station to operate on 152.24 MHz to be located on State Route 209, 1.4 miles NE. of Bloomfield, OH.

22024-CD-P-77 Anser - Quik Enterprises, Inc. (KWU435), C.P. for additional facilities to operate on 454.300 MHz to be located at a new site described as Loc. No. 2: 704 Bridges Street, Morehead City, NC.

22025-CD-P-77 Beep Communications Systems, Inc. (KEA255), C.P. for additional facilities to operate on 152.03 MHz to be located at a new site described as Loc. No. 3: 270-10 Grand Central Parkway, Glen Oaks, NY.

22026-CD-P-77 Airsignal International, Inc. (KQB688), C.P. to change antenna system operating on 152.15 MHz at Loc. No. 1: Country Rd. No. 44, approx. 2.2 miles ENE. of Hinckley, OH.

22027-CD-TC-77 RAM Broadcasting of Nevada, Inc. (Air-Ground), Consent to Transfer of Control from RAM Broadcasting Corporation, Transferor to Paul A. Matschiner, Transferee. Station: KUC995, Las Vegas, NV.

22028-CD-P-(3)-77 Mobile Phone of Texas, Inc. (KLF556), C.P. for additional facilities to operate on 152.21 MHZ, base and 459.150 MHz, repeater at a new site described as Loc. No. 2: Twin Mountains, 7.3 miles WNW. of Huckabay, TX; and for additional facilities to operate on 454.150 MHz, control at a new site described as Loc. No. 3: 1000 NE. Ninth Street, Mineral Wells, TX.

22029-CD-MP-77 Summit Mobile Radio Company (KWU412). Modification of CP to change antenna system and relocate facilities operating on 152.24 MHz to be located at Park Avenue, Auburne, ME, Loc. No. 1; also delete facilities operating on 545.125 MHz, control at Loc. No. 2: 32 Cook Street, Auburne, ME.

22030-CD-P-77 Ralph Heng dba Tri-State Communications Company (KDT215), C.P. for additional facilities to operate on 152.-12 MHz to be located at a new site described as Loc. No. 2: West side of U.S. Hwy. 54 at East 8th Street, Liberal, TX.

22031-CD-P-77 St. John Cooperative Telephone and Telegraph Company (KRS675), CP for additional facilities to operate on 152.60 MHz to be located at a new site described as Loc. No. 2: Steptoe Butte, 3.3 miles NE. of Steptoe, WA.

22032-CD-MP-77 Empire Paging Corporation (KWU374) (Dispatch). Modification of CP to change antenna system and relocate facilities operating on 72.58 MHz, control to be located at 2 World Trade Center, New York City, NY.

22033-CD-MP-77 Marc Weber Tobias and Michael Charles Tobias dba MT Systems, Inc. (KDS660), C.P. to relocate facilities operating on 152.21 MHz to be located at North of Rt. 34, 1.3 miles West of Wessington Springs, SD.

22034-CD-P-77 RAM Broadcasting of Indiana, Inc. (KSD327), C.P. to change antenna system and relocate facilities operating on 152.09 MHz at Loc. No. 1 to be located at 1 Indiana Square, Indianapolis, IN.

22035-CD-P-(2)-77 The Offshore Telephone Company (New), C.P. for a new station to operate on 35.30 and 35.62 MHz to be located on Roof of Claridge Hotel, Corner Indiana and Boardwalk, Atlantic City, NJ.

22036-CD-P-77 Professional Communications, Inc. (New), C.P. for a new 1-way station to operate on 158.70 MHz to be located at 1.5 miles SW. of Meadville, PA.

22037-CD-AL-2-77 Radiofone of Georgia, Inc. Consent to Assignment of License from Radiofone of Georgia, Inc., Assignor to Mobilfone, Inc., Assignee. Stations: KJU807 and KUS411, Valdosta, GA.

22038-CD-AL-77 Shaw-Rose Communications, Inc. Consent to Assignment of License from Shaw-Rose Communications, Inc., Assignor to Empire Paging Corporation, Assignee. Station: KAA277, Greenbrook, New Jersey.

CORRECTIONS

21689-CD-P-(4)-77 Lubbock Radio Paging Service, Inc. (KKE970), Correct to add: C.P. to replace transmitter operating on 152.06 and 152.12 MHz at Loc. No. 2: 85 Street and Avenue I, Lubbock, Texas. All other particulars are to remain as reported on PN No. 866 dated July 11, 1977.

21976-CD-TC-77 RAM Broadcasting of Oregon, Inc. Correct to Consent to Transfer of Control from RAM Broadcasting Corporation, Transferor to Paul A. Matschiner, Transferee. Station KUC874, Portland, Oregon. PN No. 873 dated Aug. 29, 1977.

MAJOR AMENDMENT

21475-CD-P-77 Prospect Communications (new), Amend to change the location to 1000 feet west of Fall River and Marble Rds intersection, Lawrenceburg, TN. As amended, the application is considered to be a "Major Action" as defined by Section 1.1305 of the Commission's Rules.

RURAL RADIO SERVICE

60390-CR-P/L-77 Mobilefone Northwest (new), C.P. for a new rural subscriber station to operate on 158.61 and 158.64 MHz to be located at any temporary fixed location within the territory of the grantee.

60391-CR-P/L-77 Mobilefone Northwest (new), C.P. for a new rural subscriber station to operate on 158.61 MHz to be located at any temporary fixed location within the territory of the grantee.

60392-CR-P/L-77 The Offshore Telephone Company (new), C.P. for a new temporary fixed station to operate on 43.30 and 43.62 MHz to be located at any temporary fixed location within the territory of the grantee.

POINT TO POINT MICROWAVE RADIO SERVICE:

OR—3519-CF-P-77 Fossil Telephone Exchange (new res) between Main and Washington St. Fossil, Oregon. Lat. 45°00'01" N., Long. 120°12'47" W. C.P. for a new station on frequency 2122.4V MHz toward Bald Mtn. PR on azimuth 146.7° and from passive reflector to Condon on azimuth 341.9°.

IL 3542-CF-P-77 American Telephone and Telegraph Company (KSA36), Chicago No. 2, 85 West Congress Street, Chicago, Illinois. Lat. 41°52'32" N., Long. 87°37'49" W. C.P. to add frequency 3930 MHz toward Lemont.

GA 3581-CF-P-77 Southern Bell Telephone and Telegraph Company (KIP48), 304 Pine Avenue, Albany, Georgia. Lat. 31° 34'40" N., Long. 84°09'17" W. C.P. to add frequency 2178H MHz toward Piney Grove.

GA—3582-CF-P-77 Same (KJH67), Piney Grove 7.6 miles SSW. of Leslie, Georgia. Lat. 31°50'47" N., Long. 84°06'13" W. C.P. to add frequencies 2128V MHz toward Albany and to add a new point of communication on 2115.2V MHz toward Cordele.

GA—3583-CF-P-77 Same (new res), 216 Twelfth Avenue, E. Cordele, Georgia. Lat. 31°58'03" N., Long. 83°46'48" W. C.P. for a new station on frequency 2165.2V MHz toward Piney Grove on azimuth 246.4°.

SC—3584-CF-P-77 Same (KIY59), 1645 Hampton Street, Columbia, South Carolina. Lat. 34°00'29" N., Long. 81°01'42" W. C.P. to add frequency 4010V MHz toward Blaney.

SC—3585-CF-P-77 Same (KJB47), 2 Block SE. of U.S. Hwy. 1, Blaney, South Carolina. Lat. 34°10'0" N., Long. 80°48'15", W. C.P. to add frequencies 3970V MHz toward Columbia and 3970V MHz toward Camden.

SC—3586-CF-P-77 Same (KJA71), 1208 Broad Street, Camden, South Carolina. Lat. 34°14'57" N., Long. 80°36'26" W. C.P. to add frequencies 4010V MHz toward Blaney and 4010V MHz toward Hartsville.

SC—3587-CF-P-77 Same (KJH41), 7 miles West of Hartsville, South Carolina. Lat. 34° 21'15" N., Long. 80°12'03" W. C.P. to add frequency 3970V MHz toward Camden.

TX—3472-CF-P-77 Southern Pacific Communications Company (new), C.P. for a new station to operate station WCT949, Houston, Texas on frequencies within Band 38700-38750 MHz in area defined by coordinates. Lat. 29°43'00"/29°48'00", Long. 95°20'00"/95°25'00".

WI—3481-CF-P-77 The Western Union Telegraph Company (WDE99), 1.7 miles NE. of Lake Geneva, Wisconsin. (Lat. 42° 37'19" Long. 88°25'56"), C.P. to add 11625V towards Hartland, Illinois on azimuth 189.6 degrees.

WI—3482-CF-P-77 Same (WGF87), 5 miles SW. of Hebron, Illinois. (Lat. 42°24'40" N., Long. 88°28'50" W.), C.P. to add 19855V towards Lake Geneva, Wisconsin, 6123.1V and 6063.8V MHz towards Sylvan Lake, Illinois on azimuths 09.6° and 119.0° respectfully.

IL—3483-CF-P-77 Same (WGF86), 1.0 miles West of Sylvan Lake, Illinois. (Lat. 42° 14'17" N. Long. 88°03'42" W.) C.P. to add 6404.8V and 6345.5V MHz towards Hartland Illinois 6375.2V and 6315.9V towards Chicago Illinois on azimuths 299.2° and 138.2° respectfully.

IL—3484-CF-P-77 Same (KSG95) Board of Trade Building Chicago Illinois. (Lat. 41° 52'40" N. Long. 87°37'56" W.) C.P. to add 5974.8V and 6093.5V towards Sylvan Lake, Illinois on azimuth 318.5°.

[Docket No. 21372; File No. 21432-CD-P-75; FCC 77-592]

JERRY C. SHAFFER

Designating Application for Hearing on Stated Issues

For a Construction Permit to establish a new two-way station in the Domestic Public Land Mobile Radio Service on base station frequency 454.175 MHz at Warren, Ohio. *Memorandum Opinion and Order.*

Adopted: August 24, 1977.

Released: September 6, 1977.

By the Commission:

In the matter of:

1. Presently before the Commission is an application filed on April 9, 1975 by Jerry C. Shaffer, File No. 21432–CD–P–75, for a construction permit to establish a new two-way mobile radio station on frequency 454.175 MHz to be located at Warren, Ohio. Anserphone, Inc. (Anserphone), a radio common carrier operating in Youngstown, Ohio, filed a "Petition to Deny Application" on May 14, 1975 and responsive pleadings where filed thereto.

2. The following issues were raised for our consideration and are discussed herein:

(a) State Certification.
(b) Need.
(c) Duplication of Service.
(d) Financial Qualifications.

3. *State Certification.* Anserphone contends that if Shaffer is to offer interconnected service, he would need the requisite authority from the Ohio Public Utilities Commission (Ohio PUC). Shaffer has stated that he plans to offer non-interconnected service only, and we have no reason to believe that he would offer interconnected service without first obtaining approval from the Ohio PUC for interconnected service. Accordingly, Anserphone's arguments concerning the need for state certification are hereby rejected.

4. *Need.* Anserphone contends that Shaffer has failed to demonstrate public need for the proposed facilities. Shaffer claims that he has adequately shown that there are various Warren area concerns interested in mobile radio service. We cannot find that this list comports with the requirements of New York Telephone Company, 47 FCC 2d 488, recon. denied, 49 FCC 2d 264 (1974), aff'd sub nom., Pocketphone *Broadcast Service, Inc.* v. *FCC*, 538 F. 2d 447 (D.C. Cir. 1976), because Shaffer does not indicate (1) when the individuals were contacted, (2) the number of individuals in each category who expressed an interest in the service, (3) the type of service they were interested in and whether they were aware that Shaffer's proposed service would not be interconnected, (4) the approximate number of one-way and two-way units for which Shaffer is holding orders, and (5) whether the individuals were notified of the approximate cost of the service. Mere assertions that individuals are aware of mobile service or the cost of mobile services are inadequate to demonstrate that the individual is aware of the applicant's proposed rates.

5. Shaffer also presented a list of 14 individuals from the Warren area who are not satisfied with radio service currently available but who would be interested in Shaffer's proposed service. Anserphone challenged the accuracy of this list, including letters from six individuals. Shaffer responded by reporting the results of his investigation of Anserphone's contentions. Of the 14 original individuals, seven are not currently interested in service from Shaffer and one was unavailable for comment. Of the remaining six, Shaffer submitted letters from five of these individuals. One letter was too vague to indicate interest in Shaffer's proposed service. Another individual had previously signed a letter submitted by Anserphone indicating that he was not dissatisfied with Anserphone's service. We are thus unable to ascertain where this individual stands. We are therefore left with three signed letters by individuals who are interested in Shaffer's service and assertions by Shaffer that a fourth person told Shaffer that he is interested in his service. Even for these four individuals we do not know (1) the type of service they are interested in and whether they are aware that Shaffer's proposed service would not be interconnected, (2) the approximate number of one-way and two-way units each would be interested in using, and (3) whether the individuals were notified of the approximate cost of the service.

6. Accordingly, we cannot find that Shaffer has demonstrated public need for the proposed facilities. It is thus necessary to designate this issue for a hearing.

7. *Duplication of Service.* Anserphone contends that there does not exist a need for the proposed facilities because existing common carriers in the area can accommodate the anticipated future need for service. Anserphone further argues that introduction of Shaffer into the Warren area market will fragment the market and thus jeopardize the economic base of existing carriers. Anserphone contends that this will cause a degradation of service to the public. We cannot agree with Anserphone. If Shaffer can demonstrate a public need for the proposed facilities, as required by New York Telephone, and absent a showing of adverse economic impact that is detrimental to the public interest, the Commission will not deny an application on the grounds that an applicant may duplicate services provided by another facility. Commonwealth Telephone Co., 61 FCC 2d 247 (1976); see also New York Telephone Company, 47 FCC 2d 488 (1974). We also point out that Anserphone's mere general allegations of adverse economic impact are insufficient to warrant the designation of this issue for a hearing. Cf. *WLVA, Inc.* v. *FCC*, 459 F. 2d 1286 (D.C. Cir. 1972).

8. *Financial Qualifications.* Anserphone contends that Shaffer does not have the financial ability to construct and operate the proposed facilities. In his letter amendments, Shaffer stated that he had on hand a base station, 17 UHF two-way mobile radios, and 37 paging units. He also indicated that the initial cash outlay would be only $1,025.00, and that the current portion of his long term debt is $9,777.76. The $11,400 cash on hand shown in Shaffer's June 30, 1976 balance sheeet adequately covers his construction costs and his current liabilities. Nevertheless, we cannot find that Shaffer has demonstrated that he is financially qualified to construct and operate the proposed facilities for one year, as required by Arlington Telephone Co., 27 FCC 2d 1 (1971), because his operating expenses must also be considered. Because we cannot find that Shaffer has demonstrated public need for the proposed facilities, see paragraphs 4–6 *supra*, we have no assurance that there will be sufficient revenues from enough subscribers to cover operating costs. Accordingly, we find that it is necessary to designate for a hearing the issue of whether Shaffer is financially qualified to construct and operate the proposed facilities.

9. Except as raised in the issues specified below, we find Shaffer to be legally, technically, and otherwise qualified to construct and operate the proposed facilities.

10. In view of the foregoing, *it is ordered*, That, pursuant to Section 309 of the Communications Act of 1934, as amended, the above-captioned application of Jerry C. Shaffer is designated for hearing upon the following issues:

(a) To determine whether Shaffer has demonstrated public need for the proposed non-interconnected facilities;

(b) To determine whether Shaffer is financially qualified to construct and operate the proposed facilities; and

(c) To determine, in light of the evidence adduced pursuant to the foregoing issues, whether a grant of the above-captioned application would serve the public interest, convenience and necessity.

12. *It is further ordered*, That the burden of introduction of evidence and the burden of proof is placed upon Jerry C. Shaffer.

13. *It is further ordered*, That the hearing shall be held at the Commission offices in Washington, D.C. at a time and place and before an Administrative Law Judge to be specified in a subsequent order.

14. *It is further ordered*, That Anserphone, Inc. is made a party to the proceeding.

15. *It is further ordered*, That the Chief, Common Carrier Bureau, is made a party to the proceeding.

16. *It is further ordered*, That parties may avail themselves of an opportunity to be heard by filing with the Commission pursuant to Section 1.221 of the Rules within 20 days of the release date hereof, a written notice stating an intention to appear.

FEDERAL COMMUNICATIONS COMMISSION
VINCENT J. MULLINS,
Secretary.

FEDERAL ELECTION COMMISSION

[Notice 1977-47, AOR 1977-41]

ADVISORY OPINION REQUESTS

Pursuant to 2 U.S.C. § 437f(c) and the procedures reflected in Part 112 of the Commission's regulations, published on August 25, 1976 (41 FR 35954), Advisory Opinion Request 1977–41 has been made public at the Commission. Copies of AOR 1977–41 were made available on September 9, 1977. These copies of the advisory opinion request were made available for public inspection and purchase at the Federal Election Commission, Public Records Division, at 1325 K Street NW., Washington, D.C. 20463.

Interested persons may submit written comments on any advisory opinion request within ten days after the date the request was made public at the Commission. These comments should be directed to the Office of the General Counsel, Advisory Opinion Section, at the Commission. Persons requiring additional time in which to respond to any advisory opinion requests will normally be granted such time upon written request to the Commission. All timely comments received by the Commission will be considered before the Commission issues an advisory opinion. Comments on pending requests should refer to the specific AOR number of the requests and statutory references should be to the United States Code citations rather than to the Public Law citations.

A description of the request recently made public as well as the identification of the requesting party follows hereafter:

AOR 1977–41: May surplus campaign funds received before the 1976 general election be used to repay a bank loan obtained and expended to retire debts from a 1969 special election campaign where the 1976 surplus was accumulated on behalf of the same individual who was a candidate in both 1969 and 1976?

Requested by Samuel H. Young, Young for Congress Committee—76, Skokie, Ill.

Dated: September 9, 1977.

THOMAS E. HARRIS,
Chairman for the Federal Election Commission.

FEDERAL ENERGY ADMINISTRATION

VOLUNTARY AGREEMENT AND PLAN OF ACTION TO IMPLEMENT THE INTERNATIONAL ENERGY PROGRAM

Meeting

In accordance with Section 252(c)(1)(A)(i) of the Energy Policy and Conservation Act (Pub. L. 94–136) notice is hereby provided of a meeting of Subcommittee A of the Industry Advisory Board to the International Energy Agency (IEA) to be held on September 22 and 23, 1977, at the offices of Exxon Corp., 1251 Avenue of the Americas, New York, N.Y., beginning at 9:30 a.m. on September 22. The agenda is as follows:

AGENDA

1. Opening remarks by Chairman: Report on communications to and from IEA; Report on the meeting of the Standing Group on Emergency Questions (SEQ) on July 12; Report by IEA Secretariat on Governing Board meeting of September 19 and 20, 1977.

2. Matters arising from record note of IAB meeting on June 21, 1977.

3. Position of Reporting Companies under:
(A) EEC competition regulations.
(B) U.S. Voluntary Plan.

4. Report by IEA Secretariat on:
(A) Status of National Emergency Sharing Organizations (NESOs).
(B) Participating governments briefing meeting on September 9, 1977.

5. Report on and discussion of work of Subcommittee A including:
(A) October–November 1977 Emergency Data Systems Test; including report on Reporting Company briefing meeting on September 8, 1977.
(B) Spring 1978 Allocation Systems Test including:
I. Data base to be used for test with particular reference to necessary governmental and other legal/clearances.
II. Work of Design Group to date.
III. Future work program.
(C) Emergency Management Manual.
(D) Comments on Progress Report by Chairman of the SEQ Working Group on demand restraint.

6. Report on and discussion of work of Subcommittee C including:
(A) Extraordinary and additional costs.
(B) Settlement of Disputes.
(C) Pricing in an emergency.

7. Report on Industry Supply Advisory Group (ISAG).

8. Dates and venues of future meetings of IAB and Subcommittees.

As povided in section 252(c)(1)(A)(ii) of the Energy Policy and Conservation Act, this meeting will not be open to the public.

Issued in Washington, D.C., September 8, 1977.

ERIC J. FYGI,
Acting General Counsel, Federal Energy Administration.

CUMULATIVE PRODUCTION/CONSUMPTION EFFECTS OF CRUDE OIL PRICE INCENTIVES

Availability of Draft Programmatic Environmental Impact Statement (DES 77–7)

AGENCY: Federal Energy Administration.

V 42 I 178 SEP 14 77 UMI

ACTION: Notice of availability.

SUMMARY: The Federal Energy Administration (FEA) has made available for public comment a draft programmatic environmental impact statement concerning the cumulative production/consumption effects of proposed crude oil price incentives.

DATE: Comments by October 25, 1977.

ADDRESS: Written comments to: Executive Communications, Box PF, Room 3317, Federal Energy Administration, Washington, D.C. 20461.

FOR FURTHER INFORMATION CONTACT:

Deanna Williams (FEA Reading Room), 12th and Pennsylvania Avenue, N.W., Room 2107, Washington, D.C. 20461 ((202) 566–9161).

Eugene Glass (Office of Price Regulation), 2000 M Street, N.W., Room 2310, Washington, D.C. 20461 ((202) 254–7477).

Robert Stern (Office of Environmental Policy), 12th and Pennsylvania Avenue, N.W., Room 7119, Washington, D.C. 20461 ((202) 566–9760).

J. Thomas Wolfe (Office of General Counsel), 12th and Pennsylvania Avenue NW., Room 7146, Washington, D.C. 20461, (202–566–9750).

SUPPLEMENTARY INFORMATION:

A. BACKGROUND

Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969 (NEPA), 42 U.S.C. 4332(2)(C), the Federal Energy Administration (FEA) has made available for public comment a draft programmatic environment impact statement (DEIS) concerning the cumulative production/consumption effects of crude oil price incentives.

The DEIS was prepared in support of the 40 month crude oil pricing program mandated by EPCA, which provides for upward adjustments in the statutory composite price of crude oil to take into account the effects of inflation and to provide incentives both for sustaining production from existing properties and for encouraging production from new properties.

The DEIS evaluates the effects on production of seven different price control options. These include alternate ways of dividing the allowable price increase between upper and lower price controlled tiers of tertiary oil, California low gravity oil and oil from low production offshore wells. For each pricing scenario, the volumes of domestic crude oil production for the years 1979 and 1985 are projected. These projections are further broken down by region and by type of technology employed (e.g., in-situ combustion, steam injection, etc.). These values were then used to derive national and regional changes in environmental residuals.

Single copies of the DEIS may be obtained from the National Energy Information Center, Room 1404, 12th and Pennsylvania Avenue, N.W., Washington, D.C. 20461. Copies of the draft statement will also be available for public review in the FEA Freedom of Information Library, Room 2107, Federal Building, 12th and Pennsylvania Avenue, N.W., Washington, D.C. between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

B. COMMENT PROCEDURE

Interested persons are invited to submit written comments to Executive Communications, FEA, Room 3309, Federal Building, 12th and Pennsylvania Avenue, N.W., Washington, D.C. 20461, Box PF. Comments should be identified on the outside of the envelope and on the document submitted to FEA with the designation "Comments on Draft Crude Oil Price Incentive Programmatic EIS". Ten copies should be submitted. All comments and related information should be received by October 25, 1977, in order to ensure consideration.

Any information or data considered by the person submitting it to be confidential must be so identified and submitted in one copy only. The FEA reserves the right to determine the confidential status of the information or data and to treat it according to that determination.

Issued in Washington, D.C., September 9, 1977.

ERIC J. FYGI,
Acting General Counsel,
Federal Energy Administration.

STATE ENERGY CONSERVATION PLANS

Negative Determination of Environmental Impact re the Nevada Energy Conservation Plan

Pursuant to 10 CFR 208.4, the Federal Energy Administration hereby gives notice that it has performed an analysis and review of the environmental impacts associated with the provision of Federal financial assistance for the implementation, by the State of Nevada, of its State Energy Conservation Plan. Federal funding is authorized by Part C of Title III of the Energy Policy and Conservation Act, 42 U.S.C. 6321, et seq.

Based upon assessment of environmental impacts that are expected to result from implementation of this plan the FEA has determined that Federal financial assistance will not be a "major Federal action significantly affecting the quality of the human environment" within the meaning of section 102(2)(C) of the National Environmental Policy Act of 1969, 42 U.S.C. 4332(2)(C). Therefore, pursuant to 10 CFR 208.4(c), the Federal Energy Administration has determined that an environmental impact statement is not required for this plan.

Single copies of the environmental assessment of the State Plan for Nevada are available upon request from the FEA National Energy Information Center, Room 1406, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461.

Copies of the environmental assessment will also be available for public review in the Federal Energy Administration Information Access Reading Room, Room 2107, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461.

A copy of the State Plan is available for public review in the Office of State Energy Conservation Programs, Room 6437, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461.

Interested persons are invited to submit data, views or arguments with respect to the environmental assessment to Executive Communications, Box PI, Room 3317, Federal Energy Administration, Washington, D.C. 20461.

Comments should be identified on the outside of the envelope and on documents submitted to FEA Executive Communications with the designation, "Environmental Assessment—Nevada Energy Conservation Plan." Fifteen copies should be submitted. All comments should be received by FEA by 4:30 p.m. e.d.s.t., September 21, 1977, in order to receive full consideration.

Any information or data considered by the person submitting it to be confidential must be so identified and submitted in one copy only. The FEA reserves the right to determine the confidential status of the information or data and to treat it according to that determination.

Issued in Washington, D.C., September 9, 1977.

ERIC J. FYGI,
Acting General Counsel,
Federal Energy Administration.

FEDERAL ENERGY ADMINISTRATION

ANTHRACITE COAL CONFERENCE

Postponement and Notice of Hearing

Notice is hereby given that the fourth Anthracite Coal Conference will be held on Thursday, October 6, 1977, at 10 a.m., Room 3000A, FEA Headquarters, 12th and Pennsylvania Avenue NW., Washington, D.C. This meeting is a postponement of the Anthracite Coal Conference originally scheduled for September 15, 1977, as published on September 2, 1977. This postponement results from the necessity of providing the conference participants with sufficient time to fully develop and assess their preliminary recommendations on the enhancement of anthracite coal production, and will allow the public additional time to arrange to attend this meeting.

The objectives of the Anthracite Coal Conference are to make recommendations to the FEA with respect to the increased utilization of anthracite coal as a readily-available energy source and the maintenance of fair and reasonable consumer prices for such supplies.

The importance of convening this conference stems from a priority commitment made by the President to find ways of improving coal production and utilization, without endangering the public health or degrading the environment. In support of this commitment the FEA was charged with the responsibility for studying methods to increase the production of anthracite coal. Analysis and development of policy recommendations to this end must be completed by the end of October.

Notice is also given that the subgroups to the conference, appointed at the first conference held on June 28, 1977, will hold meetings prior to the fourth conference.

The schedule and agenda of subgroup meetings is as follows:

UTILIZATION SUBGROUP

September 30, 1977—10 a.m., Pennsylvania Power & Light Co. Bldg., Two North Ninth Street, Allentown, Pa. Agenda: Preparation of final subgroup report.

MARKETING (TRANSPORTATION) SUBGROUP

October 5, 1977—10 a.m., ConRail, 1742 Six Penn Center Plaza, Philadelphia, Pa. Agenda: Identification of final recommendations and preparation of final subgroup report.

PRODUCTION SUBGROUP

September 30, 1977—1 p.m., Main Capital, South Office Building, Fourth Office Building, Harrisburg, Pa. Agenda: Discussion of draft decision papers and preparation of final subgroup report.

ENVIRONMENTAL SUBGROUP

October 3, 1977—10:30 a.m., Governor's Conference Room, State Office Building, Broad and Spring Garden Streets, Philadelphia, Pa. Agenda: Discussion of decision papers and preparation of final subgroup report.

TECHNOLOGY SUBGROUP

September 29, 1977—1 p.m., FEA Headquarters, Room 3000B, 12th and Pennsylvania Avenue NW., Washington, D.C. Agenda: Discussion of decision papers and preparation of final subgroup report.

The agenda for the October 6 conference will be a discussion of the issue options followed by a vote on these options to determine the consensus recommendations of the full conference. The final subgroup reports will be submitted at this time, and incorporated as supporting documentation for the final briefing to Secretary Schlesinger.

These meetings will be open to the public. The Chairman is empowered to conduct these meetings in a fashion that will, in his judgment, facilitate the orderly conduct of business. Any member of the public who wishes to file a written statement will be permitted to do so, either before or after the meeting.

Further information concerning these meetings may be obtained from Beth Nelson, Room 3502, FEA Headquarters, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461 (202–566–6230).

A Transcript of the conference and minutes of the subgroup meetings will be available for public review and copying at the Freedom of Information Public Reading Room; Room 2107, FEA Headquarters, 12th and Pennsylvania Avenue NW., Washington, D.C., between the hours of 8 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays. Any person may purchase a copy of the transcript from the reporter.

Issued at Washington, D.C., on September 12, 1977.

ERIC J. FYGI,
Acting General Counsel.

FEDERAL MARITIME COMMISSION

ALBANY PORT DISTRICT COMMISSION AND UNITED BRANDS CO.

Agreement Filed

Notice is hereby given that the following agreement has been filed with the Commission for review and approval, if required, pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of the agreement at the Washington office of the Federal Maritime Commission, 1100 L Street NW., Room 10126; or may inspect the agreement at the Field Offices located at New York, N.Y., New Orleans, Louisiana, San Francisco, California, and Old San Juan, Puerto Rico. Comments on such agreements, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C. 20573, on or before October 4, 1977. Any person desiring a hearing on the proposed agreement shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreement (as indicated hereinafter) and the statement should indicate that this has been done.

Notice of Agreement filed by:

Mr. Francis D. Barrett, Curry and Dolan, Southern Building, Washington, D.C. 20005.

Agreement No. T–2590–5, between the Albany Port District Commission (Port) and United Brands Company (UBC), modifies the parties' basic agreement providing for the use of certain office space and the preferential use of certain storage space at Transit Shed No. 2, Albany, New York. The purpose of the modification is to exercise the fourth option to renew the initial term of the agreement by: (1) Extending the term from December 1, 1977, to November 30, 1978; and (2) increasing the amount of compensation paid to the Port from $22,000 to $25,000.

Although this agreement may not be subject to section 15 of the Shipping Act, 1916, interested parties are given an opportunity to comment thereon if they so desire.

By Order of the Federal Maritime Commission.

Dated: September 9, 1977.

JOSEPH C. POLKING,
Acting Secretary.

[FR Doc.77-26696 Filed 9-13-77;8:45 am]

SOUTH CAROLINA STATE PORTS AUTHORITY AND PUERTO RICO MARITIME SHIPPING AUTHORITY

Agreement Filed

Notice is hereby given that the following agreement has been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of the agreement at the Washington office of the Federal Maritime Commission, 1100 L Street NW., Room 10126; or may inspect the agreement at the Field Offices located at New York, N.Y., New Orleans, Louisiana, San Francisco, California, and Old San Juan, Puerto Rico. Comments on such agreements, including requests for hearing, may be submitted to the secretary, Federal Maritime Commission, Washington, D.C. 20573, on or before October 4, 1977. Any person desiring a hearing on the proposed agreement shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreement (as indicated hereinafter) and the statement should indicate that this has been done.

Notice of agreement filed by:

Mr. Marion S. Moore, Jr., South Carolina State Ports Authority, P.O. Box 817, Charleston, South Carolina 29402.

Agreement No. T–3059–1, between South Carolina State Ports Authority (Authority) and Puerto Rico Maritime Shipping Authority (PRMSA), modifies the basic agreement which provides for the five-year lease of certain land area and preferential use of certain berths and cranes located at Authority's Columbus Street Terminal, Charleston, South Carolina. The purpose of the modification is to eliminate PRMSA's preferential use of Berth No. 1 and the container crane and grant to PRMSA the preferential use of Berth No. 2 and the Diamond crane.

By Order of the Federal Maritime Commission.

Dated: September 7, 1977.

JOSEPH C. POLKING,
Acting Secretary.

[Independent Ocean Freight Forwarder License No. 505–R]

AMCO CUSTOM BROKERAGE

Reinstatement of License

By Federal Maritime Commission Order served and published in the FED-

V 42 1178 SEP 14 77 UMI

ERAL REGISTER, Amco Custom Brokerage's Independent Ocean Freight Forwarder License No. 505–R was revoked, effective May 21, 1977, for failure to maintain a valid surety bond on file with the Commission. The Order of Revocation was published on June 1, 1977 in 42 FR 27986.

An appropriate surety bond has been received in favor of Amco Custom Brokerage and compliance pursuant to Section 44, Shipping Act, 1916 and, Section 510.9 of the General Order 4 has been achieved.

Therefore, by virtue of authority vested in me by the Federal Maritime Commission as set forth in Manual of Orders, Commission Order No. 1 (Revised) Section 7.04(a), dated September 15, 1973, Independent Ocean Freight Forwarder No. 505–R shall be reissued to Amco Custom Brokerage effective August 22, 1977. A copy of this Notice of Reinstatement shall be published in the FEDERAL REGISTER and served upon Amco Custom Brokerage.

LEROY F. FULLER,
Director, Bureau of Certification and Licensing.

FEDERAL POWER COMMISSION

[Docket No. CI77–758]

AMERADA HESS CORP.

Limited-Term Application

SEPTEMBER 7, 1977.

Take notice that on August 25, 1977, Amerada Hess Corporation (Applicant), 1200 Milam, 6th Floor, Houston, Tex. 77002, filed in Docket No. CI77–758 an application for a limited-term certificate of public convenience and necessity with pregranted abandonment authorizing it to engage in the sale of emergency gas.

Applicant seeks a limited-term certificate with pregranted abandonment to make a sale of emergency gas to Transcontinental Gas Pipe Line Corp. (Transco) for a two-year period commencing on the expiration of the 60-day emergency sale which was started on August 1, 1977, pursuant to Section 157.29 of the Regulations under the Natural Gas Act. The No. 1 Board of Supervisors Well was drilled as an exploratory well. The No. 1 Tolar Unit Well (15–6) was the second well drilled. Applicant is the owner of other oil and gas leases in the Greens Creek Field, Jefferson Davis and Marion Counties, Miss., adjoining the properties upon which the above designated wells are situated. Applicant and Transco have agreed to a two-year limited term contract in order to permit Applicant to determine and implement a plan of evaluation and development of the reservoir or reservoirs underlying its oil and gas leases in the Greens Creek Field. It is not known at this time whether or not the reservoir producing in the No. 1 Board of Supervisors Well and in which the No. 1 Tolar Unit Well (15–6) is completed underlies the lands covered by Applicant's other adjoining leases. During this two-year period Applicant proposes to evaluate the reserves and the reservoirs to determine whether additional development is justified on Applicant's other oil and gas leases in the field. Applicant states that until the above designated wells have been produced for a sufficient period of time an evaluation of the reservoirs and the reserves cannot be properly made, nor can Applicant make a determination on long-range marketing of such gas.

Applicant states it has received offers to sell the gas produced from the No. 1 Board of Supervisors Well and the No. 1 Tolar Unit Well (15–6) at prices in excess of the price proposed to be paid by Transco for gas sold under the two-year limited term contract. In addition, Applicant states that such price is the equivalent of the highest tier oil price being paid for oil produced in the area, converted into price per Mcf of gas.

It appears reasonable and consistent with the public interest in this case to prescribe a period shorter than 10 days for the filing of protests and petitions to intervene. Therefore, any person desiring to be heard or to make any protest with reference to said application should on or before September 14, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77–26658 Filed 9–13–77;8:45 am]

[Docket No. E–9603]

CAROLINA POWER & LIGHT CO.

Application

SEPTEMBER 6, 1977.

Take notice that Carolina Power and Light Co. (CP&L), on August 25, 1977, filed an application seeking an order pursuant to Section 203 of the Federal Power Act authorizing it to sell to the City of Fayetteville certain transmission substation facilities.

CP&L indicates that it is incorporated under the laws of the State of North Carolina with its principal business office at Raleigh, N.C. and is engaged in the electric utility business in parts of North Carolina and South Carolina.

CP&L also indicates that the City of Fayetteville, through the Public Works Commission (PWC), owns and operates electric transmission and distribution facilities within Cumberland County, N.C. for the purpose of supplying electric power and energy to its customers.

CP&L proposes, subject to regulatory approval, to perform its Agreement of June 13, 1977, with the PWC by selling to PWC certain substation transmission facilities located in CP&L's Owen Drive 230 KV Substation. CP&L states that the purchase of these facilities will allow PWC to receive totalized metering for two points of delivery under CP&L's applicable resale service schedule as amended by Agreement dated June 30, 1977.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C., 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8 and 1.10). All such petitions or protests should be filed on or before September 12, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. RM77–14]

GAS RESEARCH INSTITUTE

Conference

SEPTEMBER 7, 1977.

Take notice that on September 14, 1977, at 10 a.m., a conference of all interested persons will be convened in this proceeding. The conference will be held at the offices of the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. This conference is a continuation of the conference held on August 17, 1977, pursuant to Commission order issued July 29, 1977, in this docket.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77–26659 Filed 9–13–77;8:45 am]

[Docket No. CI77–721]

HARKINS & COMPANY

Limited-Term Application

SEPTEMBER 7, 1977.

Take notice that on August 11, 1977, Harkins & Company (Applicant), P.O. Box 1940, Alice, Tex. 78332, filed in Docket No. CI77–721 for itself and as operator for Amerada Hess Corp., First Mississippi Corp., and St. Joe Petroleum (U.S.) Corp., pursuant to Section 157.23, as amended, of the Commission's Regulations under the Natural Gas Act and Section 2.70 of the Commission's General Policy and Interpretations, for a limited-term certificate of public convenience and necessity with pregranted abandonment authorizing it to engage in the sale of emergency gas.

Applicant seeks a limited-term certificate with pregranted abandonment to make a sale of emergency gas to Transco for a two-year period commencing on the expiration of the 60-day emergency sale which was started on August 1, 1977, pursuant to Section 157.29 of the Regulations under the Natural Gas Act. The No. 1 Board of Supervisors Well was drilled as an exploratory well. The No. 1 Tolar Unit Well (15–6) was the second well drilled. Applicant is the owner of other oil and gas leases in the Greens Creek Field, Jefferson Davis and Marion Counties, Miss., adjoining the properties upon which the above designated wells are situated. Applicant and Transco have agreed to a two-year limited term contract in order to permit Applicant to determine and implement a plan of evaluation and development of the reservoir or reservoirs underlying its oil and gas leases in the Greens Creek Field. It is not known at this time whether or not the reservoir producing in the No. 1 Board of Supervisors Well and in which the No. 1 Tolar Unit Well (15–6) is completed underlies the lands covered by Applicant's other adjoining leases. During this two-year period Applicant will evaluate the reserves and the reservoirs to determine whether additional development is justified on Applicant's other oil and gas leases in the field. Until the above designated wells have been produced for a sufficient period of time an evaluation of the reservoirs and the reserves cannot be properly made, nor can Applicant make a determination on long-range marketing of such gas.

Applicant has received offers to sell the gas produced from the No. 1 Board of Supervisors Well and the No. 1 Tolar Unit Well (15–6) at prices in excess of the price to be paid by Transco for gas sold under the two-year limited-term contract. In addition, the price to be paid by Transco hereunder is the equivalent of the highest tier oil price being paid for oil produced in the area, converted into price per Mcf of gas.

It appears reasonable and consistent with the public interest in this case to prescribe a period shorter than 10 days for the filing of protests and petitions to intervene. Therefore, any person desiring to be heard or to make any protest with reference to said application should on or before September 16, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[Project No. 2593]

LATEX FIBER INDUSTRIES, INC., AND BEAVER FALLS POWER CO.

Application for Transfer of Minor License

SEPTEMBER 7, 1977.

Public notice is hereby given that an application was filed on June 6, 1977, under the Federal Power Act, 16 U.S.C. 791a–825r, by Latex Fiber Industries, Inc. (Licensee) and Beaver Falls Power Co. (Transferee) (Correspondence to: Mr. John P. Borgwardt, Assistant Secretary, Boise Cascade Corp., P.O. Box 1414, Portland, Oreg. 97207) for transfer of its minor license of the Beaver River Project, FPC No. 2593, located on the Beaver River in the towns of Croghan and New Bremen and the Village of Beaver Falls, Lewis County, N.Y.

According to the application, Latex Fiber Industries, Inc., has been sold to the Boise Cascade Corp., which wants to operate the Beaver Falls Project through its subsidiary, Beaver Falls Power Co.

The Beaver River Project consists of: (1) A reservoir which at normal headwater level has a surface area of approximately 48 acres; (2) a concrete gravity spillway dam with an overall length of 400 feet and a maximum height of 25 feet to spillway crest elevation 799.0 feet (U.S.G.S. datum); (3) a concrete and block powerhouse with an installed capacity of 1,500 kw; and (4) appurtenant facilities.

All of the power developed by this project is transmitted directly to the Licensee's paperboard mill for purposes of manufacturing.

Any person desiring to be heard or to make protest with reference to said application should, on or before October 25, 1977, file with the Federal Power Commission, 825 N. Capitol St. NE., Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to a proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules. The application is on file with the Commission and available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Project No. 632]

MONROE CITY CORP.

Application for Minor License for Hydroelectric Project

SEPTEMBER 7, 1977.

Public notice is hereby given that an application for a new minor license has been filed under the Federal Power Act, 16 U.S.C. 791a–825r, by Monroe City Corp. (Correspondence to: Mr. Norris Jensen, Mayor, Monroe City Corporation, Monroe, Utah 84745) for its constructed Lower Monroe Hydroelectric Project, FPC Project No. 632. The project is located on Monroe Creek in Fish Lake National Forest in Sevier County, Utah.

The existing project consists of: (1) A 3-foot-high and 13-foot-long concrete overflow-type diversion dam topped with 3-foot-high flashboards; (2) a concrete intake structure with a trash rack and a 21-inch-diameter cast iron pipeline 100 feet long; (3) a 4,405-foot-long welded steel penstock of which 24 feet is 20-inch-diameter pipe and 4,381 feet is 16-inch-diameter pipe; (4) a powerhouse containing a Pelton wheel connected to a generator rated at 100 kW; (5) a 2.4 kV 3-phase transmission line 3,420 feet

V 421178 SEP 14 77 UMI

long; and (6) appurtenant facilities.

All power produced by the project is delivered to Applicant's interconnected system.

Any person desiring to be heard or to make protest with reference to said application should, on or before November 7, 1977, file with the Federal Power Commission, 825 N. Capitol St. NE., Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken, but will not serve to make the protestants parties to a proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

The application is on file with the Commission and available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. ER77-566]

NEW ENGLAND POWER CO.

Proposed Supplements

SEPTEMBER 6, 1977.

Take notice that New England Power Co. (NEPC), on August 26, 1977, tendered for filing proposed supplements to its FPC Electric Service Tariff Number 3. NEPC indicates that the proposed tariff provisions provide the terms and conditions for continuation of contract demand (CD) service after October 31, 1981. NEPC states that the present CD tariff provisions expire by their own terms on October 31, 1981. An effective date of September 26, 1977 is requested.

According to NEPC copies of the filing were served on the NEPC's jurisdictional customers and on the State regulatory commissions of Massachusetts, New Hampshire, and Rhode Island.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with sections 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before September 12, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 77-26657 Filed 9-13-77;8:45 am]

[Docket No. CP77-595]

NORTHERN NATURAL GAS CO.

Application

SEPTEMBER 7, 1977.

Take notice that on August 29, 1977, Northern Natural Gas Co. (Applicant), 2223 Dodge Street, Omaha, Nebr. 68102, filed in Docket No. CP77-595 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the delivery of raw natural gas on a firm basis to Warren Petroleum Co. (Warren), and the receipt of residue gas therefrom, all in Lea County, N. Mex., pursuant to a Eunice Gas Processing Agreement (Eunice Agreement) dated January 12, 1977, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that pursuant to a Gas Purchase and Sales Agreement dated January 31, 1973, between it and El Paso Natural Gas Co. (El Paso), Applicant sells raw gas to El Paso which gas is delivered by Applicant to Warren for El Paso's account. It is said that Warren then processes the raw gas in its Eunice Gas Processing Plant for El Paso which in turn sells and delivers to Applicant the residue gas. Such arrangement with El Paso is on a best-effort basis, and is certificated through October 26, 1978, it is said.

Pursuant to the Eunice Agreement, Applicant would deliver to Warren raw natural gas for processing on a firm basis an average of 5,000 Mcf per day through March 31, 1979, and on a best efforts basis, additional raw natural gas at a rate of up to 10,000 Mcf per day during the period, November 1, 1977, through March 31, 1978, and up to 5,000 Mcf per day during the period, November 1, 1978, through March 31, 1979. Applicant further indicates that the Eunice Agreement will continue in effect after the primary term, which ends March 31, 1979, subject to termination by either party upon appropriate notification.

It is asserted that Applicant will pay initially 30 cents per Mcf of raw gas delivered to Warren by Applicant for processing during the first contract year and that 50 percent of the ethane extracted during the processing will be owned by Warren. The balance of the ethane along with all other liquid hydrocarbons extracted would be owned by Applicant.

Applicant states that granting the requested authorization will assure it that the necessary capacity will be available at Warren's Eunice plant to treat, dehydrate and process raw gas through March 31, 1979, and will provide for the continuation of the service thereafter if Applicant has such need.

Any person desiring to be heard or to make any protest with reference to said application should on or before September 29, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed or if the Commission on its own motion, believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[Docket Nos. RI77-43, RI77-61]

T. E. L. OIL & GAS, ET AL.

Amended Petition for Special Relief

SEPTEMBER 7, 1977.

Take notice that on August 2, 1977 T. E. L. Oil and Gas Corp., et al. (Petitioner), P.O. Box 292, Guymon, Okla., amended its petition for special relief in the above-captioned dockets filed April 15, 1977, pursuant to section 2.76 of the Commission's rules of practice and procedure. By this amendment petitioner seeks a total rate of approximately 75.65 cents per Mcf for the sale of gas produced from the Hamby Gas Well Unit and the Guymon Townsite Gas Unit located in Guymon, Texas County, Okla. Petitioner in its filings of April 15, 1977, was seeking a total rate of 78.188 cents per Mcf.

It appears reasonable and consistent with the public interest in this case to prescribe a period shorter than 15 days for the filing of protests and petitions to intervene. Therefore, any person desiring to be heard or to make any protest with reference to said application should on or before September 19, 1977, file a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 and 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

KENNETH F. PLUMB,
Secretary.

[Docket No. CP76-107]

TRANSWESTERN PIPELINE CO.

Petition To Amend; Correction

AUGUST 31, 1977.

In FR Doc. 77-23661, issued on August 9, 1977 and published at 42 FR 41459, Wednesday, August 17, 1977, in the bracket in the heading change "CP77-107" to read "CP76-107", and in the fourth line of the first paragraph and in the third line of the second paragraph, change "CP77-107" to read "CP76-107".

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-26668 Filed 9-13-77;8:45 am]

[Docket No. ER77-311]

UTAH POWER & LIGHT CO.

Order Permitting Late Intervention

SEPTEMBER 7, 1977.

On April 26, 1977, Utah Power & Light Co. (Utah) submitted for filing proposed rate schedule changes to its FPC Electric Tariff. Notice of this filing was issued on April 29, 1977, with responses due on or before May 11, 1977.

On May 6, 1977, Lincoln Service Corp. (Lincoln), filed a request for an extension of time until June 6, 1977, within which to file a protest and/or petition to intervene. On June 6, 1977, Lincoln asked for further extension until July 6, 1977, and by notice of June 7, 1977 the Secretary granted such extension.

On July 21, 1977, Lincoln filed an untimely Protest and Petition to Intervene. Lincoln asserts that it is a jurisdictional customer of Utah and serves approximately 4,000 customers in Western Wyoming. Lincoln asserts that a timely intervention petition was not filed because Lincoln erroneously believed all matters of dispute would be settled and such settlement now appears unlikely.

The Commission finds: (1) Participation by Lincoln in this proceeding may be in the public interest.

The Commission orders: (A) Lincoln Service Corporation is hereby permitted to intervene in this proceeding subject to the rules and regulations of the Commission: *Provided, however,* That participation of such intervenor shall be limited to the matters affecting asserted rights and interests specifically set forth in the petition to intervene; and, *Provided, further,* That the admission of such intervenor shall not be construed as recognition by the Commission that it might be aggrieved by any order entered in this proceeding.

(B) The grant of late intervention will not be the basis for any change in procedural dates established by the Commission Order issued June 23, 1977, in this proceeding.

(C) The Secretary of the Federal Power Commission shall cause prompt publication of this Order in the FEDERAL REGISTER.

By the Commission.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-26665 Filed 9-13-77;8:45 am]

[Docket No. ER77-311]

UTAH POWER & LIGHT CO.

Compliance Filing

SEPTEMBER 8, 1977.

Take notice that Utah Power and Light Co. (UP&L) on July 22, 1977, tendered for filing:

Revised sheets in UP&L's FPC Electric Tariff:
(a) Nineteenth Revised Sheet No. 1
(b) Sixth Revised Sheets Nos. 4.1 and 4.2
(c) Sixth Revised Sheets Nos. 5.1 and 5.2
(d) Fifth Revised Sheets Nos. 5A.1 and 5A.2.
(2) Supplemental testimony of Orrin T. Colby.
(3) Supplemental testimony of A. R. Dunn.
(4) Supplemental testimony of Frank N. Davis.

UP&L states that this filing is made solely for the purpose of complying with the Commission Order issued June 23, 1977, in the above noted docket.

Any person desiring to be heard or to protest said filing should file a protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such protests should be filed on or before September 22, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-26666 Filed 9-13-77;8:45 am]

[Docket No. CP74-33]

TRANSCONTINENTAL GAS PIPE LINE CORP.

Petition To Amend

SEPTEMBER 6, 1977.

Take notice that on July 27, 1977, Transcontinental Gas Pipe Line Corp. (Petitioner), P.O. Box 1396, Houston, Tex. 77001, filed in Docket No. CP74-33, a petition to amend the Commission's order of February 26, 1975 (53 FPC ____), as amended August 31, 1976 (54 FPC ____) and May 27, 1977 (57 FPC ____), issued in the instant docket pursuant to Section 7 of the Natural Gas Act by authorizing Petitioner to complete the development of the Washington Storage Field, St. Landry Parish, La. and to render additional storage service, all as more fully set forth in the petition to amend which is on file with the Commission and open to public inspection.

It is indicated that in the order of February 26, 1975, Petitioner was authorized to develop the Washington Field to an initial level of 30,000,000 dt equivalent of natural gas top storage, in three stages, reaching the full 30,000,000 dt withdrawal capability by the 1978-79 winter season. Of the total initial 30,000,000 dt level of top storage capacity, Petitioner had commitments for utilization of 26,130,000 dt from its customers, it is said. It is stated that the top storage potential of the Washington Field is rated at 60,000,000 dt, which assumes gas with a heating value of 1,000 Btu's per cubic foot.

It is indicated that in the order of August 31, 1976, Petitioner was authorized to render additional storage service up to the level of 30,000,000 dt of top storage

V 42 N 178 SEP 14 77 UMI

capacity, and to install additional compression and to modify field piping. By the order of May 27, 1977, Petitioner was authorized to increase the top storage capacity of the Washington Field to 40,000,000 dt, to install an additional dehydration unit, and to render an additional 9,371,500 dt of storage service to its customers for the 1977–78 winter season.

Petitioner asserts that one customer who had requested an increment of storage service beginning with the 1977–78 season has reduced its request and another customer has withdrawn its request for storage service (see attached appendix). Reflecting these changes, the present total of the allocated quantities of the available top storage in the Washington Field is 38,380,820 dt, it is indicated.

It is stated that Petitioner's customers have requested additional storage service for increased protection for their high priority requirements, beginning with the 1978–79 winter season. To fulfill these requests, Petitioner proposes in the instant petition to expand the top storage capability of the Washington Storage Field to 60,000,000 dt.

Petitioner submitted the table below which summarizes the present status of the allocations and commitments for future service from the Washington Storage Field:

	In dt
Present allocations for the 1977–78 season	38,380,820
Commitments for future seasons:	
1978 to 1979	9,459,245
1979 to 1980	750,000
1980 to 1981	5,000,000
Total allocations and commitments	53,590,065
Unallocated	6,409,935
Total top storage capacity	60,000,000

With the installation of the additional facilities, the estimated total investment in the Washington Storage Field will be $93,725,000.

Petitioner requests authorization to install and operate an additional 11,000 horsepower compressor unit in Station 54 in the field and to construct and operate 3.45 miles of 12-inch and 16-inch field lines. Also, 4,800,000 Mcf of additional base gas would be required to be injected in the field to attain the proposed level of expanded top storage capacity, it is said. Petitioner estimates that the cost of the proposed facilities and the additional base gas is $14,440,000.

It is indicated that of the additional 20,000,000 dt of top storage capacity that would become available in the Washington Field with the additional proposed facilities, Petitioner's customers, so far, have subscribed for 9,459,245 dt of increased storage service beginning with the 1978–79 winter season. Additional increments of storage service have been subscribed for the 1979–80 and 1980–81 seasons bringing total commitments to 53,590,065 dt, it is said.

It is stated that the facilities proposed, and the cost of the additional injected base gas, would be financed initially from short-term loans and available cash and that permanent financing would be undertaken as a part of an overall financing program at a later date.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before September 26, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Precedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

KENNETH F. PLUMB,
Secretary.

FEDERAL RESERVE SYSTEM

JEFFERSON COUNTY AGENCY, INC.

Formation of Bank Holding Company

Jefferson County Agency, Inc., Daykin, Nebr., has applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to become a bank holding company by acquiring 100 percent of the voting shares of Jefferson County Bank, Daykin, Nebr. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Kansas City. Any person wishing to comment on the application should submit views in writing to the Reserve Bank, to be received not later than September 28, 1977.

Board of Governors of the Federal Reserve System, September 8, 1977.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

[FR Doc.77-26640 Filed 9-13-77;8:45 am]

REPUBLIC OF TEXAS CORP.

Order Approving Acquisition of Bank

Republic of Texas Corporation, Dallas, Tex., a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval under section 3(a)(3) of the Act (12 U.S.C. 1842(a)(3)) to acquire all of the voting shares (less directors' qualifying shares) of the successor by merger to First Bank & Trust, Carrollton, Tex. ("Bank"). The bank into which Bank is to be merged has no significance except as a means to facilitate the acquisition of the voting shares of Bank. Accordingly, the proposed acquisition of shares of the successor organization is treated herein as the proposed acquisition of the shares of Bank.

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with section 3(b) of the Act. The time for filing comments and views has expired, and the Board has considered the application and all comments received, in light of the factors set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Applicant is the fourth largest banking organization in Texas and controls 11 banking subsidiaries, with aggregate deposits of approximately $3.2 billion, representing 6.1 percent of total commercial bank deposits in the State.[1] Acquisition of Bank ($14.9 million in deposits) would increase Applicant's share of commercial bank deposits in Texas by 0.03 percent but would not alter Applicant's ranking in the State.

By order dated October 25, 1973, the Board approved the application of Applicant to become a bank holding company through the direct acquisition of Republic National Bank of Dallas ("Republic Bank") and the indirect acquisition of 29.9 percent of the voting shares of Oak Cliff Bank & Trust Co., Dallas, Tex. In addition to its interest in Bank, Republic Bank at the time also owned indirectly between 5 and 24.99 percent of the eshares of twenty other banks, seventeen of which were in the Dallas banking market.[2] Applicant represented to the Board that it would file separate applications for prior approval by the Board for acquisition of additional shares in each of certain of those banks, and would divest completely its interests in others. In its Order the Board stated that each such application filed by Applicant would be considered on its own merits in light of the statutory standards set forth in § 3 of the Act. Since that time Applicant has divested its interest in eight of the Dallas-area banks, and has applied to acquire additional shares in five of the Dallas-area banks.[3]

Bank is the 67th largest banking organization in the Dallas banking market and controls 0.15 percent of the total deposits held by commercial banks in the market. Applicant is already a significant competitor in the Dallas banking market. The recent addition of First National Bank in Garland, Garland, Tex., Dallas National Bank in Dallas, Dallas, Tex., and Midway National Bank of Grand Prairie, Grand Prairie, Tex., as subsidiaries increased Applicant's share of the deposits to 25.7 percent, and at the present time Applicant controls the first and eighth largest banks in the market plus three smaller banks. In addition, the seven banks in the Dallas market (including Bank) in which Applicant presently holds minority interests have aggregate deposits of $513.7 million, representing 5.2 percent of market deposits.

While consummation of the proposal would appear to eliminate some existing competition inasmuch as Applicant and Bank operate in the same market, the Board notes that Applicant, or its predecessor in interest, Republic Bank, has held 20 percent or more of the shares of Bank since its formation in 1963, and that the nature of this relationship is such that little, if any, meaningful competition presently exists between Bank and Applicant's subsidiary banks in the Dallas market. But for the history of the established relationship between Applicant and Bank, the effects on existing competition would be viewed as more serious, but viewed in light of that relationship the effects are only slight. Moreover, while Applicant is the largest organization in the banking market, in view of the facts presented in the record of this application, the Board does not regard the slight increase in concentration of market deposits as significant. Accordingly, the Board concludes that the proposed acquisition of Bank by Applicant would not have significant adverse effects on competition.

The financial and managerial resources of Applicant, its subsidiaries, and Bank are regarded as generally satisfactory and consistent with approval of the application. Considerations relating to banking factors are also consistent with approval of the application. Following consummation of the transaction, Applicant intends to assist Bank in expanding its residential real estate lending activities and its commercial loan and deposit services as well as expanding Bank's drive-in facilities. These considerations relating to convenience and needs of the community to be served while not substantial, lend some weight toward approval of the application, and in the Board's view, outweigh any slightly adverse competitive effects that might result from consummation of this proposal. Accordingly, it is the Board's judgment that the proposed acquisition would be in the public interest and that the application should be approved.

On the basis of the record, the application is approved for the reasons summarized above. The transaction shall not be made (a) before the thirtieth calendar day following the effective date of this Order or (b) later than three months after the effective date of this Order, unless such period is extended for good cause by the Board, or by the Federal Reserve Bank of Dallas pursuant to delegated authority.

[1] All banking data are as of December 31, 1976, and reflect bank holding company formations and acquisitions approved as of July 1, 1977.

[2] The Dallas banking market is approximated by the Dallas RMA.

[3] By order dated June 20, 1977 (42 FR 32587), the Board denied Applicant's proposal to acquire Preston State Bank, Dallas, Tex.

By order of the Board of Governors,[4] effective September 7, 1977.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

[FR Doc.77-26641 Filed 9-13-77;8:45 am]

UNITED BANCORP

Proposed Acquisition of Family Finance Corporation

United Bancorp, Roseburg, Oreg., has applied, pursuant to Section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(2) of the Board's Regulation Y (12 CFR 225.4(b)(2)), for permission to acquire voting shares of Family Finance Corp., Roseburg, Oreg. Notice of the application was published on August 17, 1977, in The News-Review, a newspaper circulated in Roseburg, Oreg.

Applicant states that the proposed subsidiary would engage in the activities of operating as a consumer finance company and acting as insurance agent for credit life and health insurance in connection with extensions of credit by Family Finance Corp. Such activities have been specified by the Board in § 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of § 225.4(b).

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question should be accompanied by a statement summarizing the evidence the person requesting the hearing proposes to submit or to elicit at the hearing and a statement of the reasons why this matter should not be resolved without a hearing.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of San Francisco.

Any views or requests for hearing should be submitted in writing and received by the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, not later than October 6, 1977.

Board of Governors of the Federal Reserve System, September 8, 1977.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

GENERAL ACCOUNTING OFFICE

REGULATORY REPORTS REVIEW

Receipt of Report Proposals

The following requests for clearance of reports intended for use in collecting information from the public were received by the Regulatory Reports Review Staff, GAO, on September 6, 1977 (ICC), and September 7, 1977 (FMC and FTC). See 44 U.S.C. 3512 (c) and (d). The purpose of publishing this notice in the FEDERAL REGISTER is to inform the public of such receipt.

The notice includes the title of each request received; the name of the agency sponsoring the proposed collection of information; the agency form number, if applicable; and the frequency with which the information is proposed to be collected.

Written comments on the proposed FMC, FTC and ICC requests are invited from all interested persons, organizations, public interest groups, and affected business. Because of the limited amount of time GAO has to review the proposed requests, comments (in triplicate) must be received on or before October 3, 1977, and should be addressed to Mr. John M. Lovelady, Acting Assistant Director, Regulatory Reports Review, United States General Accounting Office, Room 5033, 441 G Street NW., Washington, D.C. 20548.

Further information may be obtained from Patsy J. Stuart of the Regulatory Reports Review Staff, 202–275–3532.

INTERSTATE COMMERCE COMMISSION

The ICC requests an extension without change clearance of Form ACC–42, Application for Annual or Basic Valuation. All pipeline companies subject to Part 1(b) of the Interstate Commerce Act requesting a basic or annual updated valuation, under Section 19a, must submit the request on this application form. ICC estimates about 100 pipeline companies are subject to Section 19a of the Interstate Commerce Act and about 90 applications are received each year and that reporting burden averages one hour per response.

FEDERAL TRADE COMMISSION

The FTC requests clearance of a new voluntary single-time Pre-Sale Availability Questionnaire, pursuant to the authority granted in the Magnuson-Moss Warranty Act—Federal Trade Commission Improvement Act (15 U.S.C. 2301 et seq.). The FTC's Washington Regional Office will mail the questionnaire to approximately 200 retailers within the Pennsylvania, Maryland, Delaware, West Virginia, Virginia and Washington, D.C. area. This survey will identify those retailers who are either unaware of the FTC's Rule on the Pre-sale Availability of Written Warranty Terms or are knowingly not complying with the rule. FTC estimates respondent burden to average 1.5 hours per response.

FEDERAL MARITIME COMMISSION

The FMC requests clearance of a revision to 46 CFR 531, Filing of Freight and Passenger Rates, Fares, and Charges, in the Domestic Offshore Trade, Publication and Posting. The existing part 531 will be replaced in its entirety by 46 CFR 531, Publishing, Filing and Posting Common Carrier Tariffs in the Domestic Offshore Commerce. The new part 531 sets forth revised standards concerning the construction and manner of filing tariffs in the Domestic Offshore Commerce. FMC estimates that initial compliance with these rules will impose an additional one-time burden of 94 hours per respondent and that the annual burden will average approximately 98 hours per respondent.

NORMAN F. HEYL,
Regulatory Reports Review Officer.

[FR Doc.77-26715 Filed 9-13-77;8:45 am]

REGULATORY REPORTS REVIEW

Receipt and Approval of a Proposed Report

A request for clearance of a revision to a proposed report intended for use in collecting information from the public was received by the Regulatory Reports Review Staff, GAO, on August 24, 1977. See 44 U.S.C. 3512 (c) and (d). The purpose of publishing this notice is to inform the public of such receipt and the action take by GAO.

FEDERAL COMMUNICATIONS COMMISSION

FCC requested emergency clearance of its revised Equal Employment Opportunity Program reporting requirement set forth in the Commission's Report and Order (Docket 20550, Nondiscrimination in the Employment Policies and Practices of Broadcast Licensee, adopted August 19, 1977). This revised reporting requirement is prescribed in the Commission's Rules and Regulations (§§ 73.125, 73.301, 73.599, 73.680, and 73.793). Applicants for a construction permit for a new facility, for assignment of license or construction permit or for transfer of control (other than pro forma or involuntary assignments and transfers), and applicants for renewal of license who have not previously done so, shall file with the Commission programs designed to provide equal employment opportunities for Negroes, Orientals, American Indians, Spanish-surnamed Americans, and women, or amendments to such programs. Guidelines for the preparation of such programs are set forth in the Commission's Report and Order, 60 FCC 2d 618 (1976). A program need not be filed by any station having less than five full-time employees or with respect to any minority group which is represented in such insignificant numbers in the area that a program would not be meaningful. In the latter situation, a statement of explanation should be filed.

The revised reporting requirement will be filed with the following FCC Forms: 301, 303, 303–R, 309, 311, 314, 315, 340, and 342. The Federal Communications Commission estimates the respondent burden to be 7½ hours by response with approximately 7,208 respondents.

The GAO reviewed the submission and determined that the revised reporting requirement was the direct result of a decision of the U.S. Court of Appeals for the Second Circuit, decided August 5, 1977. In as much as the Court ordered FCC to collect information from licensees employing five or more full-time employees rather than their current requirement which required licensees with more than ten full-time employees to report, GAO cleared the new reporting requirement. The GAO clearance was provided under B–180227 (R0417).

NORMAN F. HEYL,
Regulatory Reports Review Officer.

[FR Doc.77–26714 Filed 9–13–77;8:45 am]

REGULATORY REPORTS REVIEW

Receipt and Approval of Proposed Reports

A request for reinstatement of proposed reports intended for use in collecting information from the public were accepted by the Regulatory Reports Review Staff, GAO on August 31, 1977. See 44 U.S.C. 3512 (c) and (d). The purpose of publishing this notice is to inform the public of such receipt and the action taken by GAO.

FEDERAL ENERGY ADMINISTRATION

The Federal Energy Administration requested reinstatement of four clearances used in the FEA Coal Utilization Program; FEA Form C602–S–1, Major Fuel Burning Installation Coal Conversion Report; FEA Form C603–S–0, Powerplants in the Early Planning Process Indentification Report; FEA Form C607–S–0, Major Fuel Burning Installation Early Planning Process Identification Report, Schedules A–1 and A–2; and FEA Form C607–S–0, Major Fuel Burning Installation Early Planning Process Identification Report, Schedule A–3. All data elements and requirements for these forms remain the same as initially approved by GAO.

The last time these forms were submitted for clearance, they were subjected to a public comment period during the GAO review. (41 FR 19161 dated May 10, 1976; 41 FR 29041 dated July 14, 1976; 41 FR 51469 dated November 22, 1976; and 41 FR 55239 dated December 17, 1976.) When GAO cleared the forms, the expiration of the clearances were set to coincide with the life of the program, which was to end June 30, 1977, rather than a full three-year period. Since the life of the program has now been extended until December 31, 1978, by the Federal Energy Administration Authorization Act of 1977, GAO has approved the reinstatement of the clearances until December 31, 1978. The new expiration date closely approximates the date which GAO would have given the last time had the program life been at least three years. The GAO clearance was effective September 9, 1977, and the clearance numbers are B–181254 (RO370) for Form FEA–C602–S–1, B–181254 (RO196) for Form FEA–C603–S–0, B–181254 (RO424) for Schedules A–1 and A–2 of Form FEA–C607–S–0, and B–181254 (RO431) for Schedule A–3 of Form FEA–C607–S–0.

NORMAN F. HEYL,
Regulatory Reports Review Officer.

GENERAL SERVICES ADMINISTRATION

COST OF TRAVEL AND OPERATION OF PRIVATELY OWNED VEHICLES

Report

The Travel Expense Amendments Act of 1975 (Pub. L. 94–22) requires the periodic investigation of the cost to employees of travel and of operating privately owned automobiles, motorcycles, and airplanes while engaged on official business. Further, the Act requires that the results of these investigations be reported to Congress and published in the FEDERAL REGISTER upon final determination of the average actual cost.

Publication of the following report is in compliance with the requirements of the Act.

Dated: August 23, 1977.

JOEL W. SOLOMON,
Administrator, General Services Administration.

REPORT TO CONGRESS

The General Services Administration has concluded the investigations of the cost of travel and the cost of operating privately owned automobiles, airplanes, and motorcycles. Based on the results of the investigations, I am reporting our determination that the average cost per mile for the operation of a privately owned vehicle is 17 cents for a standard size automobile, 15 cents for motorcycles, and 36 cents for airplanes. Inasmuch as the statutory limitation for the above is 20 cents for automobiles, 11 cents for motorcycles, and 24 cents for airplanes, the governing regulations will be amended to reflect the 17 cent rate for automobiles. Since the allowances for airplanes and motorcycles are already at the statutory maximum levels, they cannot be increased administratively.

Our investigations have also concluded that a significant savings will accrue to the Government by revising the method of reimbursement to permit establishment of a flat daily amount as reimbursement for the fixed costs of operating privately owned vehicles, plus an amount per mile (per hour for airplanes) for the variable costs of operating privately owned vehicles. Since this method of reimbursement is more compatible with the way in which costs are incurred, it will neither reward nor penalize Government travelers. Currently, the allowable amounts would be $3.18 per day and 7 cents per mile for automobiles, $15.98 per day and $11.28 per hour for airplanes, and $1.12 per day and 6 cents per mile for motorcycles. Since implementation of this concept requires a change in the authorizing legislation, which prescribes payment of only a mileage allowance, it is my intention to discuss with the Office of Management and Budget this proposal as part of the inclusion of our legislative program.

However, we plan to take some interim actions to restructure the automobile reimbursement allowance. While the mileage allowance for automobiles has traditionally reflected the costs of operating standard size sedans, we believe that the mileage allowance should vary with the size of the automobile or alternatively should reflect the weighted average cost of operating standard, compact and subcompact sedans.

If different rates were established for different sizes of automobiles, the mileage allowances would be 17 cents for standard (8 cylinder) sedans, 13 cents for compact (6 cylinder) sedans, and 10.5 cents for subcompact (4 cylinder) sedans. If, however, the mileage allowance were established to reflect the mix of automobiles, the composite, or weighted average rate of reimbursement would be 15 cents a mile. Following rulemaking procedures, we will seek to determine whether the Federal executive agencies favor a single weighted average mileage allowance or separate rates of reimbursement for standard, compact, and subcompact automobiles. The resulting method would be used as an interim measure until legislation is enacted to reimburse on a per day/per mile basis, or permanently if legislation is not enacted.

With respect to the cost of official travel, we have determined that the statutory maximum per diem allowance ($35) is adequate for 92 percent of the travel. The adequacy of the allowance would be improved somewhat if the cities shown in the attachment to this report were designated as high rate geographic areas under the provisions of 5 U.S.C. 5702(c). While I will issue the regulations necessary to designate these cities as high rate geographic areas, and to change the amounts allowed in three existing high rate geographic areas, this will not protect the adequacy of the existing per diem allowance against future increases in the cost of lodgings and meals. Our investigations have also concluded that the maximum $50 amount for reimbursement of actual subsistence expenses for travel under unusual circumstances or to high rate geographic areas may soon be inadequate. Allowable amounts for Washington, D.C., and New York, N.Y., are already at the statutory maximum allowance. If action to increase these allowances is deferred until future investigations can document higher costs, the subsequent delay in legislation would force employees to absorb the difference between the maximum amount of reimbursement with the higher actual costs. Accordingly, I will also discuss with the Office of Management and Budget the propriety of submitting as part of our legislative program, a proposal to increase the statutory per diem allowance from $35 to $50, and the subsistence allowance from $50 to $75. Although, initially, reimbursement would be much less, these higher statutory maximum amounts would enable GSA to adjust the rates administratively as the costs of commercial lodgings and meals change in the future.

The regulations prescribing these travel allowances will be amended within 30 days.

HIGH RATE GEOGRAPHICAL AREA (HRGA) SUBSISTANCE RATES[1]

City (HRGA)	Current Reimbursable Rate	Proposed Rate	Statutory Maximum Rate
Albany, NY	$35.00	$39.00	$50.00
Baltimore, MD	35.00	41.00	50.00
Bridgeport, CT	35.00	40.00	50.00
Chicago, IL	43.00	45.00	50.00
Charleston, WV	35.00	39.00	50.00
Dallas, TX	35.00	39.00	50.00
Detroit, MI	35.00	42.00	50.00
Hartford, CT	35.00	39.00	50.00
Houston, TX	35.00	41.00	50.00
Las Vegas, NV	35.00	48.00	50.00
Miami, FL	35.00	43.00	50.00
Milwaukee, WI	35.00	39.00	50.00
Minneapolis, MN	35.00	41.00	50.00
Newark, NJ	42.00	45.00	50.00
New Orleans, LA	35.00	44.00	50.00
Providence, RI	35.00	40.00	50.00
San Francisco, CA	41.00	45.00	50.00

[1] This table includes three cities which are already designated as HRGA's; these are Chicago, IL; Newark, NJ; and San Francisco, CA.

ADDENDUM TO THE REPORT ON THE COST OF TRAVEL AND THE OPERATION OF PRIVATELY OWNED VEHICLES

1. The changes to mileage and travel allowances reflected in the preceeding report are effective for travel beginning on or after September 18, 1977. The Federal Travel Regulations (FPMR 101–7) as amended by FPMR Temporary Regulation A–11, Supplement 4, dated April 29, 1977, are further amended as follows:

(a) In paragraphs 1–4.2a(2) and 1–4.2c (1) and (2), the mileage allowance for use of a privately owned automobile is increased to 17 cents per mile.

(b) In paragraph 1–8.6.

(1) The prescribed maximum daily rates for the currently designated high rate geographical areas of Chicago, Ill.; Newark, N.J.;

V 42 I 178 SEP 14 77 S UMI

and San Francisco, Calif., are increased to $45.

(2) The boundary of the currently designated high rate area of Los Angeles, Calif., is redefined as "all locations within the county of Los Angeles," and

(3) The following newly designated high rate geographical areas are added:

Designated high rate geographical areas:	Prescribed maximum daily rates (dollars)
Albany, N.Y. (all locations within the corporate limits thereof)	39
Baltimore, Md. (all locations within the corporate limits thereof)	41
Bridgeport, Conn. (all locations within the corporate limits thereof)	40
Charleston, W. Va. (all locations within the corporate limits thereof)	39
Dallas, Tex. (all locations within the corporate limits thereof)	39
Detroit, Mich. (all locations within the corporate limits thereof)	42
Hartford, Conn. (all locations within the corporate limits thereof)	39
Houston, Tex. (all locations within the corporate limits thereof)	41
Las Vegas, Nev. (all locations within the corporate limits thereof)	48
Miami, Fla. (all locations within the corporate limits thereof)	43
Milwaukee, Wis. (all locations within the corporate limits thereof)	39
Minneapolis, Minn. (all locations within the corporate limits of Minneapolis-St. Paul, Minn.)	41
New Orleans, La. (all locations within the county of Orleans, La.)	44
Providence, R.I. (all locations within the corporate limits thereof)	49

2. No further supplements to FPMR Temporary Regulation A-11 will be issued. The changes explained above will be incorporated in a revised edition of the Federal Travel Regulations.

Dated: September 12, 1977.

JOEL W. SOLOMON,
Administrator of General Services.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Office of Education

NATIONALLY RECOGNIZED ACCREDITING AGENCIES AND ASSOCIATIONS

Revisions to List

For purposes of determining eligibility for Federal assistance, pursuant to 20 U.S.C. 1141(a) and other legislation, beginning with the Veterans Readjustment Assistance Act of 1952, the U.S. Commissioner of Education hereby publishes revisions to the list of nationally recognized accrediting agencies and associations which he determines to be reliable authorities as to the quality of training offered by educational institutions either in a geographical area or in a specialized field, and the general scope of recognition granted to the accrediting bodies.

These revisions may be added to the list previously promulgated by the Commissioner of Education on April 20, 1977, 42 FR 20507-20510, and to the revisions previously promulgated by the Commissioner on July 15, 1977, 42 FR 36559.

NATIONAL INSTITUTIONAL AND SPECIALIZED ACCREDITING AGENCIES AND ASSOCIATIONS

ADDITIONS

Physical Therapy

American Medical Association, Committee on Allied Health Education and Accreditation (programs for the physical therapist).

American Physical Therapy Association, Committee on Accreditation in Education (programs for the physical therapist and programs for the physical therapist assistant).

AGENCIES WITHDRAWN FROM LIST

Physical Therapy

Council on Medical Education, American Medical Association, in cooperation with the Committee on Accreditation in Education, American Physical Therapy Association (professional programs) (withdrawn due to discontinuance of program).

TRANSFER OF RECOGNITION

Recognition is transferred from the Council on Medical Education, American Medical Association, to the Committee on Allied Health Education and Accreditation, American Medical Association. Transfer of recognition applies to the fields of blood bank technology, cytotechnology, histologic technology, laboratory assistant education, medical assistant education, medical laboratory technician education, medical record education, medical technology, nuclear medicine technology, occupational therapy, physician's assistant education, radiologic technology, and respiratory therapy.

NATIONAL ACCREDITING AGENCIES AND ASSOCIATIONS RECOGNIZED FOR PREACCREDITATION CATEGORIES

CHANGE IN SCOPE OF RECOGNITION

Council on Education for Public Health: Preaccreditation.

STATE AGENCIES RECOGNIZED FOR THE APPROVAL OF PUBLIC POSTSECONDARY VOCATIONAL EDUCATION

REVISIONS TO LIST

For purposes of determining eligibility for Federal assistance, pursuant to 20 U.S.C. 1087-1(b), the U.S. Commissioner of Education hereby publishes revisions to the list of State agencies which he determines to be reliable authorities as to the quality of public postsecondary vocational education in their respective States.

These revisions may be added to the list previously promulgated by the Commissioner of Education on April 20, 1977, 42 FR 20507-20510.

AGENCIES WITHDRAWN FROM LIST

Montana Board of Public Education (by request).

South Dakota State Board of Vocational-Technical Education (by request).

Dated: September 2, 1977.

JOHN ELLIS,
Acting U.S. Commissioner of Education.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[NM 31258]

NEW MEXICO

Application

SEPTEMBER 6, 1977.

Notice is hereby given that, pursuant to section 28 of the Mineral Leasing Act of 1920 (30 U.S.C. 185), as amended by the Act of November 16, 1973 (87 Stat. 576), Roger C. Hanks has applied for one 4-inch and 6-inch natural gas pipeline right-of-way across the following land:

NEW MEXICO PRINCIPAL MERIDIAN, NEW MEXICO

T. 20 S., R. 24 E.,
Sec. 12, SE¼SW¼;
Sec. 13, W½NE¼.

This pipeline will convey natural gas across 0.328 of a mile of public land in Eddy County, N. Mex.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the application should be approved, and if so, under what terms and conditions.

Interested persons desiring to express their views should promptly send their name and address to the District Manager, Bureau of Land Management, P.O. Box 1397, Roswell, N. Mex. 88201.

OFFICE OF MANAGEMENT AND BUDGET

CLEARANCE OF REPORTS

List of Requests

The following is a list of requests for clearance of reports intended for use in collecting information from the public received by the Office of Management and Budget on September 8, 1977 (44 U.S.C. 3509). The purpose of publishing this list in the FEDERAL REGISTER is to inform the public.

The list includes the title of each request received; the name of the agency sponsoring the proposed collection of information; the agency form number(s), if applicable; the frequency with which the information is proposed to be collected; the name of the reviewer or reviewing division within OMB, and an indication of who will be the respondents to the proposed collection.

Requests for extension which appear to raise no significant issues are to be approved after brief notice through this release.

Further information about the items on this daily list may be obtained from the Clearance Office, Office of Management and Budget, Washington, D.C. 20503 (202-395-4529), or from the reviewer listed.

[Public Notice CM-7/108]

ADVISORY PANEL ON MUSIC

Meeting

Pursuant to Pub. L. 92463, the Federal Advisory Committee Act, notice is hereby given that the Advisory Panel on Music has scheduled a two day meeting to be

V 42 1178 SEP 14 77 UMI

held on Tuesday, October 4, and Wednesday, October 5, 1977, in Room 507 at the Department of State, Annex 2, 515 22nd Street NW., Washington, D.C. The meeting hours will be from 9:45 a.m. to 12:30 p.m. and from 2 p.m. to 5 p.m. on both days.

The sessions will be open to the public. The agenda is:

(1) Review of program policies and guidelines;

(2) Review of recent overseas tours in the music field sponsored by the Department of State;

(3) Evaluation of tapes and records of performing arts groups which are planning tours abroad, and other music groups which wish to be considered as candidates for grants sponsorship or other assistance in connection with overseas tours.

Members of the public in attendance who wish to comment on the agenda items may do so, subject to restrictions of time and direction of the Chair.

For the purpose of fulfilling building security requirements, it is requested that persons wishing to attend this open session advise the Executive Secretary, Beverly Gerstein, by telephone before October 3; the telephone number is area code 202–632–2846.

The meeting room has a seating capacity of 30, so the public will be admitted on a first-come, first-served basis.

Dated: September 2, 1977.

PAUL E. WHEELER,
Director, Office of International Arts Affairs.

[Public Notice CM-7/107]

SECRETARY OF STATE'S ADVISORY COMMITTEE ON PRIVATE INTERNATIONAL LAW, STUDY GROUP ON HOTELKEEPERS' LIABILITY

Meeting

A meeting of the Study Group on Hotelkeepers' Liability, a subgroup of the Secretary of State's Advisory Committee on Private International Law, will be held at 10 a.m. on Tuesday, October 11, 1977, in room 5519 of the Department of State. Members of the general public may attend up to the limits of the capacity of the meeting room and participate in the discussion subject to instructions of the Chairman.

The Study Group will discuss the report of the United States delegation to the first meeting of the committee of government experts for the examination of the preliminary Draft Convention on the Hotelkeeper's Contract, the report of the Secretariat of UNIDROIT on the first session of the committee and the agenda items for the second session of the committee to be held in Rome, December 12–16, 1977.

Entrance to the Department of State building is controlled, and members of the general public should use the C Street entrance. Entry will be facilitated if arrangements are made in advance, and it is requested that members of the general public who plan to attend the meeting inform their name, affiliation, and address to Miss Dorothy Fagan, Office of the Legal Adviser, Department of State, prior to October 11, 1977. The telephone number is area code 202–632–8134.

Dated: September 6, 1977.

RICHARD D. KEARNEY,
Chairman.

DEPARTMENT OF THE TREASURY

Internal Revenue Service

[Delegation Order No. 113, Rev. 4]

ASSISTANT REGIONAL COMMISSIONER (EMPLOYEE PLANS AND EXEMPT ORGANIZATIONS)

Delegation of Authority

AGENCY: Internal Revenue Service, Treasury.

ACTION: Delegation of authority.

SUMMARY: The authority of the Commissioner of Internal Revenue to make final adverse determinations regarding certain matters is being delegated to the Assistant Regional Commissioner (Employee Plans and Exempt Organizations). The text of the delegation order appears below.

EFFECTIVE DATE: September 30, 1977.

FOR FURTHER INFORMATION CONTACT:

Mr. B. Larson, E:EO:O, 1111 Constitution Avenue NW., Room 2215, Washington, D.C. 20224 (202–566–6489, not toll free).

JOHN J. MONACO,
Acting Chief, Exempt Organizations Operations Branch.

AUTHORITY TO ISSUE EXEMPT ORGANIZATION DETERMINATION LETTERS

SEPTEMBER 12, 1977.

Pursuant to authority vested in the Commissioner of Internal Revenue by Treasury Department Order No. 150–37, authority with respect to issuance of determination letters pertaining to the exempt status of organizations under section 501(a) and related matters is delegated as follows:

1. The District Director of each Employee Plans and Exempt Organizations key district is authorized to:

(a) Issue determination letters, except as noted in section 2, below, with respect to exemption from Federal income tax under sections 501 and 521; status under IRC 120, 170(c)(2), 507, 508, 509, 4942(j)(3), 4947, 4948, and 6033; imposition of tax under IRC 11, 511 through 514, 527(f), 641, 1381, and Chapters 41 and 42; provided the requests present questions the answers to which are clear from an application of the provisions of the statute, Treasury decisions or regulations, or by ruling, opinion, or court decision published in the Internal Revenue Bulletin, and

(b) Issue modifications or revocations of rulings or determination letters described above in accordance with currently applicable appeal procedures, and

(c) Redelegate this authority but not below Exempt Organizations Specialist, Grade GS–12 (other than the originator) and not below Chief, Employee Plans and Exempt Organizations Division with respect to adverse modifications or revocations of such letters.

2. In each region, the Assistant Regional Commissioner (Employee Plans and Exempt Organizations) and the Executive Assistant to each such Assistant Regional Commissioner are authorized to:

(a) Issue by certified or registered mail, final adverse determinations on issues described in IRC 7428(a)(1), and

(b) Issue decisions on appeals from determinations, modifications, and revocations issued by key district offices under this delegation, and

(c) Redelegate the authority to issue final adverse determinations on issues described in IRC 7428(a)(1), but not lower than to Regional Analyst, Grade GS-13. The authority to issue decisions on appeals from adverse determinations, modifications, and revocations may not be redelegated.

3. The Assistant Commissioner (Employee Plans and Exempt Organizations), with the concurrence of the Chief Counsel, is authorized to require pre-issuance review of specific types of final adverse determinations of issues described in IRC 7428(a)(1).

4. To the extent any action taken between October 4, 1976 (the effective date of the Tax Reform Act of 1976), and the effective date of this Order by officials described or their delegates consistent with the delegation of authority in Delegation Order 113 (Rev. 3) may require ratification, such action is hereby affirmed and ratified.

This order supersedes Delegation Order No. 113 (Rev. 3) isued April 10, 1975.

JEROME KURTZ,
Commissioner.

Office of the Secretary

SACCHARIN FROM THE REPUBLIC OF KOREA

Antidumping Determination of Sales at Less Than Fair Value

AGENCY: U.S. Treasury Department.

ACTION: Determination of sales at less than fair value.

SUMMARY: This notice is to advise the public that an antidumping investigation has resulted in a determination that saccharin from the Republic of Korea is being sold at less than fair value under the Antidumping Act, 1921. Sales at less than fair value generally occur when the price of merchandise for exportation to the United States is less than the price of such or similar merchandise sold in the home market or to third countries. This case is being referred to the U.S. International Trade Commission for a determination concerning possible injury to an industry in the United States.

EFFECTIVE DATE: September 14, 1977.

FOR FURTHER INFORMATION CONTACT:

Mr. Anthony L. Russo, Operations Officer, U.S. Customs Service, Office of Operations, Duty Assessment Division, Technical Branch, 1301 Constitution Avenue NW., Washington, D.C. 20229, telephone 202–566–5492.

SUPPLEMENTARY INFORMATION: Information was received in proper form on October 20, 1976, from counsel acting on behalf of Sherwin-Williams Co. of Cleveland, Ohio, alleging that saccharin from the Republic of Korea was being sold in the United States at less than fair value, thereby causing injury to, or the likelihood of injury to, or the prevention of establishment of an industry in the United States, within the meaning of the Antidumping Act, 1921, as amended (19 U.S.C. 160 et seq.) (referred to in this notice as "the Act"). On the basis of this information and subsequent preliminary investigation by the Customs Service, an "Antidumping Proceeding Notice" was published in the FEDERAL REGISTER of November 29, 1976 (41 FR 52352).

A "Withholding of Appraisement Notice" was published in the FEDERAL REGISTER of June 8, 1977 (42 FR 29356).

For purposes of this notice, the term "saccharin" means sodium saccharin in soluble granular and soluble powder forms.

DETERMINATION OF SALES AT LESS THAN FAIR VALUE

I hereby determine that, for the reasons stated below, saccharin from the Republic of Korea is being, or is likely to be, sold at less than fair value within the meaning of section 201(a) of the Act (19 U.S.C. 160(a)).

STATEMENT OF REASONS ON WHICH THIS DETERMINATION IS BASED

The reasons and bases for the above determination are as follows:

(a) *Scope of the investigation.* Over 90 percent of the imports of the subject merchandise from the Republic of Korea were manufactured by Kumbuk Chemical Industries Co., Ltd., Choheung Chemical Industrial Co., and Jeil Moolsan Co., Inc. Therefore, the investigation was limited to these manufacturers.

(b) *Basis of comparison.* For the purpose of considering whether the merchandise in question is being, or is likely to be, sold at less than fair value within the meaning of the Act, the proper basis of comparison is between purchase price and the home market price of such or similar merchandise. Purchase price, defined in section 203 of the Act (19 U.S.C. 162), was used since all export sales were made to unrelated importers in the United States. Home market price, as defined in section 153.2, Customs Regulations (19 CFR 153.2), was used since such or similar merchandise was sold in the home market in sufficient quantities to provide a basis of comparison for fair value purposes.

In accordance with section 153.31(b), Customs Regulations (19 CFR 153.31(b)), pricing information was obtained concerning imports and home market sales of saccharin from the Republic of Korea during the 6-month period July 1 through December 31, 1976.

(c) *Purchase price.* For the purposes of this determination of sales at less than fair value, since all of the merchandise was purchased or agreed to be purchased, prior to the time of exportation, by the persons by whom or for whose account it was imported, within the meaning of section 203 of the Act, the purchase price has been calculated on the basis of the c.i.f. price to U.S. importers with deductions for ocean freight, marine insurance, shipping charges, banking charges, and inland freight, as appropriate.

Additions were made, where appropriate, for the amount of the commodity, defense and sales taxes incurred with respect to home market sales but not collected, or rebated upon exportation. Additionally, Korean defense tax and customs duty on imported raw materials rebated at the time of exportation, were added.

The costs saved under the Korean Government's import deposit requirements by reason of the exportation of the merchandise were treated as indirect taxes and were added in accordance with the Act.

The deductions were based on actual costs incurred in transporting or selling the merchandise in accordance with section 203 of the Act. The addition for taxes and duties which were refunded or not collected by reason of the exportation of the merchandise relate to the refund of duties on raw materials and the non-collection of certain taxes. The addition for the cost savings under the import deposit program relates to monies which are usually deposited with the central bank for a fixed period of time when goods are imported. This deposit requirement is reduced by amount and time of deposit when materials are imported pursuant to export orders for a final product. The deposit requirement has the same effect as a duty and the interest savings on the exported merchandise has been added in accordance with the Act.

(d) *Home market price.* For the purposes of this determination of sales at less than fair value, the home market price has been calculated on the basis of the weighted average, packed, delivered price to wholesale purchasers. Adjustments have been made for transportation, interest expenses, rebates to a distributor, differences in packing expenses, and differences in the merchandise.

Adjustments for interst expenses, rebates and for differences in packing expenses were made in accordance with section 153.10, Customs Regulations (19 CFR 153.10). Adjustments for differences in merchandise sold in the Republic of Korea and the United States were made based upon the cost of manufacture in accordance with section 153.11, Customs Regulations (19 CFR 153.11).

Adjustments claimed for the following were not allowed: general selling and advertising expenses; and profit derived from selling import rights which are based upon export sales.

General selling and advertising expenses and profit from selling import rights were not allowed because they were determined to be not directly related to the sales under consideration, in accordance with section 153.10, Customs Regulations (19 CFR 153.10).

(d) *Result of fair value comparisons.* Using the above criteria, the purchase price was found to be lower than the home market price of such or similar merchandise. Comparisons were made on about 71 percent of the saccharin sold to the United States by the manufacturers during the period of investigation. Margins were found ranging from 24 percent to 26 percent on 100 percent of the sales compared. The weighted-average margin is 25 percent.

The Secretary has provided an opportunity to known interested persons to present written and oral views pursuant to section 153.40, Customs Regulations (19 CFR 153.40).

The U.S. International Trade Commission is being advised of this determination.

This determination is being published pursuant to section 201(d) of the Act (19 U.S.C. 160(d)).

Dated: September 8, 1977.

ROBERT H. MUNDHEIM,
General Counsel of the Treasury.

[FR Doc.77-26633 Filed 9-13-77;8:45 am]

SACCHARIN FROM JAPAN

Withholding of Appraisement Notice and Determination of Sales at Less Than Fair Value

AGENCY: United States Treasury Department.

ACTION: Withholding of Appraisement and Determination of Sales at Less Than Fair Value.

SUMMARY: This notice is to advise the public that an antidumping investigation

V 42 I 178 SEP 14 77 UMI

has been completed and that it has been determined that saccharin from Japan is being, or is likely to be, sold at less than fair value within the meaning of the Antidumping Act, 1921, as amended, with the exception of saccharin produced by Aisan Chemical Co. Ltd. Sales at less than fair value generally occur when the price of the merchandise sold for exportation to the United States is less than the price in the home market. This case is being referred to the United States International Trade Commission for determining whether an industry in the United States is being injured. Simultaneously, appraisements of entries of this merchandise will be withheld for 3 months, pending an injury determination by the International Trade Commission.

EFFECTIVE DATE: September 14, 1977.

FOR FURTHER INFORMATION CONTACT:

Mr. Anthony L. Russo, Operations Officer, Duty Assessment Division, United States Customs Service, 1301 Constitution Avenue NW., Washington, D.C. 20229 (202-566-5492).

SUPPLEMENTARY INFORMATION: Information was received in proper form on October 20, 1976, from counsel acting on behalf of Sherwin-Williams Company of Cleveland, Ohio, alleging that saccharin from Japan was being sold in the United States at less than fair value, thereby causing injury to, or the likelihood of injury to, or the prevention of the establishment of, an industry in the United States, within the meaning of the Antidumping Act, 1921, as amended (19 U.S.C. 160 et seq.) (referred to in this notice as "the Act"). On the basis of this information and subsequent preliminary investigation by the Customs Service, an "Antidumping Proceeding Notice" was published in the FEDERAL REGISTER of November 29, 1976 (41 FR 52352).

A "Notice of Tentative Determination of Sales at Not Less Than Fair Value" was published in the FEDERAL REGISTER of June 8, 1977 (42 FR 29355).

For purposes of this notice, the term "saccharin" means sodium saccharin in soluble granular and soluble powder forms.

DETERMINATION OF SALES AT LESS THAN FAIR VALUE

I hereby determine that, for the reasons stated below, saccharin from Japan is being, or is likely to be, sold at less than fair value, with the exception of saccharin produced by Aisan Chemical Co. Ltd., within the meaning of section 201(a) of the Act (19 U.S.C. 160(a)).

STATEMENT OF REASONS ON WHICH THIS DETERMINATION IS BASED

The reasons and bases for the above determination are as follows:

a. *Scope of the Investigation.* Over 60 percent of the imports of the subject merchandise from Japan were manufactured by Aisan Chemical Industrial Co., Ltd., and Daito Chemical Industrial Co. Therefore, the investigation was limited to these manufacturers.

b. *Basis of Comparison.* For the purpose of considering whether the merchandise in question is being, or is likely to be, sold at less than fair value within the meaning of the Act, the proper basis of comparison is between purchase price and the home market price of such or similar merchandise. Purchase price, as defined in section 203 of the Act (19 U.S.C. 162), was used since the export sales compared were made to unrelated purchasers in the United States or to unrelated trading companies in the home market, which then sell the merchandise to unrelated firms in the United States. Home market price, as defined in section 153.2, Customs Regulations (19 CFR 153.2), was used since such or similar merchandise was sold in the home market in sufficient quantities to provide a basis of comparison for fair value purposes.

In accordance with section 153.31(b), Customs Regulations (19 CFR 153.31 (b)), pricing information was obtained concerning imports and home market sales of saccharin from Japan during the period June 1 through December 31, 1976.

c. *Purchase Price.* For purposes of this determination of sales at less than fair value, since all merchandise was purchased prior to the time of exportation by the persons by whom or for whose account it was imported, within the meaning of section 203 of the Act, purchase price has been calculated on the basis of the c.i.f. packed price, to the United States, or the f.o.b. packed price to the unrelated trading companies, with deductions for inland freight, ocean freight, insurance, shipping charges, banking fees and commissions, as appropriate.

d. *Home Market Price.* For purposes of this determination of sales at less than fair value, the home market price was calculated on the basis of the f.o.b. delivered price to wholesale purchasers. Adjustments were made for inland freight, discounts (taken into consideration in arriving at a weighted-average price), differences in packing and interest and for selling expenses up to the amount deucted for commissions in the calculation of purchase price, as appropriate.

Adjustments for interest expenses and packing expenses relate to the difference in those costs between home market sales and sales for export to the United States.

Adjustments were claimed for differences in cirumstances of sale in accordance with section 153.10, Customs Regulations (19 CFR 153.10), for general selling expenses. Adjustments for these expenses have been disallowed. Adjustments to the home market price for selling expenses, in purchase price situations, are allowed only for cirumstances of sale which bear a direct relationship to the sales under consideration. Since general selling expenses must be borne regardless of whether particular sales are made, they are not directly related to the sales under consideration. With regard to sales by Daito, although originally allowed, an adjustment for differences in raw material cost is now rejected because further investigation did not support Daito's claim in this regard.

e. *Result of Fair Value Comparisons.* Using the above criteria, purchase price was found to be less than the home market price of such or similar merchandise. Comparisons were made on approximately 90 percent of the saccharin sold to the United States by the manufacturers during the period of investigation. No margins were found on 100 percent of the sales made by Aisan Chemical Co., Ltd. Margins were found ranging from 9 to 11 percent on the sales compared made by Daito Chemical Industrial Co. The weighted-average margin on sales by Daito amounted to 9.4 percent.

The Secretary has provided an opportunity to known interested persons to present written and oral views pursuant to section 153.40, Customs Regulations (19 CFR 153.40).

Further, and based on the reasons noted above, Customs officers are being directed to withhold appraisement of saccharin from Japan, except that produced by Aisan Chemical Industrial Co., Ltd., in accordance with section 153.48, Customs Regulations (19 CFR 153.48).

This withholding of appraisement notice is published pursuant to section 153.35(a), Customs Regulations (19 CFR 153.35(a)), and shall become effective upon publication in the FEDERAL REGISTER. Such action shall cease to be effective at the expiration of three months from the date of this publication unless previously revoked.

The United States International Trade Commission is being advised of this determination.

This determination is being published pursuant to section 201(d) of the Act (19 U.S.C. 160(d)).

Dated: September 8, 1977.

ROBERT H. MUNDHEIM,
General Counsel of the Treasury.

The Secretary,
(202-673-5068).

SUPPLEMENTARY INFORMATION: Agency business requires the addition to the Calendar for September 12 of the third-party complaint of *Gordon W. Winks and Katherine O'B. Winks* v. *Lufthansa German Airlines*, Docket 30576, as the Board must make its determination before September 14 on whether or not to review the decision of the Bureau of Enforcement not to institute an enforcement proceeding or, under Rule 205 of the Procedural Regulations, the BOE decision will become that of the Board on September 14. Accordingly the following Members have voted that agency business requires the addition of this item to the agenda of September 12, 1977 on less than seven days' notice and that no earlier announcement of this addition was possible:

Chairman Alfred E. Kahn
Member G. Joseph Minetti
Member Lee R. West
Member Elizabeth E. Bailey

[S-1305-77 Filed 9-12-77;8:52 am]

2

FEDERAL COMMUNICATIONS COMMISSION.

TIME AND DATE: Follows 9:30 a.m. Open Meeting, Thursday, September 15, 1977.

PLACE: Room 856, 1919 M Street NW., Washington, D.C.

STATUS: Closed Commission Meeting.

MATTERS TO BE CONSIDERED:

Agenda, Item No., and Subject

Hearing—1—Applications for review, filed by Melvin Pulley and by the Broadcast Bureau in the Quitman, Mississippi FM proceeding (Docket Nos. 20196 and 20197).

General—1—Consideration of Commission responses to questions posed by Order of the United States Court of Appeals of the District of Columbia Circuit regarding Commission's EEO policies.

Complaints and Compliance—1—Field investigation into the operation of Radio Station KDRG, Deer Lodge, Montana, licensed to Deer Lodge Broadcasting, Inc.

CONTACT PERSON FOR MORE INFORMATION:

Samuel M. Sharkey, FCC Public Information Officer, telephone number 202-632-7260.

Issued: September 8, 1977.

[S-1298-77 Filed 9-9-77;2:35 pm]

3

FEDERAL MARITIME COMMISSION.

FEDERAL REGISTER CITATION OF PREVIOUS ANNOUNCEMENT: September 9, 1977, 42 FR 45434.

PREVIOUSLY ANNOUNCED TIME AND DATE OF THE MEETING: September 14, 1977, 10 a.m.

CHANGES IN THE MEETING: Addition of the following item to the closed session:

1. Docket No. 77-22, Actions to Adjust or Meet Conditions Unfavorable to Shipping in the Foreign Trade of the United States (Guatemalan Decree No. 41-71); Consideration of Comments on Proposed Rule.

[S-1303-77 Filed 9-9-77;3:59 pm]

4

FEDERAL POWER COMMISSION.

SEPTEMBER 9, 1977.

The following notice of meeting is published pursuant to Section 3(a) of the Government in the Sunshine Act (Pub. L. No. 94-409), 5 U.S.C. § 552B:

TIME AND DATE: September 16, 1977, 10 a.m.

PLACE: 825 North Capitol Street.

STATUS: Open.

MATTERS TO BE CONSIDERED: (Agenda) *NOTE.—Items listed on the agenda may be deleted without further notice.

CONTACT PERSON FOR MORE INFORMATION:

Kenneth F. Plumb, Secretary, telephone 202-275-4166.

This is a list of matters to be considered by the Commission. It does not include a listing of all papers relevant to the items on the agenda. However, all public documents may be examined in the Office of Public Information, room 1000.

POWER AGENDA—7673RD MEETING, SEPTEMBER 16, 1977—REGULAR MEETING (10 A.M.)

P-1—Docket No. E-9104, Nevada Power Company.
P-2—Docket No. ER76-709, Cincinnati Gas and Electric Company.
P-3—Docket No. ER77-533, Louisiana Power & Light Company.
P-4—Docket Nos. ER76-149 and E-9537, Public Service of Indiana, Inc.
P-5—Docket No. ER77-1, Mississippi Power Company.
P-6—Docket No. ER76-40, Nevada Power Company.
P-7—Docket No. ER77-411, et al., Illinois Power Company.
P-8—Docket No. E-9592, *Roscoe E. Dean, Jr. and William D. Lovin, Complainants* v. *Georgia Power Company, Defendant.*
P-9—Project No. 1862, City of Tacoma, Washington Docket No. E-6454, City of Centralia, Washington.
CP-1—Docket No. ER77-486, Pennsylvania-New Jersey-Maryland Interconnection.
CP-2—Docket No. ER77-496, Ohio Power Company.
CP-3—Docket No. ES77-53, Pacific Power & Light Company.
CP-4—Docket No. ES77-40, Gulf States Utilities Company.
CP-5—Project Nos. 1759, 1980, 2072, 2073, 2074, 2131, 2357, 2394, 2431, 2471, 2486, 2523, 2550, Wisconsin Michigan Power Company and Wisconsin Electric Power Company.
CP-6—Docket No. ER77-534, Missouri Utilities Company.
CP-7—Docket No. E-9563, U.S. Department of the Interior, Bonneville Power Administration.

MISCELLANEOUS AGENDA—7673RD MEETING, SEPTEMBER 16, 1977—REGULAR MEETING

M-1—Docket No. RM76-15, Regulation of Small Producers.
M-2—Docket No. RM77-20, Associated Gas Distributors.

MISCELLANEOUS AGENDA—7673RD MEETING, SEPTEMBER 16, 1977—REGULAR MEETING

CM-1—1975 Edition of Hydroelectric Plant Construction Cost and Annual Production Expenses.
CM-2—Upper Peninsula Generating Company.

GAS AGENDA—7673RD MEETING, SEPTEMBER 16, 1977—REGULAR MEETING

G-1—Docket No. RP75-102, Panhandle Eastern Pipe Line Company.
G-2—Docket No. RP77-3, Northern Natural Gas Company.
G-3—Docket No. RP74-25, Texas Gas Transmission Corporation.
G-4—Docket No. RP75-79, *Lehigh Portland Cement Company* v. *Florida Gas Transmission Company.*
G-5—Docket Nos. AR61-2 and AR69-1, et al., Area Rate Proceeding, et al. (Southern Louisiana Area).
G-6—Docket No. RI77-20, Dorfman Production Company, Operator.
G-7—Docket No. RI77-34, Maurice L. Brown Company.
G-8—*Pennzoil Producing Co.* v. *FPC*, 533 F. 2d 485 (5th Cir. 1977), and *Mobil Oil Corp.* v. *Lightcap*, 221 Kan. 448, 562 p. 2d 1 (1977).
G-9—Docket No. CI75-45, et al., Tenneco Oil Company, et al.
G-10—Docket No. CI77-500, Hunt Oil Company.
G-11—Docket No. CI76-597, Producer's Gas Company.
G-12—Docket No. CP76-424, Kentucky West Virginia Gas Company.
G-13—Docket No. CP74-314, El Paso Natural Gas Company; Docket No. CP76-327, Northwest Pipeline Corporation; Docket No. CI77-526, Sun Oil Company, et al.
G-14—Docket No. CP74-299, Kansas-Nebraska Natural Gas Company, Inc.
G-15—Docket No. CP77-417, Transcontinental Gas Pipe Line Corporation.
G-16—Docket No. CP77-368, Lone Star Gas Company (a division of Enserch Corporation).
G-17—Docket No. CP73-30, Lone Star Gas Company, a division of Enserch Corporation.
G-18—Docket No. CP77-425, Algonquin Gas Transmission Company.
G-19—Docket No. CP77-524, Florida Gas Transmission Company, United Gas Pipe Line Company.
G-20—Docket No. CS73-208, H&L Operating Company; Docket No. CS71-866, Douglas R. Cummings; Docket No. CS76-556, Tacklon, Inc., et al.; Docket No. CS72-365, Jerome P. McHugh & Associates; Docket No. CS76-930, Clemco, Inc.; Docket No. CS71-179, Herman George Kaiser.
CG-1—Docket No. RP73-23 (PGA77-6(a)). Lawrenceburg Gas Transmission Corporation.
CG-2—Docket No. RP71-107, (PGA76-1). Northern Natural Gas Company.
CG-3—Docket Nos. CI76-758 and CI77-15, Getty Oil Company; Docket No. CI77-616, Cities Service Company.
CG-4—Docket No. CP75-127, Texas Eastern Transmission Corporation and Tennessee Gas Pipeline Company, a Division of Tenneco, Inc.; Docket No. CP77-401, Texas Eastern Transmission Corporation; Docket No. CP77-521, Columbia Gulf Transmission Corporation.
CG-5—Docket No. CP77-386, Michigan Wisconsin Pipe Line Company.
CG-6—Docket No. CP77-492, Western Gas Interstate Company.
CG-7—Docket No. CP77-326, Columbia Gulf Transmission Company; Docket No. CP77-348, Columbia Gulf Transmission Company, Northern Natural Gas Company and Tennessee Gas Pipeline Company, a division of Tenneco Inc.; Docket No. CP77-365, Sea Robin Pipeline Company, Columbia Gas Transmission Corporation and Columbia Gulf Transmission Company.

KENNETH F. PLUMB, *Secretary.*

5

INDIAN CLAIMS COMMISSION.

TIME AND DATE: 10:15 a.m., September 21, 1977.

PLACE: Room 600, 1730 K Street, NW., Washington, D.C.

STATUS: Open to the Public.

Docket 182, *Fort Sill Apache.*
Docket 229, *Navajo.*
Docket 356, *Pueblo of Santa Clara.*

FOR MORE INFORMATION:

David H. Bigelow, Executive Director, Room 640, 1730 K Street, NW., Washington, D.C. 20006, telephone 202-653-6184.

[S-1306-77 Filed 9-12-77;10:27 am]

6

INDIAN CLAIMS COMMISSION.

FEDERAL REGISTER CITATION OF PREVIOUS ANNOUNCEMENT: 42 FR 45435, September 9, 1977.

PREVIOUSLY ANNOUNCED TIME AND DATE: 10:15 a.m., September 14, 1977.

PLACE: Room 600, 1730 K Street NW., Washington, D.C.

STATUS: Open to the Public.

CHANGE IN THE MEETING: The following item has been added:

Docket 363, *Sioux.*

FOR MORE INFORMATION:

David H. Bigelow, Executive Director, Room 640, 1730 K Street NW., Washington, D.C. 20006, Telephone 202-653-6184.

7

NATIONAL TRANSPORTATION SAFETY BOARD.

FEDERAL REGISTER CITATION OF PREVIOUS ANNOUNCEMENTS: 42 FR 44110, September 1, 1977; 42 FR 44869, September 7, 1977.

PREVIOUSLY ANNOUNCED TIME AND DATE OF MEETING:

September 8, 1977, 9:30 a.m. [NM-77-27].

CHANGE IN THE MEETING: The meeting is postponed until Friday, September 16, 1977. A majority of the Board has determined by recorded vote that the business of the Board requires this change and that no earlier announcement was possible.

[S-1300-77 Filed 9-9-77;3:59 pm]

8

NATIONAL TRANSPORTATION SAFETY BOARD.

FEDERAL REGISTER CITATION OF PREVIOUS ANNOUNCEMENT: 42 FR 45101, September 8, 1977.

PREVIOUSLY ANNOUNCED TIME AND DATE OF MEETING: Friday, September 16, 1977, 9:30 a.m. [NM-77-28].

CHANGES IN THE MEETING: In view of the postponement of meeting No. NM-77-27, the agenda item originally scheduled to be discussed in open session at 9:30 a.m. on September 8, 1977, has been included in the agenda for meeting No. NM-77-28. For convenience of the public, a revised agenda for meeting No. NM-77-28 is set forth below. The two items which were to have been discussed in closed session on September 8 have been rescheduled for a separate meeting, No. NM-77-29, at 2:30 p.m. on September 16. Agenda Item 6 of meeting No. NM-77-28 has been redesignated as Items 6 and 7, below.

1. *Aircraft Accident Report.*—Ruel Insurance Corporation, Cessna 414, N8PR, and USAF F-4E, 67-0255, near Brigton, Florida, September 13, 1976.

2. *Recommendation* to Federal Aviation Administration re timely dissemination by air traffic controllers of all available weather information to flightcrews in the terminal area.

3. *Recommendation* to Federal Aviation Administration re implementation of an aviation subsystem for air traffic control environment.

4. *Proposed Special Study* on Alcohol—Alternatives I and II, Proposals for Phases II and III.

5. *Recommendations* to American Gas Association and Connecticut Natural Gas Corporation re pipeline accident in Greenwich, Connecticut, May 25, 1977.

6. *Recommendation* to Federal Aviation Administration re improvements in method of dissemination and description of severe weather information to flightcrews.

7. *Recommendation* to Federal Aviation Administration re depiction of additional airports on air traffic control radar displays.

8. *Discussion of Closeout* of Safety Recommendations A-72-3, A-75-80, A-77-7, and R-73-11.

CONTACT PERSON FOR MORE INFORMATION:

Sharon Flemming (202-755-4930).

[S-1301-77 Filed 9-9-77;3:59 pm]

9

NATIONAL TRANSPORTATION SAFETY BOARD.

TIME AND DATE: 2:30 p.m., Friday, September 16, 1977 [NM-77-29].

PLACE: NTSB Board Room, National Transportation Safety Board, 800 Independence Avenue, SW., Washington, D.C. 20594.

STATUS: Closed.

V 42 178 SEP 14 77 UMI

MATTERS TO BE CONSIDERED:

1. *Discussion.*—Staff processing of safety recommendations following a major accident.

2. *Discussion.*—Proposed organization redesignation in the Bureau of Accident Investigation.

CONTACT PERSON FOR MORE INFORMATION:

Sharon Flemming (202–755–4930).

[S–1302–77 Filed 9–9–77;3:59 pm]

10

OVERSEAS PRIVATE INVESTMENT CORPORATION

Meeting of the Board of Directors.

TIME AND DATE: Meeting of the OPIC Board of Directors: Tuesday September 20, 1977 at 9:00 a.m. (Closed Portion) and 11:00 a.m. (Open Portion).

PLACE: Offices of the Corporation, 7th Floor Board Room, 1129 20th Street NW., Washington, D.C.

STATUS: The first part of the meeting from 9:00 a.m. to 11:00 a.m. will be closed to the public. The open portion of the meeting will start at 11:00 a.m.

MATTERS TO BE CONSIDERED:
(Closed to the Public: 9:00 a.m. to 11:00 a.m.)

1. Country Eligibility: OPIC Programs.
2. Private Participation Negotiations.
3. OPIC Procedures.
4. Finance Project in Caribbean.
5. Insurance Project in Caribbean.
6. Insurance Project in East Asia.
7. Reinsurance Proposal.
8. Claims Reports.
9. Information Reports.

FURTHER MATTERS TO BE CONSIDERED:

(Open to the Public: 11:00 a.m.)

1. Approval of Minutes of Previous Meetings.
2. Reconfirmation of Scheduled Board Meeting.
3. Personnel: Testimonials.
4. OPIC Minerals Policy.
5. Revision of War Risk Coverage.
6. Investment Promotion Program.
7. Allocation of Reserves.
8. Financial Statement.
9. Information Reports.

CONTACT PERSON FOR INFORMATION:

Information with regard to this meeting may be obtained from the Secretary of the Corporation at (202–632–1839).

ELIZABETH A. BURTON,
Corporate Secretary.

SEPTEMBER 12, 1977.

11

FEDERAL COMMUNICATIONS COMMISSION.

TIME AND DATE: 9:30 a.m., Thursday, September 15, 1977.

PLACE: Room 856, 1919 M Street, NW., Washington, D.C.

STATUS: Open Commission Meeting.

MATTERS TO BE CONSIDERED:

Agenda, Item No., and Subject

General—1—Petition by the Council for UHF Broadcasting (CUB) to amend Section 2.106 and Part 74 of the Commission's Rules to restore UHF channels 70–83 for additional assignments to television broadcast translators on a secondary basis (RM–2764).

Safety and Special Radio Services—1—Petition filed by Forest Industries Telecommunication for amendment of Parts 91 and 93 of the Rules to permit interservice geographic sharing of certain 150 and 450 MHz band taxicab Radio Service channels by the Forest Products Radio Service licensees (RM–2702).

Common Carrier—1—Formal complaint of Offshore Telephone Company against South Central Bell Telephone Company and American Telephone and Telegraph Company (File No. TS–2–77).

Common Carrier—2—Petition for suspension and investigation of Southern Pacific Communications Company's tariff revisions for its Satellite Transmission Service under Transmittal No. 98 filed by American Satellite Corporation.

Cable Television—1—Petition for immediate reconsideration and withdrawal of authorization, or stay of Lakeland Cablevision, Inc. (Detroit Lakes, Minnesota), Mimeo No. 85306 (June 15, 1977), filed on behalf of Spokane Television, Inc., licensee of Station KTHI–TV (ABC, Channel 11) Fargo, North Dakota.

Cable Television—2—Applications for certificates of compliance (CAC–7174, 7175) filed by Coldwater Cablevision, Inc., to serve Batavia and Girard Townships, Michigan, and request for special relief to carry three inconsistent television broadcast stations; and opposition filed by West Michigan Telecasters, Inc., licensee of Station WZZM–TV, Grand Rapids, Michigan.

Cable Television—3—Petition for reconsideration of a Commission Order concerning Section 76.92(d) of the Rules, FCC 77–178, released March 22, 1977, filed by Spartan Radiocasting Co., licensee of Station WSPA–TV, Spartanburg, South Carolina.

Cable Television—4—Petition for special relief (CSR–1151) filed by Cable-Vision, a division of American Television and Communications Corporation; and petition for special relief (CSR–1164) filed by Miami Valley Broadcasting Corporaton, licensee of Station KTVU, Oakland, California, and KQED, Inc., licensee of Station KQEC, San Francisco, California.

Cable Television—5—Petition for special relief filed by Warner Cable of Akron, operator of an integrated cable television system serving Akron, Tallmadge, Barberton, Fairlawn, Stow and Cuyahoga Falls, Ohio.

Cable Television—6—Request for order to show cause filed by Southern Tier Educational Television Association, Inc., licensee of Television Broadcast Station WSKG, Binghamton, New York.

Assignment of License and Transfer of Control—1—Application for the voluntary assignment of license of standard broadcast station KPSC, Denver, Colorado, from the First National Bank of Denver, Successor Personal Representative of the Estate of Paco Sanchez, Deceased, to Latino Broadcasting Corporation (BAL–8739); and petition to deny and motion for dismissal of the subject application filed by Francisco J. Sanchez, Jr.

Assignment of License and Transfer of Control—2—Application for consent to voluntary transfer of control of Westport Television, Inc., licensee of UHF station KBMA–TV, Kansas City, Missouri, from Benno C. Schmidt and BMA Properties, Inc. to Scripps-Howard Broadcasting Company (BTC–8303).

Assignment of License and Transfer of Control—3—Voluntary assignment of license of Stations KUAM AM–FM–TV, Agana, Guam, from Pacific Broadcasting Corporation to Pacific Telestations, Inc. (BAL–9967, BALH–2395, BALCT–617); petitions to deny filed by Magof, Inc., Licensee of Station KATB, Agana, Guam, and by Guam Media Company; request for waiver of "one-to-a-market" provisions of the multiple ownership rules.

Renewal—1—Indianapolis Black Media Coalition's petition to deny renewal application of Station WSMJ(FM), Greenfield, Indiana.

Renewal—2—Application for renewal of license for Station KLFB, Lubbock, Texas (BR–4555).

Renewal—3—Indianapolis Black Media Coalition's petition to deny renewal application of Stations WNDE/WFBQ(FM), Indianapolis, Indiana.

Aural—1—Application (BPFT–347) of Ponce Broadcasting Corp. (WZAR–FM, Ponce, Puerto Rico) for CP for new FM translator to serve Mayaguez, Puerto Rico; and petition to deny filed by Radio Americas Corporation (WORA–FM).

Television—1—Application for a new commercial TV station to operate on Channel 33, Phoenix, Arizona, filed by Legend of Cibola Television Company (BPCT–4926).

Broadcast—1—Petition from the Broadcast Equipment Section of the Industrial Electronics Division, Electronics Industries (EIA) that requests amendment of Part 73 relating to the maximum permissible effective radiated power above the horizontal for Television Broadcasting Stations (RM–1701).

Complaints and Compliance—1—Request by the United States Postal Service for a ruling that its spot announcements qualify for the use of the abbreviated sponsorship identification provided by Section 73.1212 (f) of the Rules; and requests by the U.S. Postal Service and the U.S. Department of Defense for waiver of the requirements of Section 317(a)(1) of the Communications Act of 1934, as amended, and Section 73.1212(a) of the Rules.

Complaints and Compliance—2—Application for review of the Broadcast Bureau's March 1, 1977 ruling denying the fairness doctrine complaint of the Grocery Manufacturers of America and the American Meat Institute against NBC.

CONTACT PERSON FOR MORE INFORMATION:

Samuel M. Sharkey, FCC Public Information Officer, telephone number 202–632–7260.

Issued: September 8, 1977.

12

SECURITIES AND EXCHANGE COMMISSION.

FEDERAL REGISTER CITATION OF PREVIOUS ANNOUNCEMENT: 42 FR 45733.

PREVIOUS ANNOUNCED TIME AND DATE:

September 14, 1977, 10 a.m.

CHANGE IN THE MEETING: Deletion of item on open meeting agenda.

The following item originally scheduled for the open meeting on Wednesday, September 14, 1977, has been rescheduled for the open meeting on Monday, September 19, 1977:

Application filed by The Columbia Gas System, Inc. for an order to issue and sell short-term notes and commercial paper and request for hearing by the State of Ohio regarding the application (Rescheduled from September 8, 1977).

Chairman Williams, and Commissioners Loomis, Evans and Pollack voted to approve the above change and determined that no earlier notice thereof was possible.

WEDNESDAY, SEPTEMBER 14, 1977
PART II

FEDERAL ENERGY ADMINISTRATION

ENERGY CONSERVATION PROGRAM

Electric Refrigerators, Refrigerator-Freezers, Freezers, Clothes Dryers, and Television Sets; Test Procedures

V 42 178 SEP 14 77 UMI

Title 10—Energy

CHAPTER II—FEDERAL ENERGY ADMINISTRATION

PART 430—ENERGY CONSERVATION PROGRAM FOR APPLIANCES

Test Procedures for Electric Refrigerators and Electric Refrigerator-Freezers, and Freezers

AGENCY: Federal Energy Administration.

ACTION: Final rule.

SUMMARY: This rule prescribes final test procedures for electric refrigerators, electric refrigerator-freezers, and freezers. Appliance test procedures are one element of the appliance energy efficiency program required by the Energy Policy and Conservation Act.

FOR FURTHER INFORMATION CONTACT:

James A. Smith (Office of Conservation), Room 307, Old Post Office Building, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461 (202–566–4635).

Jim Merna (Media Relations, Room 3104, Federal Building, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461 (202–566–9833).

William J. Dennison (Office of General Counsel), Room 7148, Federal Building, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461 (202–566–9750).

SUPPLEMENTARY INFORMATION:

A. BACKGROUND

The Federal Energy Administration (FEA) hereby amends Part 430, Chapter II of Title 10, Code of Federal Regulations, in order to prescribe test procedures for electric refrigerators, electric refrigerator-freezers, and freezers, pursuant to section 323 (42 U.S.C. 6293) of the Energy Policy and Conservation Act (Act) (Pub. L. 94–163). These test procedures were proposed by notice issued April 21, 1977 (42 FR 21584, April 17, 1977), and a public hearing on the proposed test procedures was held on June 14, 1977. The definitions of "refrigerator," "refrigerator-freezer," and "freezer" were proposed at 41 FR 19980, May 14, 1976, but these definitions have been revised in response to public comments, as discussed below.

By notice issued May 24, 1977 (42 FR 27896, June 1, 1977), FEA established Subparts A and B of Part 430, Chapter II of Title 10, Code of Federal Regulations. Certain definitions and general provisions applicable to the Energy Conservation Program For Appliances have been promulgated in Subpart A. Final test procedures for room air conditioners and dishwashers have been prescribed in Subpart B. In addition to the test procedures for electric refrigerators, electric refrigerator-freezers, and freezers prescribed today, the final test procedures for clothes dryers and television sets are also being prescribed by separate notices. Several other test procedures have been proposed for inclusion in Subpart B. FEA has also proposed a Subpart C for appliance energy efficiency improvement targets. An outline of the provisions of Part 430 which have so far been established, including provisions in today's notices, is as follows:

SUBPART A—GENERAL PROVISIONS

Sec.
430.1 Purpose and Scope.
430.2 Definitions.

SUBPART B—TEST PROCEDURES

430.21 Purpose and Scope.
430.22 Test Procedures for Measures of Energy Consumption:
(a) Refrigerators and refrigerator-freezers
(b) Freezers.
(c) Dishwashers.
(d) Clothes dryers.
. . . . .
(f) Room air conditioners
. . . . .
(h) Television sets.
430.23 Units to be Tested [Reserved]
430.24 Representations Regarding Measures of Energy Consumption
(a) Refrigerators and refrigerator-freezers.
(b) Freezers.
(c) Dishwashers.
(d) Clothes dryers.
. . . . .
(f) Room air conditioners.
. . . . .
(h) Television sets.

APPENDICES TO SUBPART B

Appendix A1—Uniform Test Method for Measuring the Energy Consumption of Electric Refrigerators and Electric Refrigerator-Freezers.
. . . . .
Appendix B—Uniform Test Method for Measuring the Energy Consumption of Freezers.
Appendix C—Uniform Test Method for Measuring the Energy Consumption of Dishwashers.
Appendix D—Uniform Test Method for Measuring the Energy Consumption of Clothes Dryers.
. . . . .
Appendix F—Uniform Test Method for Measuring the Energy Consumption of Room Air Conditioners.
. . . . .
Appendix H—Uniform Test Method for Measuring the Energy Consumption of Television Sets.

B. DISCUSSION OF COMMENTS

Comments were received from industry a trade association, and a state government. The major issues raised by the comments are discussed below.

1. TYPE OF ENERGY INPUT

Comments were received which pointed out that the proposed definition of "basic model" for refrigerators and refrigerator-freezers referred to "electrical characteristics" of covered products. These comments questioned whether units using a non-electrical energy input were intended to be covered by the proposed test procedures.

At the time of publication of the proposed test procedures, FEA believed that refrigerators and refrigerators-freezers using an energy source other than electricity were not to any significant extent distributed in commerce. Subsequently FEA has learned that a significant number of gas refrigeration products are manufactured, primarily for use in mobile homes and recreational vehicles, and therefore it is asking NBS to develop test procedures for these covered products.

The test procedures prescribed today for electric refrigerators and electric refrigerator-freezers reflect minor editorial and definitional changes which were necessary to clarify that these procedures apply only to electric refrigerators and electric refrigerator-freezers. This entailed redefining "refrigerator" and "refrigerator-freezer" and modifying the proposed definitions to apply only to the class of electric refrigerators and electric refrigerator-freezers. Section 323 of the Act authorizes the development of test procedures for classes of a covered product type. Test procedures for the class of gas refrigerators and gas refrigerator-freezers will be proposed as soon as practicable, in keeping with the notice issued July 22, 1976 (41 FR 31237, July 27, 1976) which delayed the proposal of test procedures for refrigerators and refrigerator-freezers beyond the date contemplated by the Act.

Because FEA is unaware of any freezers intended for personal use or consumption which use an energy source other than electricity, it has not asked NBS to develop any additional test procedures for freezers. The test procedures prescribed today for freezers, however, do reflect a minor definitional change to indicate that only electric freezers are presently intended to be covered by these test procedures.

2. ANNUAL OPERATING COST

Several comments suggested that a 50-percent use credit for an antisweat heater switch, such as the credit allowed in the energy factor calculations, also be allowed in the estimated annual operating cost calculations. FEA agrees that such an adjustment of the estimated annual operating cost calculations is necessary if the estimated annual operating cost figure is to be logically consistent with the energy factor. Without the adjustment, two products which are identical except for an antisweat heater switch on one would have the same annual operating cost figure, but the unit with the antisweat heater switch would have a lower energy factor. This would be confusing to consumers. Therefore, the estimated annual operating cost for electric refrigerators, electric refrigerator-freezers, and freezers has been amended in §§ 430.22(a)(1) and 430.22(b)(1) to reflect these changes.

One comment stated that no credit should be applied either to the energy factor or to the cost of operation, because such a credit would be a disincentive for manufacturers to remove the need for antisweat heaters (e.g., by improving the insulation of their products). However, NBS has verified that the antisweat heater switch is indeed used when available in refrigeration products, and that such products therefore use less energy than similar units without the switch. For these reasons, FEA has determined that a use credit for an antisweat heater switch is appropriate both for the annual operating cost and for the energy factor calculations.

Several comments suggested that the use credit should be a figure other than 50 percent, but no supporting information was supplied which was not previously considered in arriving at the 50 percent credit recommended by NBS and adopted by FEA as best reflecting actual consumer use of antisweat heaters.

One comment suggested that monthly operating cost be included as another measure of energy consumption. FEA does not believe that a measure of monthly operating cost would significantly add to the information conveyed by the estimated annual operating cost, the inclusion of which is mandated by the Act.

3. ENERGY FACTOR FOR FREEZERS

Some comments suggested that calculation of an unadjusted energy factor for freezers would lead consumers to believe that freezers are less efficient than electric refrigerators and electric refrigerator-freezers. These comments noted that the energy factor for electric refrigerators having a 15° F. freezer compartment is adjusted by a factor of 1.44, and that the energy factor for electric refrigerator-freezers having a 5° F. freezer compartment is adjusted by a factor of 1.63 FEA has determined that consistency requires that the calculation of the energy factor for freezers include an adjustment factor of 1.73, in order to compensate for the lower working temperature of freezers. The energy factor for freezers has been amended in § 430.22(b)(4) to reflect this change.

Because neither the energy factor nor the adjusted volume is used in the determination of the estimated annual operating cost, this adjustment factor will not affect those calculations. The 1972 baseline efficiency on which the proposed energy efficiency improvement target for freezers (42 FR 36648, July 15, 1977) was based, will be affected, however. As a result, appropriate changes will be made in the energy factors associated with the target for freezers.

4. ADJUSTING THE ENERGY FACTOR

One commenter suggested that the concepts of an adjusted refrigerated volume and an energy factor be abandoned on the grounds that they compromise manufacturers' incentive to add extra insulation to freezer compartments and so discourage the use of optimal insulation thicknesses. While the concept of the energy factor as proposed is imperfect, FEA believes that the alternative of allowing no compensation for the lower operating temperatures of freezing compartments places at an unreasonable disadvantage those units with higher ratios of freezer volume to refrigerator volume.

In theory, a 63-percent increase in freezer compartment insulation would obviate the need for an adjustment factor. In practice, however, the conductance of the freezer compartment insulation of most currently available refrigerator-freezers is within 25 percent of the conductance of the refrigerator compartment insulation. For this reason, FEA believes that the concept of an adjusted energy factor is appropriate as a measure of energy consumption which will assist consumers in making purchasing decisions, as required by the Act. As noted above, FEA has decided not only to retain an adjusted energy factor for electric refrigerators and electric refrigerator-freezers, but also to extend this concept to freezers.

The same commenter also suggested that the energy factor favors larger units because the major heat transfer mechanisms are more dependent upon area than volume. However, the utility of a refrigeration product is a reflection of its volume and not its surface area, and the measure of efficiency should reflect this utility. For example, the energy factor correctly indicates that one large unit is preferable to two smaller units with the same total volume.

5. CREDIT FOR OTHER ENERGY SAVING DEVICES

FEA and NBS are currently studying the advisability of a credit for a switch to interrupt operation of a unit's evaporator fan when the unit's door is open. Special credit may be appropriate because the test procedures prescribed today involve a cycle type with doors remaining closed, so that any advantages of such a device would not be reflected.

FEA is prepared to amend these test procedures if further developments indicate that energy saving devices are given inappropriate credit due to differences between the test procedures and actual consumer use.

6. TEST VOLTAGE

Several comments were directed to proposed § 430.23 (a)(3) and (b)(3), which required basic models having a dual voltage rating to be tested at each design voltage. All household electric refrigerators, electric refrigerator-freezers, and freezers in the United States are designed to operate at a nominal 115 volt, 60 HZ circuit, and any other nameplate voltage rating is included solely for use outside the United States. Because FEA does not intend to require testing under conditions not found in the United States, this requirement is determined to be unduly burdensome and has been deleted.

7. NUMBER OF UNITS TO BE TESTED

Some comments expressed objections to the sampling provision for electric refrigerators, electric refrigerator-freezers, and freezers. Proposed § 430.23 (a) and (b) provided for sampling of each basic model to be tested when testing of electric refrigerators, electric refrigerator-freezers or freezers is required by the Act or by program regulations of agencies responsible for administering the Act. This provision was intended both to provide an acceptable level of assurance that test results are applicable to any entire basic model for which testing is required and to minimize the testing burden on manufacturers.

Test procedures prescribed under section 323 of the Act are intended ultimately to be used, for example, for labeling under section 324, for monitoring the progress of manufacturers toward accomplishing the energy efficiency improvement targets under section 325, and for enforcement testing under section 326. These aspects of the appliance program have not, however, been implemented. It is quite possible that the objectives of appliance testing under each of these parts of the program, as well as the instructions as to how a test procedure should be applied (e.g., sampling of production units), may differ. FEA, NBS, and FTC are continuing to evaluate the appropriate method or methods for sampling the units to be tested in order to comply with the statute and satisfy all of the different elements of the appliance program.

While the various parts of the appliance program identified above are not in effect at this time, section 323(c) of the Act provides:

> Effective 90 days after a test procedure rule applicable to a covered product is prescribed under this section, no manufacturer, distributor, retailer or private labeler may make any representation—
> (1) In writing including a representation on a label, or
> (2) In any broadcast advertisement, respecting the energy consumption of such product, unless such product has been tested in accordance with such test procedure and such representation fairly discloses the results of such testing.

In order to eliminate the problems discussed above associated with a general sampling provision, § 430.23 has been reserved in the final test procedures, and sampling requirements which apply only for purposes of advertising have been reorganized into § 430.24 (a) and (b) of the final test procedures. Sections 430.24 (a) and (b) are similar to proposed § 430.23 (a) and (b), but contain several revisions. Most notably, the units tested are required to be representative of production units or actual production units. This change is intended to reduce the burden which might be caused by requiring post-production rating of basic models in every instance of testing pursuant to section 323(c) of the Act.

Until a labeling rule has been implemented pursuant to section 324, manufacturers are not required to test unless they choose to make representations regarding a measure of energy consumption identified in or based upon section 430.22 (a) and (b). It should also be emphasized that the test procedures prescribed today apply only to the initial rating of a basic model.

In addition, certain technical changes have been made in sampling language. Specifically, there is to be 95 percent confidence that the true mean of any measure of the basic model lies within

V 42 I 178 SEP 14 77 UMI

±10 percent of the mean of such measure of the sample. Comments pertaining to several proposed test procedures criticized the language of the proposed sampling provisions. These comments suggested that a sampling provision should refer to the estimate of the mean rather than to the true mean. FEA has considered this suggestion and has determined that the language prescribed today is more technically correct because the statistical measures "estimate of the mean" and "mean of the sample" are generally considered to be identical. The final test procedures for room air conditioners and dishwashers used both these terms in a manner that could be confusing, and the language prescribed today is intended to eliminate this possibility of confusion.

9. PRODUCTS COVERED BY THE FINAL TEST PROCEDURES

Some comments suggested that a few products cannot be tested satisfactorily using the proposed test procedures. FEA is prepared to amend the test procedures as new products or new design features may require. No specific details have been provided, however, to justify any such amendments of the proposed test procedures at this time.

One commenter specifically stated that compact refrigerators could not be tested accurately using the proposed test procedures. No particular feature of compact refrigerators was cited, however, which would render the test procedures inappropriate for testing these units.

9. AMBIENT TEMPERATURES

It was suggested that the test procedures be amended to specify that tests be conducted at an ambient temperature of 104° F. Although such a test would provide a useful performance criterion, the change from the currently specified ambient temperature of 90° F. would not more accurately reflect energy efficiency. Therefore, this suggestion was not adopted.

10. NORMAL CYCLE

Several comments suggested that the use of the word "normal" in the term "normal cycle" implied that that cycle was the usual cycle or the cycle expected to be used most often. Commenters therefore took exception to the definition of "normal cycle" which stated that any anti-sweat heater switch would be in the highest energy consuming position during this cycle. The term "standard cycle" was offered as a substitute. FEA has adopted this change.

Suggestions were also made to specify a "standard cycle-maximum" and a "standard cycle-minimum." FEA wishes to encourage maximum use of energy-saving devices such as anti-sweat heaters. Evidence was elicited during the public comment period which indicated that anti-sweat heater switches tend to remain in the position set at the factory. In order to encourage manufacturers to ship refrigeration products with the anti-sweat heater switch in the lowest energy consuming position, FEA has determined that a cycle in which the switch is in the same position as set at the factory is preferable to a "standard cycle-minimum."

A suggestion that FEA more clearly specify the duration of test cycles has been adopted. A "cycle" refers to continuous operation of a unit for a period of 24 hours. However, test data may be based on test periods of less than 24 hours if corrected to correspond to a 24-hour period as specified in HRF-2-ECFT-1975.

11. CORRELATIVE TEST PROCEDURES

Several comments indicated that correlative methods have been developed by manufacturers of refrigeration products which yield virtually the same results as those obtained through the test procedures prescribed today. At this time FEA has not made a decision on the feasibility of allowing correlative testing. If additional data are submitted by individual manufacturers, FEA will examine the possibility of using correlative testing and will determine whether the Act would permit such methods to be used in lieu of the prescribed test procedures.

12. MISCELLANEOUS

After careful consideration of all the comments and further consultation with NBS and FTC, FEA has incorporated in the final rule some minor changes that were not discussed above.

C. REGULATIONS PRESCRIBED

1. TEST PROCEDURES

The test procedures for electric refrigerators, electric refrigerator-freezers, and freezers prescribed today are included in Subpart B and are substantially the same as those proposed, with the exception of the changes discussed above. As with the proposal procedures, the test methodology incorporates the approach contained in the Association of Home Appliance Manufacturers (AHAM) Standard HRF-2-ECFT-1975 for measuring average energy consumption per cycle type, and the American National Standard (ANS) B38.1-1970 for measuring net refrigerated volume. For purposes of FEA's program, the incorporated standards remain applicable as presently written regardless of any subsequent amendment of the ANS or AHAM Standard, until further amendment by FEA.

Under the requirements of section 32(c) of the Federal Energy Administration Act of 1974 (15 U.S.C. 761 et. seq.) as amended by section 9 of the Federal Energy Administration Authorization Act of 1977 (Pub. L. 95-70), the Administrator of FEA is to consult with the Attorney General and the Chairman of the Federal Trade Commission concerning the impact on competition of any rules prescribed by FEA which utilize or incorporate any commercial standards.

The Administrator has transmitted copies of the test procedures for electric refrigerators, electric refrigerator-freezers, and freezers, which incorporate the above-mentioned commercial standards, to the Attorney General and the Chairman of the Federal Trade Commission for their comments concerning the impact of such standards on competition, in accordance with section 32(c). Neither official has any comments, nor do they recommend against the incorporation or use of these commercial standards in the final test procedures for electric refrigerators, electric refrigerator-freezers, and freezers.

2. GENERAL PROVISIONS

Also prescribed today are definitions of "electric refrigerator," "electric refrigerator-freezer," "freezer," "refrigerator," and "refrigerator-freezer." The definition of the term "basic model" for refrigerators and refrigerator-freezers, and for freezers, has been added. Some of these definitions were previously proposed in Subpart A (41 FR 19980, May 14, 1976; 42 FR 21588, April 27, 1977). Comments which were received regarding these definitions, and the issues which they raised, have been discussed earlier in this notice.

3. APPLICATION OF TEST PROCEDURES

As discussed previously, the final test procedures prescribed today must be applied before representations regarding a measure of energy consumption can be made. Because the purposes and needs of the different elements of the appliance program (e.g., labeling, targets) vary, application of the standard test methodology prescribed today may differ in some respects for each program element. It is expected that instructions on how to apply the standard test methodology to these other elements of the appliance program will be proposed for comment in the near future.

The requirements of § 430.24 (a) and (b) of the final regulations apply until such time as final labeling requirements for a particular measure of energy consumption and the associated test procedure application provision are prescribed. After that time, all representations regarding a measure of energy consumption covered by a labeling rule must be the same as represented on the label.

D. UNIT COSTS OF ENERGY

Under section 323(b)(2) of the Act, FEA is to provide manufacturers information as to the representative average unit costs of energy. This information was provided by notice issued July 11, 1977 (42 FR 36549, July 15, 1977).

E. PREEMPTION

Today's rulemaking prescribing final test procedures for electric refrigerators, electric refrigerator-freezers, and freezers supersedes any State regulation to the extent required by section 327 of the Act. Pursuant to section 327, all State regulations which provide for the disclosure of information with respect to any measure of energy consumption of electric refrigerators, electric refrigerator-freezers, or freezers, or which provide for any energy efficiency standard or similar requirement with respect to energy efficiency or energy use of electric refrigerators, electric refrigerator-freezers, or freezers, must now employ

test procedures identical to those specified in today's final rule.

(Energy Policy and Conservation Act, Pub. L. 94-163, as amended by Pub. L. 94-385; Federal Energy Administration Act of 1974, Pub. L. 93-275, as amended by Pub. L. 94-385; E.O. 11790, 39 FR 23185)

In consideration of the foregoing, Part 430 of Chapter II of Title 10, Code of Federal Regulations, is amended as set forth below, effective October 17, 1977.

Issued in Washington, D.C., September 8, 1977.

ERIC J. FYGI,
Acting General Counsel,
Federal Energy Administration.

1. Section 430.2 is amended by adding subparagraphs (1) and (2) as part of the definition of "Basic model," and by adding in appropriate alphabetical order definitions of "electric refrigerator," "electric refrigerator-freezer," "freezer," "refrigerator," and "refrigerator-freezer" to read as follows:

§ 430.2 Definitions.

. . . . . .

"Basic model" means all units of a given type of covered product (or class thereof) manufactured by one manufacturer and—

(1) With respect to refrigerators and refrigerator-freezers, which have the same primary energy source, which have electrical characteristics that are essentially identical, and which do not have any differing physical or functional characteristics that affect energy consumption.

(2) With respect to freezers, which have the same primary energy source, which have electrical characteristics that are essentially identical, and which do not have any differing physical or functional characteristics that affect energy consumption.

. . . . . .

"Electric refrigerator" means a cabinet designed for the refrigerated storage of food at temperatures above 32° F., and having a source of refrigeration requiring an electrical energy input only. It may include a compartment for the freezing and storage of food at temperatures below 32° F. but does not provide a separate low temperature compartment designed for the freezing of and the long term storage of food at temperatures below 8° F. It has only one exterior door, but it may have interior doors on compartments.

. . . . . .

"Electric refrigerator-freezer" means a cabinet which consists of two or more compartments with at least one of the compartments designed for the refrigerated storage of foods at temperatures above 32° F. and with at least one of the compartments designed for the freezing of and the storage of frozen foods at temperatures of 8° F. or below and may be capable of being adjusted by the user to a temperature of 0° F. or below. The source of refrigeration requires an electrical energy input only.

. . . . . .

"Freezer" means a cabinet designed as a unit for the storage of food at temperatures of 0° F. or below, having the ability to freeze food, and having a source of refrigeration requiring an electrical energy input only.

"Refrigerator" means an electric refrigerator or a gas refrigerator.

. . . . . .

"Refrigerator-freezer" means an electric refrigerator-freezer or a gas refrigerator-freezer.

. . . . . .

2. Section 430.22 is amended by adding paragraph (a) and (b), to read as follows:

§ 430.22 Test procedures for measures of energy consumption.

(a) *Refrigerators and refrigerator-freezers.* (1) The estimated annual operating cost for electric refrigerators and electric refrigerator-freezers without an anti-sweat heater switch shall be the product of the following three factors: (i) The representative average-use cycle of 365 cycles per year, (ii) the average per-cycle energy consumption for the standard cycle in kilowatt-hours per cycle, determined according to 4.1 of Appendix A1 of this subpart, and (iii) the representative average unit cost in dollars per kilowatt-hour as provided by the Administrator, the resulting product then being rounded off to the nearest dollar per year.

(2) The estimated annual operating cost for electric refrigerators and electric refrigerator-freezers with an anti-sweat heater switch shall be the product of the following three factors: (i) The representative average-use cycle of 365 cycles per year, (ii) half the sum of the average per-cycle energy consumption for the standard cycle and the average per-cycle energy consumption for a test cycle type with the anti-sweat heater switch in the position set at the factory, each in kilowatt-hours per cycle, determined according to 4.1 of Appendix A1 of this subpart, and (iii) the representative average unit cost in dollars per kilowatt-hour as provided by the Administrator, the resulting product then being rounded off to the nearest dollar per year.

(3) The estimated annual operating cost for any other specified cycle type for electric refrigerators and electric refrigerator-freezers shall be the product of the following three factors: (i) The representative average-use cycle of 365 cycles per year, (ii) the average per-cycle energy consumption for the specified cycle type, determined according to 4.1 of Appendix A1 to this subpart, and (iii) the representative average unit cost in dollars per kilowatt-hour as provided by the Administrator, the resulting product then being rounded off to the nearest dollar per year.

(4) The energy factor for electric refrigerators and electric refrigerator-freezers, expressed in cubic feet per kilowatt-hour per cycle, shall be—

(i) For electric refrigerators and electric refrigerator-freezers not having an anti-sweat heater switch, the quotient of (A) the adjusted total volume in cubic feet, determined according to 4.2 of Appendix A1 of this subpart, divided by (B) the average per-cycle energy consumption for the standard cycle in kilowatt-hours per cycle, determined according to 4.1 of Appendix A1 of this subpart, the resulting quotient then being rounded off to the second decimal place, and

(ii) For electric refrigerators and electric refrigerator-freezers having an anti-sweat heater switch, the quotient of (A) the adjusted total volume in cubic feet, determined according to 4.2 of Appendix A1 of this subpart, divided by (B) half the sum of the average per-cycle energy consumption for the standard cycle and the average per-cycle energy consumption for a test cycle type with the anti-sweat heater switch in the position set at the factory, each in kilowatt-hours per cycle, determined according to 4.1 of Appendix A1 of this subpart, the resulting quotient then being rounded off to the second decimal place.

(5) Other useful measures of energy consumption for electric refrigerators and electric refrigerator-freezers shall be those measures of energy consumption for electric refrigerators and electric refrigerator-freezers which the Administrator determines are likely to assist consumers in making purchasing decisions and which are derived from the application of Appendix A1 of this subpart.

(b) *Freezers.* (1) The estimated annual operating cost for freezers without an anti-sweat heater switch shall be the product of the following three factors: (i) The representative average-use cycle of 365 cycles per year, (ii) the average per-cycle energy consumption for the standard cycle in kilowatt-hours per cycle, determined according to 4.1 of Appendix B of this subpart, and (iii) the representative average unit cost in dollars per kilowatt-hour as provided by the Administrator, the resulting product then being rounded off to the nearest dollar per year.

(2) The estimated annual operating cost for freezers with an anti-sweat heater switch shall be the product of the following three factors: (i) The representative average-use cycle of 365 cyles per year, (ii) half the sum of the average per-cycle energy consumption for the standard cycle and the average per-cycle energy consumption for a test cycle type with the anti-sweat heater switch in the position set at the factory, each in kilowatt-hours per cycle, determined according to 4.1 of Appendix B of this subpart, and (iii) the representative average unit cost in dollars per kilowatt-hour as provided by the Administrator, the resulting product then being rounded off to the nearest dollar per year.

(3) The estimated annual operating cost for any other specified cycle type for freezers shall be the product of the following three factors: (i) The representative average-use cycle of 365 cycles per year, (ii) the average per-cycle energy consumption for the specified cycle type, determined according to 4.1 of Appendix B of this subpart, and (iii) the

V 42 178
SEP 14 77
UMI

representative average unit cost in dollars per kilowatt-hour as provided by the Administrator, the resulting product then being rounded off to the nearest dollar per year.

(4) The energy factor for freezers, expressed in cubic feet per kilowatt-hour per cycle, shall be—

(i) For freezers not having an anti-sweat heater switch, the quotient of (A) the adjusted net refrigerated volume in cubic feet, determined according to 4.2 of Appendix B of this subpart, divided by (B) the average per-cycle energy consumption for the standard cycle in kilowatt-hours per cycle, determined according to 4.1 of Appendix B of this subpart, the resulting quotient then being rounded off to the second decimal place, and

(ii) For freezers having an anti-sweat heater switch, the quotient of (A) the adjusted net refrigerated volume in cubic feet, determined according to 4.2 of Appendix B of this subpart, divided by (B) half the sum of the average per-cycle energy consumption for the standard cycle and the average per-cycle energy consumption for a test cycle type with the anti-sweat switch in the position set at the factory, each in kilowatt-hours per cycle, determined according to 4.1 of Appendix B of this subpart, the resulting quotient then being rounded off to the second decimal place.

(5) Other useful measures of energy consumption for freezers shall be those measures of energy consumption for freezers which the Administrator determines are likely to assist consumers in making purchasing decisions and which are derived from the application of Appendix B of this subpart.

* * * * *

3. Section 430.24 is amended by adding paragraphs (a) and (b), to read as follows:

§ 430.24 Representations regarding measures of energy consumption.

(a) *Refrigerators and refrigerator-freezers.* (1) Except as provided in paragraph (a)(3) of this section, no manufacturer, distributor, retailer, or private labeler of electric refrigerators or electric refrigerator-freezers may make any representation with respect to or based upon a measure or measures of energy consumption described in § 430.22(a) unless a sample of sufficient size of each basic model for which such representation is made has been tested in accordance with applicable provisions of this subpart such that, for each such measure of energy consumption, there is 95 percent confidence that the true mean of such measures of the basic model lies within ±10 percent of the mean of such measures of the sample.

(2) The sample selected for paragraph (a)(1) of this section shall be comprised of units which are production units, or are representative of production units, of the basic model being tested.

(3) Whenever a rule applicable to electric refrigerators or electric refrigerator-freezers is prescribed under section 324 of the Act, this paragraph shall not apply to any label covered by such rule, and all representations of any measure of energy consumption covered by such rule shall be identical to the measure of energy consumption on the label.

(b) *Freezers.* (1) Except as provided in paragraph (b)(3) of this section, no manufacturer, distributor, retailer, or private labeler of freezers may make any representation with respect to or based upon a measure or measures of energy consumption described in § 430.22(b) unless a sample of sufficient size of each basic model for which such representation is made has been tested in accordance with applicable provisions of this subpart such that, for each such measure of energy consumption there is 95 percent confidence that the true mean of such measures of the basic model lies within ±10 percent of the mean of such measures of the sample.

(2) The sample selected for paragraph (b)(1) of this section shall be comprised of units which are production units, or are representative of production units, of the basic model being tested.

(3) Whenever a rule applicable to freezers is prescribed under section 324 of the Act, this paragraph shall not apply to any label covered by such rule, and all representations of any measure of energy consumption covered by such rule shall be identical to the measure of energy consumption on the label.

* * * * *

4. Subpart B of Part 430 is amended to add an Appendix A1, to read as follows:

APPENDIX A1—UNIFORM TEST METHOD FOR MEASURING THE ENERGY CONSUMPTION OF ELECTRIC REFRIGERATORS AND ELECTRIC-REFRIGERATOR-FREEZERS

1. DEFINITIONS

1.1 "Adjusted total volume" means the sum of (i) the net general refrigerated volume as defined in ANS B38.1–1970 in cubic feet, and (ii) the product of an adjustment factor and the net freezer refrigerated volume as defined in ANS B38.1–1970, in cubic feet.

1.2 "Anti-sweat heater" means a device incorporated into the design of a refrigerator or refrigerator-freezer to prevent the accumulation of moisture on exterior surfaces of the cabinet under conditions of high

1.3 "Cycle" means the operation of an electric refrigerator or electric refrigerator-freezer for a continuous period of 24 hours with the consumer-activated controls set so that the test conditions specified in HRF–2–ECFT–1975 are maintained.

1.4 "Cycle type" means the operation of an electric refrigerator or electric refrigerator-freezer for a continuous period of 24 hours, with the consumer-activated controls set to establish various operating characteristics.

1.5 "Standard cycle" means the cycle type in which the anti-sweat heater switch, when provided, is set in the highest energy consuming position.

2. TESTING CONDITIONS

2.1 *Operational conditions.* Install the electric refrigerator or electric refrigerator-freezer and maintain the operating conditions in accordance with the Association of Home Appliance Manufacturers (AHAM) Standard HRF–2–ECFT–1975. All references in HRF–2–ECFT–1975 to American National Standard (ANS) B38.1 shall be interpreted as references to ANS B38.1–1970.

3. TEST CYCLE AND MEASUREMENTS

3.1 *Test cycle.* Perform a test cycle type by establishing the testing conditions set forth in 2, testing the electric refrigerator or electric refrigerator-freezer in accordance with the AHAM Standard HRF–2–ECFT–1975. Test data may be based on test periods of less than 24 hours if corrected to correspond to a 24-hour test period as specified in HRF–2–ECFT–1975.

3.2 *Test measurements.* Measure electric refrigerator or electric refrigerator-freezer net refrigerated volume, V_n, expressed in cubic feet and defined, in accordance with ANS B38.1–1970, section 3.2 as:

$$V_n = V_f + V_g$$

where

V_f = net freezer refrigerated volume, in cubic feet

V_g = net general refrigerated volume, in cubic feet

3.3 *Reported values.* State the reported values of energy consumption in kilowatt-hours as determined in accordance with AHAM Standard HRF–2–ECFT–1975, and the net freezer refrigerated volume, net general refrigerated volume, and the net refrigerated volume (as defined in HRF–2–ECFT–1976), all in cubic feet, as determined in accordance with ANS B38.1–1970, Section 3.2.

4. CALCULATION OF DERIVED RESULTS FROM TEST MEASUREMENTS

4.1 *Average per-cycle energy consumption.* Calculate for the cycle type under test the average per-cycle energy consumption of electric refrigerators and electric refrigerator-freezers, expressed in kilowatt-hours per cycle, in accordance with AHAM Standard HRF–2–ECFT–1975.

4.2 *Adjusted total volume.*

4.2.1 *Electric refrigerators.* Calculate for electric refrigerators under test the adjusted total volume, V_{rr}, expressed in cubic feet and defined as:

$$V_{rr} = (V_f \times C_r) + V_g$$

where

V_f and V_g are defined in 3.2, and

C_r = adjustment factor of 1.44, dimensionless

4.2.2 *Electric refrigerator-freezers.* Calculate for electric refrigerator-freezers under test the adjusted total refrigerated volume, V_{rf}, expressed in cubic feet and defined as:

$$V_{rf} = (V_f \times C_{rf}) + V_g$$

where

V_f and V_g are defined in 3.2, and

C_{rf} = adjustment factor of 1.63, dimensionless

5. Subpart B of Part 430 is amended to add an Appendix B, to read as follows:

APPENDIX B—UNIFORM TEST METHOD FOR MEASURING THE ENERGY CONSUMPTION OF FREEZERS

1. DEFINITIONS

1.1 "Anti-sweat heater" means a device incorporated into the design of a freezer to prevent the accumulation of moisture on exterior surfaces of the cabinet under conditions of high ambient humidity.

1.2 "Cycle" means the operation of a freezer for a continuous period of 24 hours with the consumer-activated controls preset so that the test conditions specified in HRF–2–ECFT–1975 are maintained.

1.3 "Cycle type" means the operation of a freezer for a continuous period of 24 hours with the consumer-activated controls set to establish various operating characteristics.

1.4 "Standard cycle" means the cycle type in which the anti-sweat heater switch, when provided, is set in the highest energy consuming position.

2. TESTING CONDITIONS

2.1 *Operational conditions.* Install the freezer and maintain the operating conditions in accordance with the Association of Home Appliance Manufacturers (AHAM) Standard HRF–2–ECFT–1975. All references in HRF–2–ECFT–1975 to American National Standard (ANS) B38.1 shall be interpreted as references to ANS B38.1–1970.

3. TEST CYCLE AND MEASUREMENTS

3.1 *Test cycle.* Perform a test cycle type by establishing the testing conditions set forth in 2, testing the freezers in accordance with the AHAM Standard HRF–2–ECFT–1975. Test data may be based on test periods of less than 24 hours if corrected to correspond to a 24-hour test period as specified in HRF–2–ECFT–1975.

3.2 *Test measurements.* Measure the net freezer refrigerated volume, in cubic feet, in accordance with ANS B38.1–1970, section 4.2.

3.3 *Reported values.* State the reported values of energy consumption, E_t, expressed in kilowatt-hours, as determined in accordance with AHAM Standard HRF–2–ECFT–1975 and the net freezer refrigerated volume, in cubic feet, as determined in accordance with ANS B38.1–1970, section 4.2.

4. CALCULATION OF DERIVED RESULTS FROM TEST MEASUREMENTS

4.1 *Average per-cycle energy consumption.*

4.1.1 *Chest freezers.* Calculate for chest freezers under test the average per-cycle energy consumption, E_c, expressed in kilowatt-hours per cycle, and defined as:

$$E_c = E_t \times C_c$$

where

E_t is defined in 3.3, and

C_c = correction factor of 0.7, dimensionless

4.1.2 *Upright freezers.* Calculate for upright freezers under test the average per-cycle energy consumption, E_u, expressed in kilowatt-hours per cycle and defined as:

$$E_u = E_t \times C_u$$

where

E_t is defined in 3.3, and

C_u = correction factor of 0.85, dimensionless

4.2 *Adjusted net refrigerated volume.*

4.2.1 *Freezers.* Calculate for freezers under test, the adjusted net freezer refrigerated volume, V_{ff}, expressed in cubic feet and defined as:

$$V_{ff} = V_f \times C_f.$$

where

V_f = net freezer refrigerated volume from 3.2, and

C_f = adjustment factor of 1.73, dimensionless.

PART 430—ENERGY CONSERVATION PROGRAM FOR APPLIANCES

Test Procedures for Clothes Dryers

AGENCY: Federal Energy Administration.

ACTION: Final rule.

SUMMARY: This rule prescribes final test procedures for clothes dryers. Appliance test procedures are one element of the appliance energy efficiency program required by the Energy Policy and Conservation Act.

FOR FURTHER INFORMATION CONTACT:

James A. Smith, (Program Office), Room 307, Old Post Office Building, 12th and Pennsylvania Avenue, NW., Washington, D.C. 20461 (202–566–4635).

Jim Merna, Media Relations), Room 3104, Federal Building, 12th and Pennsylvania Avenue, NW., Washington, D.C. 20461 (202–566–9833).

Michael Skinker, (Office of General Counsel), Room 5116, Federal Building, 12th and Pennsylvania Avenue, NW., Washington, D.C. 20461 (202–566–9750 or 202–566–9380.

SUPPLEMENTARY INFORMATION:

A. BACKGROUND

The Federal Energy Administration (FEA) hereby amends Part 430, Chapter II of Title 10, Code of Federal Regulations, in order to prescribe test procedures for clothes dryers pursuant to section 323 (42 U.S.C. 6293) of the Energy Policy and Conservation Act (Act) (Pub. L. 94–163). Clothes dryer test procedures were proposed by notice issued April 21, 1977 (42 FR 21589, April 27, 1977), which solicited oral and written comments from interested persons, and a public hearing on the proposed test procedures was held on June 13, 1977. The definitions of "electric clothes dryer" and "gas clothes dryer" were proposed at 41 FR 19980, May 14, 1976.

By notice issued May 24, 1977 (42 FR 27896, June 1, 1977), FEA established Subparts A and B of Part 430, Chapter II of Title 10, Code of Federal Regulations. Certain definitions and general provisions applicable to the energy conservation program for appliances have been promulgated in Subpart A. Final test procedures for room air conditioners and dishwashers have been prescribed in Subpart B. In addition to the test procedures for clothes dryers prescribed today, the final test procedures for television sets, electric refrigerators, electric refrigerator-freezers, and freezers are also being prescribed by separate notices. Several other test procedures have been proposed for inclusion in Subpart B. FEA has also proposed a Subpart C for appliance energy efficiency improvement targets. An outline of the provisions of Part 430 which have so far been established, including provisions in today's notices, is as follows:

SUBPART A—GENERAL PROVISIONS

Sec.
430.1 Purpose and Scope.
430.2 Definitions.

SUBPART B—TEST PROCEDURES

430.21 Purpose and Scope.
430.22 Test Procedures for Measures of Energy Consumption:
(a) Refrigerators and refrigerator-freezers.
(b) Freezers.
(c) Dishwashers.
(d) Clothes dryers.
* * * * *
(f) Room air conditioners.
* * * * *
(h) Television sets.
430.23 Units to be tested [Reserved].
430.24 Representations Regarding Measures of Energy Consumption.
(a) Refrigerators and Refrigerator-freezers.
(b) Freezers.
(c) Dishwashers.
(d) Clothes dryers.
* * * * *
(f) Room air conditioners.
* * * * *
(h) Television sets.

APPENDICES TO SUBPART B

APPENDIX A1—Uniform Test Method for Measuring Energy Consumption of Electric Refrigerators and Electric Refrigerator-freezers.

* * * * *

APPENDIX B—Uniform Test Method for Measuring the Energy Consumption of Freezers.

APPENDIX C—Uniform Test Method for Measuring the Energy Consumption of Dishwashers.

APPENDIX D—Uniform Test Method for Measuring the Energy Consumption of Clothes Dryers.

* * * * *

APPENDIX F—Uniform Test Method for Measuring the Energy Consumption of Room Air Conditioners.

* * * * *

APPENDIX H—Uniform Test Method for Measuring the Energy Consumption of Television Sets.

B. DISCUSSION OF COMMENTS

Comments were received from industry, consumers, and a federal agency. Most of the comments were directed toward technical areas of the proposed test procedures, although some of the comments were specifically directed toward the information that was to be placed on the label. The comments which were directly concerned with the content of the label were more applicable to the labeling program under section 324 of the Act, rather than to the prescription of final test procedures, and were therefore forwarded to the Federal Trade Commission for consideration in developing labeling rules applicable to clothes dryers. The major issues raised by the comments on the proposed test procedures are discussed below.

1. BASIC MODEL DEFINITION

One manufacturer commented on the proposed definition for the "basic model" of clothes dryers in § 430.2 and suggested that the definition be broadened to provide that all similar models which consume an equivalent amount of energy when tested according to the proposed test procedures constitute the same basic model. In particular, it was recommended that the definition incorporate the idea that "styling differences, convenience features, components and functions which do not alter energy usage, do not constitute additional 'basic models' and require testing thereof."

In response to this comment FEA has modified the proposed definition for the "basic model" of clothes dryers to clarify that a single basic model includes units with any variety of different physical or

V 4 2 1 7 8 SEP 14 7 7 UMI

functional characteristics if these characteristics do not have any effect on the energy consumption of the particular clothes dryer model being tested. For example, these characteristics may include automatic termination systems, drum lights, features which provide for an extended tumble after cooldown, thermostats, cooldown variations, and end-of-cycle signals—if the existence of these features does not affect the energy consumption of the clothes dryer as measured by the prescribed test procedures.

The manufacturer also suggested that units with console lights or other lighting systems that do not consume more than 10 watt-hours of energy during the test cycle should not constitute additional basic models. FEA has responded to this suggestion by revising the installation instructions for the test procedures in 2.1 of Appendix D to permit the manufacturer before testing the clothes dryer to disconnect all console lights or other lighting systems which do not consume more than 10 watts during the clothes dryer test cycle.

2. TEST LOAD

One comment proposed altering the test procedures to provide that two test cycles be conducted on each unit tested using two different loads one consisting entirely of cotton energy test cloths and the other consisting of synthetic energy test cloths. The proposed test procedures required that one test cycle be conducted using a test load of energy test cloths that were a mixture of 50 percent cotton and 50 percent polyester. The commenter felt, however, that this mixture would not produce results that would be representative of actual clothes drying time by consumers. This conclusion was based on the commenter's opinion that most consumers dry synthetics and cotton clothes separately. Therefore, since synthetic material dries more rapidly than cotton due to its low moisture holding ability, the 50–50 test load material as proposed would probably require a longer time to dry due to the presence of the cotton and, therefore, unrealistic differences in the energy measurements between units might occur.

No consumer usage data was provided, however, to support the proposition that most families dry their synthetic clothes separately from their cotton clothes. A Proctor and Gamble field survey conducted for clothes washers provides 1972 consumer usage data which indicates that the composition of wash loads by type of fabric was: 60 percent plain cotton; 20 pecent cotton/synthetic; and 20 percent synthetics. Also, at a public hearing held by FEA in Washington, D.C., on June 2, 1976, concerning the proposed appliance energy efficiency improvement targets for clothes washers, General Electric Company estimated that in an average washer load the ratio of natural fiber to synthetic fiber was approximately 50 percent. Based on these factors and NBS' recommendation, FEA has decided to use a test cloth made of a blend of equal portions of synthetic and cotton material as the appropriate test load. This choice also reflects the trend toward the use of an increasing amount of synthetic materials in a typical consumer wash load and, therefore, is more representative of the type of materials being dried by consumers in a normal dryer load.

The industry and other interested persons are encouraged, however, to provide any additional reliable data as it becomes available concerning consumer clothes drying patterns which would indicate the type and composition of materials actually being dried in a normal load. This data would be considered by FEA in deciding whether or not to alter the present composition of the test cloth material used as the test load.

Another comment with respect to the use of energy test cloths as the test load suggested that the test procedures limit the use of the same energy test cloths to a maximum of 25 test cycles, since the composition of the cloth begins to change after this point and resultant changes in clothes dryer's energy consumption could occur. NBS agrees that this proposed change would reduce potential variability in the test results that may occur from any change in the cotton/polyester composition of the test cloth material caused by the loss of cotton fibers due to continued drying of the same test cloth. Therefore, NBS recommends and FEA concurs that 2.6.1 and 2.6.2 of Appendix D be modified to limit the number of test runs with the same energy test cloth and energy stuffer cloths to 25 runs.

3. FIELD USE FACTOR

Several comments questioned the use of 1.2 for the field use factor as the appropriate multiplier to provide laboratory test results that are representative of actual consumer usage. The comments suggested that this figure should be closer to 1.1. After the comments were received, FEA, in conjunction with NBS, re-evaluated the use of 1.2 as the proper multiplying factor.

A survey conducted by Oklahoma Gas and Electric Company of 64 homes demonstrated that in drying 33,000 loads of clothes, an average of 2.5 kilowatt-hours (kWh's) of electricity was used per cycle. Association of Home Appliance Manufacturers (AHAM) reported data that represented the energy consumption in 1972 of 2,983,200 production units of clothes dryers, consisting of approximately 93 percent standard-size electric dryers and 7 percent compact-size electric dryers, as 5,736,900 kWh's of electricity for one cycle of each unit. This energy consumption was determined by conducting tests in accordance with the procedures described in AHAM's standard HLD–1 and HLD–2EC. Based on this 1972 baseline data, the per-cycle clothes dryer energy consumption for a test conducted pursuant to HLD–2EC which requires a 60 percent reduction in the moisture content of the test load (65 percent to 5 percent) is 1.923 kWh per cycle (5,736,900 KWh's per-cycle divided by 2,983,000 units). Since the reduction in the moisture content of the test load required in the proposed test procedures for clothes dryers is 66 percent (70 percent to 4 percent), the proposed test procedures will result in 10 percent more moisture reduction and therefore 10 percent more energy consumption than the test specified in HLD–2EC.

Therefore, the energy consumed per cycle, 1.923 kWh, by the 1972 production units must be corrected by a factor of 10 percent to arrive at an equivalent per-cycle energy consumption figure that would have resulted had FEA proposed test procedures been used to test the 1972 units. This figure would be 2.12 (1.10 x 1.923 kWh) or 10 percent greater than the figure achieved by the use of the test procedures in HLD–2EC.

The field use factor prescribed in the final test procedures for clothes dryers was derived by dividing the 2.5 kWh per cycle from the Oklahoma Gas and Electric Survey by 2.12 kWh per cycle, which is the adjusted energy consumption to reflect use of the proposed test procedures and a 66 percent reduction in the moisture content of the test load. The resultant field use factor is 1.18. NBS has determined that this value, 1.18, is more accurate than the 1.2 originally proposed and determined on the basis of limited NBS testing, since the 1.18 multiplying factor is derived from data that is production weighted.

Based on NBS's recommendation, FEA has concluded that a field usage factor of 1.18 would more accurately account for any differences between the values derived from the laboratory test procedures and those obtained from actual consumer use. Accordingly, the definition of the field use factor, FU, stated in 4.1 of Appendix D has been changed to 1.18.

4. CLOTHES DRYER CATEGORIES

The majority of the comments recommended that the test procedures provide for four categories of clothes dryers rather than the two categories, standard and compact, as originally proposed. The reason proffered for the further categorization of clothes dryers is to better assist the consumer when purchasing a particular size dryer for particular needs.

Presently, standard clothes dryers include those with drum capacities of 4.4 cubic feet or greater and compact clothes dryers consist of those with drum capacities of less than 4.4 cubic feet. The comments suggested that both of these two categories be further subdivided thereby creating four categories to be determined according to the following drum capacity measurements: 0–3.0 cu. ft., 3.0–4.4 cu. ft., 4.4–6.1 cu. ft., and greater than 6.1 cu. ft. Even with the further categorization, the comments still recommended that the same test loads be used: 3.0 pounds for those clothes dryers with less than a 4.4 cu. ft. drum capacity and 7.0 pounds for those clothes dryers with a 4.4 cu. ft. or greater drum capacity.

One manufacturer, however, fully supported FEA's choice of two clothes dryer categories as being representative of the reality that exists in the marketplace today. This manufacturer also felt that since the test procedures are intended to provide results that are representative of average use conditions, further categorization could confuse and possibly mislead the public.

After consultation with NBS and FTC, FEA has determined that further categorization would not provide a more representative or accurate test procedure for measuring the energy consumption of different size clothes dryers. Therefore, the final test procedures retain the two categories for clothes dryers, standard and compact, as originally proposed.

5. ENERGY FACTOR

Several comments suggested that the energy factor as proposed be changed in order to maintain consistency with the industry practice of defining clothes dryer efficiency as pounds of water removed per kilowatt-hour.

The proposed energy factor for clothes dryers in § 430.22(d)(2) is an additional measure of energy consumption which will be useful to the consumer in making purchasing decisions. Based on NBS' recommendation, FEA has expressed the energy factor in terms of number of pounds of clothes in the test load per kilowatt-hour consumed by the clothes dryer, rather than the amount of water removed per kilowatt-hour. FEA believes that an energy factor determined in this manner will be more meaningful to consumers and easier to relate to than pounds of water removed during a drying cycle and, therefore, is more likely to assist the consumer in making purchasing decisions. The language of § 430.22(d)(2) has been revised accordingly.

6. CONTINUOUSLY BURNING PILOT LIGHT

One manufacturer commented that the calculations provided in the proposed test procedures for determining the estimated annual operating cost for gas clothes dryers in § 430.22(d)(1)(ii) double counts the amount of energy consumed by the continuously burning pilot light while the clothes dryer is in operation.

The total amount of energy consumed by a gas clothes dryer per year is equal to the amount of energy consumed by the dryer during its operation during a year (which includes the energy consumed by the continuously burning pilot light) plus the energy consumed by the pilot light for rest of the time during the year that the dryer is not in operation. NBS conducted a series of tests according to the proposed test procedures using a standard size gas clothes dryer with a 7 pound bone-dry test load. The test resulted in drying times between 15 and 20 minutes to achieve the required 66 percent reduction in the moisture content. Therefore, during the representative average use cycle of 416 cycles per year the clothes dryer operates 138.6 hours (20 minutes per cycle/60 min. per hour times 416 cycles per year) or approximately 140 hours per year. Since the continuously burning pilot light is on year round and there are 8,760 hours in a year, the pilot light burns for 8,620 hours per year (8,760 (hours minus 140 hours) while the clothes dryer is not in operation. FEA has, accordingly, changed 404 of Appendix D to use the more accurate figure of 8,620 hours for determining the per-cycle energy consumption of the continuously burning pilot light in order to prevent a double counting of the energy consumed by the pilot light during the operation of the clothes dryer.

Several comments also addressed the 2 percent tolerance in the hourly Btu rating of the gas burner specified in 2.3.2.1 and 2.3.2.2 as being too restrictive. NBS has determined that a 5 percent tolerance on the hourly Btu rating of the burner will have only a minimal effect on the accuracy of the test measurements for clothes dryers and will make the test procedures less burdensome on the industry to conduct. Based on NBS' recommendation, FEA has changed 2.3.2.1 and 2.3.2.2 of Appendix D to permit a tolerance of 5 percent in the hourly Btu rating of the gas burner.

7. ELECTRICAL SUPPLY VOLTAGE

A number of comments questioned the use of the nameplate voltage as the electrical supply voltage required by the test procedures to be maintained during the testing of all clothes dryers. These comments suggested that a specific test voltage be indicated, and that since dryers are designed for three electrical systems, depending upon the dryer's particular terminal block wiring, the test voltage specified should be the same for all clothes dryers in the same voltage category.

FEA agrees with the NBS recommendation to adopt this change, since stating a specific test voltage rather than requiring the manufacturer to conduct the test at the stated nameplate voltage would reduce the variability of measurements between manufacturers. 2.3.1 of Appendix D has been changed accordingly.

8. NUMBER OF TEST RUNS ON EACH UNIT

In order to reduce variability in the test results, one manufacturer felt that five cycles or runs should be conducted on each unit and the results averaged to arrive at a single energy consumption figure for each individual unit. FEA is interested in obtaining test results that are representative of the majority of the individual units that make up each basic model. This can be more easily achieved by testing more units of the same basic model rather than conducting repeated tests on the same unit.

Therefore, FEA has determined that requiring five tests on each unit would be unnecessarily burdensome on the industry in relation to the potential reduction in variability of the test results that may be achieved. Accordingly, no change has been made in the final test procedures in response to this suggestion.

9. RELATIVE HUMIDITY

It was suggested that the tolerance of 45 percent to 55 percent relative humidity required by the proposed test procedures for the relative humidity of the test room was too stringent and should be relaxed to permit a range of 40 percent to 60 percent relative humidity. Some manufacturers stated that special test rooms would have to be built in order to control the relative humidity within the proposed levels.

NBS conducted tests on clothes dryers at the suggested tolerance of 40 percent to 60 percent relative humidity and found that there was an insignificant variation in the test results while also maintaining an ambient room air temperature of 72° to 78° F, as required by the test procedures. In light of the NBS test results and based on NBS' recommendation FEA has modified 2.2 of Appendix D to permit a range of 40 percent to 60 percent relative humidity in the room during the test. This will make the test less burdensome on the industry to conduct without having any significant affect on the accuracy of the test measurements.

10. ENERGY SAVING FEATURES

In the proposed test procedures for clothes dryers the test cycle is run with the clothes dryer being operated at the maximum temperature setting and the maximum time setting, where applicable, until the wet test load is dried to a specified level of moisture content. No specific provision is made in the test procedures to distinguish the testing of clothes dryers with automatic sensing control systems activated by temperature or moisture, as opposed to dryers that are time controlled by the user.

One manufacturer commented that clothes dryer features or options which would save energy, such as temperature sensing and moisture sensing control systems, should be credited by the test procedures. The commenter did provide some frequency of use data based on limited testing of these automatic control systems versus time control systems when both existed on the same model, which indicated that the moisture sensing and temperature sensing features may be used more frequently if they were available on a particular model. The commenter, however, did not supply—and FEA does not have available at this time—any data based on actual testing, or otherwise, that would indicate an actual energy savings from the use of these automatic control systems. FEA agrees with the NBS recommendation that until such time as complete and reliable consumer usage and energy savings data are available for these automatic sensing control systems, the final test procedures for clothes dryers should not make allowance for these features.

FEA agrees with NBS, however, that the final test procedures prescribed today will produce test results from which an accurate and representative estimated annual cost can be calculated.

The industry and other interested persons are encouraged to provide any reliable data to FEA as it becomes available concerning any actual energy savings design features or options on clothes dryers and the consumer usage of these fea-

V 42 178 SEP 14 77 UMI

tures. This data would be considered by FEA in deciding whether or not an energy credit for these features should be incorporated into the test procedures.

Also with respect to energy consumption or energy savings features, the Office of Consumer Affairs for the Department of Health, Education and Welfare (HEW), suggested that all energy inputs used by a clothes dryer to perform its function should be considered when evaluating the amount of energy consumed by that appliance. Specifically HEW felt that it was necessary to consider the loss of the heated or cooled air which is used by the dryer during its normal operation and the resultant energy cost to re-heat or re-cool the replacement air.

HEW also commented on and one consumer provided some data on the total energy savings to the consumer that could occur from the use of devices on clothes dryers such as exhaust diverters which attempt to save the heat generated by the clothes dryer in the winter by venting the exhaust of the clothes dryer back into the interior of the home. HEW suggested that the amount of energy that could be saved and the resultant dollar savings to the consumer by the use of a device such as an exhaust diverter should be placed on the label.

Clothes dryers are generally placed inside the home and utilize the interior air for drying clothes by drawing it into the clothes dryer and then exhausting it through a vent to the outside of the home. Therefore, a potentially significant quantity of the internal pre-conditioned air in the home is lost to the outdoors by the normal operation of a clothes dryer and replacement air must then be heated or cooled. Thus, the energy consumed by a clothes dryer consists, in part, of the amount of additional energy needed to maintain the desired ambient air temperature in the home.

In providing for the determination of the estimated annual operating cost for clothes dryers, the final test procedures do not account for the added energy costs to the heating or cooling units in the home to recondition the air lost during the operation of the clothes dryer. The final test procedures also do not provide a method for crediting any potential energy savings that could be achieved from design changes on clothes dryers that would avoid or diminish those added energy costs by altering the normal intake and exhaust venting arrangements of a clothes dryer.

While the test procedures prescribed today are final, FEA believes that the added energy losses caused by the normal clothes dryer exhaust system and the potential energy savings to be achieved from certain venting design options merit further study. FEA has therefore directed NBS to evaluate and study this problem and to provide FEA with reliable data on the amount and significance of any energy and cost savings that could be achieved by the different types of clothes dryers used in the home in conjunction with different heating and cooling units, and to what extent today's prescribed test procedures would have to be changed to account for these potential energy losses and energy savings. NBS has also been requested to evaluate any burden on the industry that would be caused by a modification of these test procedures. If after review of the NBS study FEA determines that the issue merits further consideration, FEA will publish the NBS study in the FEDERAL REGISTER and afford interested persons an opportunity to comment. In no event will the final test procedures for clothes dryers prescribed today be amended with respect to this issue without providing interested persons an opportunity to present oral and written data, views, and arguments.

11. NUMBER OF UNITS TO BE TESTED

Proposed § 430.23(d) provided for sampling of each basic model to be tested when testing of clothes dryers is required by the Act or by program regulations of agencies responsible for administering the Act. This provision was intended both to provide an acceptable level of assurance that test results are applicable to any entire basic model for which testing is required and to minimize the testing burden on manufacturers.

The comments expressed some objections to the sampling provision for clothes dryers similar in substance to the objections raised to the sampling plan proposed for room air conditioners by notices issued July 22, 1976 (41 FR 31237, July 27, 1976) and March 24, 1977 (42 FR 16811, March 30, 1977). One manufacturer also requested that some provision in the test procedures be same for a resampling within a short period of time if the mean of the selected sample does not fall within the specified limits.

Test procedures prescribed under section 323 of the Act are intended to be used, for example, for labeling under section 324, in monitoring the progress of manufacturers toward accomplishing the energy efficiency improvement targets under section 325, and in enforcement testing under section 326. These aspects of the appliance program have not, however, been implemented. It is quite possible that the objectives of appliance testing under each of these parts of the program, as well as the instructions on how a test procedure should be applied (e.g., sampling of production units), may differ. FEA, NBS, and FTC are continuing to evaluate the appropriate method or methods for applying the test procedures in order to comply with the statute and satisfy all of the different elements of the appliance program.

While the various parts of the appliance program identified above are not in effect at this time, section 323(c) of the Act provides:

> Effective 90 days after a test procedure rule applicable to a covered product is prescribed under this section, no manufacturer, distributor, retailer or private labeler may make any representation—
>
> (1) In writing (including a representation on a label), or
>
> (2) In any broadcast advertisement, respecting the energy consumption of such product or cost of energy consumed by such product, unless such product has been tested in accordance with such test procedure and such representation fairly discloses the results of such testing.

In order to eliminate the problems discussed above associated with a general sampling provision, proposed § 430.23(d) has been limited in the final test procedures to testing which section 323(c) of the Act requires regarding the advertising of clothes dryers. The sampling requirements which apply only for purposes of advertising have been reorganized into § 430.24(d) of the final test procedures. Section 430.24(d) is similar to proposed § 430.23(d), but with several revisions. Most notably, the units tested are required to be representative of production units or actual production units. This change is intended to reduce the burden which might be caused by requiring post-production rating of basic models in every instance of testing pursuant to section 323(c) of the Act.

In addition, certain technical changes have been made in the sampling language. Specifically, there is to be 95 percent confidence that the true mean of any measure of the basic model lies within 5 percent of the mean of such measure of the sample. Comments pertaining to several proposed test procedures, including clothes dryers, criticized the language of the proposed sampling provisions. These comments suggested that a sampling provision should refer to the estimate of the mean rather than to the true mean. FEA has considered this suggestion and has determined that the language prescribed today is more technically correct because the statistical measures "estimate of the mean" and "mean of the sample" are generally considered to be identical. The test procedures for room air conditioners and dishwashers used both these terms in a manner that could be confusing, and the language prescribed today is intended to eliminate this potential confusion.

Until a labeling rule has been implemented pursuant to section 324, manufacturers are not required to test unless they choose to make a representation regarding a measure of energy consumption identified in or based upon § 430.22 (d). It should also be emphasized that the test procedures prescribed today apply only to the initial rating of a basic model.

12. MISCELLANEOUS

After careful consideration of all of the comments and further consultation with NBS and FTC, FEA has incorporated some minor editorial and technical changes in the proposed test procedures in the final rule that were not discussed above.

C. REGULATIONS PRESCRIBED

1. TEST PROCEDURES

The test procedures for clothes dryers prescribed today are included in Subpart B and are substantially the same as those proposed, with the exception of the changes discussed above. As with the proposed procedures, the test methodology incorporates the approach contained in the Association of Home Appliance Manufacturers (AHAM) Standard HLD-2EC for measuring the energy consumption clothes dryers. For purposes of FEA's program, the incorporated approach remains applicable as presently written, regardless of any subsequent amendment by the standard setting organization, until further amendment by FEA.

Under the requirements of section 32 (c) of the Federal Energy Administration Act of 1974 (15 U.S.C. 761 et seq.) as amended by section 9 of the Federal Energy Administration Authorization Act of 1977 (Pub. L. 95–70), the Administrator of FEA is to consult with the Attorney General and the Chairman of the Federal Trade Commission concerning the impact on competition of any rules prescribed by FEA which utilize or incorporate any commercial standards.

The Administrator has transmitted copies of the test procedures for clothes dryers, which incorporate the above mentioned commercial standards, to the Attorney General and the Chairman of the Federal Trade Commission for their comments concerning the impact of such standards on competition in accordance with section 32(c). Neither official has any comments nor do they recommend against the incorporation or use of these commercial standards in the final test procedures for clothes dryers.

2. GENERAL PROVISIONS

Prescribed today are definitions of "electric clothes dryer" and "gas clothes dryer." These definitions were previously proposed in Subpart A (41 FR 19977, May 14, 1976). The definition of the term "basic model" for clothes dryers prescribed today as substantially the same as the definition previously proposed in Subpart A (42 FR 21589, April 27, 1977). Comments which were received regarding the definition of "basic model" have been discussed earlier in this notice.

3. APPLICATION OF TEST PROCEDURES

As discussed previously, the final clothes dryer test procedures prescribed today must be applied before representations regarding a measure of energy consumption can be made. Because the purposes and needs of the different elements of the appliance program (e.g., labeling, targets) vary, application of the standard test methodology prescribed today may differ in some respects for each program element. It is expected that instructions on how to apply the standard test methodology to these other elements of the appliance program will be proposed for comment in the near future.

The requirements of § 430.24(d) of the final regulations apply until such time as final labeling requirements for a particular measure of energy consumption and the associated test procedures' application provision are prescribed. After that time, any representation regarding a measure of energy consumption covered by a labeling rule must be the same as the measure of energy consumption specified on the label.

D. UNIT COSTS OF ENERGY

Under section 323(b)(2) of the Act, FEA is to provide manufacturers information as to the representative average unit costs of energy. This information was provided by notice issued July 11, 1977 (42 FR 36549, July 15, 1977).

E. PREEMPTION

Today's rulemaking prescribing final test procedures for clothes dryers supersedes any State regulation to the extent required by section 327 of the Act. Pursuant to section 327, all State regulations which provide for the disclosure of information with respect to any measure of energy consumption of clothes dryers or which provide for any energy efficiency standard or similar requirement with respect to energy efficiency or energy use of clothes dryers must now employ test procedures identical to those specified in today's final rule.

(Energy Policy and Conservation Act, Pub. L. 94–163, as amended by Pub. L. 94–385; Federal Energy Administration Act of 1974, Pub. L. 93–275, as amended by Pub. L. 94–385; E.O. 11790, 39 FR 23185)

In consideration of the foregoing, Part 430 of Chapter II of Title 10, Code of Federal Regulations, is amended as set forth below, effective October 17, 1977.

Issued in Washington, D.C., September 8, 1977.

ERIC J. FYGI,
Acting General Counsel,
Federal Energy Administration.

1. Section 430.2 is amended by adding paragraph (4) as part of the definition of "basic model," and by adding in the appropriate alphabetical order definitions of "electric clothes dryer" and "gas clothes dryer" to read as follows:

§ 430.2 Definitions.

* * * * *

"Basic model" means all units of a given type of covered product (or class thereof) manufactured by one manufacturer and—

* * * * *

(4) With respect to clothes dryers, which have the same primary energy source, which have electrical characteristics that are essentially identical, and which do not have any differing physical or functional characteristics that affect energy consumption.

* * * * *

"Electric clothes dryer" means a cabinet-like appliance designed to dry fabrics in a tumble-type drum with forced air circulation. The heat source is electricity and the drum and blower(s) are driven by an electric motor(s).

* * * * *

"Gas clothes dryer" means a cabinet-like appliance designed to dry fabrics in a tumble-type drum with forced air circulation. The heat source is gas and the drum and blower(s) are driven by an electric motor(s).

* * * * *

2. Section 430.22 is amended by adding a paragraph (d), to read as follows:

§ 430.22 Test procedures for measures of energy consumption.

* * * * *

(d) *Clothes dryers.* (1) The estimated annual operating cost for clothes dryers shall be—

(i) For an electric clothes dryer, the product of the following three factors: (A) The representative average-use cycle of 416 cycles per year, (B) the total per-cycle energy consumption in kilowatt-hours per-cycle, determined according to 4.1 of Appendix D to this subpart, and (C) the representative average unit cost in dollars per kilowatt-hour as provided by the Administrator, the resulting product then being rounded off to the nearest dollar per year, and

(ii) For a gas clothes dryer, the product of the representative average-use cycle of 416 cycles per year times the sum of (A) the product of the gas dryer electric per-cycle energy consumption in kilowatt-hours per cycle, determined according to 4.2 of Appendix D to this subpart, times the representative average unit cost in dollars per kilowatt-hour as provided by the Administrator plus (B) the product of the total gas dryer gas energy consumption per cycle, in Btu's per cycle, determined according to 4.5 of Appendix D of this subpart, times the representative average unit cost in dollars per Btu as provided by the Administrator, the resulting product then being rounded off to the nearest dollar per year.

(2) The energy factor, expressed in pounds of clothes per kilowatt-hour, for clothes dryers shall be either the quotient of a 3-pound bone-dry test load for compact dryers, as defined by 2.6.1 of Appendix D to this subpart or the quotient of a 7 pound bone-dry test load for standard dryers, as defined by 2.6.2 of Appendix D to this subpart, as applicable, divided by the clothes dryer energy consumption per cycle, as determined according to 4.1 for electric clothes dryers and 4.6 for gas clothes dryers of Appendix D to this subpart, the resulting quotient then being rounded off to the nearest hundredth (.01).

(3) Other useful measures of energy consumption for clothes dryers shall be those measures of energy consumption for clothes dryers which the Administrator determines are likely to assist consumers in making purchasing decisions and which are derived from the application of Appendix D to this subpart.

* * * * *

3. Section 430.24 is amended by adding a paragraph (d), to read as follows:

§ 430.24 Representations regarding measures of energy consumption.

* * * * *

(d) *Clothes dryers.* (1) Except as provided in paragraph (d)(4) of this section, no manufacturer, distributor, retailer, or private labeler of clothes dryers may make any representation with re-

V 42 178
SEP 14 77
UMI

spect to or based upon a measure or measures of energy consumption described in § 430.22(d) unless a sample of sufficient size of each basic model for which such representation is made has been tested in accordance with applicable provisions of this subpart such that, for each such measure of energy consumption, there is 95 percent confidence that the true mean of such measures of the basic model lies within ±5 percent of the mean of such measures of the sample.

(2) The sample selected for paragraph (d)(1) of this section shall be comprised of units which are production units, or are representative of production units, of the basic model being tested.

(3) A basic model having dual voltage ratings shall be separately tested at each design voltage such that the requirements of paragraph (d)(1) of this section are satisfied at each rating.

(4) Whenever a rule applicable to clothes dryers is prescribed under section 324 of the Act, this paragraph shall not apply to any label covered by such rule, and all representations of any measure of energy consumption covered by su h rule shall be identical to the measure of energy consumption on the label.

4. Subpart B of Part 430 is amended to add an Appendix D, to read as follows:

APPENDIX D—UNIFORM TEST METHOD FOR MEASUSING THE ENERGY CONSUMPTION OF CLOTHES DRYERS

1 DEFINITIONS

1.1 "AHAM" means the Association of Home Appliance Manufacturers.

1.2 "Bone-dry" means a condition of a load of test cloth which has been dried in a dryer at maximum temperature for a minimum of 10 minutes, removed and weighed before cool down, and then dried again for 10 minute periods until the final weight change of the load is 1 percent or less.

1.3 "Compact" means a clothes dryer with a drum capacity of less than 4.4 cubic feet.

1.4 "Cool down" means that portion of the clothes drying cycle when the added gas or electric heat is terminated and the clothes continue to tumble and dry within the drum.

1.5 "Cycle" means a sequence of operation of a clothes dryer which performs a clothes drying operation, and may include variations or combinations of the functions of heating, tumbling and drying.

1.6 "Drum capacity" means the volume of the drying drum in cubic feet.

1.7 "HLD–1" means the test standard promulgated by AHAM and titled "AHAM Performance Evaluation Procedure for Household Tumble Type Clothes Dryers", June, 1974, and designated as HLD–1.

1.8 "HLD–2EC" means the test standard promulgated by AHAM and titled "Test Method for Measuring Energy Consumption of Household Tumble Type Clothes Dryers," December. 1975. and designated as HLD–2EC

1.9 "Standard size" means a clothes dryer with a drum capacity of 4.4 cubic feet or greater

1.10 "Moisture content" means the ratio of the weight of water contained by the test load to the bone-dry weight of the test load, expressed as a percent.

2. TESTING CONDITIONS

2.1 *Installation.* Install the clothes dryer in accordance with manufacturer's instructions. The dryer exhaust shall be restricted by adding the AHAM exhaust simulator described in 3.3.5 of HLD–1. All external joints should be taped to avoid air leakage. Disconnect all console lights or other lighting systems on the clothes dryer which do not consume more than 10 watts during the clothes dryer test cycle.

2.2 *Ambient temperature and humidity.* Maintain the room ambient air temperature between 72°F and 78°F and the room relative humidity at 40 percent to 60 percent relative humidity.

2.3 *Energy supply.*

2.3.1 *Electrical supply.* Maintain the electrical supply at the clothes dryer terminal block within 1 percent of 120/240 or 120/208Y or 120 volts as applicable to the particular terminal block wiring system and within 1 percent of the nameplate frequency as specified by the manufacturer.

2.3.2 *Gas supply.*

2.3.2.1 *Natural gas.* Maintain the gas supply to the clothes dryer at a normal inlet test pressure immediately ahead of all controls at 7 to 10 inches of water column. If the clothes dryer is equipped with a gas appliance pressure regulator, the regulator outlet pressure at the normal test pressure shall be approximately that recommended by the manufacturer. The hourly Btu rating of the burner shall be maintained within ±5 percent of the rating specified by the manufacturer. The natural gas supplied should have a heating value of approximately 1,025 Btu's per standard cubic foot. The actual heating value, H_n, in Btu's per standard cubic foot, for the natural gas to be used in the test shall be obtained either from measurements made by the manufacturer conducting the test using a standard continuous flow calorimeter as described in 2.4.6 or by the purchase of bottled natural gas whose Btu rating is certified to be at least as accurate a rating as could be obtained from measurements with a standard continuous flow calorimeter as described in 2.4.6.

2.3.2.2 *Propane gas.* Maintain the gas supply to the clothes dryer at a normal inlet test pressure immediately ahead of all controls at 11 to 13 inches of water column. If the clothes dryer is equipped with a gas appliance pressure regulator, the regulator outlet pressure at the normal test pressure shall be approximately that recommended by the manufacturer. The hourly Btu rating of the burner shall be maintained within ±5 percent of the rating specified by the manufacturer. The propane gas supplied should have a heating value of approximately 2,500 Btu's per standard cubic foot. The actual heating value, H_p, in Btu's per standard cubic foot, for the propane gas to be used in the test shall be obtained either from measurements made by the manufacturer conducting the test using a standard continuous flow calorimeter as described in 2.4.6 or by the purchase of bottled gas whose Btu rating is certified to be at least as accurate a rating as could be obtained from measurements with a standard continuous calorimeter as described in 2.4.6.

2.4 *Instrumentation.* Perform all test measurements using the following instruments, as appropriate:

2.4.1 *Weighing scales.*

2.4.1 *Weighing scale for test cloth.* The scale shall have a range of 0 to a maximum of 30 pounds with a resolution of at least 0.2 ounces and a maximum error no greater than 0.3 percent of any measured value within the range of 3 to 15 pounds.

2.4.1.2 *Weighting scale for drum capacity measurements.* The scale should have a range of 0 to a maximum of 500 pounds with a resolution of 0.50 pounds and a maximum error no greater than 0.5 percent of the measured value.

2.4.2 *Kilowatt-hour meter.* The kilowatt-hour meter shall have a resolution of 0.001 kilowatt-hours and a maximum error no greater than 0.5 percent of the measured value for any demand greater than 0.16 kilowatt-hours per hour.

2.4.3 *Gas meter.* The gas meter shall have a resolution of 0.001 cubic feet and a maximum error no greater than 0.5 percent of the measured value for any demand greater than 0.2 cubic feet per hour.

2.4.4 *Dry and wet bulb psychrometer.* The dry and wet bulb psychrometer shall have an error no greater than ±1° F over the range of 32° to 100° F.

2.4.5 *Thermometer.* The thermometer shall have an error no greater than ±1° F over the range of 32° to 100° F.

2.4.6 *Standard Continuous Flow Calorimeter.* The calorimeter shall have an operating range of 750 to 3,500 Btu per cubic feet. The maximum error of the basic calorimeter shall be no greater than 0.2 percent of the actual heating value of the gas used in the test. The indicator readout shall have a maximum error no greater than 0.5 percent of the measured value within the operating range and a resolution of 0.2 percent of the full scale reading of the indicator instrument.

2.5 *Lint trap.* Clean the lint trap thoroughly before each test run.

2.6 *Test cloths.*

2.6.1 *Energy test cloth.* The energy test cloth shall be clean and consist of the following:

(a) Pure finished bleached cloth, made with a momie or granite weave, which is 50 percent cotton and 50 percent polyester and weighs 5.75 ounces per square yard and has 65 ends on the warp and 57 picks on the fill.

(b) Cloth material that is 24 inches by 36 inches and has been hemmed to 22 inches by 34 inches before washing. The maximum shrinkage after five washes shall not be more than four percent on the length and width.

(c) The number of test runs on the same energy test cloth shall not exceed 25 runs.

2.6.2 *Energy stuffer cloths.* The energy stuffer cloths shall be made from energy test cloth material and shall consist of pieces of material that are 12 inches by 12 inches and have been hemmed to 10 inches by 10 inches before washing. The maximum shrinkage after five washes shall not be more than four percent on the length and width. The number of test runs on the same energy stuffer cloth shall not exceed 25 runs.

2.7 *Test loads.*

2.7.1 *Compact size dryer load.* Prepare a bone-dry test load of energy cloths which weighs 3.00 pounds ± .03 pounds. Adjustments to the test load to achieve the proper weight can be made by the use of energy stuffer cloths. Dampen the load by agitating it in water whose temperature is 100°±5° F and consists of 0 to 17 parts per million hardness for approximately two minutes in order to saturate the fabric. Then, extract water from the wet test load by spinning the load until the moisture content of the load is between 66.5 percent to 73.5 percent of the bone-dry weight of the test load.

2.7.2 *Standard size dryer load.* Prepare a bone-dry test load of energy cloths which weighs 7.00 pounds ± .07 pounds. Adjustments to the test load to achieve the proper weight can be made by the use of energy stuffer cloths. Dampen the load by agitating it in water whose temperature is 100°±5° F and consists of 0 to 17 parts per million hardness for approximately two minutes in order to saturate the fabric. Then, extract water from the wet test load by spinning the load until the moisture content of the load is between 66.5 percent to 73.5 percent of the bone-dry weight of the test load.

2.7.3 *Method of loading.* Load the energy test cloths by grasping them in the center, shaking them to hang loosely and then dropping them in the dryer at random.

3. TEST PROCEDURES AND MEASUREMENTS

3.1 *Drum capacity.* Measure the drum capacity by sealing all openings in the drum except the loading port with a plastic bag, and ensure that all corners and depressions are filled and that there are no extrusions of the plastic bag through the opening in the drum. Support the dryer's rear drum surface on a platform scale to prevent deflection of the dryer, and record the weight of the empty dryer. Fill the drum with water to a level determined by the intersection of the door plane and the loading port. Record the temperature of the water and then the weight of the dryer with the added water and then determine the mass of the water in pounds. Add or subtract the appropriate volume depending on whether or not the plastic bag protrudes into the drum interior. The drum capacity is calculated as follows:

$$C = \frac{w}{d}$$

C=capacity in cubic feet.
w=mass of water in pounds.
d=density of water at the measured temperature in pounds per cubic feet.

3.2 *Dryer loading.* Load the dryer as specified in 2.6.

3.3 *Test Cycle.* Operate the clothes dryer at the maximum temperature setting and, if equipped with a timer, at the maximum time setting and dry the test load until the moisture content of the test load is between 2.5 percent to 5.0 percent of the bone-dry weight of the test load, but do not permit the dryer to advance into cool down. If required, reset the timer or automatic dry control.

3.4 *Data recording.* Record for each test cycle:

3.4.1 Bone-dry weight of the test load described in 2.6.

3.4.2 Moisture content of the wet test load before the test described in 2.6.

3.4.3 Moisture content of the dry test load obtained after the test described in 3.3.

3.4.4 Test room conditions, temperature and percent relative humidity described in 2.2.

3.4.5 For electric dryers—the total kilowatt-hours of electric energy, E_t, consumed during the test described in 3.3.

3.4.6 For gas dryers:

3.4.6.1 Total kilowatt-hours of electrical energy, E_{te}, consumed during the test described in 3.3.

3.4.6.2 Cubic feet of gas per cycle, E_{tg}, consumed during the test described in 3.3.

3.4.6.3 On gas dryers using a continuously burning pilot light—the cubic feet of gas, E_{pg}, consumed by the gas pilot light in one hour.

3.4.6.4 Correct the gas heating value, GEF, as measured in 2.3.2.1 and 2.3.2.2, to standard pressure and temperature conditions in accordance with U.S. Bureau of Standards, Circular C417, 1938. A sample calculation is illustrated in Appendix E of HLD–1.

4. CALCULATION OF DERIVED RESULTS FROM TEST MEASUREMENTS

4.1 *Total per-cycle electric dryer energy consumption.* Calculate the total electric dryer energy consumption per cycle, E_{te}, expressed in kilowatt-hours per cycle and defined as:

$$E_{te} = \frac{66}{(W_w - W_d)} \times E_t \times FU$$

E_t=the energy recorded in 3.4.5
66=an experimentally established value for the percent reduction in the moisture content of the test load during a laboratory test cycle
FU=Field use factor=1.18
W_w=the moisture content of the wet test load as recorded in 3.4.2
W_d=the moisture content of the dry test load as recorded in 3.4.3

4.2 *Per-cycle gas dryer electrical energy consumption.* Calculate the gas dryer electrical energy consumption per cycle, E_{te}, expressed in kilowatt-hours per cycle and defined as:

$$E_{te} = \frac{66}{(W_w - W_d)} \times E_{te} \times FU$$

E_{te}=the energy recorded in 2.4.6.1
FU, 66, W_w, W_d as defined in 4.1

4.3 *Per-cycle gas dryer gas energy consumption.* Calculate the gas dryer gas energy consumption per cycle, E_{tg}, expressed in Btu's per cycle as defined as:

$$E_{tg} = \frac{66}{(W_w - W_d)} \times E_{tg} \times FU \times GEF$$

E_{tg}=the energy recorded in 3.4.6.2
GEF=corrected gas heat value (Btu per cubic feet) as defined in 3.4.6.4
FU, 66, W_w, W_d as defined in 4.1

4.4 *Per-cycle gas dryer continuously burning pilot light gas energy consumption.* Calculate the gas dryer continuously burning pilot light gas energy consumption per cycle, E_{cp}, expressed in Btu's per cycle and defined as:

$$E_{cp} = E_{pg} \times \left(\frac{8760 - 140}{416}\right) \times GEF$$

E_{pg}=the energy recorded in 3.4.6.3
8760=number of hours in a year
416=representative average number of clothes dryer cycles in a year
140=estimated number of hours that the continuously burning pilot light is on during the operation of the clothes dryer for the representative average use cycle for clothes dryers (416 cycles per year)
GEF as defined in 4.3

4.5 *Total per-cycle gas dryer energy consumption expressed in Btu's.* Calculate the total gas dryer energy consumption per cycle, E_g, expressed in Btu's per cycle and defined as:

$$E_g = E_{tg} + E_{cp}$$

E_{tg} as defined in 4.3
E_{cp} as defined in 4.4

4.6 *Total per-cycle gas dryer energy consumption expressed in kilowatt-hours.* Calculate the total gas dryer energy consumption per cycle, E_{cg}, expressed in kilowatt-hours per cycle and defined as:

$$E_{cg} = E_{te} + \frac{E_g}{3412 \text{ Btu/kWh}}$$

E_{te} as defined in 4.2
E_g as defined in 4.5

[FR Doc.77–26725 Filed 9–13–77;8:45 am]

PART 430—ENERGY CONSERVATION PROGRAM FOR APPLIANCES

Test Procedures for Television Sets

AGENCY: Federal Energy Administration.

ACTION: Final rule.

SUMMARY: This rule prescribes final test procedures for television sets. Appliance test procedures are one element of the appliance energy efficiency program required by the Energy Policy and Conservation Act.

FOR FURTHER INFORMATION CONTACT:

James A. Smith (Program Office), Room 307, Old Post Office Building, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461 (202–566–4635).

Charles E. Vilade (Media Relations), Room 3104, Federal Building, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461 (202–566–9833).

Elliott D. Light (Office of General Counsel), Room 7150, Federal Building, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461 (202–566–9750).

SUPPLEMENTARY INFORMATION:

A. BACKGROUND

The Federal Energy Administration (FEA) hereby amends Part 430, Chapter II of Title 10, Code of Federal Regulations, in order to prescribe test procedures for television sets pursuant to section 323 (42 U.S.C. 6293) of the Energy Policy and Conservation Act (Act) (Pub. L. 94–163). Television receiver test procedures were proposed by notice issued April 21, 1977 (42 FR 21580, April 27, 1977). No requests to make oral presentations concerning the proposed test procedures were filed and, as a result, the public hearing scheduled for June 14 was canceled. The definitions of "color television receiver" and "monochrome television receiver" were proposed at 41 FR 18890, May 14, 1976. The phrase "television receiver" has been changed to "television set" in the final test procedures and the above definitions have been changed in the final test procedures in order to be consistent with the language of section 322(a)(8) of the Act.

By notice issued May, 24, 1977 (42 FR 27896, June 1, 1977), FEA established Subparts A and B of Part 430, Chapter II of Title 10, Code of Federal Regulations. Certain definitions and general provisions applicable to the energy conservation program for appliances have been promulgated in Subpart A. Final test procedures for room air conditioners and dishwashers have been prescribed in Suppart B. In addition to the test procedures for television sets prescribed today, the final test procedures for clothes dryers, electric refrigerators, electric refrigerator-freezers, and freezers are also being prescribed by separate notices. Other test procedures have been proposed for inclusion in Subpart B. FEA has also proposed a Subpart C for appliance energy efficiency improvement targets. An outline of the provisions of Part 430 which have so far been established, including provisions in today's notices, is as follows:

SUBPART A—GENERAL PROVISIONS

Sec.
430.1 Purpose and Scope.
430.2 Definitions.

SUBPART B—TEST PROCEDURES

430.21 Purpose and Scope.
430.22 Test Procedures for Measures of Energy Consumption:
(a) Refrigerators and refrigerator-freezers.
(b) Freezers.
(c) Dishwashers.
(d) Clothes dryers.

• • • • •

V 421178 SEP 14 77 UMI

(f) Room air conditioners.

• • • • •

(h) Television sets.

430.23 Units to be Tested [Reserved].

430.24 Representative Regarding Measures of Energy Consumption

(a) Refrigerators and refrigerator-freezers

(b) Freezers

(c) Dishwashers

(d) Clothes dryers

• • • • •

(f) Room air conditioners

• • • • •

(h) Television sets

APPENDICES TO SUBPART B

Appendix A1—Uniform Test Method for Measuring the Energy Consumption of Electric Refrigerators and Electric Refrigerator-Freezers.

• • • • •

Appendix B—Uniform Test Method for Measuring the Energy Consumption of Freezers.

Appendix C—Uniform Test Method of Measuring the Energy Consumption of Dishwashers.

Appendix D—Uniform Test Method for Measuring the Energy Consumption of Clothes Dryers.

• • • • •

Appendix F—Uniform Test Method for Measuring the Energy Consumption of Room Air Conditioners.

• • • • •

Appendix H—Uniform Test Method for Measuring the Energy Consumption of Television Sets.

B. DISCUSSION OF COMMENTS

Only comments from industry were received in response to the request for public comments. All comments were directed toward technical areas of the proposed test procedures. The major issues raised by the comments are discussed below.

1. ENERGY SAVING FEATURES

It was suggested that many units with a remote control have a remote control defeat switch which when used permits the consumer to turn off all standby power to the remote control circuits. It was suggested that television sets which incorporate a remote control defeat switch should receive the same 50 percent credit given to units having a vacation switch and that the credit could be applied by reducing by 50 percent the contribution of remote control circuits to the standby power. FEA agrees that these switches have the potential to save energy and should be classified as energy saving features. For this reason the suggestion has been adopted.

Revisions have also been made to incorporate the 50 percent energy credit for energy saving devices into the estimated annual operating cost. This change obviates the need to distinguish the standard and vacation operating modes for purposes of the estimated annual operating cost. Thus, the estimated annual operating cost for the vacation mode has been deleted from the final regulation.

2. NUMBER OF UNITS TO BE TESTED

One comment was concerned about the requirement that units to be tested come from the production stream. It was felt that this could delay advertising if tests could not be run on preproduction models. While no comments adressed the number of units to be tested or the 5 percent tolerance required on any measure of energy consumption, FEA has reviewed the actual use of test procedures in the context of other covered products. Test procedures prescribed under section 323 of the Act are intended to be used, for example for labeling under section 324, in monitoring of the program of manufacturers toward accomplishing the energy efficiency improvement targets under section 325, and in enforcement testing under section 326. These aspects of the appliance program have not, however, been implemented. It is quite possible that the objectives of appliance testing under each of these parts of the program as well as the instructions as to how a test procedure should be applied (e.g., sampling of production units), may differ. FEA, NBS, and FTC are continuing to evaluate the appropriate method or methods for applying test procedures in order to comply with the statute and satisfy all of the different elements of the appliance program.

While the various parts of the appliance program identified above are not in effect at this time, section 323(c) of the Act provides:

Effective 90 days after a test procedure rule applicable to a covered product is prescribed under this section, no manufacturer, distributor, retailer, or private labeler may make any representation—

(1) In writing (including a representation on a label) or,

(2) In any broadcast advertisement, respecting the energy consumption of such product or cost of energy consumed by such product, unless such product has been tested in accordance with such test procedure and such representation fairly discloses the results of such testing.

The sampling requirements which apply only for purposes of advertising have been reorganized into § 430.24(h) of the final test procedures. Section 430.24(h) is similar to proposed § 430.23(h) but with several revisions. Most notably, the units tested are required to be representative of production units or actual production units. This change is intended to reduce the burden which might be caused by requiring post-production rating of basic models in every instance of testing pursuant to section 323(c) of the Act.

In addition, certain technical changes have been made in the sampling language. Specifically, there is to be 95 percent confidence that the true mean or any measure of the basic model lies within 5 percent of the mean of such measure of the sample. Comments pertaining to several proposed test procedures criticized the language of the proposed sampling provisions. These comments suggested that a sampling provision should refer to the estimate of the mean rather than to the true mean. FEA has considered this suggestion and has determined that the language prescribed today is more technically correct because the statistical measures "estimate of the mean" and "mean of the sample" are generally considered to be identical. The test procedures for room air conditioners and dishwashers used both these terms in a manner that could be confusing, and the language prescribed today is intended to eliminate this potential confusion.

Until a labeling rule has been implemented pursuant to section 324, manufacturers are not required to test unless they choose to make a representation regarding a measure of energy consumption identified in or based upon § 430.22 (h). It should also be emphasized that the test procedures prescribed today apply only to the initial rating of a basic model.

3. REPRESENTATIVE AVERAGE-USE CYCLE

One comment received stated that the television set in a home entertainment center is not used as many hours as a television set alone. No supporting data to this claim was submitted. The average-use cycle was obtained by using a weighted average of the hours of operation of a television receiver. The number of home entertainment centers sold containing television sets is small when compared to television sets sold alone. Thus, the weighted effect in the representative average-use cycle of any difference in the hours of television set operation included in home entertainment centers is negligible. For these reasons, no changes have been made to the proposed average-use cycle for home entertainment centers.

4. MISCELLANEOUS

After careful consideration of all of the comments and further consultation with NBS and FTC, FEA has incorporated some minor changes in the proposed test procedures in the final rule that were not discussed above.

C. REGULATIONS PRESCRIBED

1. TEST PROCEDURES

The test procedures for television sets prescribed today are included in Subpart B and are substantially the same as those proposed, with the addition of the changes discussed above. As with the proposed procedures, the test methodology incorporates American National Standard C 16.13–1961, Method of Testing Monochrome Television Broadcast Receivers for calculation of available power. Also incorporated into the test methodology are the National Television System Committee composite video signal and the Institute of Radio Engineers unit flat field. For purposes of FEA's program, the incorporated standards remain applicable as presently written, regardless of any subsequent amendment by the standard setting organization, until further amendment by FEA.

Under the requirements of section 32 (c) of the Federal Energy Administration Act of 1974 (15 U.S.C. 761 et seq.) as amended by section 9 of the Federal Energy Authorization Act of 1977 (Pub. L. 95–70), the Administrator of FEA is to consult with the Attorney General and the Chairman of the Federal Trade Commission concerning the impact on competition of any rules prescribed by FEA which utilize or incorporate any commercial standards.

The Administrator has transmitted copies of the test procedures for television sets, which incorporate the above mentioned commercial standards, to the Attorney General and the Chairman of the Federal Trade Commission for their comments concerning the impact of such standards on competition in accordance with section 32(c). Neither official has any comments nor do they recommend against the incorporation or use of these commercial standards in the final test procedures for television sets.

2. GENERAL PROVISIONS

Also prescribed today are certain definitions for "television set," "color television set," and "monochrome television set." The definitions of color television set and monochrome television set were previously proposed in Subpart A (41 FR 19977, May 14, 1976). (As originally proposed, the word "receiver" was used instead of "sets." The definition of "basic model" for television sets, proposed at 42 FR 21583, has also been added. A definition of "television set" has been added for the purposes of clarification.

3. APPLICATION OF TEST PROCEDURES

As discussed previously, the final test procedures prescribed today must be applied before any representation regarding a measure of energy consumption can be made. Because the purposes and needs of the different elements of the appliance program (e.g., labeling, targets) vary, application of the standard test methodology prescribed today may differ in some respects for each program element. It is expected that instructions on how to apply the standard test methodology to these other elements of the appliance program will be proposed for comment in the near future.

The requirements of § 430.24(h) of the final regulations apply until such time as final labeling requirements for a particular measure of energy consumption and the associated test procedure application provision are prescribed. After that time, representations regarding a measure of energy consumption covered by a labeling rule must be the same as represented on the label.

D. UNIT COSTS OF ENERGY

Under section 323(b)(2) of the Act, FEA is to provide manufacturers information as to the representative average unit costs of energy. This information was provided by notice issued July 11, 1977 (42 FR 36549, July 15, 1977).

E. PREEMPTION

Today's rulemaking prescribing final test procedures for television sets supersedes any State regulation to the extent required by section 327 of the Act. Pursuant to section 327, all State regulations which provide for the disclosure of information with respect to any measure of energy consumption of television sets or which provide for any energy efficiency standard or similar requirement with respect to energy efficiency or energy use of television sets must now employ test procedures identical to those specified in today's final rule.

(Energy Policy and Conservation Act, Pub. L. 94–163, as amended by Pub. L. 94–385; Federal Energy Administration Act of 1974, Pub. L. 93–275, as amended by Pub. L. 94–385; E.O. 11790, 39 FR 23185.)

In consideration of the foregoing, Part 430 of Chapter II of Title 10, Code of Federal Regulations, is amended as set forth below, effective October 17, 1977.

Issued in Washington, D.C., September 8, 1977.

ERIC J. FYGI,
Acting General Counsel,
Federal Energy Administration.

1. Section 430.2 is amended by adding subparagraph (8) as part of the definition of "basic model" and by adding in appropriate alphabetical order definitions of "color television set," "monochrome television set," and "television set" to read as follows:

§ 430.2 Definitions.

• • • • •

"Basic model" means all units of a given type of covered product (or class thereof) manufactured by one manufacturer and—

• • • • •

(8) With respect to television sets, which have identical screen size, which have electrical characteristics that are essentially identical, and which do not have any differing physical or functional characteristics that affect energy consumption.

• • • • •

"Color television set" means an electrical device designed to convert incoming broadcast signals into color television pictures and associated sound.

• • • • •

"Monochrome television set" means an electrical device designed to convert incoming broadcast signals into monochrome television pictures and associated sound.

• • • • •

"Television set" means a color television set or a monochrome television set.

• • • • •

2. Section 430.22 is amended by adding paragraph (h) to read as follows:

§ 430.22 Test procedure for measures of energy consumption.

• • • • •

(h) *Television sets.* (1) The estimated average annual operating cost for television sets shall be the product of:

(i) The average annual energy consumed by the television set in kilowatt-hours per year, determined according to 3.0 of Appendix H of this subpart, and

(ii) The representative average unit cost of energy in dollars per kilowatt-hour as provided by the Administrator, the resulting product then being rounded off to the nearest dollar per year.

(2) The receiver energy efficiency factor for television sets shall be:

(i) For color television sets, the product of the estimated minimum power requirement (.130 kilowatts) and the average annual hours of use (2,200 hr/yr.), divided by the average annual energy consumed by the television set in kilowatt-hours per year, determined according to 3.0 of Appendix H to this subpart. The resultant is then multiplied by 100 and expressed as a percent,

(ii) For monochrome television sets, the product of the estimated minimum power requirement (.040 kilowatts) and the average annual hours of use (2,200 hr/yr.), divided by the average annual energy consumed by the television set in kilowatt-hours per year determined according to 3.0 of Appendix H of this subpart. The result is then multiplied by 100 and expressed as a percent.

(3) Other useful measures of energy consumption for television sets shall be those measures of energy consumption for television sets which the Administrator determines are likely to assist consumers in making purchasing decisions and which are derived from the application of Appendix H of this subpart.

• • • • •

3. Section 430.24 is amended by adding paragraph (h), to read as follows:

§ 430.24 Representations regarding measures of energy consumption.

• • • • •

(h) *Television sets.* (1) Except as provided in paragraph (h)(3) of this section, no manufacturer, distributor, retailer, or private labeler of television sets may make any representation with respect to or based upon a measure or measures of energy consumption described in § 430.22(h) unless a sample of sufficient size of each basic model for which such representation is made has been tested in accordance with applicable provisions of this subpart such that, for each such measure of energy consumption, there is at least 95 percent confidence that the true mean of such measures of the basic model is within ±5 percent of the mean of such measures of the sample.

(2) The sample selected for paragraph (h)(1) of this section shall be comprised of units which are production units, or are representative of production units, of the basic model being tested.

(3) Whenever a rule applicable to television sets is prescribed under section 324 of the Act, this paragraph shall not apply to any label covered by such rule, and all representations of any measure of energy consumption covered by such rule shall be identical to the measure of energy consumption on the label.

• • • • •

V 42 1178
SEP 14 77
UMI

4. Subpart B of Part 430 is amended to add an Appendix H, to read as follows:

• • • • •

APPENDIX H—UNIFORM TEST METHOD FOR MEASURING THE ENERGY CONSUMPTION OF TELEVISION SETS

1. DEFINITIONS

1.1 "IRE-unit flat field" means a specific video electrical signal which results in a particular level of brightness of the television screen as established by the Institute of Radio Engineers.

1.2 "Filament keep-warm" means a feature that provides a voltage to keep vacuum tube and or picture tube filaments warm for the purpose of allowing almost instantaneous response to the power control switch.

1.3 "Operating time" (t_o) means the hours per year during which the television set is operating with power control turned on.

1.4 "Remote control" means an optional feature which allows the user to control the television set from more than one location by a hand held device.

1.5 "Standby power consumption" (P_s) means the minimum amount of energy consumed with the power control switch turned off.

1.6 "Standby time" (t_s) means the hours per year during which the television set is connected to a power outlet with the power control switch turned off.

1.7 "Vacation switch or master on-off switch" means an optional energy saving feature incorporated into the design of a television set that permits the user to disconnect the filament keep-warm circuit(s).

1.8 "Remote control defeat switch" means a switch which permits the user to disconnect all standby power to a television set.

2. TESTING CONDITIONS AND MEASUREMNTS

2.1 *Test equipment and test signals.* The following equipment and test signals shall be used for testing of television sets.

2.1.1 Regulated power source capable of supplying 120 volts (±1.2 volts) alternating current.

2.1.2 Signal generator capable of producing radio frequency (RF) television test signals, at a convenient very high frequency (VHF) channel, modulated with, National Television System Committee composite video as follows:

2.1.2.1 Standard White Pattern, RF signal modulated to 87 percent with a 100 IRE-unit flat field.

2.1.2.2 Standard Black Pattern, all adjustments as for 2.1.2.1 except modulated with a zero IRE-unit flat field.

2.1.2.3 The test signals in 2.1.2.1 and 2.1.2.2, supplied by a source whose impedance equals the design antenna impedance of the television set under test, shall be adjusted to a level of 70 decibels (dB) ±3dB, referrred to a zero dB level of one femtowatt (1×10^{-15} watt) available power. (For a 300 ohm source, 70 dB referred to one femtowatt corresponds to an open-circuit voltage of 3.5 millivolts. For the calculation of "available power" use American National Standard C.16.13–1961, Method of Testing Monochrome Television Broadcast Receivers.)

2.1.3 Wattmeter capable of measuring the average power consumption of the television set under test. The wattmeter shall be accurate to within 1 percent of the full scale value. All measurements shall be made on the upper half of the scale of the wattmeter.

2.2 INITIAL SET-UP OF TELEVISION SET

2.2.1 Remove all batteries from television sets designed for both battery and alternating current operation. Deactivate all present or automatic controls affecting brightness which are customer options. Adjust all non-customer controls according to the manufacturer's service procedure.

2.2.2 Apply power to the television set under test from the power source specified in 2.1.1 through the wattmeter specified in 2.1.3. Adjust the volume control to the lowest possible setting.

2.2.3 Connect the output of the signal generator as specified in 2.1.2 to the VHF antenna terminals of the television set. Tune the television set to the channel of the RF signal.

2.3 MEASUREMENT OF OPERATING POWER CONSUMPTION (P_o)

2.3.1 Turn on the television set and allow at least five minutes warm-up time. With the synchronization controls adjusted for a stable test pattern, apply the standard white pattern specified in 2.1.2.1 to the television set. Adjust any customer controls other than the volume or synchronization controls for maximum power consumption as indicated by the wattmeter specified in 2.1.3. Illuminate any room illuminance sensor which has not been deactivated, to produce maximum power consumption. Record the white pattern consumption (P_w) as indicated by the wattmeter in watts.

2.3.2 Change the signal source to the standard black pattern specified in 2.1.2.2. Adjust any customer controls, other than the volume or synchronization controls, for the minimum power consumption as indicated by the wattmeter. Cover any room illuminance sensor which has not been deactivated. Record the black pattern power consumption (P_b) as indicated by the wattmeter in watts.

2.3.3 Compute the operating power consumption (P_o) as follows:

$$P_o = \frac{P_w + P_b}{2}$$

where
P_o=operating power consumption in watts
P_w=as determined from 2.3.1
P_b=as determined from 2.3.2

2.4 MEASUREMENT OF STANDBY POWER CONSUMPTION (P_s)

2.4.1 For television sets without either a vacation switch or a remote control defeat switch, turn the power switch off and after two minutes measure the standby power consumption (P_s).

2.4.2 For a television set equipped with a remote control defeat switch, a vacation switch or both, turn the power switch, any vacation switch, and any remote control defeat switch to the lowest energy consuming position. Measure the minimum power consumption (P_{min}). Turn any vacation switch and any remote control defeat switch to the highest energy consuming position and measure the maximum power consumptions, (P_{max}). The standby power is then calculated from the equation:

$$P_s = \frac{(P_{max} - P_{min})}{2} + P_{min}$$

where
P_s=standby power consumption in watts
P_{max}=power consumption, in watts, measured with the television set power switch off and the vacation switch and remote control defeat switch in the highest energy consuming position
P_{min}=power consumption, in watts, measured with the television set power switch off and the vaction switch and remote control defeat switch in the lowest energy consuming position

3.0 *Average Annual Energy Consumption*

$$E = \frac{P_o t_o}{1{,}000} + \frac{P_s t_s}{1{,}000} = 2.2P_o + 6.56P_s$$

where
E=total average annual energy consumed by the television set (kilowatt-hour per year)
P_o=operating power consumption as computed in 2.3.3
t_o=operating time, 2,200 h/yr
P_s=standby power consumption computed in 2.4
t_s=standby time, 6,560 h/yr

Title 24—Housing and Urban Development

CHAPTER X—FEDERAL INSURANCE ADMINISTRATION, DEPARTMENT OF THE INTERIOR

SUBCHAPTER B—NATIONAL FLOOD INSURANCE PROGRAM

[Docket No. FI-3334]

PART 1915—IDENTIFICATION AND MAPPING OF SPECIAL HAZARD AREAS

List of Communities With Special Hazard Areas

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: The purpose of this rule is the identification of communities with areas of special flood or mudslide or erosion hazards as authorized by the National Flood Insurance program. The identification of such areas is to provide guidance so that communities may mitigate hazards and reduce property losses by adopting appropriate flood plain management or other measures to minimize damage caused by floods or other hazards. It will enable communities to guide future construction, where practicable, away from locations which are threatened by flood or other hazards.

DATE: The effective date of identification is the date listed in the eighth column of the table or 30 days after the date of this FEDERAL REGISTER publication, whichever is later.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Flood Disaster Protection Act of 1973 requires the purchase of flood insurance on and after March 2, 1974, as a condition of receiving any form of Federal or Federally related financial assistance for acquisition or construction purposes in an identified plain area having special flood hazards that is located within any community participating in the National Flood Insurance Program.

One year after the identification of the community as flood prone, the requirement applies to all identified special flood hazard areas within the United States, so that; after that date, no such financial assistance can legally be provided for acquisition and construction in these areas unless the community has entered the program. The prohibition, however, does not apply to loans by Federally regulated, insured, supervised, or approved lending institutions: (1) To finance the acquisition of a residential dwelling occupied as a residence prior to March 1, 1976, or one year following identification of the area within which such dwelling is located as an area containing special flood hazards, whichever is later, or made to extend, renew, or increase the financing or refinancing in connection with such a dwelling, (2) to finance the acquisition of a building or structure completed and occupied by a small business concern, as defined by the Secretary, prior to January 1, 1976, (3) any loan or loans, which in the aggregate do not exceed $5,000, to finance improvements to or rehabilitation of a building or structure occupied as a residence prior to January 1, 1976, or (4) any loan or loans, which in the aggregate do not exceed an amount prescribed by the Secretary, to finance nonresidential additions or improvements to be used solely for agricultural purposes on a farm.

This 30 day period does not supersede the statutory requirement that a community, whether or not participating in the program, be given the opportunity for a period of six months to establish that it is not seriously flood prone or that such flood hazards as may have existed have been corrected by floodworks or other flood control methods. The six months period shall be considered to begin 30 days after the date of publication in the FEDERAL REGISTER or the effective date of the Flood Hazard Boundary Map, whichever is later. Similarly, the one year period a community has to enter the program under section 201(d) of the Flood Disaster Protection Act of 1973 shall be considered to begin 30 days after publication in the FEDERAL REGISTER or the effective date of the Flood Hazard Boundary Map, whichever is later.

This identification is made in accordance with Part 1915 of Title 24 of the Code of Federal Regulations as authorized by the National Flood Insurance Program (42 U.S.C. 4001-4128).

Accordingly, § 1915.3 is amended by adding in alphabetical sequence a new entry to the table, which entry reads as follows:

1915.3 List of Communities with special hazard areas (FHBMS in effect).

[Docket No. FI-3324]

PART 1915—IDENTIFICATION AND MAPPING OF SPECIAL HAZARD AREAS

Withdrawal of Flood Insurance Maps

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: The purpose of this rule is to list communities where Flood Insurance Rate Maps or Flood Hazard Boundary Maps published by the Federal Insurance Administration have been temporarily withdrawn. The list also includes the date each map was withdrawn, and the effective date of its republication if the map has in fact been republished. During the period that the map is withdrawn, the insurance purchase requirement of the National Flood Insurance Program (as described below) was suspended.

DATE: The effective date of withdrawal is the date that appears in the fifth column of the table.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Flood Disaster Protection Act of 1973 (Pub. L. 93-234) requires the purchase of flood insurance on and after March 2, 1974, as a condition of receiving any form of Federal or Federally related financial assistance for acquisition or construction purposes in an identified flood plain area having special flood hazards that is located within any community participating in the National Flood Insurance Program. The denial of such financial assistance has no application outside of the identified special flood hazard areas of such flood-prone communities.

One year after the identification of the community as flood prone, the requirement applies to all identified special hazard areas within the United States, so that, after that date, no such financial assistance can legally be provided for acquisition and construction in these areas unless the community has entered the program.

The prohibition, however, does not apply to loans by Federally regulated, insured, supervised or approved lending institutions: (1) To finance the acquisition of a residential dwelling occupied as a residence prior to March 1, 1976, or one year following identification of the area within which such dwelling is located as an area containing special flood hazards, whichever is later, or made to extend, renew, or increase the financing or refinancing in connection with such a dwelling, (2) to finance the acquisition of a building or structure completed and occupied by a small business concern, as defined by the Secretary, prior to January 1, 1976, (3) any loan or loans, which in the aggregate do not exceed $5,000, to finance improvements to or rehabilitation of a building or structure occupied as a residence prior to January 1, 1976, or (4) any loan or loans, which in the aggregate do not exceed an amount prescribed by the Secretary, to finance nonresidential additions or improvements to be used solely for agriculture purposes on a farm.

Prior to July 1, 1975, the statutory requirement for the purchase of flood insurance did not apply until and unless the community entered the program and the special flood hazard areas were identified by the issuance of a flood insurance map. However, after July 1, 1975, or one year after identification, whichever is later, the requirement applies to all communities in the United States that are identified as having special flood hazard areas within their community boundaries, so that, no such financial assistance can legally be provided for buildings in these areas unless the community has entered the program.

The insurance purchase requirement with respect to a particular community may be altered by the issuance or withdrawal of the Federal Insurance Administration's (FIA's) official flood maps, the Flood Insurance Rate Map (FIRM) or the Flood Hazard Boundary Map (FHBM). A FHBM is usually designated by the letter "H" preceding the map number and a FIRM by the letter "I" preceding the map number. If the FIA withdraws a FHBM for any reason the insurance purchase requirement is suspended during the period of withdrawal. However, if the community is in the Regular Program and only the FIRM is withdrawn but a FHBM remains in effect, then flood insurance is still required for properties located in identified special flood hazard areas, but the maximum amount of insurance available for new applications or renewal is first layer coverage under the Emergency Program, since the community's Regular Program status is suspended while the map is withdrawn. (For definitions see 24 CFR Part 1909 et seq.)

As the purpose of this revision is the convenience of the public, notices and public procedure are unnecessary, and cause exists to make this amendment effective upon publication. Accordingly, Subchapter B of Chapter X of Title 24 of the Code of Federal Regulations is amended as follows:

1. Present § 1915.6 is revised to read as follows:

§ 1915.6 Administrative withdrawal of maps.

(a) *Flood Hazard Boundary Maps (FHBM's).* The following is a cumulative list of withdrawals pursuant to this part:

40 FR 5149
40 FR 17015
40 FR 20798
40 FR 46102
40 FR 53579
40 FR 56672
41 FR 1478
41 FR 50990
41 FR 13352
41 FR 17726
42 FR 8895
42 FR 29433
42 FR 46227

(b) *Flood Insurance Rate Maps (FIRM's).* The following is a cumulative list of withdrawals pursuant to this part:

40 FR 17015
41 FR 1478

2. The following additional entries (which will not appear in the Code of Federal Regulations) are made pursuant to § 1915.6:

REASONS FOR RESCINDMENT

1. The Community appealed its flood-prone designation and FIA determined the Community would not be inundated by a flood having a one-percent chance of occurrence in any given year.

1A. FIA determined the Community would not be inundated by a flood having a one-percent chance of occurrence in any given year.

2. The Flood Hazard Boundary Map (FHBM) contained printing errors or was improperly distributed. A new FHBM will be prepared and distributed.

4. A more accurate FIA map is the effective map for this community.

[Docket No. FI-2706]

PART 1917—APPEALS FROM PROPOSED FLOOD ELEVATION DETERMINATIONS

Final Flood Elevation Determination for Town of East Haven, Conn.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: Final base flood elevations (100-year flood) are listed below for selected locations in the Town of East Haven, Conn. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

EFFECTIVE DATE: On publication of the Flood Insurance Rate Map for the Town of East Haven, Conn.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations for the Town of East Haven, Connecticut are available for review at Town Hall, 250 Main Street, East Haven, Conn.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202–755–5581 or toll free line 800–424–8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of his final determinations of flood elevations for the Town of East Haven, Conn.

This final rule is issued in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90–448), 42 U.S.C. 4001–4128, and 24 CFR Part 1917).

An opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. No appeals of the proposed base flood elevations were received from the community or from individuals within the community.

The Administrator, to whom the Secretary has delegated the statutory authority, has developed criteria for flood plain management in flood-prone areas in accordance with 24 CFR Part 1910.

The final 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Tuttle Brook	Route 95	17
	Main St	16
	School ground	15
	Burr St	14
	Forest St	12

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202–755–5581 or toll free line 800–424–8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of his final determinations of flood elevations for the Town of Agawam.

This final rule is issued in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90–448), 42 U.S.C. 4001–4128, and 24 CFR Part 1917).

An opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. No appeals of the proposed base flood elevations were received from the community or from individuals within the community.

The Administrator, to whom the Secretary has delegated the statutory authority, has developed criteria for flood plain management in flood-prone areas in accordance with 24 CFR Part 1910.

Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations for the Town of Agawam are available for review at 36 Main Street, Agawam, Mass.

The final 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Connecticut River	Southend Bridge (Route 57).	59
Westfield River	Mittenegue Bridge	69
	Suffield St	62
	Agawam-West Springfield Bridge.	60
Still Brook	Pine St	170

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; (42 U.S.C. 4001–4128); and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: May 24, 1977.

INTERSTATE COMMERCE COMMISSION

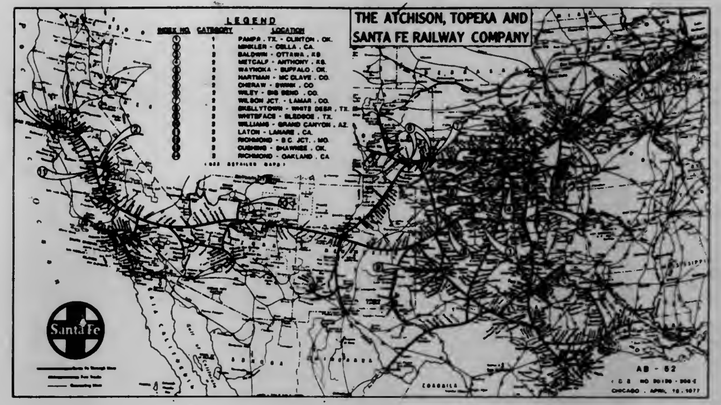
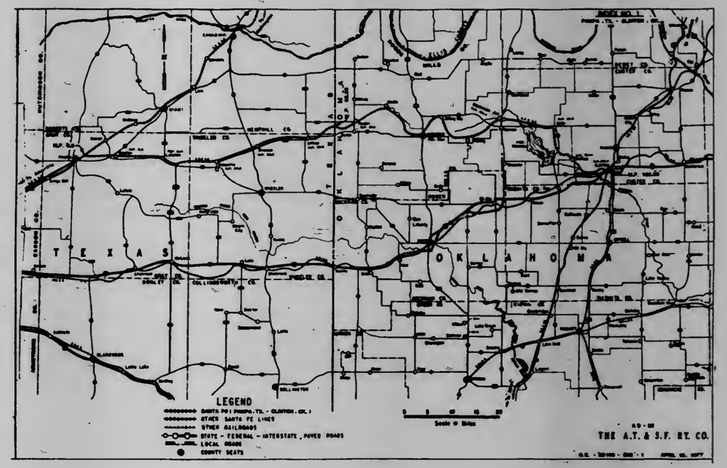
[AB-52 (SDM)]

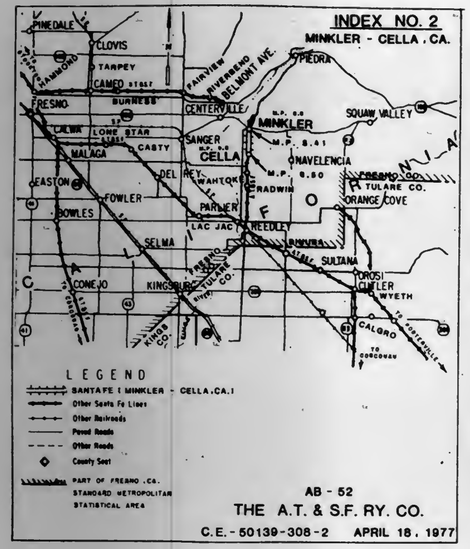


ATCHISON, TOPEKA & SANTA FE RAILWAY CO.

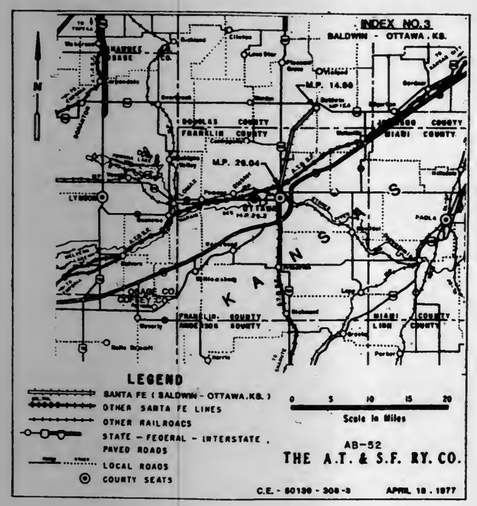


System Diagram Map

Notice is hereby given that, pursuant to the requirements contained in Title 49 of the Code of Federal Regulations, Part 1121.22, that the Atchison, Topeka & Santa Fe Railway Co., has filed with the Commission its color-coded system diagram map in docket No. AB-52 (SDM). The maps reproduced here in black and white are reasonable reproductions of that system map and the Commission on September 2, 1977, received a certificate of publication as required by said regulation which is considered the effective date on which the system diagram map was filed.



Color-coded copies of the map have been served on the Governor of each state in which the railroad operates and the Public Service Commission or similar agency and the State designated agency. Copies of the map may also be requested from the railroad at a nominal charge. The maps also may be examined at the office of the Commission, Section of Dockets, by requesting docket No. AB 52 (SDM).



H. G. HOMME,
Acting Secretary.

THE ATCHISON, TOPEKA & SANTA FE RAILWAY CO.

DESCRIPTION OF LINES TO ACCOMPANY THE SYSTEM DIAGRAM MAP

Category (1). All lines or portions of lines which the carrier anticipates will be the subject of an abandonment or discontinuance application to be filed within the three year period following the date upon which the diagram, or any amended diagram, is filed with the Commission.

Map Code (Index No. 1)—Texas/Oklahoma

(a) Pampa, Tex., to Clinton, Okla., entire Clinton District 136.69 miles.
(b) Located in the States of Texas and Oklahoma. Milespost at State line 56.62.
(c) Located in Custer and Roger Mills County, Okla.; Hemphill, Wheeler, and Gray County, Tex.
(d) Milepost 0.0 to 136.69.
(e) Agency stations at Pampa, Tex. (Milepost 0.0); Cheyenne, Okla. (Milepost 80.0); Butler, Okla. (Milepost 116.6); Clinton, Okla. (Milepost 136.4).

Map Code (Index No. 2)—California

(a) Minkler to Celia; a 1.91 mile segment of the Wahtoke District.
(b) Located entirely in the State of California.
(c) Located entirely in Fresno County.
(d) Milepost 8.41 to 6.50.
(e) No agency staitons on segment. Segment service by agent at Reedley (Milepost 0.0).

Category (2). All lines or portions of lines potentially subject to abandonment which the carrier has under study and believes may be the subject of a future abandonment application because of either anticipated operating losses or excessive rehabilitation costs, as compared to potential revenues.

Map Code (Index No. 3)—Kansas

(a) Baldwin to Ottawa; entire Baldwin District 11.05 miles.
(b) Located entirely in the State of Kansas.
(c) Located in Douglas and Franklin County, Kans.
(d) Milepost 14.95 to 26.04.
(e) Agency station at Ottawa (Milepost 26.2).

Map Code (Index No. 4)—Kansas

(a) Metcalf to Anthony; entire Anthony District 16.49 miles.
(b) Located entirely in the State of Kansas.
(c) Located in Sumner and Harper County.
(d) Milepost 42.81 to 59.30.
(e) Agency stations at Bluff City (Milepost 48.2) and Anthony (Milepost 59.1).

Map Code (Index No. 5)—Oklahoma

(a) Waynoka to Buffalo; entire Buffalo District 51.37 miles.
(b) Located entirely in the State of Oklahoma.
(c) Located in Woods, Woodward, and Harper Counties.
(d) Milepost 1.17 to 52.23.
(e) Agency stations at Waynoka (Milepost 0.0) and Buffalo (Milepost 52.1).

Map Code (Index No. 6)—Colorado

(a) Hartman to McClave, a 36.48 mile segment; Cheraw to Swink, a 11.49 mile segment; Wiley to Big Bend, a 4.17 mile industrial spur. These three segments make up the entire Arkansas Valley District.
(b) Located entirely in the State of Colorado.
(c) Segment Hartman to McClave is located in Prowers and Bent Counties; segment Cheraw to Swink is located entirely in Otero County; segment Wiley to Big Bend is located in Prowers and Bent Counties.
(d) Segment Hartman to McClave, Milepost 7.44 to 43.92; segment Cheraw to Swink, Milepost 81.68 to 93.17; segment Wiley to Big Bend, a 4.17 mile spur connecting at Wiley, Milepost 36.48.
(e) Agency stations at Hartman (Milepost 7.83, Bristol (Milepost 13.1), Wiley (Milepost 36.3 and McClave (Milepost 43.6).

Map Code (Index No. 7)—Colorado

(a) Wilson Jct. to Lamar; entire Lamar District, consisting of a connecting track between Santa Fe main line at Lamar across the Arkansas River to the A. V. District, 4.36 miles.
(b) Located entirely in the State of Colorado.
(c) Located entirely in Prowers County.
(d) Milepost 4.53 to 0.17.
(e) Agency station at Lamar (Milepost 0.0).

Map Code (Index No. 8)—Texas

(a) Skellytown to White Deer, a 10.4 mile industrial spur on the Second District, also referred to as the Skellytown spur.
(b) Located entirely in the State of Texas.
(c) Located entirely in Carson County.
(d) Skellytown spur connecting at White Deer, Main Line Milepost 512.8.
(e) Agency station at White Deer (Main line Milepost 512.8).

Map Code (Index No. 9)—Texas

(a) Whiteface to Bledsoe; a 24.23 mile segment of the Lehman District.
(b) Located entirely in the State of Texas.
(c) Located entirely in Cochran County.
(d) Milepost 39.20 to 63.43.
(e) Agency stations at Whiteface (Milepost 39.2) and Lehman (Milepost 50.5).

Mape Code (Index No. 10)—Arizona

(a) Williams to Grand Canyon; entire Grand Canyon District 63.79 miles.
(b) Located entirely in the State of Arizona.
(c) Located entirely in Coconino County.
(d) Milepost 0.0 to 63.79.
(e) No agency stations on segment.

Map Code (Index No. 11)—California

(a) Laton on Lanare; entire Laton District 17.56 miles.
(b) Located entirely in the State of California.
(c) Located in Fresno and Kings Counties.
(d) Milepost 0.0 to 17.56.
(e) No agency stations on segment.

Category (3). All lines or portions of lines for which an abandonment or discontinuance application is pending before the Commission on the date upon which the diagram, or any amended diagram, is filed with the Commission.

Map Code (Index No. 12)—Missouri

(a) Richmond to B. C. Junction, a 59.65 mile segment of the St. Joseph District.
(b) Located entirely in the State of Missouri.
(c) Located in Ray, Clay, Clinton, and Buchanan Counties.
(d) Milepost 5.60 to 65.25.
(e) Agency station at Plattsburg (Milepost 43.8).

Map Code (Index No. 13)—Oklahoma

(a) Cushing to Shawnee, a 38.53 mile segment of the Cushing District.
(b) Located entirely in the State of Oklahoma.
(c) Located in Payne, Lincoln, and Pottowatomie Counties.
(d) Milepost 84.85 to 123.38.
(e) Agency stations at Cushing (Milepost 82.4) and Shawnee (Milepost 132.0).

Map Code (Index No. 13)—Oklahoma

(a) Richmond to Oakland, a 9.24 mile segment of the Oakland District.
(b) Located entirely in the State of California.
(c) Located in Contra Costa and Alameda Counties.
(d) Milepost 0.51 to 9.75.
(e) Agency stations at Richmond (Milepost 0.0) and Oakland (Milepost 10.9).

CUMULATIVE REPORT ON RESCISSIONS AND DEFERRALS

September 1977

V 42 178
SEP 14 77
UMI

OFFICE OF MANAGEMENT AND BUDGET

CUMULATIVE REPORT ON RESCISSIONS AND DEFERRALS

September 1977

This report is submitted in fulfillment of the requirements of section 1014(e) of the Impoundment Control Act of 1974 (Pub. L. 93-344). Section 1014(e) provides for a monthly report listing all current year budget authority with respect to which, as of the first day of the month, a special message has been transmitted to the Congress.

This month's report gives the status as of September 1, 1977, of the 20 rescissions and 64 deferrals contained in the first eighteen special messages transmitted to the Congress for fiscal year 1977. These messages were transmitted to the Congress on July 29, September 22, October 1, November 5, December 3, 1976, January 7 and 17, March 9 and 24, April 4 and 28, May 18, July 7, 19 (both the fourteenth and fifteenth messages), and July 26 (both the sixteenth and seventeenth messages), and August 16, 1977.

RESCISSIONS (TABLE A AND ATTACHMENT A)

Six rescissions totaling $665.3 million in FY 1977 budget authority are presently before the Congress. Table A summarizes the status of rescissions proposed as of September 1, 1977. Attachment A shows the history and status of each rescission proposed for fiscal year 1977.

DEFERRALS (TABLE B AND ATTACHMENT B)

As of September 1, 1977, $4,367.9 million in 1977 budget authority was being deferred from obligation and another $4.6 million in 1977 obligations was being deferred from expenditure. Table B summarizes the status of existing deferrals. Attachment B shows the history and status of each deferral proposed during fiscal year 1977.

INFORMATION FROM SPECIAL MESSAGES

The special messages containing information on each of the rescissions and deferrals covered by the cumulative report are contained in the Federal Registers of:

Tuesday, August 3, 1976 (Vol. 41, No. 150, Part VI)
Monday, September 27, 1976 (Vol. 41, No. 188, Part III)
Thursday, October 7, 1976 (Vol. 41, No. 196, Part IV)
Wednesday, November 10, 1976 (Vol. 41, No. 218, Part VII)
Wednesday, December 8, 1976 (Vol. 41, No. 237, Part II)
Thursday, January 13, 1977 (Vol. 42, No. 9, Part X)
Monday, January 24, 1977 (Vol. 42, No. 15, Part VIII)

BERT LANCE,
Director.

TABLE A

STATUS OF 1977 RESCISSION PROPOSALS

	Amount (In millions of dollars)
Proposed rescissions	1,926.9
Withdrawn (R77-4A, Special Message No. 4, R77-13A, Special Message No. 8)	-95.0
Accepted by the Congress (R77-3, R77-5, R77-8, R77-9, R77-10, R77-11)	-711.6
Rejected by the Congress	-186.6
Adjustments	-268.4 1/
Pending before the Congress	665.3

* *

TABLE B

STATUS OF 1977 DEFERRALS

	Amount (In millions of dollars)
Proposed deferrals	7,484.4
Routine Executive releases (-2,619.6M) and adjustments (-466.7M) 2/ through September 1, 1977	-3,086.3
Overturned by the Congress	-25.6
Currently before the Congress	4,372.5 3/

1/ This amount is the difference between $721.0 million in Navy shipbuilding and conversion funds originally proposed for rescission and $452.6 million rescinded. When the rescission was proposed, these funds were already obligated for supply contracts. In testimony before the House Appropriations Committee, the Secretary of Defense concurred in the opinion that these contracts should not be terminated.

2/ An amount equal to $1,845.0 million included in the "Adjustments" column of Attachment B to this report represents superseded deferrals. This amount is not included in the "Adjustments" entry above because superseded deferrals are netted out in calculating the amount shown on the line "Deferrals proposed by the President" to avoid double counting.

3/ Includes $4.6 million of outlays in one Treasury deferral, D77-27A.

V 42 178 SEP 14 77 UMI

CANAL ZONE GOVERNMENT—PANAMA CANAL COMPANY

PRIVACY ACT OF 1974

Proposed System of Records

V 42 178 SEP 14 77 UMI

CANAL ZONE GOVERNMENT—PANAMA CANAL COMPANY

PRIVACY ACT OF 1974

System of Records

The Canal Zone Government and the Panama Canal Company maintain a system of records called "Canal Protection Division Activity Report Files." A description of the system is published below.

These agencies filed a report on the system with the Office of Management and Budget, the Senate, the House of Representatives and the Privacy Protection Study Commission on August 29, 1977. The system came into existence in May 1975, but, through administrative oversight, notice of its existence and character has not been given to date. Since suspension of the system would adversely affect the security of the locks, dams, and other vital installations, these agencies have requested a waiver of the 60-day notice period required before implementation of a system by OMB Circular A-108, Transmittal Memoranda 1 (September 30, 1975) and 3 (May 17, 1976).

These agencies invite the submission of written data, views or arguments on any aspect of this system by any member of the public. To be considered, comments must be received on or before October 14, 1977.

Send comments to:
Joseph J. Wood
Agency Records Officer
(Chief, Administrative Services Division)
Panama Canal Company
Box M
Balboa Heights, Canal Zone
Mark all comments: "CACP—2."

Thomas M. Constant,
Assistant to the Governor of the Canal Zone
Secretary, Panama Canal Company.

PCC—CZG/CACP—2

System name: Canal Protection Division Activity Report Files, PCC—CZG/CACP—2

System location: Canal Protection Division Pacific and Atlantic Area Commanders' Offices, at Paraiso, and Cristobal, Canal Zone, respectively.

Categories of individuals covered by the system: Persons who are or have been subjects of investigation by Canal Protection Division personnel, including those arrested and those who have committed, or are alleged to have committed, violations of laws or regulations in areas protected by the Canal Protection Division.

Categories of records in the system: Activity reports, index cards and logbooks containing information such as subject's name, identification number, occupation and employing unit and, when a subject has been barred from vital areas, a notation to that effect; date and time of incident and report; name of person making the report; information concerning the incident or arrest; and witnesses' or victims' names, identification numbers and employing units.

Authority for maintenance of the system: 2 C.Z.C. 31, 76A Stat. 7; 50 U.S.C. 191; and E. O. 10226 of March 23, 1951 (now appearing as 35 CFR Part 129).

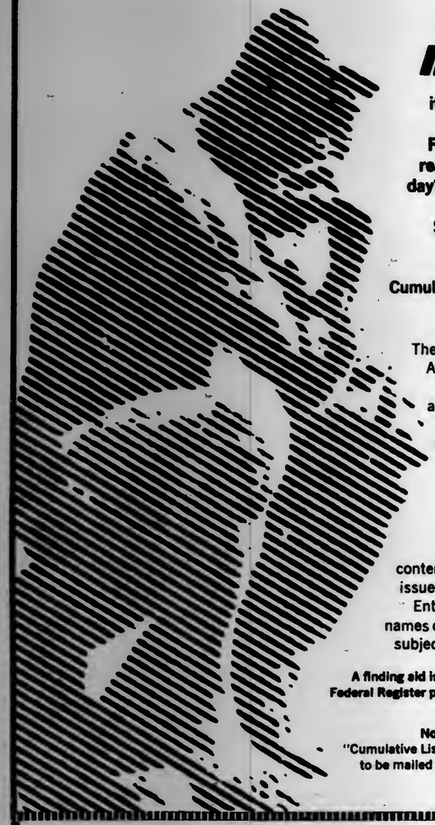
Routine uses of records maintained in the system, including categories of users and the purposes of such uses: See general routine use paragraphs in 35 CFR Part 10, Appendix A. Information in connection with actual or potential violations of the security of areas guarded by the Canal Protection Division may also be disclosed to intelligence units or agencies of the United States Government including the State Department and the Department of Defense.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Printed forms 8-1/2 by 11 inches and index cards.

Retrievability: Alphabetical card file of names of subjects gives cross-reference to activity reports filed in numerical order.

Safeguards: Active files maintained in file cabinets in Area Commanders' offices. File cabinets and offices locked when not in use. Inactive files maintained at Agency Records Center, a building locked when not in use. Access to files and filing areas restricted to authorized personnel.



Retention and disposal: Activity reports retained at Area Commanders' offices for two years, subsequently held at Agency Records Center for three or more years, then destroyed. Index cards retained for up to ten years after date of last entry.

System manager(s) and address: Chief, Canal Protection Division, Box M, Balboa Heights, Canal Zone.

Systems exempted from certain provisions of the act: All information in this system is exempt from certain subsections of the Privacy Act of 1974, 5 U.S.C. 552a, and from the procedures for access and contest set forth in the agency's regulations. See 35 CFR 10.13 and 10.14.

would you like to know

if any changes have been made in certain titles of the CODE OF FEDERAL REGULATIONS without reading the Federal Register every day? If so, you may wish to subscribe to the "Cumulative List of CFR Sections Affected," the "Federal Register Index," or both.

Cumulative List of CFR Sections Affected
$10.00
per year

The "Cumulative List of CFR Sections Affected" is designed to lead users of the Code of Federal Regulations to amendatory actions published in the Federal Register, and is issued monthly in cumulative form. Entries indicate the nature of the changes.

Federal Register Index $8.00
per year

Indexes covering the contents of the daily Federal Register are issued monthly, quarterly, and annually. Entries are carried primarily under the names of the issuing agencies. Significant subjects are carried as cross-references.

A finding aid is included in each publication which lists Federal Register page numbers with the date of publication in the Federal Register.

Note to FR Subscribers: FR Indexes and the "Cumulative List of CFR Sections Affected" will continue to be mailed free of charge to regular FR subscribers.

Mail order form to:
Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402

There is enclosed $_____ for _____ subscription(s) to the publications checked below:

..... CUMULATIVE LIST OF CFR SECTIONS AFFECTED ($10.00 a year domestic; $12.50 foreign)
..... FEDERAL REGISTER INDEX ($8.00 a year domestic; $10.00 foreign)

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The six-month trial period ended August 6. The program is being continued on a voluntary basis (see OFR notice, 41 FR 32914, August 6, 1976). The following agencies have agreed to remain in the program:

Monday	Tuesday	Wednesday	Thursday	Friday
NRC	USDA/ASCS		NRC	USDA/ASCS
DOT/COAST GUARD	USDA/APHIS		DOT/COAST GUARD	USDA/APHIS
DOT/NHTSA	USDA/FNS		DOT/NHTSA	USDA/FNS
DOT/FAA	USDA/REA		DOT/FAA	USDA/REA
DOT/OHMO	CSC		DOT/OHMO	CSC
DOT/OPSO	LABOR		DOT/OPSO	LABOR
	HEW/ADAMHA			HEW/ADAMHA
	HEW/CDC			HEW/CDC
	HEW/FDA			HEW/FDA
	HEW/HRA			HEW/HRA
	HEW/HSA			HEW/HSA
	HEW/NIH			HEW/NIH
	HEW/PHS			HEW/PHS

Documents normally scheduled on a day that will be a Federal holiday will be published the next work day following the holiday.

Comments on this program are still invited. Comments should be submitted to the Day-of-the-Week Program Coordinator, Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408.

ATTENTION: For questions, corrections, or requests for information please see the list of telephone numbers appearing on opposite page.

federal register

Area Code 202 Phone 523-5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $5.00 per month or $50 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

Title 3—The President

PROCLAMATION 4519

Veterans Day, 1977

By the President of the United States of America

A Proclamation

The blessings of liberty which our ancestors secured for us are today, as they have always been, the birthright of every American. They have remained so because in each generation there have been men and women who have been willing to suffer the hardships and sacrifices necessary to preserve our rights for future generations.

No act of citizenship is more worthy of our respect than a willingness to serve in our armed forces and to protect and defend our ideals. There are nearly thirty million of our fellow citizens among us today who have earned that respect by their loyal and honorable service.

In recognition of the contributions our veterans have made to the cause of peace and freedom, the Congress has determined (5 U.S.C. 6103(a)) that one day each year should be set aside as a national holiday in order that all Americans may be able to take part in activities designed to show our respect for their dedication to their country.

NOW, THEREFORE, I, JIMMY CARTER, President of the United States of America, ask all Americans to observe Monday, October 24, 1977, as Veterans Day in a manner that will let our Nation's veterans know that their sacrifices are and always will be recognized and appreciated.

I urge the conduct of public ceremonies, the visible tribute of members of the business community, and the personal participation of all Americans of all ages in honoring our Nation's veterans.

I especially encourage remembrance to those men and women who are sick and disabled and to those who are patients in our hospitals.

I call upon Federa, State and local government officials to mark Veterans Day by displaying the flag of the United States and by supporting and encouraging public involvement in appropriate exercises and programs.

IN WITNESS WHEREOF, I have hereunto set my hand this thirteenth day of September, in the year of our Lord nineteen hundred and seventy-seven, and of the Independence of the United States of America the two hundred and second.

Jimmy Carter

Executive Order 12009 • September 13, 1977

Providing for the Effectuation of the Department of Energy Organization Act

By virtue of the authority vested in me by the Constitution and statutes of the United States of America, including the Department of Energy Organization Act (Public Law 95–91; 91 Stat. 565), and as President of the United States of America, it is hereby ordered as follows:

SECTION 1. Pursuant to Section 901 of the Department of Energy Organization Act, I hereby prescribe October 1, 1977, as the effective date of that Act.

SEC. 2. The Director of the Office of Management and Budget, in consultation with the Secretary of Energy and the Federal Energy Regulatory Commission, as appropriate, shall take all steps necessary or appropriate to ensure or effectuate the transfer of functions provided for in the Department of Energy Organization Act, to the extent required or permitted by law, including transfers of funds, personnel and positions, assets, liabilities, contracts, property, records and other items related to the transfer of functions, programs, or authorities.

SEC. 3. As required by Section 901 of the Department of Energy Organization Act, this Order shall be published in the FEDERAL REGISTER.

Jimmy Carter

THE WHITE HOUSE,
September 13, 1977.

rules and regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title 7—Agriculture

CHAPTER IX—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; FRUITS, VEGETABLES, NUTS), DEPARTMENT OF AGRICULTURE

[Valencia Orange Reg. 573]

PART 908—VALENCIA ORANGES GROWN IN ARIZONA AND DESIGNATED PART OF CALIFORNIA

Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This regulation establishes the quantity of California-Arizona Valencia oranges that may be shipped to fresh market during the weekly regulation period Sept. 16–22, 1977. This regulation is needed to provide for orderly marketing of fresh Valencia oranges for the regulation period because of the production and marketing situation confronting the orange industry.

EFFECTIVE DATE: September 16, 1977.

FOR FURTHER INFORMATION CONTACT:

Charles R. Brader, Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250 (202–447–3545).

SUPPLEMENTARY INFORMATION: *Findings.* (1) pursuant to the amended marketing agreement and Order No. 908, as amended (7 CFR Part 908), regulating the handling of Valencia oranges grown in Arizona and designated part of California, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), and upon the basis of the recommendations and information submitted by the Valencia Orange Administrative Committee, established under the amended marketing agreement and order, and upon other available information, it is found that the limitation of handling of Valencia oranges, as provided in this regulation will tend to effectuate the declared policy of the act.

(2) The need for this regulation to limit the quantities of Valencia oranges that may be marketed from District 1, District 2, or District 3 during the specified week stems from the production and marketing situation confronting the Valencia orange industry.

(i) The committee has submitted its recommendation for the quantities of Valencia oranges that should be marketed during the specified week. The recommendation, designed to provide equity of marketing opportunity to handlers in all districts, resulted from consideration of the factors covered in the order. The committee further reports the fresh market demand for Valencia oranges continues good.

Average f.o.b. price was $4.51 per carton on 532 cars for the week ended September 8, as compared with $4.47 per carton on 531 cars the previous week. Track and rolling supplies at 288 cars were up 24 cars from last week.

(ii) Having considered the recommendation and information submitted by the committee, and other available information, the Secretary finds that the quantities of Valencia oranges which may be handled should be established as provided in this regulation.

(3) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking procedure, and postpone the effective date of this regulation until 30 days after publication in the FEDERAL REGISTER (5 U.S.C. 553), because the time intervening between the date when information become available upon which this regulation is based and the time when this regulation must become effective in order to effectuate the declared policy of the act is insufficient. A reasonable time is permitted for preparation for such effective time; and good cause exists for making the regulation effective as specified. The committee held an open meeting during the current week, after giving due notice, to consider supply and market conditions for Valencia oranges and the need for regulation. Interested persons were afforded an opportunity to submit information and views at this meeting. The recommendation and supporting information for regulation during the period specified were promptly submitted to the Secretary after the meeting was held, and information concerning such provisions and effective time has been provided to handlers of Valencia oranges. It is necessary, to effectuate the declared policy of the act, to make this regulation effective during the period specified. The committee meeting was held on September 13, 1977.

§ 908.873 Valencia Orange Regulation 573.

(a) Order. (1) The quantities of Valencia oranges grown in Arizona and designated part of California which may be handled during the period September 16, 1977, through Sept. 22, 1977, are hereby fixed as follows:

(i) District 1: 290,000 cartons;

(ii) District 2: 435,000 cartons;

(iii) District 3: Unlimited.

(2) As used in this section, "handled", "District 1", "District 2", "District 3", and "carton" have the same meaning as when used in the amended marketing agreement and order.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.)

Dated: September 14, 1977.

CHARLES R. BRADER,
Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc.77-27088 Filed 9-14-77;11:57 am]

CHAPTER XVIII—FARMERS HOME ADMINISTRATION, DEPARTMENT OF AGRICULTURE

SUBCHAPTER G—MISCELLANEOUS REGULATIONS

[FmHA Instruction 440.3]

PART 1888—SPECIAL ASSISTANCE TO DROUGHT STRICKEN AREAS

Amendment

AGENCY: Farmers Home Administration, USDA

ACTION: Final rule.

SUMMARY: The Farmers Home Administration issues amended regulations to provide that loan funds may be used to pay initial operating and maintenance expenses attributable to short term measures necessary to augment community water supplies; all users being served by the project, regardless of meter size, may be considered in determining the amount of the grant; and, that the reasonable user rate provision of § 1823.472 (b), (b)(1), and (b)(2), will not be applicable when determining the amount of eligible grant assistance for drought projects. This action is brought about by the need for emergency assistance through grants and/or loans and the intended effect is to ameliorate the impact of the drought conditions.

EFFECTIVE DATE: September 15, 1977. Comments must be received on or before October 17, 1977.

ADDRESSES: Submit written comments to the Office of the Chief, Directives Management Branch, Farmers Home Administration, U.S. Department of Agriculture, Room 6316, South Building, Washington, D.C. 20250. All written comments made pursuant to this notice will be available for public inspection at the address given above.

FOR FURTHER INFORMATION CONTACT:

Mr. Charles B. Hart (202–447–5717).

SUPPLEMENTARY INFORMATION: Section 1888.13 of Part 1888 of Chapter XVIII, Title 7, Subchapter G, "Miscellaneous Regulations," in the Code of

V 42 179
SEP 15 77
UMI

Federal Regulations, (42 FR 19322; 42 FR 23158; 42 FR43965) is amended. The text of paragraph (c) of this section is amended to provide that loan funds may be used to pay initial operating and maintenance expenses attributable to short term measures necessary to augment community water supplies. The text of paragraph (d) of this section is amended to further explain methods for determining grant assistance to eligible recipients and project users suffering from drought, as set forth in the amended § 1888.13(d). It is the policy of this Department that rules relating to public property, loans, grants, benefits, or contracts shall be published for comment notwithstanding the exemptions in 5 U.S.C. 553 with respect to such rules. This amendment, however, is not published for proposed rulemaking since any delay in administering this currently needed asssistance would be contrary to the public interest. However, comments will be accepted and material thus submitted will be evaluated and acted upon in the same manner as if the document were a proposal. However, this addition will remain effective until amended in order to permit the public business to proceed expeditiously. Accordingly, the text of paragraphs (c) and (d) of § 1888.13 are amended to read as follows:

§ 1888.13 Loans and grants to rural communities for water supply assistance.

* * * * *

(c) For those projects determined to meet the requirements of paragraph (b) of this section, assistance may be provided to the extent necessary for the construction, enlargement, extension, improvement, or any other appropriate community water facility purpose for ameliorating drought caused problems. Such assistance may include, but not be limited to, deepening an existing well, developing a new water source by digging a new well, or extending water supply lines to other water sources. Additionally, assistance may be provided for short term measures necessary to augment community water supplies where there are severe problems resulting from water shortages due to the drought, including the use of loan funds for initial operation and maintenance expenses attributable to such measures. However, increased operation and maintenance expenses on existing facilities attributable to the drought are not items for which assistance may be provided. Eligibility is limited to those project measures which can be completed by April 30, 1978. Under special circumstances or hardship an extension of completion time may be granted by the FmHA Administrator.

(d) The provisions of paragraph (b), (b)(1), and (b)(2) of § 1823.472 of this Chapter as they pertain to the use of grant funds to achieve a reasonable user cost and to those users that may be considered eligible recipients of grant benefits will not apply. All users being served by the project, regardless of meter size, may be considered in determining the amount of grant, except that projects must primarily serve rural residents. Grant assistance will be determined as follows:

* * * * *

(7 U.S.C. 1989; delegation of authority by the Sec. of Agri., 7 CFR 2.23; delegation of authority by the Asst. Sec. for Rural Development, 7 CFR 2.70.)

NOTE.—The Farmers Home Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821 and OMB Circular A-107.

Dated: September 8, 1977.

JAMES E. THORNTON,
Associate Administrator,
Farmers Home Administration.

[FR Doc.77-26936 Filed 9-14-77;8:45 am]

Title 10—Energy

CHAPTER I—NUCLEAR REGULATORY COMMISSION

Amendments to Chapter to Revoke or Revise Certain Reporting Requirements

Correction

In FR Doc. 77-25074 appearing on page 43965 in the issue for Thursday, September 1, 1977, the amendment to § 20.403 should read as follows: "2. Paragraph (a)(4) of § 20.403 is amended by deleting '$100,000' and substituting therefor '$200,000'."

CHAPTER II—FEDERAL ENERGY ADMINISTRATION

1977 PRICE AND ALLOCATION INTERPRETATIONS

AGENCY: Federal Energy Administration.

ACTION: Notice of interpretations.

SUMMARY: Attached are the interpretations issued by the General Counsel of the Federal Energy Administration (FEA) during the period August 5 through August 31, 1977.

FOR FURTHER INFORMATION CONTACT:

Kathleen Williams, Federal Energy Administration, 12th & Pennsylvania Avenue NW., Room 7132, Washington, D.C. 20461 (202-566-2454).

SUPPLEMENTARY INFORMATION: FEA interpretations issued pursuant to 10 CFR Part 205, Subpart F, are published in the FEDERAL REGISTER from time to time in accordance with editorial and classification criteria set forth in 42 FR 7923, February 8, 1977.

In 42 FR 7923, FEA stated as follows:

The Interpretations published today are altered from the form in which they were originally issued only in the following respects:

(1) Material which is arguably confidential under 18 U.S.C. 1905 (chiefly specific price or supply data relating to the requesting firm's business operations) has been deleted and replaced by x's;

(2) The inside address, subject line and salutation have been deleted and replaced by the following uniform data identification headings:

To: (Firm which submitted request for interpretation or on whose behalf request for interpretation was submitted);

Date: (Date Interpretation was issued);

Rules Interpreted: List of regulations, rulings or statutory provisions construed in the Interpretation);

Code: (Information indicating (i) whether the Interpretation was issued by General Counsel/Washington ("GCW") or Regional Counsel, and the FEA Region concerned (e.g., "GCR(IV)"), (ii) whether the Interpretation is a Price Interpretation ("PI") or Allocation Interpretation ("AI"), or both, and (iii) the generic subject or subjects (e.g., "Class of Purchaser," "December 1 Rule") discussed in the Interpretation); and

(3) Nonsubstantive information included as a matter of course at the end of every Interpretation (indicating, for example, by whom and to what extent the Interpretation may be relied upon, the procedure for appeal of the Interpretation, and to whom copies of the Interpretation have been sent) has also been omitted.

These alterations were predicated on the issuance of Interpretations in letter format, and all Interpretations through Interpretation 1977-27 were in fact issued as letters. Beginning with Interpretation 1977-28 (the first Interpretation appended hereto) FEA has issued Interpretations under a new format in which the Interpretation is an attachment to a brief cover letter. This style permits FEA to group in the cover letter all nonInterpretive remarks which used to be found in the introductory and concluding paragraphs of Interpretations and which need not be published in the FEDERAL REGISTER. This format also permits FEA to structure the interpretation proper—the attachment to the cover letter—in a manner appropriate for publication in the FEDERAL REGISTER without the need for alteration or other preparation (except for the deletion of any confidential material).

Thus, subject to the single exception just noted, the Interpretations published today, including the interpretation numbers and data identification headings, are published exactly in the form issued. Because the non-interpretive introductory paragraph or paragraphs usually beginning "This is in response to your request * * *" are now found in the cover letter, the text of Interpretations as published in the REGISTER will no longer begin with such paragraphs but will consist entirely of portions labelled "Facts," "Issue," and "Interpretation."

Except as indicated above, the editorial and classification standards noted in 42 FR 7923 with respect to publication of Interpretations remain unaltered.

FEA Interpretations depend for their authority on the accuracy of the factual statement used as a basis for the Interpretation (10 CFR 205.84(a)(2)) and may be rescinded or modified at any time (§ 205.85(d)). Only the persons to whom Interpretations are addressed and other persons upon whom Interpretations are served are entitled to rely on them (§ 205.85(c)). An Interpretation is modified by a subsequent amendment to the regulation(s) or ruling(s) interpreted thereby to the extent that the Interpretation is inconsistent with the amended regulation(s) or ruling(s) (§ 205.85(e)). In addition, Interpretations are subject to appeal. The Interpretations appended hereto are published today only for general guidance in accordance with the reasons set forth in the FEA notice cited above.

Issued in Washington, D.C., September 10, 1977.

ERIC J. FYGI,
Acting General Counsel,
Federal Energy Administration.

INTERPRETATION 1977-28

To: Mobil Oil Corporation.

Date: August 5, 1977.

Rules Interpreted: §§ 205.2, 205.33(a), 211.12 (e), 211.13 (c) and (f).

Code: GCW—AI—"New" Wholesale Purchaser-Reseller; Base Period Use, Adjustments to; Procedural Requirements.

FACTS

Mobile Oil Corp. ("Mobile") is the prime supplier of motor gasoline for Ace Oil Co. ("Ace"), a distributor in Chattanooga, Tenn. (a wholesale purchaser-reseller under the Mandatory Petroleum Allocation Regulations). Ace entered into an agreement with the Atlantic Richfield Co. ("ARCO") to assume ARCO's FEA-mandated supply obligations for twelve retail motor gasoline sales outlets (also classified as wholesale purchaser-resellers under FEA regulations). "Three-party agreements" executed by Ace, ARCO and each of the twelve purchasers were submitted to the FEA's Region IV Office for approval. The agreements requested termination of the base period supplier/purchaser relationship between ARCO and the individual purchasers and the substitution by an assignment of Ace as the new base period supplier for the twelve accounts. The FEA granted approval of the three-party agreements by letters sent to each of the twelve purchasers over the period of February 17 through May 19, 1976. Each letter indicated that ARCO had voluntarily relinquished its supply obligation for the individual purchaser and that Ace had assumed the base period supply obligation for that purchaser.

On June 1, 1976, Ace certified to Mobil pursuant to 10 CFR 211.13(f) for an adjustment to its base period use to reflect the additional supply obligation arising out of Ace's agreement to supply the twelve former ARCO accounts. By letter dated June 14, 1976, Mobil agreed to make the increased allocation of gasoline available to Ace without waiving any of its rights.

ISSUE

The issue presented for interpretation is: (1) Whether a wholesale purchaser-reseller which receives FEA approval of termination of its base period supply relationship (in the context of a three-party agreement approved by FEA) is a "new wholesale purchaser" under 10 CFR 211.12(e); and, (2) whether a supplier who accepts the supply obligation to supply a "new wholesale purchaser" can certify to its supplier for an upward adjustment of its base period use as provided in 10 CFR 211.13(c)(1).

INTERPRETATION

For the reasons set forth below, it has been concluded that a wholesale purchaser-reseller which receives FEA approval of termination of its base period supply relationship in the context of an FEA approved three-party agreement as described hereinabove is a "new wholesale purchaser" under 10 CFR 211.12(e). In addition, the new supplier for that "new wholesale purchaser-reseller" can then certify to its supplier for an upward adjustment of its base period use as provided in 10 CFR 211.13(c)(1) to reflect the assumption of an additional allocation obligation.[1]

FEA approval of the termination for the base period supply relationships between ARCO and the twelve retail gasoline sales outlets was required by 10 CFR 211.9(2)(i). That section provides:

Unless otherwise provided in this part or directed by FEO, the supplier/wholesale purchaser-reseller relationships defined by specific dates or base periods or otherwise imposed pursuant to this part shall be maintained for the duration of the Mandatory Petroleum Allocation Program and may not be waived or otherwise terminated without the express written approval of FEO.

By requesting and receiving FEA approval of the termination, ARCO was relieved of the supply obligation of the twelve purchasers and the purchasers then had no base period supplier and were therefore "new wholesale purchasers" under the express language of 10 CFR 211.12(e). That section provides, in relevant part, as follows:

(e) *New wholesale purchasers.* Wholesale purchasers which do no have base period suppliers and wholesale purchasers whose base period suppliers are unable to supply them with sufficient amounts of an allocated product shall be supplied as provided in this paragraph.

Such "new wholesale purchasers" may obtain FEA approval, in the form of an assignment, for the establishment of a new supplier/purchaser relationship with a different supplier, as provided in 10 CFR 211.12(e)(2)(ii):

Wholesale purchaser-resellers without a base period supplier or a new supplier as provided in § 211.10(e)(1) must apply to FEA for an assignment to a supplier and for assignment of base period volume in accordance with Subpart C of Part 205 of this chapter.

Submission of the so-called three-party agreements was the vehicle in this case by which the twelve wholesale purchaser-resellers, having simultaneously terminated their relationship with ARCO, sought under § 211.12(e)(2)(ii) to obtain assignment to Ace. When FEA approved the three-party agreement, Ace became the supplier for the twelve wholesale purchaser-resellers.

In light of its new and increased supply responsibilities to the twelve wholesale purchasers, Ace sought an increase of supply from Mobil. Pursuant to the provisions of 10 CFR 211.13(c)(1), a wholesale purchaser-reseller, such as Ace is entitled to an automatic adjustment to its base period use level "whenever (1) it is notified pursuant to § 205.36(d) of an assignment to supply a new wholesale purchaser * * *." That section further provides that the amount of the adjustment shall be "equal to the increase in the allocation entitlements which the wholesale purchaser-reseller is to supply." Mobil is Ace's base period supplier Therefore, Mobil is obligated under the provisions of 10 CFR 211.13(c)(1) to supply Ace with additional motor gasoline in a volume which is equal to the aggregate amount which Ace is obligated to supply to the twelve wholesale purchasers acquired under the three party agreements approved by FEA.

You have also contended in your request that Mobil is an aggrieved party as defined in 10 CFR 205.2 with regard to FEA's approval of the three party agreements and assignment of Ace as the base period supplier for the twelve accounts. As an aggrieved party within the contemplation of FEA procedural regulations you contend that FEA's approval of the three party agreements described hereinabove was not in conformance with the notice requirements specified in 10 CFR 205.33(a). In connection with assignments of new purchasers, that section provides:

The FEA shall serve notice on any person readily identifiable by the FEA as one who will be aggrieved by the FEA action and may serve notice on any other person that written comments regarding the application for assignment will be accepted if filed within 10 days of service of the notice; or may determine that notice should be published in the FEDERAL REGISTER.

For the purposes of FEA administrative proceedings, the term "aggrieved" is defined in 10 CFR 205.2 as "a person with an interest thought to be protected under the FEAA, EPAA or Proclamation No. 3279, as amended, who is adversely affected by an order or interpretation issued by the FEA or a State Office."

Mobil is within the scope of the definition of the term "aggrieved" with respect to the orders issued by FEA Region IV assigning Ace as the base period supplier of the twelve accounts. This assignment as has been described hereinabove has the ultimate effect of increasing Mobil's supply obligations to Ace. As pointed out in your request, increases in Mobil's supply obligations could cause a disruption in the company's supply and distribution system to the detriment of all of Mobil's accounts and could adversely affect Mobil's position as a marketer in the petroleum industry. Therefore, Mobil is a party with interests sought to be protected under Section 4(b)(1) of the Emergency Petroleum Allocation Act of 1973 as amended.

Mobil was also "readily identifiable" by the FEA as a party which would be aggrieved by the transfer of supply obligations because Ace was identified as a Mobil distributor in the three party agreements submitted to FEA. Accordingly, Mobil should have been treated as an aggrieved party and given notice of the action.

In general when FEA fails to comply with the notice requirements in issuing an assignment order and the failure to do so is raised in a timely and proper manner on appeal, the order will be reversed and vacated. *See Texaco, Inc.*, 3 FEA § 80,664 (June 29, 1976). However, it appears from the facts contained in your submission and set forth below that Mobil, having received actual notice of the FEA orders discussed herein, failed to appeal these orders.

As indicated in your submission, Mobil requested clarification of 10 CFR 211.13(c) from Region IV with regard to the three party agreements hereinabove described on March 2, 1976, and Mobil received a reply from the FEA Regional Office on March 24, 1976. In addition, Ace certified to Mobil for an increase in its base period volume reflecting all of the newly acquired accounts on June

[1] FEA Interpretation 1976-50, issued January 3, 1975, is not dispositive of the issue in this case because 10 CFR 211.13(c) in its present form was not in existence at the time of the issuance of that interpretation.

V 42 1179
SEP 15 77
UMI

1, 1976. It is evident that Mobil had actual notice both of the submission of the three party agreements and the subsequent approval of them by FEA as early as March 1976, but failed to appeal the orders within the thirty day period provided for in 10 CFR 205.38.

In the event the application of 10 CFR 211.13 consistent with this interpretation may result in serious hardship or gross inequity, Mobil may file an "Application for Exception" in accordance with the procedures set forth in Subpart D of 10 CFR Part 205.

INTERPRETATION 1977-29

To: Peerless Distributing Company.
Date: August 9, 1977.
Rules Interpreted: §§ 212.31, 212.81, 212.91.
Code: CCR(V)—PI—Firm, def.; Refiner, def.; Reseller, def.

FACTS

Peerless Distributing Company ("Peerless") is a Michigan company engaged in the purchase and resale of various petroleum products. It is owned 100 percent by members of the Fleischman family (the family consisting of the father, mother, son, two daughters, and son-in-law). Members of the same family also own 100 percent of a second firm engaged in reselling petroleum products, Petroleum Specialties, Incorporated ("Petroleum Specialties") and two refineries, Lakeside Refining Company ("Lakeside") and Crystal Refining Company ("Crystal").

Peerless is both a purchaser from and supplier to the other Fleischman-owned companies. Peerless purchases approximately 30 percent of its product from Crystal and Lakeside. Peerless files its own federal and state income tax returns, and claims that it has traditionally operated as a completely independent entity. Peerless also maintains its own inventories and claims to establish prices separately from the other family held companies.

ISSUE

May Peerless be treated as a separate entity under the Mandatory Petroleum Price Regulations ("Price Regulations"), or must it be considered as part of an integrated "firm" along with Petroleum Specialties, Lakeside, and Crystal? If it must be treated as part of an integrated "firm", must the regulations for refiners, 10 CFR 212.81, et seq., be applied to its business activities?

INTERPRETATION

The definition of "firm" in 10 CFR 212.31 provides that the Federal Energy Administration ("FEA") "may, in regulations and forms issued under this part (212), treat as a firm: (1) A parent and the consolidated and unconsolidated entities (if any) which it directly or indirectly controls, (2) a parent and its consolidated entities, (3) an unconsolidated entity, or (4) any part of a firm."

FEA regulations provide that with regard to both refiners and resellers, a "firm" will include any consolidated or unconsolidated entities which it directly or indirectly controls. For refiners, under Subpart E of Part 212, 10 CFR, "firm" is defined in § 212.32, as "a parent and the consolidated and unconsolidated entities (if any) which it directly or indirectly controls." As for resellers under Subpart F of 10 CFR, Part 212, FEA in an amendment to § 212.92, effective May 1, 1976, expressly defined "seller" as "a parent and the consolidated and unconsolidated entities (if any) which it directly or indirectly controls." In issuing this amendment FEA pointed out that this express definition "conforms to prior interpretations that 'seller' as used in Subpart F, is the same as 'firm' as defined in Subpart E of Part 212, i.e., a parent and the consolidated and unconsolidated entities (if any) which it directly or indirectly controls." (41 FR 19110, May 10, 1976).

One of the purposes of defining a firm in this manner is to guard against the possibility of a firm improperly magnifying allowable costs through intracorporate sales or transfers of products at prices reflecting a margin of profit added to each sale or transfer within the firm. Using the "control" concept, the costs which can be passed through are the costs to the "firm," assuring only a dollar-for-dollar passthrough of actual costs incurred by the "firm" concerned.

If direct or indirect control exists between entities, they must be included in the "firm." Peerless argues that it operates on a completely independent basis from the other family-owned companies and therefore no "control" exists. But in FEA Interpretation 1975-32 (42 FR 29722, May 10, 1977), FEA made clear that control is determined by possession of the power to control and not the actual exercise of that power. FEA explained that the issue of control must be decided on objective as well as established criteria. A decision as to the issues of control "which would depend upon a judgment by FEA regarding the degree of • • • actual supervision of • • • day to day operations and which might be subject to review according to the changing circumstances of managerial intervention • • • would be both administratively unfeasible and too arbitrary and indefinite to permit coherent application of the price and allocation regulations • • •"

Power to control a company must be inferred from 100-percent ownership and the power to control all of the companies must be interpreted from the common ownership within the same family. Cost of Living Council ("CLC") Phase IV and FEA regulations include the definitions of "parent and its consolidated entities" and "unconsolidated entity" the qualification that an individual "shall be deemed to control a firm which is directly or indirectly controlled by him or by his father, mother, spouse, children or grandchildren." 6 CFR 150.31 and 10 CFR 212.31.

The ownership and thus the power to control all four of the Fleischman-owned companies lies within the members of the same family. Peerless states in its request that it "is controlled by persons who also own Lakeside, Crystal, and Petroleum Specialties." FEA must treat all four companies as one "firm."

Which Subpart of Part 212 should be applicable to the "firm," which is engaged in both refining and reselling operations? Section 212.81, under Subpart E, the refiner regulations, states that:

"This subpart applies to each sale of a covered product which is purchased or refined by a refiner, except as provided in Subparts F and K."

Section 212.91, under Subpart F, the reseller and retailer regulations, states that:

"• • • For purposes of this subpart, "reseller" includes any entity of a refiner (other than an entity that operates in Puerto Rico) that is engaged in the business of purchasing and reselling covered products: *Provided*, That the entity does not purchase more than 5 percent of such covered products from the refiner including any entities that it directly or indirectly controls: *And provided further*, That the entity has consistently and historically exercised the exclusive price authority with respect to sales by the entity."

FEA Interpretation 1977-6 (42 FR 17100, March 31, 1977) explained that:

"• • • the regulations make it clear that Subpart B applies to all sales of a "refiner" except as provided in Subpart F, and the only exceptions under Subpart F are: (1) Refiner resales of crude oil • • • and (2) an entity of a refiner that is engaged in purchasing and reselling covered products • • • only if that entity (a) purchases no more than five percent of such covered products from the refiner ("including any entities that it directly or indirectly controls"), and (b) has consistently and historically exercised exclusive price authority with respect to its own sales."

Peerless admits that it purchases approximately 30 percent of its product volume from Crystal and Lakeside. It therefore fails to qualify for treatment as a reseller under the "5 percent rule" of § 212.91. Since under § 212.81 all refiner activities are regulated under Subpart B, except with respect to that part of a refiner, if any, which meets the exceptions outlined in § 212.91, the family owned "firm" must be treated as a refiner under Subpart E of the Price Regulations.

Peerless also claims that FEA has allowed "companies, which otherwise meet the regulations definitions of one firm, to continue to operate as separate entities for the purpose of calculating the maximum permissible selling price for each." FEA's Office of Exceptions and Appeals, has under certain circumstances, allowed such separate treatment. A request for interpretation is not the proper forum for Peerless to seek such relief. An exception from the requirements of the Price Regulations would have to be sought under the procedures of Subpart D of 10 CFR Part 205.

INTERPRETATION 1977-30

To: Atlantic Richfield Company.
Date: August 10, 1977.
Rules Interpreted: §§ 211.67(d)(2), 212.53(c).
Code: GCW—AI, PI—Export Sales Deduction.

FACTS

Atlantic Richfield Company ("ARCO") is a refiner subject to the Mandatory Petroleum Price and Allocation Regulations, 10 CFR Part 211 and 10 CFR Part 212.

ARCO produces non-bonded aviation jet fuel and then sells volumes of such fuel to a domestic purchaser intending to uplift it on international flights departing from the United States. The purchaser certifies to ARCO that certain of such volumes are for export.

ISSUE

All sales of non-bonded aviation fuel to be consumed on international flights departing from the United States export sales for purposes of the export sales deduction set forth in § 211.67(d)(2), when the purchaser certifies that the volumes sold are for export?

INTERPRETATION

Section 211.67(d)(2) states:

The volume of a refiner's crude oil runs to stills in a particular month for purposes of the calculations in paragraph (a)(1) of this section and the calculations for the national domestic crude oil supply ratio shall be reduced by that refiner's volume of export sales under § 212.53 of Part 212 of this chapter in that month of refined petroleum products (including aviation fuels as defined in § 211.142 of this part, but excluding refined lubricating oils) and residual fuel oil, *including sales to a domestic purchaser which certifies the product is for export;* • • • (Emphasis added.)

Section 211.67(d)(2) expressly refers to the provisions of § 212.53 to define the scope of those export sales which are required to be deducted from ARCO's crude oil runs to stills. Section 212.53(c) specifically deals with the question of non-bonded aviation fuel by providing that:

Non-bonded aviation fuel uplifted in the United States for international flights departing from the United States shall not be considered as export for purposes of this part.

Therefore, a purchaser's certification to the contrary notwithstanding, sales of non-bonded aviation fuel uplifted in the United States for international flights departing from the United States are not export sales, and consequently should be included in ARCO's crude oil runs to stills for purposes of the export sales deduction set forth in § 211.67(d)(2).

INTERPRETATION 1977-31

To: Mobil Oil Corporation.
Date: August 12, 1977.
Rules Interpreted: §§ 211.51, 211.67.
Code: GCW—AI—Crude Oil, def.; Entitlements Program.

FACTS

Mobil Oil Corporation ("Mobil") is planning to import liquid hydrocarbons ("liquids") produced at the Arun field in Indonesia. Facilities designed to produce, treat and liquify natural gas are currently under construction at the field. Upon completion of the plant facilities 600 MM SCF per day of liquified natural gas ("LNG") will be produced and a substantial volume of liquids will be available at the plant.

The facilities being constructed at Arun are designed to become operational in stages. Liquids will be recovered from the production facilities in an interim operation and will be available for loading for export in September of 1977. The Arun gas plant is to become operational in mid-1978.

The liquids produced at Arun in the interim operation will be derived from wellhead condensation which has been reduced to ambient conditions through retrograde condensation (the formation of liquids from gas through reduction of pressure). The Arun wellhead conditions are such that the gas produced is at high pressure and temperature (5,000 p.s.i.; 340 F) and contains a significant volume of liquid. Due to the high pressure of the gas and in order to obtain complete recovery of the liquids, four stages of separation by retrograde condensation or "flashing" (separation of liquids from gas by reduction of pressure) will be used. The liquids are first separated at 1150 pounds per square inch ("p.s.i.") and then pumped 20 miles to liquid recovery facilities near the marine loading terminal. Two additional flash stages will then be employed to reduce the pressure to 200 p.s.i. and 60 p.s.i. respectively. The vapor phase from these stages will be utilized as fuel and the excess flared.

After these two flash stages, the stream is discharged at 41° F because of the thermodynamic cooling effects of the condensation. The stream is then passed through a steam exchanger to heat the liquid to 174° F and reflashed at atmospheric pressure. The final flash step further reduces the volume of recovered liquid and results in stable liquids at ambient conditions.

ISSUE

Are the liquids recovered from gas production at the Arun field in Indonesia through separation by retrograde condensation at an interim facility and imported to the United States by Mobil for use as feedstock in domestic Refineries "lease condensate" and thus within the definition of crude oil in 10 CFR 211.51 and eligible for inclusion in the volume of crude oil runs to stills for purposes of the entitlements program set forth 10 CFR 211.67?

INTERPRETATION

For the reasons set forth below, it has been concluded that the liquids recovered from the gas production at the Arun field in Indonesia through an interim operation pending completion of a gas processing plant by means of retrograde condensation and imported to the United States by Mobil qualify as "lease condensate" and are thus within the definition of crude oil in 10 CFR 211.51 and eligible for inclusion in the entitlements program, 10 CFR 211.67.

Crude oil is defined in 10 CFR 211.51 as follows: • • • a mixture of liquid hydrocarbons *including lease condensate* that exists in natural underground reservoirs and remains liquid at atmospheric pressure after passing through surface separating facilities. (Emphasis added.)

The term "lease condensate" does not have a uniform definition in the petroleum industry. Generally, condensate refers to the heavier liquid hydrocarbon portion of natural gas in the underground reservoir which is mechanically separated from natural gas as a liquid through a process of retrograde condensation, involving pressure reduction, and sometimes accompanied by a reduction in temperature as well. Condensate separated from natural gas by conventional lease separation facilities ("surface separators" (at the wellhead, or by a single mechanical separator ("field facility"), located centrally and servicing two or more wells, is typically referred to as "lease condensate." Condensate which is separated from natural gas at gas processing plants, for example, at the inlet side of a gas processing plant, is referred to as "plant condensate." For the purposes of FEA's price regulations (10 CFR, Part 212, Subpart D), condensate, wherever recovered (lease, field or plant) is considered as crude oil and priced accordingly. (See 40 FR 40819, September 4, 1975). However, for the purposes of the allocation regulations (10 CFR Part 211) only lease condensate is included in the definition of crude oil.

The liquids recovered from the Arun field are lease condensate because they are recovered by mechancial separation after retrograde condensation in a process comparable to recovery at the lease or at field facilities. Additionally, they remain liquid at normal atmospheric pressure and thus fall within the definition of crude oil in 10 CFR 211.51.

As Mobile pointed out in its request, the condensate recovery process does differ from the general method of recovery of lease condensate in two ways. First, the condensate facilities span an area of twenty miles and second, the liquids are reheated in the final stage prior to marine shipment.

The fact that the condensate facilities span an area of twenty miles does not alter the conclusion that the basic method of recovery in this case is comparable to the domestic recovery of lease condensate. After the first separation, the liquids are transported twenty miles so that further recovery can take place near the marine loading terminal. As you indicated, stabilizing the liquid at a location near the loading port offers the efficiency of being able to use the low pressure off-gas as fuel. Carrying the flash stages out at the lease would require flaring of this low pressure gas. The completion of the condensate recovery at the loading port does not change the basic method of recovery of the liquids. Furthermore, the condensate recovery during the interim operation is not associated with a gas processing plant. Therefore, the distance involved in the Arun interim operation is not a distinguishing factor.

The second difference, the fact that, unlike the normal processing of lease condensate, the liquids at the Arun interim operation are reheated in the final stage prior to marine shipment, does not detract from the classification of this material as lease condensate. The reheating does not affect the composition of the condensate, but only, as pointed out in Mobil's submission, enhances the separation of the liquids and substantially reduces the volume of the material recovered. This heating process is not equivalent to a fractionation process.

Finally, classification of the Arun condensate as lease condensate and therefore crude oil under the definition of that term in 10 CFR Part 211 will allow the condensate to be included in Mobil's crude oil receipts as imported crude oil for the purposes of the entitlements program. That program seeks to reduce to a competitive range disparities in refiner's feedstock costs resulting from the fact that some refiners have greater access to price controlled domestic crude oil whereas other refiners are more dependent on higher priced imported crude oil. The Arun liquids are in all respects the equivalent to foreign crude oil, they are obtained at a price equivalent to foreign crude oil and will be used as refinery feedstock in Mobil's domestic refineries.

INTERPRETATION 1977-32

To: Cook & Cooley, Inc.
Date: August 29, 1977.
Rules Interpreted: § 211.13(c).
Code: GC(IX)—AI—Adjustments to Base Period Use.

FACTS

Cook & Cooley, Inc., ("Cook & Cooley") is a distributor of Texaco branded motor gasoline for independently operated Texaco retail sales outlets in the Los Angeles basin area, and is a wholesale purchaser-reseller within the contemplation of FEA regulations. Cook & Cooley did not begin to supply several of these retail outlets until the latter part of 1972, after the operators had terminated supply relationships with other distributors. Therefore, the base period responsibility to supply these retail outlets, under FEA allocation regulations, was with Cook & Cooley for the latter months of 1972 and with other suppliers for the preceding months of 1972.

Prior to March 1, 1976, Cook & Cooley received notification from two of these retail outlets that they had elected to designate Cook & Cooley as their sole base period supplier in accordance with the provisions of 10 CFR 211.105. The election by these retail outlets placed an additional supply obligation of approximately 1.67 million gallons of gasoline annually on Cook & Cooley, Inc.

ISSUE

The issue presented for interpretation is whether Cook & Cooley, as a wholesale purchaser-reseller, is entitled to an automatic adjustment to its base period use under 10 CFR 211.13(c) to reflect the increased supply obligation resulting from the designation of Cook & Cooley as the sole base period supplier to certain of its purchasers pursuant to 10 CFR 211.105.

INTERPRETATION

For the reasons set forth below, it has been concluded that Cook & Cooley, as a wholesale purchaser-reseller, is not entitled to an automatic adjustment to its base period use under the provisions of 10 CFR 211.13(c) for increased supply obligations resulting from the designation of Cook & Cooley as the sole base period supplier pursuant to 10 CFR 211.105.

When initially promulgated on January 15, 1974, the general provisions of 10 CFR Part 211, Subpart A, required each supplier to supply all retail outlets which purchased or obtained allocated product from that supplier during the base period. The supplier/purchaser relationship so established could not be waived or otherwise terminated without the express written approval of the FEA. On October 3, 1975, 10 CFR 211.105 was amended

V 42 1179 SEP 15 77 UMI

(40 FR 47477, October 9, 1975) to permit a branded independent marketer with two or more base period suppliers during a calendar year corresponding to a base period to designate its supplier as of December 1972 as its sole supplier for the entire base period. The relevant part of the amended regulation (§ 211.105 (b) and (c)) establishes that:

(b) * * * A wholesale purchaser-reseller of motor gasoline which terminates a supplier/purchaser relationship pursuant to this paragraph may by no later than February 29, 1976, designate its supplier as of December 1972 as the base period supplier for all periods during a calendar year which corresponds to base periods and during which the purchaser was entitled to an allocation from the terminated base period supplier(s). This designation may be made once and shall be for the duration of the Mandatory Petroleum Allocation Program unless otherwise ordered by FEA pursuant to Part 205 of this chapter.

(c) A wholesale purchaser-reseller of motor gasoline which designates a base period supplier pursuant to paragraph (b) of this section shall provide written notice to the terminated base period supplier(s) and to the designated supplier at least twenty (20) days prior to the beginning of the first period corresponding to a base period affected by the termination * * * The designated base period supplier shall begin deliveries reflecting its increased supply obligation, if any, to the wholesale purchaser-reseller pursuant to paragraph (d) of this section starting with the first period corresponding to a base period after receiving the notice from the wholesale purchaser-reseller required by this paragraph (c).

The change to a single designated base period supplier did not require formal action or issuance of orders by the FEA. As indicated above, the only affirmative action required to effectuate the change was the wholesale purchaser's notification in accordance with the regulatory provisions within the prescribed time period. Subsequent to February 29, 1976, this option is no longer available.

The preamble to 10 CFR 211.105, as amended, stated with reference to the increased obligations of designated suppliers that:

The provisions of Part 205 with respect to assignments, adjustments and exceptions should provide adequate means of relief in those few instances where designated suppliers need to obtain additional suppliers of motor gasoline to meet their requirements.

It is also significant to note that 10 CFR 211.13(c)(1), which was last amended on October 3, 1975 subsequent to the October 3, 1975 amendment to 10 CFR 211.105, specifically limits adjustments to a wholesale purchaser-reseller's base period use to those situations in which it has been:

* * * notified pursuant to § 205.36(d) of an assignment to supply a new wholesale purchaser; or * * * notified pursuant to § 205.26 (c) of an adjustment granted pursuant to § 211.12(h), § 211.13(e), § 211.125(b) or § 211.145(b) to the base period use of a wholesale purchaser entitled to receive an allocation from that wholesale purchaser-reseller * * *.

Thus, no provision was made in the FEA allocation regulations to permit automatic upward base period use adjustments for a supplier to reflect the increased supply obligations resulting from a wholesale purchaser's exercise of the option to designate a sole base period supplier pursuant to 10 CFR 211.105.

INTERPRETATION 1977-33

To: C. R. England Oil & Gas Properties.
Date: August 31, 1977.
Rules Interpreted: §§ 212.72, 212.131.
Code: GCW-PI—Certification.

FACTS

1. C. R. England Oil & Gas Properties ("C. R. England") is a producer of domestic crude oil subject to the Mandatory Petroleum Price Regulations of 10 CFR Part 212.

2. Triton Oil & Gas Corporation assigned to C. R. England, effective May 31, 1973, oil and gas leases to Lots 20, 21 and 22 in the Saratoga Field, Hardin County, Texas. As assignee, C. R. England is the sole producer of crude oil from those lots. For the purposes of this interpretation, each of Lots 20, 21 and 22 shall be considered a "property" as that term is used in 10 CFR 212.72 and 212.131.

3. Producers Monthly Report Forms P-1, filed by Triton Oil & Gas Corporation and by C. R. England with the Railroad Commission of Texas, show that the crude oil produced and sold from Lots 20, 21 and 22 for the period June 1, 1973 through June 30, 1975 exceeded the base production control level ("BPCL") for each property.

4. C. R. England did not make a certification pursuant to FEA regulations of crude oil produced and sold from these properties during this period.

5. On November 24, 1975, Sun Oil Company ("Sun") paid C. R. England for crude oil Sun had purchased from the three lots during 1973 and 1974. That payment reflected, for Lots 21 and 22, the "old crude oil" price. According to C. R. England, Sun advised C. R. England at that time that the "new crude oil" price could not be paid on Lots 21 and 22 because the necessary certifications as to 1972 production had not been filed in 1973. In addition, C. R. England alleges that Sun asserted that it was precluded from paying the "new crude oil" price to C. R. England because such a payment might be a "retroactive price increase" barred under 10 CFR 212.1(c)(1) of FEA regulations.

6. C. R. England takes the position that it should be relieved of its burden of compliance with respect to certification under 10 CFR 212.131. It points out that it made a "timely and diligent" inquiry of Sun in October 1973, regarding Sun's failure to send to C. R. England the proper certification forms, and that, in response, Sun employees made verbal statements to C. R. England claiming it was unnecessary to provide any certification forms at that time because the proceeds of crude oil produced and sold from these lots were being held in suspense pending resolution of certain title problems connected with lands covered by the oil and gas leases to Lots 20, 21 and 22.

7. C. R. England urges that the burden of compliance with certification procedures was shared by Sun. C. R. England alleges that, in any event it could not have issued written certification because it did not receive from Sun the correct forms for Lots 20, 21 and 22.

ISSUE

The issue presented for consideration is whether a producer may sell volumes of crude oil as "new crude oil" as defined in 10 CFR 212.72 when that producer failed to certify that such volumes qualify as "new crude oil" as required in 10 CFR 212.131(a)(2)(i).

INTERPRETATION

For the reasons set forth below, it has been concluded that a producer that fails to certify crude oil as "new crude oil" as required in 10 CFR 212.131(a)(2)(i) within the consecutive two-month period immediately succeeding the month in which the crude oil is produced and sold cannot charge the "new crude oil" price for such crude oil because the crude oil does not qualify as "new crude oil" pursuant to the definition in 10 CFR 212.72.

With reference to "new crude oil," 10 CFR 212.72 provides in pertinent part that it:

(3) shall not * * * include any number of barrels not certified as new crude oil pursuant to the provisions of § 212.131(a)(1) within the consecutive two-month period immediately succeeding the month in which the crude oil is produced and sold, except where such recertification is explicitly required or permitted by FEA order, interpretation, or ruling.[2]

10 CFR 212.131(a)(2)(i) provides that:

(i) With respect to each sale of crude oil from a property which has not qualified as a stripper well property, the producer shall certify in writing to the purchaser the number of barrels of new crude oil and the number of barrels of old crude oil * * *.

10 CFR 212.131 clearly states that a producer shall certify, and that the certification shall contain certain information. This section does not say a producer "ought to" or "shall, when practicable" certify. FEA believes that its certification requirements must be strictly construed in order to insure price reliability and stability and to minimize disputes between producers and purchasers with respect to prices charged for crude oil sold.

The certification requirements have evolved from the rule originally adopted by the Cost of Living Council on August 17, 1973 which required producers which charged a price in excess of the ceiling price to certify in writing to the purchaser in each sale: (1) The ceiling price of the crude oil; (2) the amount of new crude oil; and (3) the base production control level (6 CFR 150.354, 38 FR 22536, August 22, 1973). The requirements were substantially continued by FEO in 10 CFR 212.74(c) (39 FR 1924, January 15, 1974). In a rulemaking issued on August 29, 1974 (39 FR 31622, August 30, 1974), the certification requirements of 10 CFR 212.74(c) were redesignated as 10 CFR 212.131, and amended to require each producer and each seller of domestic crude oil to certify in writing to the purchaser, with respect to each sale: (1) The ceiling price (in first sales); (2) the amount of stripper well lease crude oil; (3) the amount of new crude o'l; (4) the amount of released crude oil; and (5) the amount of old crude oil. On November 29, 1974, 10 CFR 212.131 was amended to provide that the certification requirements as to a first sale of domestic crude oil may be satisfied by a one-time certification as to the BPCL for each month of 1972 for the particular property (39 FR 42246, December 4, 1974).

Effective March 23, 1975 (40 FR 28647, July 7, 1975), FEA amended the definitions of "new crude petroleum" and "released crude petroleum" in 10 CFR 212.72 to exclude the volumes that were not certified as new and released crude petroleum within the two month period immediately following the month in which the petroleum was first produced and sold. The July preamble made it clear that volumes of crude oil, other than stripper well crude oil, produced and sold prior to January 1975 could be certified as new or released only until March 23, 1975. All volumes of crude oil produced and sold in January 1975 or thereafter are clearly subject to the two month restriction in order to qualify as "new" or "released" domestic crude petroleum. 10 CFR 212.131 was subsequently amended to require new certifications for first sales of all domestic crude oil

[2] Although the definition of "new crude oil" only refers to 10 CFR 212.131(a)(1), it is intended to encompass the certification requirements of 10 CFR 212.131(a)(2) as well. The definition was inadvertently not changed to conform to subsequent amendments to the certification requirements, but will be revised by technical amendment to reflect those changes.

within the two month period following the month of production and sale (41 FR 37309, September 3, 1976).

Thus, prior to March 23, 1975, FEA price regulations contained no explicit time restrictions on the certification of first sales of domestic crude oil. Sun was therefore correct in its assertion to C. R. England in October of 1973 that certification of the 1972 production was not necessary at that time. However, for crude oil produced and sold in January 1975 or thereafter, certification within the two-month period following the month in which such volumes were produced and sold is necessary in order for such crude oil to qualify as "new crude oil." It is an established principle of law that a firm's ignorance of its obligations under federal law does not constitute a justification for nonconformance with such laws. C. R. England has an affirmative obligation to be cognizant of, and conform to, the requirements of FEA regulations. See Carlos R. Leffler, 2 FEA § 80,640 (July 18, 1975); Belco Petroleum Corp., 3 FEA § 83,136 (May 12, 1976). Since C. R. England failed to certify the volumes of crude oil produced and sold within the two-month period specified in the regulations, the crude oil does not qualify as "new crude oil."

The definition of "new crude oil" (10 CFR 212.72) does permit, as noted above, the recertification as new and released crude oil of volumes of crude oil initially certified as old crude oil, where such recertification is required or permitted by FEA order, interpretation or ruling. This provision is intended to provide for the possibility that certain volumes of crude oil treated as old oil may subsequently become eligible for treatment as new or released crude oil by virtue of later administrative action. This provision is not applicable in the circumstances presented here because the classification of the crude oil as "old crude oil" is the result of the failure of C. R. England to certify the crude oil in a timely manner and not the result of administrative action.

C. R. England contends in its request that the reason for its failure to file the certification of the amount of base production control level crude oil production is because Sun, the purchaser of the crude oil, did not request the certification. The regulations, however, explicitly require certification by the producer. The following passage from the preamble of the August 26, 1976 "Clarifications to Mandatory Petroleum Price Regulations Applicable to Domestic Crude Oil" (41 FR 36171) emphasizes that the duty to file certification forms in accordance with FEA regulations attaches to the producer, not to the purchaser.

* * * [I]t should be noted that it has been the practice among many purchasers and producers for the purchaser to prepare the certification and send it to the producer for completion and authentication and return to the purchaser. FEA has no objections to this practice to the extent that it permits any large purchaser to help to relieve the certification burdens on a small producer. *However, the certification responsibility must in every case rest ultimately with the producer.* (*Id.* at 36183, emphasis added.)

In addition, 10 CFR 212.31(d) expressly provides that "[n]o firm may sell domestic crude oil unless it provides the certification required by this section." In this regard, FEA stated in the August 26 rulemaking that "[t]o ensure compliance with the requirements of this section, a purchaser may refuse to recognize a sale of crude oil at other than lower tier prices until the necessary certification has been made." Thus, it was consistent with FEA regulations and stated policy for Sun to pay the "old crude oil" price where C. R. England failed to timely certify that the volumes of crude oil qualified as "new crude oil."

Title 12—Banks and Banking

CHAPTER II—FEDERAL RESERVE SYSTEM

SUBCHAPTER A—BOARD OF GOVERNORS OF THE FEDERAL RESERVE SYSTEM

[Regs. G, T, U, and X]

PART 207—SECURITIES CREDIT BY PERSONS OTHER THAN BANKS, BROKERS OR DEALERS

PART 220—CREDIT BY BROKERS AND DEALERS

PART 221—CREDIT BY BANKS FOR THE PURPOSE OF PURCHASING OR CARRYING MARGIN STOCKS

PART 224—RULES GOVERNING BORROWERS WHO OBTAIN SECURITIES CREDIT

List of OTC Margin Stocks; Corrections

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Correction of List of OTC Margin Stocks.

SUMMARY: This document corrects the List of OTC Margin Stocks published in the FEDERAL REGISTER on August 18, 1977, at page 41604.

EFFECTIVE DATE: The List of OTC Margin Stocks was effective on August 15, 1977.

FOR FURTHER INFORMATION CONTACT:

Jamie Lenoci, Financial Analyst, Division of Banking Supervision and Regulation, Board of Governors of the Federal Reserve System, Washington, D.C. 20551 (202-452-2781).

SUPPLEMENTARY INFORMATION: In the List of OTC Margin Stocks, FR Doc. 77-23790, appearing at page 41604 in the FEDERAL REGISTER of August 18, 1977, the following corrections are made:

1. The description of the stocks of CHICAGO & NORTH WESTERN TRANSPORTATION COMPANY found at page 41608, the third column, is corrected to read: "Class A, $.83⅓ par common."

2. The description of the stocks of Krueger, W. A. Company found at page 41614, the second column, is corrected to read: "$2.50 par common."

Dated: September 9, 1977.

THEODORE E. ALLISION,
Secretary of the Board.

CHAPTER III—FEDERAL DEPOSIT INSURANCE CORPORATION

PART 343—INSURED STATE NONMEMBER BANKS WHICH ARE MUNICIPAL SECURITIES DEALERS

Postponement of Effective Date

AGENCY: Federal Deposit Insurance Corporation.

ACTION: Change in Effective Date of Part 343 of FDIC's Regulations.

SUMMARY: On August 8, 1977 FDIC's Board of Directors adopted a new Part 343 of FDIC's Rules and Regulations. The new part, appearing at 42 FR 40891 (1977), Friday, August 12, 1977, concerned insured State nonmember banks which are municipal securities dealers and contained an effective date of September 15, 1977. For administrative convenience and in the interest of coordinating with the Board of Governors of the Federal Reserve System and the Comptroller of the Currency, the effective date of the Regulation will be postponed until October 31, 1977.

FOR FURTHER INFORMATION CONTACT:

Judith E. Minsker, Attorney, Legal Division, Federal Deposit Insurance Corporation, Washington, D.C. 20429 (202-389-4422).

By order of the Board of Directors, September 9, 1977.

FEDERAL DEPOSIT INSURANCE CORPORATION.
ALAN R. MILLER,
Executive Secretary.

Title 14—Aeronautics and Space

CHAPTER I—FEDERAL AVIATION ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Docket No. 77-GL-3; Amdt. 39-3033]

PART 39—AIRWORTHINESS DIRECTIVES

McCauley Model D2A34C58-(), F2A34-C58-(), and D2A34C98-(), Series Propellers

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new Airworthiness Directive (AD) which requires periodic inspection of the McCauley D2A34C58-(), F2A34C58-(), and D2A34C98-() series propellers. The AD is needed to detect cracks and prevent failures of hubs which could result in separation of the blade(s). Since this condition is likely to exist or develop in other propellers of the same design, the Airworthiness Directive requires periodic inspection of the propeller hubs for fatigue cracking, until replaced by McCauley oil-filled hubs containing a dyed oil crack detection system.

DATES: Effective, September 16, 1977. Compliance schedule—As prescribed in the body of the AD.

ADDRESSES: Information relating to the service documents referenced in the body of the AD may be obtained from McCauley Accessory Division, Cessna Aircraft Company, Box 7, Roosevelt Station, Dayton, Ohio 45417.

Copies of the service information incorporated in this AD are contained in the Rules Docket, Office of the Regional Counsel, 2300 East Devon Avenue, Des Plaines, Illinois 60018; and at FAA Headquarters, Room 916, 800 Independence Avenue SW., Washington, D.C. 20591.

V 42 1179 SEP 15 77 UMI

FOR FURTHER INFORMATION CONTACT:

Henry L. Weiss, Engineering and Manufacturing Branch, Flight Standards Division, AGL-214, Federal Aviation Administration, 2300 East Devon Avenue, Des Plaines, Ill. 60018. Telephone 312-694-4500, extension 308.

SUPPLEMENTARY INFORMATION: A proposal to amend Part 39 of Federal Aviation Regulations by adding an Airworthiness Directive applicable to the McCauley D2A34C58-( ), F2A34C58-( ), and D2A34C98-( ) series propellers was published in the FEDERAL REGISTER (42 FR 7159), February 7, 1977. The proposal, which requires periodic inspection of the affected propeller hubs, was issued in conjunction with the National Transportation Safety Board's (NTSB) Safety Recommendations of September 21, 1976. These recommendations were based in part on NTSB's Metallurgical Laboratory examination of several failed hubs each of which was a different model having certain design improvements intended to decrease fatigue type failures. Periodic inspections of the affected propellers are no longer required when the hubs are replaced by McCauley oil-filled series hubs containing a dyed oil crack detection system. Although no comments have been received about the proposal to date, some minor changes were adopted in the new Airworthiness Directive. Namely, the applicability statement was amended to include the phrase, "but not limited to," in order to ensure that any aircraft other than those which were initially cited in the proposal, which are equipped with such propellers, comply with the Directive. Also, the phrase "Federal Aviation Administration approved revisions," was added following the references to McCauley Service Bulletins and Manuals.

Since a situation exists that requires immediate adoption of this regulation, it is found that notice and public procedure hereon are impractical and good cause exists for making this amendment effective in less than 30 days.

In accordance with Departmental Regulatory Reform, dated March 23, 1976, we have determined that the expected impact of this final regulation is so minimal that it does not warrant an evaluation.

DRAFTING INFORMATION

The principal authors of this document are H. L. Weiss, Flight Standards Division, Great Lakes Region, and J. T. Brennan, Office of the Regional Counsel, Great Lakes Region.

ADOPTION OF THE AMENDMENT

Accordingly, and pursuant to the authority delegated to me by the Administrator, § 39.13 of the Federal Aviation Regulations (14 CFR 39.13) is amended by adding the following new Airworthiness Directive:

MCCAULEY PROPELLERS. Applies to the following Model D2A34C58-( ), F2A34C58-( ), and D2A34C98-( ) series propellers installed on but not limited to Cessna A188, A188A, and A188B "Agwagon," and Transavia PL-12 "Air Truck" aircraft.

D2A34C58	F2A34C58-N
D2A34C58-A	D2A34C98-BM or -BMN
D2A34C58-B, -BM, or -BMN	D2A34C98-CM or -CMN
D2A34C58-C, -CM, or -CMN	D2A34C98-JM or -JMN
D2A34C58-J, -JM, or -JMN	D2A34C98-KM or -KMN
D2A34C58-K, -KM, or -KMN	D2A34C98-LM or -LMN
D2A34C58-L, -LM, or -LMN	D2A34C98-M or -MN
D2A34C58-M or -MN	D2A34C98-N
D2A34C58-N	

Compliance required as indicated, unless already accomplished. To detect propeller hub cracks and prevent possible failure, accomplish the following:

(a) All Models and Series listed above.

(1) Propeller hubs with less than 500 hours time in service, inspect in accordance with paragraph (d)(2) within 525 hours total time and reinspect in accordance with paragraph (d)(2) every 100 hours time in service from last inspection.

(2) Propeller hubs with 500 or more but less than 1,200 hours time in service, inspect in accordance with paragraph (d)(2) within the next 25 hours time in service after the effective date of this AD, and reinspect in accordance with paragraph (d)(2) every 100 hours time in service from last inspection.

(b) Model D2A34C58 and D2A34C58-A only. Propeller hubs with 1,200 or more total hours in service, or whose total time in service is unknown, remove from service and replace in accordance with paragraph (d)(1) within the next 25 hours in service after the effective date of this AD.

(c) All Models and Series listed above except D2A34C58 and D2A34C58-A. Propeller hubs with 1,200 or more hours time in service, or whose total time in service is unknown, inspect in accordance with paragraph (d)(3) within the next 25 hours time in service after the effective date of this AD, unless already accomplished within the last 300 hours time in service and reinspect in accordance with paragraph (d)(3) every 300 hours time in service from the last inspection.

(d) Required Action. (1) Remove propeller from the aircraft, disassemble, inspect components and replace hub with a Model D2A34C58-BMNO, -CMNO, -JMNO, -KMNO, -LMNO, -MNO, -NO, -O; F2A34C58-NO, -O, or D2A34C98-BMNO, -CMNO, -JMNO, -LMNO, -MNO, -NO, or -O oil-filled series hub as applicable in accordance with McCauley Service Bulletin No. 122 dated February 15, 1977, and Service Manual No. 720415, or later Federal Aviation Administration approved revisions.

(2) Inspect all external surfaces of propeller hub for cracks by dye penetrant method. Replace before further flight any cracked hub with a McCauley oil-filled series hub as in paragraph (d)(1).

(3) Remove propeller from aircraft and disassemble. Inspect all internal and external hub surfaces for cracks by dye penetrant method in accordance with McCauley Service Letter 1974-3 dated March 29, 1974, or later Federal Aviation Administration approved revisions. Replace before further flight any cracked hub with a McCauley oil-filled series hub as in paragraph (d)(1).

(e) Exemption. The foregoing inspections may be discontinued after replacement of Model D2A34C58-( ), F2A34C58-( ), or D2A34C98-( ) series propeller hubs with McCauley oil-filled hubs as in paragraph (d)

(McCauley Service Bulletin No. 88 and Cessna Service Letters SE77-4 and SE77-12 also pertain to this subject.)

The manufacturer's specifications and procedures identified in this Directive are incorporated herein and made part hereof pursuant to 5 U.S.C. 552(a)(1). All persons affected by the Directive who have not already received these documents from the manufacturer, may obtain copies upon request to McCauley Accessory Division, Cessna Aircraft Co., Box 7, Roosevelt Station, Dayton, Ohio 45417. These documents may also be examined at the Great Lakes Regional Office, 2300 East Devon Avenue, Des Plaines, Ill. 60018, and at FAA Headquarters, 800 Independence Avenue SW., Washington, D.C. 20591. A historical file on this Airworthiness Directive which includes incorporated material in full is maintained by the FAA at the headquarters in Washington, D.C., and the Great Lakes Region.

This amendment becomes effective: September 16, 1977.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.89.)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Des Plaines, Ill., on August 31, 1977.

LEON C. DAUGHERTY,
Acting Director,
Great Lakes Region.

NOTE.—The incorporation by reference in the preceding document was approved by the Director of the FEDERAL REGISTER on June 19, 1967.

[Airspace Doc. No. 77-CE-3]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Alteration of Transition Area—Moberly, Missouri

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The nature of this federal action is to realign and redesignate the existing transition area at Moberly, Missouri, to provide controlled airspace for aircraft executing instrument approach procedures to Omar N. Bradley Airport which are based on a Non-Directional Radio Beacon (NDB) navigational aid being installed at the airport.

EFFECTIVE DATE: December 1, 1977.

FOR FURTHER INFORMATION CONTACT:

Dwaine E. Hiland, Airspace Specialist, Operations, Procedures and Airspace Branch, Air Traffic Division, ACE-537, FAA, Central Region, Federal Building, 601 East 12th Street, Kansas City, Mo. 64106, telephone 816-374-3408.

SUPPLEMENTARY INFORMATION: The City of Moberly, Missouri, is installing a Non-Directional Radio Beacon (NDB) on Omar N. Bradley Airport. This navigation aid will provide additional guidance for aircraft utilizing this airport. The establishment of instrument approach procedures based on the navigation aid entails alteration of the Moberly, Missouri, transition area at and above 700 feet above the ground (AGL) within which aircraft are provided air traffic control service. The intended effect of this action is to insure adequate controlled airspace for aircraft executing the new instrument approach procedures.

DRAFTING INFORMATION

The principal authors of this document are Dwaine E. Hiland, Operations, Procedures and Airspace Branch, Air Traffic Division and John L. Fitzgerald, Jr., Office of the Regional Counsel.

DISCUSSION OF COMMENTS

On pages 13303 and 13304 of the FEDERAL REGISTER dated March 10, 1977, the Federal Aviation Administration published a notice of proposed rulemaking which would amend Section 71.181 of Part 71 of the Federal Aviation Regulations so as to alter the transition area at Moberly, Missouri. Interested persons were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No objections were received as a result of the Notice of Proposed Rule Making.

Accordingly, Subpart G, Section 71.181 of the Federal Aviation Regulations (14 CFR 71.181) as republished on January 3, 1977 (42 FR 440), is amended, effective 0901 G.m.t. December 1, 1977, by amending the following transition area to read:

MOBERLY, MISSOURI

That airspace extending upward from 700 feet above the surface within a 6.5 mile radius of the Omar N. Bradley Airport (Latitude 39°27'50" N., Longitude 92°25'35" W.); and 3 miles either side of the 315° bearing from the airport extending from the 6.5 mile radius to 8 miles northwest of the airport; and 3 miles either side of the 126° bearing from the airport extending from the 6.5 mile radius to 8 miles southeast of the airport.

(Sec. 307(a), Federal Aviation Act of 1958 as amended (49 U.S.C. 1348); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); Sec. 11.69 of the Federal Aviation Regulations (14 CFR 11.69).)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Kansas City, Missouri, on September 6, 1977.

C. R. MELUGIN, JR.,
Director, Central Region.

[FR Doc.77-26875 Filed 9-14-77;8:45 am]

[Airspace Docket No. 77-WE-25]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Alteration of Transition Area, Montague, Calif.

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment alters the Montague, Calif., transition area by changing the bearing reference from the Montague RBN by 4° from 360° to 356°. This change is necessary in order to provide controlled airspace protection for aircraft executing the revised NDB-A instrument approach procedure to the Siskiyou County Airport.

EFFECTIVE DATE: December 1, 1977.

ADDRESSES: Copies of this final rule may be obtained from:

Federal Aviation Administration, Air Traffic Division, Chief, Airspace and Procedures Branch, AWE-530, 15000 Aviation Boulevard, Lawndale, Calif. 90261.

FOR FURTHER INFORMATION CONTACT:

Thomas W. Binczak, Airspace and Procedures Branch, Air Traffic Division, Federal Aviation Administration, 15000 Aviation Boulevard, Lawndale, Calif. 90261. Telephone: 213-536-6182.

SUPPLEMENTARY INFORMATION: The purpose of this amendment to Subpart G of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is to alter the description of the Montague, Calif. transition area to provide controlled airspace for the revised NDB-A instrument approach procedure to the Siskiyou County Airport, Montague, Calif.

The change in bearing reference of 4° is so minimal as to impose no additional burden on any person and thus notice and public procedure hereon are unnecessary.

DRAFTING INFORMATION

The principal authors of this document are Thomas W. Binczak, Air Traffic Division, and DeWitte T. Lawson, Jr., Esquire, Regional Counsel.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, Subpart G of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended, effective 0901 G.m.t., December 1, 1977, as hereinafter set forth.

In Subpart G § 71.181 (42 FR 440) the Montague, Calif. transition area is amended so as to delete the reference to the 360° bearing and insert in lieu thereof "356° bearing."

(Sec. 307(a), Federal Aviation Act of 1958, as amended (49 U.S.C. 1348(a)); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)).)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Los Angeles, Calif., on September 6, 1977.

HERMAN C. BLISS,
Acting Deputy Director,
Western Region.

[Airspace Docket No. 77-WE-15]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LAW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Alteration of Transition Area: Ukiah, California

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment alters the Ukiah, California Transition Area by establishing additional controlled airspace west of V-27 and east of V-27W between Ukiah and Fortuna, California VORTAC's. This additional airspace will be used for radar vectoring of aircraft between the main and alternate airways.

EFFECTIVE DATE: December 1, 1977.

ADDRESS: Copies of this final rule may be obtained from: Federal Aviation Administration, Air Traffic Division, Chief, Airspace and Procedures Branch, 15000 Aviation Boulevard, Lawndale, Calif. 90261.

FOR FURTHER INFORMATION CONTACT:

Thomas W. Binczak, Airspace and Procedures Branch, Air Traffic Division, Federal Aviation Administration, 15000 Aviation Boulevard, Lawndale, Calif. 90261. Telephone 213-536-6182.

SUPPLEMENTARY INFORMATION: The purpose of this amendment to Subpart G of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is to alter the transition area at Ukiah, Calif.

On July 21, 1977, a Notice of Proposed Rulemaking (NPRM) was published in the FEDERAL REGISTER (42 FR 37415) stating that the Federal Aviation Administration proposed to alter the transition area at Ukiah, Calif., to provide controlled airspace for aircraft transiting between V-27 and V-27W northwest of Ukiah, Calif.

V 42 1179
SEP 15 77
UMI

Interested persons were afforded an opportunity to participate in the rulemaking through submission of comments. All comments received were favorable.

DRAFTING INFORMATION

The principal authors of this document are Thomas W. Binczak, Air Traffic Division, and DeWitte T. Lawson, Jr., Esquire, Regional Counsel.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, Subpart G of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended, effective 0901 GMT, December 1, 1977, as hereinafter set forth.

§ 71.181 [Amended]

UKIAH, CALIFORNIA

Following "• • • Fortuna VORTAC 110° radials." Add: • • • "and that airspace extending upward from 5,300 feet MSL bounded on the east by the southwest edge of V–27 and on the west by the east/southeast edge of V–27W."

(Sec. 307(a) of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1348(a)) and Sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A–107.

Issued in Los Angeles, California on September 1, 1977.

HERMAN C. BLISS,
Acting Deputy Director,
Western Region.

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Designation of Transition Area—Clarion, Iowa

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The nature of this federal action is to designate a transition area at Clarion, Iowa to provide controlled airspace for aircraft executing instrument approach procedures to the Clarion Municipal Airport which are based on a Non-Directional Radio Beacon (NDB) navigational aid being installed at the airport.

EFFECTIVE DATE: December 1, 1977.

FOR FURTHER INFORMATION CONTACT:

Dwaine E. Hiland, Airspace Specialist, Operations, Procedures and Airspace Branch, Air Traffic Division, ACE–537, FAA, Central Region, Federal Building, 601 East 12th Street, Kansas City, Mo. 64106, telephone 816–374–3408.

SUPPLEMENTARY INFORMATION: The City of Clarion, Iowa is installing a Non-Directional Radio Beacon (NDB) on the Clarion Municipal Airport. This navigational aid will provide new navigational guidance for aircraft utilizing this airport. The establishment of an instrument approach procedure based on this navigational aid entails designation of a transition area at and above 700 feet above ground level (AGL) within which aircraft are provided air traffic control service. The intended effect of this action is to ensure adequate controlled airspace for aircraft executing the new instrument approach procedures at the Clarion Municipal Airport.

DRAFTING INFORMATION

The principal authors of this document are Dwaine E. Hiland, Operations, Procedures and Airspace Branch, Air Traffic Division and John L. Fitzgerald, Jr., Office of the Regional Counsel.

DISCUSSION OF COMMENTS

On pages 20834 and 20335 of the FEDERAL REGISTER dated April 21, 1977, as extended in the FEDERAL REGISTER of May 31, 1977, at page 27603, the Federal Aviation Administration published a notice of proposed rulemaking which would amend Section 71.181 of Part 71 of the Federal Aviation Regulations so as to designate a transition area at Clarion, Iowa. Interested persons were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No objections were received as a result of the Notice of Proposed Rule Making.

Accordingly, Subpart G, Section 71.181 of the Federal Aviation Regulations (14 CFR 71.181) as republished on January 3, 1977 (42 FR 440), is amended, effective 0901 G.m.t. December 1, 1977, by adding the following new transition area:

CLARION, IOWA

That airspace extending upward from 700' above the surface within a 5 mile radius of the Clarion Municipal Airport (latitude 42°44'30" N., longitude 93°45'30" W.) and within 3 miles each side of the 311° bearing from the Clarion Municipal Airport, extending from the 5 mile radius to 8.5 miles northwest of the airport.

(Sec. 307(a), Federal Aviation Act of 1958 as amended (49 U.S.C. 1348); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); Sec. 11.69 of the Federal Aviation Regulations (14 CFR 11.69)).

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A–107.

Issued in Kansas City, Missouri, on September 6, 1977.

C. R. MELUGIN, Jr.,
Director, Central Region.

[Docket No. 12537; Amdt. No. 65–22]

PART 65—CERTIFICATION: AIRMEN OTHER THAN FLIGHT CREWMEMBERS

Inspection Authorization

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY. This amendment is being issued to clarify current rules, and to adopt additional rules, applicable to applicants for, and holders of, an inspection authorization (I.A.). This action is necessary since the current rules have been the subject of considerable misunderstanding.

EFFECTIVE DATE: October 17, 1977.

FOR FURTHER INFORMATION CONTACT:

Raymond E. Ramakis, Regulatory Projects Branch (AFS–940), Safety Regulations Division, Flight Standards Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591; Telephone: (202) 755–8716.

SUPPLEMENTARY INFORMATION: Interested persons have been afforded an opportunity to participate in the making of this amendment by a notice of proposed rule making (Notice No. 73–4) issued on January 29, 1973, and published in the FEDERAL REGISTER on February 6, 1973 (38 F.R. 3410). Due consideration has been given to all comments received in response to the notice. Except as otherwise discussed in this amendment, the amendment and the reasons for it are identical to the proposal and the reasons set forth in the proposal.

Many of the three hundred and seventy-six comments received in response to the notice expressed disagreement with proposed § 65.91(c)(2). That section would have required the applicant for an inspection authorization to have had diversified practical experience performing aircraft and aircraft engine maintenance during at least the two-year period before applying. Nearly all of the commentators in disagreement with this proposal objected to the use of the word "diversified" as being confusing, vague, or undefined. The FAA agrees that the words "diversified practical experience", as used in proposed § 65.91(c)(2), need further clarification and, accordingly, withdraws this proposal.

In addition, many commentators disagreed with proposed § 65.95 (c) and (d). Paragraph (c) would have precluded the holder of an I.A. from exercising the privileges of his authorization outside of the area of jurisdiction of the local FAA District Office in which his fixed base of operation is located. Under paragraph (d), the holder of an I.A. changing the location of, or terminating inspection activity at, his fixed base of operation would have had to surrender the authorization to the local FAA District Office. Most of those opposing these proposals stated, in essence, that a mere change of geographical location has no effect on qualifications to exercise the privileges of an I.A. Others stated that the inability to use an I.A. outside the fixed base of operation would cause economic hardship.

After consideration of these comments, the FAA has determined that the holder of an I.A. should not be denied the use of his authorization when going outside the jurisdiction of his local FAA District Office or terminating inspection activity at, or changing the location of, his fixed base of operation, as provided in proposed § 65.95 (c) and (d). Accordingly, these proposals are withdrawn.

Proposed § 65.94 would have required the holder of an I.A. to keep, and make available for inspection by the Administrator, a current record of inspections performed by him under § 65.95(a). While a preponderance of commentators favored this proposal, some contended that such a requirement would impose an undue economic burden and others felt that it would not be beneficial to anyone. In light of the economic burden that this recordkeeping provision may impose, the FAA has decided to further evaluate the impact of proposed § 65.94. Accordingly, that proposed section is also withdrawn.

Proposed § 65.91(c)(1) was intended to clarify the current section by providing that an applicant for an I.A. would have to hold a currently effective mechanic certificate with both an airframe rating and a powerplant rating, each of which has been in effect for not less than three years. Moreover, under proposed § 65.92(a), the holder of an I.A. could exercise the privileges of the authorization only while he holds a currently effective certificate and ratings. While those proposed sections specified that the applicant for, or holder of, an I.A. must have a currently effective mechanic certificate, they did not expressly provide that the airframe and powerplant ratings held must also be current. Sections 65.91(c)(1) and 65.92(a), as adopted, make this clear. These requirements will ensure that the applicant for an I.A. is qualified to exercise the privileges of the authorization and remains qualified while he holds the authorization.

Paragraph (d) of current § 65.91 provides that an inspection authorization expires on March 31 of each year. That paragraph is revoked by this amendment since the provision contained therein is included in new § 65.92(a).

A review of comments received in response to the notice indicates that proposed § 65.93 appears to have been misinterpreted by several commentators. The purpose of that proposal was merely to require that a person desiring to renew his I.A. must present the evidence currently required by that section at the local FAA District Office having jurisdiction over the area in which his fixed base of operation is located. The proposal was designed to relax the current requirement to submit that evidence at a more distant General Aviation District Office or International Filed Office. However, as part of its Operations Review Program, the FAA is considering extensive revisions to current § 65.93, including a revision similar to that set forth in Notice 73–4. In light of this, the FAA concludes that it would be appropriate to consider all revisions to that section during the Operations Review, rather than implementing a single revision at the present time.

The FAA has conducted a preliminary evaluation of the impacts of the provisions adopted in this amendment. Based on that evaluation, it has been determined that the impacts of those provisions will be minimal and that an in-depth evaluation under the policy of the Secretary of Transportation and the Administrator (41 FR 16200; April 16, 1976) is not required.

The principal authors of this document are Irving Birnbaum, Flight Standards Service, and Danvers E. Long, Office of the Chief Counsel.

Accordingly, Part 65 of the Federal Aviation Regulations is amended, effective October 17, 1977, as follows:

1. By amending § 65.91 by revising paragraph (c)(1), and by revoking and reserving paragraph (d) as follows:

§ 65.91 Inspection authorization.

• • • • • •

(c) To be eligible for an inspection authorization, an applicant must:

(1) Hold a currently effective mechanic certificate with both an airframe rating and a powerplant rating, each of which is currently effective and has been continuously in effect for not less than the three year period immediately before the date of application;

• • • • • •

(d) [Reserved]

2. By adding a new § 65.92 to read as follows:

§ 65.92 Inspection authorization: Duration.

Each inspection authorization expires on March 31 of each year. However, the holder may exercise the privileges of that authorization only while he holds a currently effective mechanic certificate with both a currently effective airframe rating and a currently effective powerplant rating.

(b) An inspection authorization ceases to be effective whenever any of the following occurs:

(1) The authorization is surrendered, suspended, or revoked.

(2) The holder no longer has a fixed base of operation.

(3) The holder no longer has the equipment, facilities, and inspection data required by § 65.91(c) (3) and (4) for issuance of his authorization.

(c) The holder of an inspection authorization that is suspended or revoked shall, upon the Administrator's request, return it to the Administrator.

(Secs. 313(a) and 601, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a) and 1421); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)).)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A–107.

Issued in Washington, D.C. on September 9, 1977.

LANGHORNE BOND,
Administrator.

SUBCHAPTER F—AIR TRAFFIC AND GENERAL OPERATING RULES

[Docket No. 17137; Amdt. No. 95–274]

PART 95—IFR ALTITUDES

Miscellaneous Amendments

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts miscellaneous amendments to the required IFR (instrument flight rule) altitudes and changeover points for certain Federal airways, jet routes, or direct routes for which a minimum or maximum en route authorized IFR altitude is prescribed. These regulatory actions are needed because of changes occurring in the National Airspace System. These changes are designed to provide for the safe and efficient use of the navigable airspace under instrument conditions in the affected areas.

EFFECTIVE DATE: October 6, 1977.

FOR FURTHER INFORMATION CONTACT:

William L. Bersch, Flight Procedures and Airspace Branch (AFS–730), Aircraft Programs Division, Flight Standards Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591, telephone 202–426–8277.

SUPPLEMENTARY INFORMATION: This amendment to Part 95 of the Federal Aviation Regulations (14 CFR Part 95) prescribe new, amended, suspended, or revoked IFR altitudes governing the operation of all aircraft in IFR flight over a specified route or any portion of that route, as well as the changeover points (COPs) for Federal airways, jet routes, or direct routes as prescribed in Part 95. The specified IFR altitudes, when used in conjunction with the prescribed changeover points for those routes, ensure navigation aid coverage that is adequate for safe flight operations and free of frequency interference.

The reasons and circumstances which create the need for this amendment involve matters of flight safety, operational efficiency in the National Airspace System, and are related to published aeronautical charts that are essential to the user and provides for the safe and efficient use of the navigable airspace. In addition, those various reasons or circumstances require making this amendment effective before the next scheduled charting and publication date of the flight information to assure its timely availability to the user. The effective date of this amendment reflects those considerations. In view of the close and im-

V 42 179

mediate relationship between these regulatory changes and safety in air commerce, I find that notice and public procedure before adopting this amendment is unnecessary, impracticable, or contrary to the public interest and that good cause exists for making the amendment effective in less than 30 days.

The principal authors of this document are Rudolph L. Fioretti, Flight Standards Service, and Richard W. Danforth, Office of the Chief Counsel.

ADOPTION OF THE AMENDMENT

Accordingly and pursuant to the authority delegated to me by the Administrator, Part 95 of the Federal Aviation Regulations (14 CFR Part 95) is amended as follows effective: October 6, 1977.

(Secs. 307, 313(a), 601, and 1110, Federal Aviation Act of 1958 (49 U.S.C. §§ 1348, 1354 (a), 1421, and 1510); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); Delegation: 25 FR 6489 and Paragraph 802 of Order FS P 1100.1, as amended March 9, 1973.)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Washington, D.C. on September 6, 1977.

JAMES M. VINES,
Chief, Aircraft Programs Division.

NOTE.—The incorporation by reference in the preceding document was approved by the Director of the Federal Register on May 12, 1969.

[Docket No. 17215; Amdt. No. 1090]

PART 97—STANDARD INSTRUMENT APPROACH PROCEDURES

Miscellaneous Amendments

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment establishes, amends, suspends, or revokes Standard Instrument Approach Procedures (SIAPs) for operations at certain airports. These regulatory actions are needed because of the adoption of new or revised criteria, or because of changes occurring in the National Airspace System, such as the commissioning of new navigational facilities, addition of new obstacles, or changes in air traffic requirements. These changes are designed to provide safe and efficient use of the navigable airspace and to promote safe flight operations under instrument flight rules at the affected airports.

DATES: An effective date for each SIAP is specified in the amendatory provisions.

ADDRESSES: Availability of matters incorporated by reference in the amendment is as follows:

For examination—1. FAA Rules Docket, FAA Headquarters Building, 800 Independence Avenue SW., Washington, D.C. 20591;

2. The FAA Regional Office of the region in which the affected airport is located; or

3. The Flight Inspection Field Office which originated the SIAP.

For Purchase—Individual SIAP copies may be obtained from:

1. FAA Public Information Center (APA-430), FAA Headquarters Building, 800 Independence Avenue SW., Washington, D.C. 20591; or

2. The FAA Regional Office of the region in which the affected airport is located.

By Subscription—Copies of all SIAPs, mailed weekly, may be ordered from Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. The current annual subscription price is $150.00; add $30.00 for each additional copy mailed to the same address.

FOR FURTHER INFORMATION CONTACT:

William L. Bersch, Flight Procedures and Airspace Branch (AFS-730), Aircraft Programs Division, Flight Standards Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, D.C. 20591; telephone 202-426-8277.

SUPPLEMENTARY INFORMATION: This amendment to Part 97 of the Federal Aviation Regulations (14 CFR Part 9) prescribes new, amended, suspended, or revoked Standard Instrument Approach Procedures (SIAPs). The complete regulatory description of each SIAP is contained in official FAA form documents which are incorporated by reference in this amendment under 5 U.S.C. § 552(a), 1 CFR Part 51, and § 97.20 of the Federal Aviation Regulations (FARs). The applicable FAA forms are identified as FAA Forms 8260-3, 8260-4, and 8260-5. Materials incorporated by reference are available for examination or purchase as stated above.

The large number of SIAPs, their complex nature, and the need for a special format make their verbatim publication in the FEDERAL REGISTER expensive and impractical. Further, airmen do not use the regulatory text of the SIAPs but refer to their graphic depiction on charts printed by publishers of aeronautical materials. Thus, the advantages of incorporation by reference are realized and publication of the complete description of each SIAP contained in FAA form document is unnecessary. The provisions of this amendment state the affected CFR (and FAR) sections, with the types and effective dates of the SIAPs. This amendment also identifies the airport, its location, the procedure identification and the amendment number.

This amendment to Part 97 is effective on the date of publication and contains separate SIAPs which have compliance dates stated as effective dates based on related changes in the National Airspace System or the application of new or revised criteria. Some SIAP amendments may have been previously issued by the FAA in a National Flight Data Center (FDC) Notice to Airmen (NOTAM) as an emergency action of immediate flight safety relating directly to published aeronautical charts. The circumstances which created the need for some SIAP amendments may require making them effective in less than 30 days. For the remaining SIAPs, an effective date at least 30 days after publication is provided.

Further, the SIAPs contained in this amendment are based on the criteria contained in the U.S. Standard for Terminal Instrument Approach Procedures (TERPs). In developing these SIAPs, the TERPs criteria were applied to the conditions existing or anticipated at the affected airports. Because of the close and immediate relationship between these SIAPs and safety in air commerce, I find that notice and public procedure before adopting these SIAPs is unnecessary, impracticable, or contrary to the public interest and, where applicable, that good cause exists for making some SIAPs effective in less than 30 days.

The principal authors of this document are Rudolph L. Fioretti, Flight Standards Service, and Richard W. Danforth, Office of the Chief Counsel.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me, Part 97 of the Federal Aviation Regulations (14 CFR Part 97) is amended by establishing, amending, suspending, or revoking Standard Instrument Approach Procedures, effective on the dates specified, as follows:

1. By amending § 97.23 VOR-VOR/DME SIAPs identified as follows:

* * * *Effective November 3, 1977.*

Kailua-Kona, HI—Ke-ahole, VOR/DME Rwy 17 (TAC) Orig.

Kailua-Kona, HI—Ke-ahole, VORTAC Rwy 17, Amdt. 3, canceled

Holland, MI—Tulip City, VOR-A, Amdt. 5

Holland, MI—Park Township, VOR-C, Amdt. 4

Belmar-Farmingdale, NJ—Monmouth County, VOR-A, Amdt. 9

2. By amending § 97.25 SDF-LOC-LDA SIAPs identified as follows:

* * * *Effective September 22, 1977.*

Augusta, ME—Augusta State, LOC Rwy 17, Original

3. By amending § 97.27 NDB/ADF SIAPs identified as follows:

* * * *Effective November 3, 1977.*

Holland, MI—Park Township, NDB-B, Amdt. 3

* * * *Effective October 6, 1977.*

Selma, AL—Selfield, NDB Rwy 30, Amdt. 1

Anahuac, TX—Chambers County, NDB Rwy 30, Amdt. 1

NOTE.—The FAA published an amendment in Docket No. 17063, Amdt. No. 1084 to Part 97 of the Federal Aviation Regulations (42 FR 39381; August 4, 1977) under section 97.27 effective October 8, 1977, which is hereby amended as follows:

Minchumina, AK—Minchumina, NDB Rwy 2, Amdt. 1 is effective October 6, 1977.

4. By amending § 97.29 ILS-MLS SIAPs identified as follows:

* * * *Effective September 1, 1977.*

Tulsa, OK—Tulsa International, ILS Rwy 35R, Amdt. 24

(Secs. 307, 313(a), 601, and 1110, Federal Aviation Act of 1958 (49 U.S.C. §§ 1348, 1354 (a), 1421, and 1510); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); Delegation: 24 FR 5662 and Paragraph 802 of Order FS P 1100.1, as amended March 9, 1973.)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Washington, D.C. on September 9, 1977.

JAMES M. VINES,
Chief,
Aircraft Programs Division.

NOTE.—The incorporation by reference in the preceding document was approved by the Director of the Federal Register on May 12, 1969.

SUBCHAPTER D—MISCELLANEOUS EXCISE TAXES

[T.D. 7496 (CC:LR-1614)]

PART 53—FOUNDATION EXCISE TAXES

Taxes on Excess Business Holdings

AGENCY: Internal Revenue Service, Treasury.

ACTION: Publication of full text of final regulations.

SUMMARY: This document sets forth the full text of previously adopted final regulations (42 FR 34499, July 6, 1977) related to taxes on the excess business holdings of private foundations.

EFFECTIVE DATE: The regulations are effective for taxable years beginning after December 31, 1969.

FOR FURTHER INFORMATION CONTACT:

Larry E. Smith of the Legislation and Regulations Division, Office of the Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue, N.W., Washington, D.C. 20224, Attention: CC:LR:T, 202-566-3909, not a toll-free call.

SUPPLEMENTARY INFORMATION:

BACKGROUND

On January 3, 1973, the FEDERAL REGISTER published a notice of proposed rulemaking containing proposed amendments to the Foundation Excise Tax Regulations (26 CFR Part 53) under section 4943 of the Internal Revenue Code of 1954, 38 FR 32. The amendments were proposed to conform the regulations to section 101(b) of the Tax Reform Act of 1969 (83 Stat. 507). A public hearing was held on March 29, 1973. After consideration of all comments regarding the proposed amendments, those amendments were adopted, as revised, by T.D. 7496, published in the FEDERAL REGISTER for July 6, 1977 (42 FR 34499). In addition, T.D. 7496 superseded § 143.6 of the Temporary Excise Tax Regulations under the Tax Reform Act of 1969 (26 CFR Part 143). However, T.D. 7496 as published in the FEDERAL REGISTER contained only the changes to the notice of proposed rulemaking published on January 3, 1973, rather than the full text of the final regulations. This document sets forth the full text of the final regulations.

Accordingly, the full text of the final regulations adopted by T.D. 7496 is as follows.

ROBERT A. BLEY,
Director, Legislation and Regulations Division.

Subpart D of 26 CFR Part 53 is inserted in its appropriate place to read as follows:

§ 53.4943-1 General rule; purpose

Generaly, under section 4943, the combined holdings of a private foundation and all disqualified persons (as defined in section 4946(a)) in any corporation conducting a business which is not substantially related (aside from the need of the foundation for income or funds or the use it makes of the profits derived) to the exempt purposes of the foundation are limited to 20 percent of the voting stock in such corporation. In addition, the combined holdings of a private foundation and all disqualified persons in any unincorporated business (other than a sole proprietorship) which is not substantially related (aside from the need of the foundation for income or funds or the use it makes of the profits derived) to the exempt purposes of such foundation are limited to 20 percent of the beneficial or profits interest in such business. In the case of a sole proprietorship which is not substantially related (within the meaning of the preceding sentence), section 4943 provides that a private foundation shall have no permitted holdings. These general provisions are subject to a number of exceptions and special provisions which will be described in following sections.

§ 53.4943-2 Imposition of tax on excess business holdings of private foundations.

(a) *Imposition of initial tax*—(1) *In general.*—(i) *Initial tax.* Section 4943(a)(1) imposes an initial excise tax (the "initial tax") on the excess business holdings of a private foundation for each taxable year of the foundation which ends during the taxable period defined in section 4943(d)(2). The amount of such tax is equal to 5 percent of the total value of all the private foundation's excess business holdings in each of its business enterprises. In determining the value of the excess business holdings of the foundation subject to tax under section 4943, the rules set forth in §§ 20.-2031-1 through 20.2031-3 of this chapter (Estate Tax Regulations) shall apply.

(ii) *Disposition of certain excess business holdings within ninety days.* In any case in which a private foundation acquires excess business holdings, other than as a result of a purchase by the foundation, the foundation shall not be subject to the taxes imposed by section 4943, but only if it disposes of an amount of its holdings so that it no longer has such excess business holdings within 90 days from the date on which it knows, or has reason to know, of the event which caused it to have such excess business holdings. Similarly, a private foundation shall not be subject to the taxes imposed by section 4943 because of its purchase of holdings where it did not know, or have reason to know of prior acquisitions by disqualified persons, but only if the foundation disposes of its excess holdings within the 90-day period described previously, and its purchase would not have created excess business holding but for such prior acquisitions by disqualified persons. In determining whether for purposes of this (ii), the foundation has disposed of such excess business holdings during such 90-day period, any disposition of holdings by a disqualified person during such period shall be disregarded.

(iii) *Extension of ninety day period.* The period described in paragraph (a)(1)(ii) of this section, during which no tax shall be imposed under section 4943, shall be extended to include the period during which a foundation is prevented by federal or state securities laws from disposing of such excess business holdings.

(iv) *Effect of disposition subject to material restrictions.* If a private foundation disposes of an interest in a business enterprise but imposes any material restrictions or conditions that prevent the transferee from freely and effectively using or disposing of the transferred interest, then the transferor foundation will be treated as owning such interest until all such restrictions or conditions

V 42 179 SEP 15 77 UMI

are eliminated (regardless of whether the transferee is treated for other purposes of the Code as owning such interest from the date of the transfer). However, a restriction or condition imposed in compliance with federal or state securities laws, or in accordance with the terms or conditions of the gift or bequest through which such interest was acquired by the foundation, shall not be considered a material restriction or condition imposed by a private foundation.

(v) *Foundation knowledge of acquisitions made by disqualified persons.* (A) For purposes of paragraph (a)(1)(ii) of this section, whether a private foundation will be treated as knowing, or having reason to know, of the acquisition of holdings by a disqualified person will depend on the facts and circumstances of each case. Factors which will be considered relevant to a determination that a private foundation did not know or had no reason to know of an acquisition are: the fact that it did not discover acquisitions made by disqualified persons through the use of procedures reasonably calculated to discover such holdings; the diversity of foundation holdings; and the existence of large numbers of disqualified persons who have little or no contact with the foundation or its managers.

(B) The provisions of paragraph (a)(1)(v)(A) of this section may be illustrated by the following example:

Example. By the fifteenth day of the fifth month after the close of each taxable year, the F Foundation sends to each foundation manager, substantial contributor, person holding more than a 20% interest (as described in section 4946(a)(1)(C)) in a substantial contributor, and foundation described in section 4946(a)(1)(H), a questionnaire asking such persons to list all holdings, actual or constructive, in each business enterprise in which F had holdings during the taxable year in excess of those permitted by the 2 percent de minimis rule of section 4943(c)(2)(C). In preparing the list of such enterprises, F takes into account its constructive holdings only if, during the taxable year, F (along with all related foundations described in section 4946(a)(1)(H)) owned over 2% of the voting stock, profits interest or beneficial interest in the entity actually owning the holdings constructively held by F. The questionnaire asks each such person to list the holdings in such enterprises of any persons who, because of their relationship to such disqualified person, were themselves disqualified persons (i.e., members of the family (as defined in section 4946(d)), and any corporations, partnerships, trusts and estates described in section 4946(a)(1)(E) through (G) in which such person, or members of his family, had an interest). The questionnaire asks that constructive holdings be listed only if, during the taxable year, the disqualified person owned over 2% of the voting stock, profits interest or beneficial interest in the entity actually owning the holdings constructively held by such person. (Thus a disqualified person owning less than 2% of a mutual fund is not required to list his attributed share of all the securities in the portfolio of the fund.) If no response to the questionnaire is received, the foundation seeks the information requested by the questionnaire by mailing a second (but not a third) questionnaire. If a questionnaire which is returned to the foundation indicates that certain information was unavailable to the person completing the questionnaire, the foundation seeks that information directly. For example, if a disqualified person indicates that he could not find out whether a corporation described in section 4946(a)(1)(E) had holdings in the enterprise listed in the questionnaire, the foundation seeks to obtain this information directly from the corporation by mailing it a questionnaire. In such a case, F may be found not to have reason to know of the acquisition of holdings by a disqualified person.

(vi) *Holdings acquired other than by purchase.* See section 4943(c)(6) and § 53.4943–6 for rules relating to the acquisition of certain holdings other than by purchase by the foundation or a disqualified person.

(2) *Special rules.* In applying subparagraph (1) of this paragraph, the tax imposed by section 4943(a)(1)—

(i) Shall be imposed on the last day of the private foundation's taxable year, but

(ii) The amount of such tax and the value of the excess business holdings subject to such tax shall be determined with respect to the foundation's holdings (based upon voting power, profits or beneficial interest, or value, whichever is applicable) in any business enterprise as of that day during the foundation's taxable year when the foundation's excess holdings in such enterprise were the greatest.

In applying subdivision (ii) of this subparagraph, if a foundation's excess business holdings in a business enterprise which constitute such foundation's greatest excess holdings in such enterprise for any taxable year are maintained for 2 or more days during such taxable year, the value of such excess holdings which is subject to tax under section 4943(a)(1) shall be the greatest value of such excess holdings in such enterprise as of any day on which such greatest excess holdings are maintained during such taxable year.

(3) *Examples.* The provisions of this paragraph may be illustrated by the following examples:

Example (1). Y is a private foundation reporting on a calendar year basis. On January 1, 1973, Y has 20 shares of common stock in corporation N, of which five shares constitute excess business holdings. On June 1, 1973, Y disposes of such five shares; however, because of additional acquisitions of N common stock on such date by disqualified persons with respect to Y, the remaining 15 shares of N common stock held by Y now constitute excess business holdings. There are no further acquisitions or dispositions of N common stock during 1973 by Y or its disqualified persons. Although Y's greatest holdings in N during 1973 are held between January 1, 1973, and May 31, 1973, Y's greatest excess holdings in N during 1973 are held between June 1, 1973, and December 31, 1973. Therefore, the tax specified in section 4943(a)(1) shall be computed on the basis of the greatest value of such greatest excess holdings as of any day between June 1 and December 31, 1973.

Example (2). X is a private foundation reporting on a calendar year basis. On January 1, 1972, X has 100 shares of common stock in M corporation which are excess business holdings. On such date each share of M common stock has a fair market value of $100. On February 28, 1972, in an effort to dispose of such excess business holdings, X sells 70 shares of M common stock for $120 per share (the fair market value of each share on such date) to A, an individual who is not a disqualified person within the meaning of section 4946(a). The value of $120 per share is the highest fair market value between January 1 and February 28, 1972. X disposes of no more stock in M for the remainder of calendar year 1972. On December 31, 1972, the fair market value of each share of M common stock is $80. X calculates its tax on its excess business holdings in M for 1972 as follows:

100 shares of M common stock times $120 fair market value per share as of Feb. 28, 1972	$12,000
$12,000 multiplied by rate of tax (percent)	5
Amount of tax on X foundation's excess business holdings for 1972	$600

Example (3). Assume the same facts as in Example (2) except that the sale of X to A occurs on January 7, 1973, when the fair market value of each share of M corporation common stock equals $70. A value of $100 per share is the highest fair market value of the M common stock between January 1 and January 7, 1973. On May 9, 1973, X for the first time has excess business holdings in N corporation in the form of 200 shares of N common stock. The value per share of N common stock on May 9, 1973, equals $200. X makes no disposition of the N common stock during 1973, and the value of each share of N common stock as of December 31, 1973 equals $250 (the highest value of N common stock during 1973). X calculates its tax on its excess business holdings in both M and N for 1973 as follows:

100 shares of M common stock times $100 fair market value per share	$10,000
$250 fair market value per share	$50,000
Total	$60,000
Total	$60,000
$60,000 multiplied by rate of tax (percent)	5
Amount of tax on X foundation's excess business holdings for 1973	$3,000

(b) *Additional tax.* In any case in which the initial tax is imposed under section 4943(a) with respect to the holdings of a private foundation in any business enterprise, if, at the close of the correction period (as defined in section 4943(d)(3) and § 53.4943–9) with respect to such holdings the foundation still has excess business holdings in such enterprise, there is imposed a tax under section 4943(b) equal to 200 percent of the value of such excess holdings as of the last day of such correction period (determined without regard to extensions).

§ 53.4943–3 Determination of excess business holdings.

(a) *Excess business holdings.*—(1) *In general.* For purposes of section 4943, the term "excess business holdings" means, with respect to the holdings of any private foundation in any business enterprise (as described in section 4943(d)(4)), the amount of stock or other interest in the enterprise which, except as provided in § 53.4943–2(a)(1), the foundation, or a disqualified person, would have to dispose of, or cause the disposition of, to a person other than a disqualified person (as defined in section 4946(a)) in order for the remaining holdings of the foundation in such enterprise to be permitted holdings (as defined in paragraphs (b) and (c) of this section). If a private foundation is required by section 4943 and the regulations thereunder to dispose of certain shares of a class of stock in a particular period of time and other shares of the same class of stock in a shorter period of time, any stock disposed of shall be charged first against those dispositions which must be made in such shorter period.

(2) *Example.* The provisions of this paragraph may be illustrated by the following example:

Example. Corporation X has outstanding 100 shares of voting stock, with each share entitling the holder thereof to one vote. F, a private foundation, possesses 20 shares of X voting stock representing 20 percent of the voting power in X. Assume that the permitted holdings of F in X under paragraph (b)(1) of this section are 11 percent of the voting stock in X. F, therefore, possesses voting stock in X representing a percentage of voting stock in excess of the percentage permitted by such paragraph. Such excess percentage is 9 percent of the voting stock in X, determined by subtracting the percentage of voting stock representing the permitted holdings of F in X (i.e., 11 percent) from the percentage of voting stock held by F in X (i.e., 20 percent). (20% − 11% = 9%). The excess business holdings of F in X are an amount of voting stock representing such excess percentage, or 9 shares of X voting stock (9 percent of 100).

(b) *Permitted holdings in an incorporated business enterprise*—(1) *In general.*—(i) *Permitted holdings defined.* Except as otherwise provided in section 4943(c)(2) and (4), the permitted holdings of any private foundation in an incorporated business enterprise (including a real estate investment trust, as defined in section 856) are—

(A) 20 percent of the voting stock in such enterprise reduced (but not below zero) by

(B) The percentage of voting stock in such enterprise actually or constructively owned by all disqualified persons.

(ii) *Voting stock.* For purposes of this section, the percentage of voting stock held by any person in a corporation is normally determined by reference to the power of stock to vote for the election of directors, with treasury stock and stock which is authorized but unissued being disregarded. Thus, for example, if a private foundation holds 20 percent of the shares of one class of stock in a corporation, which class is entitled to elect three directors, and such foundation holds no stock in the other class of stock, which is entitled to elect five directors, such foundation shall be treated as holding 7.5 percent of the voting stock because the class of stock it holds has 37.5 percent of such voting power, by reason of being able to elect three of the eight directors, and the foundation holds one-fifth of the shares of such class (20 percent of 37.5 percent is 7.5 percent). The fact that extraordinary corporate action (e.g., charter or by-law amendments) by a corporation may require the favorable vote of more than a majority of the directors, or of the outstanding voting stock, of such corporation shall not alter the determination of voting power of stock in such corporation in accordance with the two preceding sentences.

(2) *Nonvoting stock as permitted holdings*—(i) *In general.* In addition to those holdings permitted by paragraph (b)(1) of this section, the permitted holdings of a private foundation in an incorporated business enterprise shall include any share of nonvoting stock in such enterprise held by the foundation in any case in which all disqualified persons hold, actually or constructively, no more than 20 percent (35 percent where third persons have effective control as defined in paragraph (b)(3)(ii) of this section) of the voting stock in such enterprise. All equity interests which do not have voting power attributable to them shall, for purposes of section 4943, be classified as nonvoting stock. For this purpose, evidences of indebtedness (including convertible indebtedness), and warrants and other options or rights to acquire stock shall not be considered equity interests.

(ii) *Stock with contingent voting rights and convertible nonvoting stock.* Stock carrying voting rights which will vest only when conditions, the occurrence of which are indeterminate, have been met, such as preferred stock which gains such voting rights only if no dividends are paid thereon, will be treated as nonvoting stock until the conditions have occurred which cause the voting rights to vest. When such rights vest, the stock will be treated as voting stock that was acquired other than by purchase, but only if the private foundation or disqualified persons had no control over whether the conditions would occur. Similarly, nonvoting stock which may be converted into voting stock will not be treated as voting stock until such conversion occurs. For special rules where stock is acquired other than by purchase, see section 4943(c)(6) and the regulations thereunder.

(iii) *Example.* The provisions of this paragraph (2) may be illustrated by the following example:

Example. Assume that F, a private foundation, holds 10 percent of the single class of voting stock of corporation X, and owns 20 shares of nonvoting stock in X. Assume further that A and B, the only disqualified persons with respect to F, hold 10 percent of the voting stock of X. Under the provisions of paragraph (b)(1) of this section, the 10 percent of X voting stock held by F will be classified as permitted holdings of F in X since 20 percent less the percentage of voting stock held by A and B in X is 10 percent. In addition, under the provisions of this (2), the 20 shares of X nonvoting stock will qualify as permitted holdings of F in X since the percentage of voting stock held by A and B in X is no greater than 20 percent.

(3) *Thirty-five-percent rule where third person has effective control of enterprise*—(i) *In general.* Except as provided in section 4943(c)(4), paragraph (b)(1) of this section shall be applied by substituting 35 percent for 20 percent if—

(A) The private foundation and all disqualified persons together do not hold, actually or constructively, more than 35 percent of the voting stock in the business enterprise, and

(B) The foundation establishes to the satisfaction of the Commissioner that effective control (as defined in paragraph (b)(3)(ii) of this section) of the business enterprise is in one or more persons (other than the foundation itself) who are not disqualified persons.

(ii) *"Effective control" defined.* For purposes of this subparagraph, the term "effective control" means the possession, directly or indirectly, of the power to direct or cause the direction of the management and policies of a business enterprise, whether through the ownership of voting stock, the use of voting trusts, or contractual arrangements, or otherwise. It is the reality of control which is decisive and not its form or the means by which it is exercisable. Thus, where a minority interest held by individuals who are not disqualified persons has historically elected the majority of a corporation's directors, effective control is in the hands of those individuals.

(4) *Two percent de minimis rule*—(i) *In general.* Under section 4943(c)(2)(C), a private foundation is not treated as having excess business holdings in any incorporated business enterprise in which it (together with all other private foundations (including trusts described in section 4947(a)(2)) which are described in section 4946(a)(1)(H)) actually or constructively owns not more than 2 percent of the voting stock and not more than 2 percent in value of all outstanding shares of all classes of stock. If, however, the private foundation, together with all other private foundations which are described in section 4946(a)(1)(H), actually or constructively owns more than 2 percent of either the voting stock or the value of the outstanding shares of all classes of stock in any incorporated business enterprise, all the stock in such business enterprise classified as excess business holding under section 4943 is treated as excess business holdings. For purposes of this paragraph, any stock owned by a private foundation which is treated as held by a disqualified person under section 4943(c)(4)(B), (5), or (6) shall be treated as actually owned by the private foundation. See paragraph (b)(1) of § 53.4941(d)–4 for the determination of excess business holdings without regard to section 4943(c)(2)(C) for purposes of applying section 101(C)(2)(B) of the Tax Reform Act of 1969 (83 Stat. 533).

(ii) *Examples.* The provisions of this subparagraph may be illustrated by the following examples:

Example (1). F, a private foundation, owns 1 percent of the single class of voting stock and 1 percent in value of all the outstanding shares of all classes of stock in X corporation. No other private foundation described in section 4946(a)(1)(H) owns any stock in X. All of the stock owned by F in X would be excess business holdings under section 4943(c)(1) if section 4943(c)(2)(C) were inapplicable. F owns no other shares of stock in X. Since F owns no more than 2 percent of the voting stock and no more than 2 percent in value of all outstanding shares of all classes of stock in X, under section 4943(c)

V 42 1179 SEP 15 77 UMI

(2)(C) none of the stock in X owned by F is treated as excess business holdings.

Example (2). Assume the facts as stated in Example (1), except that F and T, a controlled private foundation under section 4946(a)(1)(H), together own 1 percent of all the voting stock and 1 percent in value of all the outstanding shares of all classes of stock in X. All of the stock in X owned by F and T would be excess business holdings under section 4943(c)(1) if section 4943(c)(2)(C) were inapplicable. Since F and T together own no more than 2 percent of the voting stock and no more than 2 percent in value of all outstanding shares of all classes of stock in X, under section 4943(c)(2)(C) none of the stock in X owned by either F or T is treated as excess business holdings.

Example (3). Assume the facts as stated in Example (1), except that F owns 3 percent of the voting stock in X, 2 percent of which is treated as held by P, a disqualified person of F, under section 4943(c)(4)(B). Under subdivision (i) of this subparagraph, the 2 percent of the stock in X owned by F which is treated as held by P under section 4943(c)(4)(B) is treated as actually owned by F for purposes of section 4943(c)(2)(C). Consequently, all of the X stock owned by F is treated as excess business holdings under section 4943(c)(2)(C). However, only 1 percent of the stock in X is subject to tax under section 4943(a), since the other 2 percent is treated as owned by a disqualified person under section 4943(c)(4)(B) for purposes of determining the tax upon F under section 4943(a).

(c) *Permitted holdings in an unincorporated business enterprise*—(1) *In general.* The permitted holdings of a private foundation in any business enterprise which is not incorporated shall, subject to the provisions of subparagraphs (2), (3), and (4) of this paragraph, be determined under the principles of paragraph (b) of this section.

(2) *Partnership or joint venture.* In the case of a partnership (including a limited partnership) or joint venture, the terms "profits interest" and "capital interest" shall be substituted for "voting stock" and "nonvoting stock," respectively, wherever those terms appear in paragraph (b) of this section. The interest in profits of such foundation (or such disqualified person) shall be determined in the same manner as its distributive share of partnership taxable income. See section 704(b) (relating to the determination of the distributive share by the income or loss ratio) and the regulations thereunder. In the absence of a provision in the partnership agreement, the capital interest of such foundation (or such disqualified person) in a partnership shall be determined on the basis of its interest in the assets of the partnership which would be distributable to such foundation (or such disqualified person) upon its withdrawal from the partnership, or upon liquidation of the partnership, whichever is the greater.

(3) *Sole proprietorship.* For purposes of section 4943, a private foundation shall have no permitted holdings in a sole proprietorship. In the case of a transfer by a private foundation of a portion of a sole proprietorship, see paragraph (c)(2) of this section (relating to permitted holdings in partnerships). For the treatment of a private foundation's ownership of a sole proprietorship prior to May 26, 1969, see § 53.4943–4.

(4) *Trusts and other unincorporated business enterprises*—(i) *In general.* In the case of any unincorporated business enterprise which is not described in paragraph (c)(2) or (3) of this section, the term "beneficial interest" shall be substituted for "voting stock" wherever the term appears in paragraph (b) of this section. Any and all references to novoting stock in paragraph (b) of this section shall be inapplicable with respect to any unincorporated business enterprise described in this subparagraph.

(ii) *Trusts.* For purposes of section 4943, the beneficial interest of a private foundation or any disqualified person in a trust shall be the beneficial remainder interest of such foundation or person determined as provided in paragraph (b) of § 53.4943–8.

(iii) *Other unincorporated business enterprises.* For purposes of section 4943, the beneficial interest of a private foundation or any disqualified person in an unincorporated business enterprise (other than a trust or an enterprise described in paragraph (c)(2) or (3) of this section) includes any right to receive a portion of distributions of profits of such enterprise, and, if the portion of distributions is not fixed by an agreement among the participants, any right to receive a portion of the assets (if any) upon liquidation of the enterprise, except as a creditor or employee. For purposes of this subparagraph, a right to receive distributions of profits includes a right to receive any amount from such profits (other than as a creditor or employee), whether as a sum certain or as a portion of profits realized by the enterprise. Where there is no agreement fixing the rights of the participants in such enterprise, the interest of such foundation (or such disqualified person) in such enterprise shall be determined by dividing the amount of all equity investments or contributions to the capital of the enterprise made or obligated to be made by such foundation (or such disqualified person) by the amount of all equity investments or contributions to capital made or obligated to be made by all participants in the enterprise.

(d) *Examples.* The provisions of this section may be illustrated by the following examples:

Example (1). Corporation X has outstanding 100 shares of voting stock, with each share entitling the holder thereof to one vote. Assume that F, a private foundation, possesses 30 shares of X voting stock, and that A and B, the only disqualified persons with respect to F, together own 10 shares of X voting stock. The excess business holdings of F in X are 20 shares of X voting stock, determined as follows:

(i) Determination of voting stock percentages:	
(a) Total number of outstanding votes in X	100
(b) Total number of votes in X held by F	30
(c) Total number of votes in X held by A and B	10
(d) Percentage of voting stock in X held by F (item (b) divided by item (a)) (percent)	30
(e) Percentage of voting stock in X held by A and B item (c) divided by item (a)) (percent)	10
(ii) Determination of permitted holdings of voting stock:	
(a) Percentage of voting stock in X held by A and B (percent)	10
(b) Permitted holdings of voting stock by F in X (20 pct less item (a)) (percent)	10
(iii) Determination of excess business holdings:	
(a) Percentage of voting stock in X held by F (percent)	30
(b) Permitted holdings of voting stock by F in X (percent)	10
(c) Item (a) less item (b) (percent)	20
(d) Excess business holdings of F in X (i.e., an amount of X voting stock representing a percentage of voting stock equivalent to that in item (c)) (shares)	20

Example (2). F, a private foundation, is a partner in P partnership. In addition, A and B, the only disqualified persons with respect to F, are partners in P. The partnership agreement of P contains no provisions regarding the sharing of profits by, and the respective capital interests of, the partners.

(i) Assume that, under section 704(b), F's distributive share of P taxable income is determined to be 20 percent. In addition, assume that under such section, A and B are determined to have a 4-percent distributive share each of P taxable income. Accordingly, F holds a 20-percent profits interest in P, and A and B hold an 8-percent profits interest in P. Assuming that the provisions of section 4943(c)(2)(B) do not apply, the permitted holdings of F in P are 12 percent of the profits interest in P, determined by subtracting the precentage of the profits interest held by A and B in P (i.e., 8 percent) from 20 percent. (20 percent−8 percent=12 percent.) F, therefore, holds a percentage of the profits interest in P in excess of the percentage permitted by § 53.4943–3(b)(1). The excess business holdings of F in P are a percentage of the profits interest in P equivalent to such excess percentage, or 8 percent of the profits interest in F, determined by subtracting the permitted holdings of F in P (i.e., 12 percent) from the percentage of the profit interest held by F in P (i.e., 20 percent) (20 percent−12 percent=8 percent.)

(ii) Assume that, under the partnership agreement, F would be entitled to a distribution of 20 percent of P's assets upon F's withdrawal from P and to a distribution of 30 percent of P's assets upon the liquidation profits interest held by F in P (i.e., 20 percent) (20 percent−12 percent=8 percent), of P. F, therefore, holds a 30-percent capital centage of the assets of P distributable to F upon F's withdrawal from P, or the percentage of such assets distributable to F upon the liquidation of P. Since the percentage of the profits interest held by A and B in P is less than 20 percent, such 30-percent capital interest will be included in the permitted holdings of F in P.

§ 53.4943–4 Present holdings.

(a) *Introduction*—(1) *Section 4943(c)(4) in general.* (i) Paragraph (4) of section 4943(c) prescribes transition rules for a private foundation which, but for such paragraph, would have excess business holdings on May 26, 1969. Section 4943(c)(4) provides such a foundation with protection from the initial tax on excess business holdings in two ways. First, the entire interest of such a foundation in any business enterprise in which such a foundation, but for section 4943(c)(4), would have had excess business holdings on May 26, 1969, is treated under section 4943(c)(4)(B) as held by disqualified persons for a certain period of time (the "first phase"). The effect of such treatment is to prevent a private foundation from being subject to the initial tax with respect to its May 26, 1969, interest during the first phase holding period and also to prevent the foundation from purchasing any additional business holdings in such business enterprise during such period (unless the combined holdings of the foundation and all disqualified persons fall below the 20 percent (or 35 percent, if applicable) figure prescribed by section 4943(c)(2)). Second, section 4943(c)(4)(A)(i) initially increases the percentage of permitted holdings of such a foundation to a percentage equal to the difference between—

(A) The percentage of combined holdings of the foundation and all disqualified persons in such business enterprise on May 26, 1969 (subject to a 50 percent maximum), and

(B) The percentage of holdings of all disqualified persons.

The percentage referred to in paragraph (a)(1)(i)(A) of this section is referred to in this section as the "substituted level". This "substituted level" is then reduced by the "downward ratchet rule" prescribed by section 4943(c)(4)(A)(ii) and paragraph (d)(3) of this section for certain dispositions by such foundation or by disqualified persons. The primary purpose of the substituted level is to indicate what the permitted holdings in such business enterprise will be immediately after the expiration of the first phase holding period. Thereafter, the permitted holdings of a private foundation itself are further limited to a maximum 25 percent interest in such business enterprise by section 4943(c)(4)(D) as soon as the combined holdings of all disqualified persons in such business enterprise exceed 2 percent (of the voting stock). If the combined holdings of all disqualified persons at no time exceed 2 percent (of the voting stock) during the 15 years following the first phase (the "second phase"), then the substituted level is reduced to a 35 percent maximum after the second phase.

(ii) Paragraph (a)(1)(i) of this section may be illustrated by the following example:

Example. On May 26, 1969, private foundation P held a 5 percent interest in corporation X (voting stock and value). On such date disqualified persons held a 16 percent interest in X (voting stock and value). Assume that except for section 4943(c)(4), P would have had a 1 percent interest in X which would have constituted excess business holdings. Therefore, section 4943(c)(4)(B) applies and P's 5 percent interest in X is treated as held by a disqualified person during the 10-year period beginning May 26, 1969. Since the entire 21 percent held by P and disqualified persons is now treated as held by disqualified persons, P's substituted level is 21 percent and its permitted holdings are zero (21%—21%). However, P has no excess business holdings in X, because during the 10-year period P is not treated as holding such interest. The only change in the interest in X occurs on January 2, 1972, when P disposes of 2 percent of its interest in X to A, an unrelated person. Since the interest held by P and all disqualified persons (21%—2%=19%) has decreased below 20 percent, P's substituted level is reduced to 20 percent and its permitted holdings are 1 percent (20%—19%) on such date. Therefore, if the other interests in X do not change, P will not have excess business holdings if P purchases no more than an additional 1 percent interest in X.

(2) *Interaction of provisions of section 4943(c)(4), (5), and (6).* During the first phase, a private foundation may acquire additional interests in a business enterprise, other than by purchase, which are entitled to be treated as held by disqualified persons for varying holding periods under section 4943(c)(5) or (6) (relating respectively to certain holdings acquired pursuant to the terms of a trust or will in effect on May 26, 1969, and to the 5-year period to dispose of certain gifts, bequests, etc.). In any case, holdings which the private foundation disposes of shall be charged first against those holdings which it must dispose of in the shortest period in order to avoid the initial tax thereon. Further, acquisitions of a private foundation under a pre-May 27, 1969, will or trust described in section 4943(c)(5) are treated in a manner similar to the treatment of interests actually held by a private foundation on May 26, 1969. See §§ 53.4943–5 and 53.4943–6.

(b) *Present holdings in general.* (1) Section 4943(c)(4)(B) provides that any interest in a business enterprise held by a private foundation on May 26, 1969, if the foundation on such date has excess business holdings (determined without regard to section 4943(c)(4)), shall (while held by the foundation) be treated as held by a disqualified person during a first phase. Therefore, no interest of a private foundation shall be treated as held by a disqualified person under section 4943(c)(4)(B) and this section unless:

(i) The private foundation was an entity (not including a revocable trust) in existence on May 26, 1969, even though it was not then treated as a private foundation under section 509 or section 4947;

(ii) Such interest was actually or constructively owned by such entity on such date; and

(iii) Without regard to section 4943(c)(4) such entity had on such date an interest (considered in connection with the interests actually or constructively owned by all disqualified persons with respect to such entity on that date in the same business enterprise, determined as if the entity were then a private foundation) which exceeded the permitted holdings prescribed by section 4943(c)(2) or (3).

(See, however, section 4943(c)(5) and § 53.4943–5 for similar treatment for certain interests acquired by a private foundation under the terms of a trust or a will which were in effect on May 26, 1969.) If a private foundation owns an interest described by section 4943(c)(4)(B), then the length of the first phase for such an interest is prescribed by paragraph (c) of this section and shall not be affected by any interest acquired by the private foundation or any disqualified person in such business enterprise after May 26, 1969. In addition, the amount of permitted holdings in such business enterprise is prescribed by paragraph (d) of this section. An interest constructively held by a private foundation (or a disqualified person) on May 26, 1969, shall not cease to be an interest to which section 4943(c)(4) applies merely because it is later distributed to such foundation (or to such disqualified person). Nor shall an interest directly held by a private foundation (or disqualified person) on May 26, 1969, cease to be treated as an interest to which section 4943(c)(4) applies to the extent it remains actually or constructively held by such foundation (or such disqualified person) upon transfer of such interest, such as upon the incorporation of a sole proprietorship.

(2) The provisions of this paragraph may be illustrated by the following example:

Example. A, a nonprofit research organization described in section 501(c)(3), was organized in 1966. On May 26, 1969, A held 50 percent of the stock of corporation B. For its taxable years 1970, 1971, and 1972, A is classified as an organization described in section 509(a)(2). However, for 1973 and subsequent years, A fails to satisfy the gross investment income limitation of section 509(a)(2)(B), and is thus classified as a private foundation. In such a case, section 4943(c)(4) applies, and a disqualified person shall be treated as holding A's stock in B during a first phase that begins on May 26, 1969.

(c) *First phase holding periods*—(1) *In general.* If, on May 26, 1969, a private foundation has excess business holdings in any business enterprise (determined with regard to the 20 or 35 percent permitted holdings of section 4943(c)(2)), then all interests which such foundation holds, actually or constructively, in such enterprise on May 26, 1969, shall (while held by such foundation) be deemed held by a disqualified person during the following periods:

(i) The 20-year period beginning on May 26, 1969, if the private foundation holds, actually or constructively, more than 95 percent of the voting stock (or more than a 95 percent profits or beneficial interest in the case of an unincorporated enterprise) in such enterprise on such date;

(ii) Except as provided in paragraph (c)(1)(i) of this section, the 15-year period beginning on May 26, 1969, if the private foundation and all disqualified persons hold, actually or constructively

V 42 1179 SEP 15 77 UMI

on such date, more than 75 percent of the voting stock (or more than a 75 percent profits or beneficial interest in the case of any unincorporated enterprise) or 75 percent of the value of all outstanding shares of all classes of stock in such enterprise (or more than a 75 percent profits and capital interest in the case of a partnership or joint venture); or

(iii) The 10-year period beginning on May 26, 1969, in any case not described in paragraph (c)(1)(i) or (ii) of this section.

The 20-year, 15-year, or 10-year period described in this subdivision (whichever applies) shall, for purposes of section 4943 and this section, be known as the "first phase".

(2) *Sole proprietorships.* The 20-year period described in paragraph (c)(1) of this section shall apply with respect to any interest which a private foundation holds in a sole proprietorship on May 26, 1969. See paragraph (b) of this section for the effect of converting such an enterprise to a corporate, partnership, or other form.

(3) *Suspension of first-phase periods.* The 20-year, 15-year, or 10-year period described in paragraph (c)(1) of this section shall be suspended during the pendency of any judicial proceeding which is brought and diligently litigated by the private foundation and which is necessary to reform, or to excuse the foundation from compliance with, its governing instrument or any other instrument (as in effect on May 26, 1969) in order to allow disposition of any excess business holdings held by the foundation on May 26, 1969.

(4) *Election to shorten the period during which certain holdings of private foundations are treated as held by disqualified persons.* If, on May 26, 1969, the combined holdings of a private foundation and all disqualified persons in any one business enterprise are such as to make applicable the 15-year period referred to in paragraph (c)(1)(ii) of this section, and if, on such date, the foundation's holdings do not exceed 95 percent of the voting stock in such enterprise, then such 15-year period is shortened to the 10-year period referred to in paragraph (c)(1)(iii), if at any time before January 1, 1971, one or more individuals—

(i) Who are substantial contributors (as described in section 507(d)(2)), or members of the family within the meaning of section 4946(d) of one or more substantial contributors, to such private foundation, and

(ii) Who on May 26, 1969, held in the aggregate more than 15 percent of the voting stock in the enterprise,

made an election in the manner described in 26 CFR 143.6 (rev. as of Apr. 1, 1974).

(5) *Examples.* The provisions of this paragraph (c) may be illustrated by the following examples:

Example (1). Assume that F, a private foundation, owns, on May 26, 1969, 50 shares of voting stock in corporation X representing 50 percent of the voting power in X and 25 percent of the value of all outstanding shares of all classes of stock in X. Assume further that A and B, the only disqualified persons with respect to F, own five shares each of voting stock in X on such date. The 10 shares of voting stock in X owned by A and B together represent 10 percent of the voting power in X and 5 percent of the value of all outstanding shares of all classes of stock in X. Under the provisions of § 53.4943-3, the excess business holdings of F in X (determined without regard to section 4943(c)(4)) as of such date are, therefore, 40 percent of X voting stock. Accordingly, since the combined holdings of F, A, and B in X are, on such date, less than 75 percent of the voting stock in X and less than 75 percent of the value of all outstanding shares of all classes of stock in X, under the provisions of section 4943(c)(4)(B)(iii), all holdings of F in X (i.e., 50 percent of X voting stock) will be treated as held by a disqualified person through May 25, 1979.

Example (2). Assume the facts as stated in Example (1), except that F, on December 15, 1969, purchases an additional 10 shares of voting stock in X representing 10 percent of X voting power. Assume, further, that there were no other transactions in the stock in X during 1969. While the 50 percent of X voting stock held by F on May 26, 1969, will be deemed held by a disqualified person through May 25, 1979, the additional 10 shares of X voting stock acquired by purchase by F on December 15, 1969, will not be deemed to be so held. Accordingly, since, under the provisions of § 53.4943-3, such 10 shares represent excess business holding of F in X, such 10 shares will be subject to the imposition of tax under the provisions of section 4943(a).

Example (3). Assume the facts as stated in Example (1), except that F, on December 15, 1971, acquires an additional 10 shares of voting stock in X (representing 10 percent of X voting power) under the terms of a will which was executed before May 26, 1969, to which section 4943(c)(5) applies. While the 50 percent of X voting stock held by F on May 26, 1969, will be deemed held by a disqualified person through May 25, 1979, the additional 10 percent of X voting stock acquired by F on December 15, 1971, will, under the provisions of section 4943(c)(5), be deemed held by a disqualified person through December 14, 1981. See § 53.4943-5.

Example (4). Assume that F, a private foundation, owns on May 26, 1969, 50 shares of voting stock in corporation Y representing 50 percent of the voting power in Y. Assume further that C and D, the only disqualified persons with respect to F, own on such date 15 shares each of Y voting stock and that the 30 shares of Y voting stock owned by C and D together represent 30 percent of the voting power in Y. Under the provisions of § 53.4943-3 the excess business holdings of F in Y (determined without regard to section 4943(c)(4)) as of such date are, therefore, 50 percent of Y voting stock. Accordingly, since the combined holdings of F, C, and D in Y represent, on such date, more than 75 percent of the voting stock in Y, under the provisions of section 4943(c)(4)(B)(ii), all holdings of F in Y (i.e., 50 percent of Y voting stock) will be treated as held by a disqualified person through May 25, 1984.

Example (5). M, a private foundation, owns on May 26, 1969, sole proprietorship S. Since, under the provisions of § 52.5954-3, M's ownership of S constitutes excess business holdings (determined without regard to section 4943(c)(4) as of May 26, 1969, and since M's interest in S is greater than 95 percent on such date, under the provisions of this paragraph a disqualified person will be treated as the owner of S for the 20-year period beginning on such date. If S is later incorporated, that percentage of the interest in S retained by M, even though less than a 95-percent interest, shall continue to be treated as held by a disqualified person through May 25, 1989.

Example (6). A and B, individuals, together own on May 26, 1969, 40 shares of voting stock in corporation X representing 40 percent of the voting power in X and 20 percent of the value of all outstanding shares of all classes of stock in X. A and B are both disqualified persons with respect to F, a private foundation, which owns no stock in X on May 26, 1969. On January 1, 1973, A and B donate the 40 shares of X voting stock held by them to F. Since F had no excess business holdings on May 26, 1969, section 4943(c)(4) does not apply. See however, section 4943(c)(6) and § 53.4943-6.

Example (7). Assume the facts as stated in Example (6), except that F, on May 26, 1969, owns 50 shares of voting stock in X, representing 50 percent of the voting power in X and 25 percent of the value of all outstanding shares of all classes of stock in X. Under the provisions of this paragraph, the 50 shares of X voting stock held by F on May 26, 1969 shall be treated in accordance with the provisions of section 4943(c)(4), while the 40 shares of X voting stock acquired by F on January 1, 1973 shall be treated in accordance with the provisions of section 4943(c)(6). See § 53.4943-6.

(d) *Permitted holdings under section 4943(c)(4)—(1) In general.* The permitted holdings of a private foundation to which section 4943(c)(4) applies in a business enterprise shall be as follows:

(i) The excess of the substituted combined voting level over the disqualified person voting level, and separately,

(ii) The excess of the substituted combined value level over the disqualified person value level.

(2) *Definitions.* For purposes of paragraph (d) of this section—

(i) The term "disqualified person voting level" on any given date means the percentage of voting stock held by all disqualified persons together on such date (including stock deemed held by such a person by reason of section 4943(c)(4), (5), or (6)).

(ii) The term "disqualified person value level" on any given date means the percentage of the total value of all outstanding shares of all classes of stock in a business enterprise held by all disqualified persons together on such date (including stock deemed held by such a person by reason of section 4943(c)(4), (5), or (6)).

(iii) The term "foundation voting level" prior to the second phase is equal to zero. After the first phase, such term on any given date means the lowest percentage of voting stock held by a private foundation (without regard to section 4943(c)(4)(B)) in a business enterprise on May 26, 1969, and at all times thereafter up to such date. See section 4943(c)(5) and § 53.4943-5 for the effect of interests acquired pursuant to the terms of certain wills or trusts in effect on May 26, 1969.

(iv) The term "foundation value level" prior to the second phase is equal to zero. After the first phase, such term on any given date means the lowest percentage of the total value of all outstanding shares of all classes of stock held by a private foundation (without

regard to section 4943(c)(4)(B)) in a business enterprise on May 26, 1969, and at all times thereafter up to such date. See section 4943(c)(5) and § 53.4943-5 for the effect of interests acquired pursuant to the terms of certain wills or trusts in effect on May 26, 1969.

(v) The term "substituted combined voting level" means the lowest percentage to which the sum of the foundation voting level plus the disqualified person voting level has been reduced since May 26, 1969, by paragraph (d)(4) of this section (the "downward ratchet rule"), subject to the following modifications:

(A) In no event shall such substituted level exceed 50 percent; and

(B) Such substituted level shall be increased (but not above 50 percent) in accordance with section 4943(c)(5) and § 53.4943-5 for certain interests acquired by such foundation pursuant to the terms of a will or trust in effect on May 26, 1969.

(vi) The term "substituted combined value level" means the lowest percentage to which the sum of the foundation value level plus the disqualified person value level has been reduced since May 26, 1969, by paragraph (d)(4) of this section (the "downward ratchet rule"), subject to the following modifications:

(A) In no event shall such substituted level exceed 50 percent; and

(B) Such substituted level shall be increased (but not above 50 percent) in accordance with section 4943(c)(5) and § 53.4943-5 for certain interests acquired by such foundation pursuant to the terms of a will or trust in effect on May 26, 1969.

(vii) In the case of an interest in a partnership or joint venture, definitions (i) through (iv) of this subparagraph shall be applied by substituting "profit interests" for "voting stock" and "all partnership interests" for "all outstanding shares of all classes of stock."

(viii) In the case of an interest in a business enterprise other than a corporation, partnership or joint venture, definitions (i) through (iv) of this subparagraph shall be applied by substituting "beneficial remainder interests" for "voting stock" and "all beneficial remainder interests" for "all outstanding shares of all classes of stock."

(ix) Each level defined in paragraph (d)(2)(iii), (iv), (v) and (vi) as of any date shall be carried over to the subsequent date subject to any adjustments prescribed for such level.

(3) *Permitted holdings—First phase.* Since during the first phase the substituted combined voting level generally does not exceed the disqualified person voting level, and the substituted combined value level generally does not exceed the disqualified person value level, the permitted holdings during the first phase are generally equal to zero. The permitted holdings during the first phase exceed zero only where the 20 percent (or 35 percent) limitation on the downward ratchet rule contained in paragraph (d)(4)(ii)(B) of this section applies.

(4) *Downward ratchet rule—(i) In general.* Except as provided in paragraph (d)(4)(ii) of this section and section 4943(c)(5)—

(A) *Scope of rule.* In general, when the percentage of the holdings in a business enterprise held by a private foundation and all disqualified persons together to which section 4943(c)(4) applies decreases, or when the percentage of the holdings of the private foundation alone in such business enterprise decreases, such holdings may not be increased (except as provided under section 4943(c)(5) or (6)). This so-called "downward ratchet rule" is designed to prevent the private foundation from purchasing additional holdings in the business enterprise until the substituted combined voting level reduced to the 20-percent (or 35 percent) figure prescribed by section 4943(c)(2).

(B) *Levels affected.* Under the downward ratchet rule any decrease after May 26, 1969, in the percentage of holdings comprising either the substituted combined voting level, the substituted combined value level, the foundation voting level or the foundation value level shall cause the respective level to be decreased to such decreased percentage for purposes of determining the foundation's permitted holdings.

(C) *Implementation of reductions.* Thus, if at any time the sum of the foundation voting level and the disqualified person voting level is less than the immediately preceding substituted combined voting level, the substituted level shall be decreased so that it equals such sum. For example, if on May 26, 1969, a foundation and all disqualified persons together have holdings in a business enterprise equal to 50 percent, on such date the substituted combined voting level and the disqualified person voting level equal 50 percent (since such holdings of the foundation are treated as held by a disqualified person). If the private foundation or a disqualified person on May 27, 1969, sold 2 percent of such holdings to a nondisqualified person, the disqualified person voting level would be decreased to 48 percent (50%—2%), causing the substituted combined voting level to be decreased to 48 percent. As a further example, assume that on May 26, 1969, a foundation and all disqualified persons together have holdings in a business enterprise equal to 50 percent, and when the first phase expires on May 26, 1979, the substituted combined voting level is still 50 percent, the foundation voting level is 10 percent, and the disqualified person voting level is 40 percent. If a disqualified person thereafter sells 2 percent to a nondisqualified person so that the sum of the disqualified person voting level (40%—2%=38%) and the foundation voting level (10%) equals 48 percent (38%+10%), then the substituted combined voting level is decreased to 48 percent. Similarly, if at any time the sum of the foundation value level and the disqualified person value level is less than the immediately preceding substituted combined value level, the substituted combined value level shall be decreased so that it equals such sum.

(D) *Restrictions on increases in levels.* In addition, none of the four levels referred to in paragraph (d)(4)(i)(B) of this section may be adjusted upward to reflect any increase in the holdings comprising such level, except as provided in section 4943(c)(5) and § 53.4943-5. As a result, any transfer of May 26, 1969, holdings from a disqualified person to a private foundation shall not increase the foundation voting level or the foundation value level (unless the transfer qualifies under section 4943(c)(5)), and thus may reduce the substituted combined value level (and, where appropriate, the substituted combined voting level). Thus, in the last preceding example, if the disqualified person, instead of selling the 2 percent interest to a nondisqualified person, had sold such interest to the foundation, the substituted combined voting level would still be reduced to 48 percent, since the disqualified person voting level would be reduced by 2 percent (to 38%) but the foundation voting level would not be increased by 2 percent (remaining at 10%). However, any transfer of May 26, 1969, holdings from a private foundation to a disqualified person under section 101(l)(2)(B) of the Tax Reform Act of 1969, shall reduce the foundation value level (and, where appropriate, the foundation voting level), but will not reduce the substituted combined value level or the substituted combined voting level. The disqualified person voting level and disqualified person value level are correspondingly increased, not being limited to interests held since May 26, 1969. In addition, a transfer of May 26, 1969, holdings from one disqualified person to another, for example, by bequest, shall not reduce the substituted combined voting level nor the substituted combined value level.

(ii) *Exceptions—(A) One percent de minimus rule.* If after May 26, 1969, there are one or more decreases in the holdings comprising any of the four levels referred to in paragraph (d)(4)(i)(B) of this section during any taxable year of a private foundation, and if such decreases are attributable to issuances of stock (or such issuances coupled with redemptions), then, unless the aggregate of such decreases equals or exceeds 1 percent, the determination of whether there is a decrease in such level for purposes of this paragraph (d)(4) shall be made only at the close of such taxable year. If, however, the aggregate of such decreases equals or exceeds 1 percent, such level shall be decreased at that time as if the previous sentence had never applied.

(B) *Twenty percent (or 35 percent) floor.* In no event shall the downward rachet rule contained in paragraph (d)(4)(i) of this section decrease the substituted combined voting level or the substituted combined value level below 20 percent, or, for purposes of section 4943(c)(2)(B), below 35 percent.

V 42 N 179 SEP 15 77 UMI

(iii) *Special rules*—(A) *Change of foundation managers.* In the case of a foundation manager (as defined in section 4946(b)) who on May 26, 1969, owns holdings in a business enterprise and who is replaced by another foundation manager, the decrease in the substituted combined voting or value levels shall be limited to the excess, if any, of the departing foundation manager's holdings over his successor's holdings.

(B) *Termination of private foundation status under section 507.* If an organization gives the notification described in section 507(b)(1)(B)(ii) of the commencement of a 60-month termination period and fails to meet the requirements of section 509(a) (1), (2) or (3) for the entire period, then such organization will be treated as a private foundation during the entire 60-month period for purposes of this paragraph (d)(4) and section 4946(a)(1)(H). For example, X, a private foundation gives notification of the commencement of a 60-month termination commencing on January 1, 1972. X and Y, another private foundation, are effectively controlled by the same persons within the meaning of section 4946(a)(1)(H). X and Y hold 25 percent each of the voting stock of Z corporation on May 26, 1969, so that the substituted combined voting level for X or Y is 50 percent on such date. If X meets the requirements of section 509(a) (1), (2), or (3) for the entire 60-month period, section 4946(a)(1)(H) is inapplicable to X, and, under the downward ratchet rule, the substituted combined voting level for Y is decreased by 25 percent. On the other hand, if X meets the requirements of section 509(a)(2) for its taxable years 1972 and 1973, but fails to meet the requirements of section 509(a) (1), (2), or (3) in 1974, 1975, and 1976, then solely for purposes of section 4943(c)(4)(A)(ii) and this paragraph (d)(4), X will be treated as a disqualified person with respect to Y, and Y will be treated as a disqualified person with respect to X, for taxable years 1972 through 1976 pursuant to section 4946(a)(1)(H). Thus, for purposes of section 4943(c)(4)(A)(ii), the substituted combined voting level for X or Y will not be decreased by reason of the fact that X was attempting to terminate under section 507(b)(1)(B), and assuming no other transactions, such level will remain at 50 percent.

(iv) *Examples.* The provisions of this paragraph (d) (4) may be illustrated by the following examples:

Example (1). F, a private foundation, owns on May 26, 1969, 50 shares of voting stock in corporation X representing 50 percent of the voting stock in X and 25 percent of the value of all outstanding shares of all classes of stock in X. A and B, the only disqualified persons with respect to F, together own, on such date, 2 shares of voting stock in X representing 2 percent of the voting stock in X and 1 percent of the value of all outstanding shares of all classes of stock in X. In addition, on such date, F owns 30 shares of nonvoting stock in X, representing 30 percent of the value of all outstanding shares of all classes of stock in X, and A and B together own 15 shares of nonvoting stock in X representing 15 percent of the value of all outstanding shares of all classes of stock in X. The provisions of section 4943(c)(4)(B)(iii) apply and during the 10-year period beginning on May 26, 1969, a disqualified person is deemed to hold all interests of F in X. Assume that on February 1, 1972, F sells to C, an unrelated individual, 12 shares of voting stock in X representing 12 percent of the voting stock in X and 6 percent of the value of all outstanding shares of all classes of stock in X.

(I) Beginning on May 26, 1969, the disqualified person voting level is 52 percent, the foundation voting level is zero, and the substituted combined voting level is 50 percent; the disqualified person value level is 71 percent, the foundation value level is zero, and the substituted combined value level is 50 percent.

(II) Beginning on February 1, 1972, the disqualified person voting level is 40 percent (52%−12%), the foundation voting level is zero, and the substituted combined voting level is 40 percent; the disqualified person value level is 65 percent (71%−6%), the foundation value level is zero and the substituted combined value level is 50 percent.

Example (2). F, a private foundation on the calendar year basis, holds, on May 26, 1969, 30 percent of the voting stock in corporation Y. C and D, the only disqualified persons with respect to F, together hold, on such date, 10 percent of the voting stock in Y. The provisions of section 4943(c)(4)(B)(iii) apply with respect to F, and disqualified persons are deemed to hold all interests of F in Y for the 10-year period beginning on May 26, 1969, so that the substituted combined voting level as of such date is 40 percent. On February 1, 1973, a stock issuance by Y causes the combined holdings of voting power by F, C, and D in Y to decrease by 0.3 percent. On June 1, 1973, another such issuance causes such combined holdings to decrease by 0.5 percent. In September 1, 1973, an unrelated stock redemption by Y causes such combined holdings to increase by 0.4 percent. Under this paragraph the determination whether there is a decrease in the substituted combined voting level for purposes of the downward ratchet rule shall not be made before January 1, 1974, since the aggregate of the decreases occurring on February 1 and June 1 of 1973 is less than 1 percent (0.3%+0.5%). Therefore, the substituted combined voting level as of January 1, 1974, is 39.6 percent (40%−[(0.3%+0.5%)−0.4%].)

Example (3). Assume the facts as stated in Example (2), except that, on October 1, 1973, a stock issuance by Y causes the combined holdings of voting power by F, C, and D in Y to decrease by 0.3 percent. Since the aggregate of the decreases occurring on February 1, June 1, and October 1, of 1973 exceeds 1 percent, the determination whether there is a decrease in the substituted combined voting level shall be made as of October 1, 1973. At that time the substituted combined voting level shall be reduced to 39.2 percent (40%−0.3%−0.5%), the lowest actual combined holdings during the period that the de minimis rule was in effect.

(5) *Permitted holdings—Second phase*—(i) *In general.*—For purposes of section 4943 and this section, the term "second phase" means the 15-year period immediately following the first phase. Upon the expiration of the first phase with respect to an interest to which section 4943(c)(4) applies, such interest shall no longer be treated as held by a disqualified person under section 4943(c)(4)(B). During the second phase, the manner of determining the permitted holdings of a private foundation to which section 4943(c)(4) applies shall be the same as applicable to the first phase, except that a 25 percent maximum shall apply under certain conditions specified in paragraph (d)(5)(ii) of this section. For these purposes the substituted combined voting level and the substituted combined value level in effect for the foundation at the end of the first phase shall be carried over to the second phase. The substituted levels are carried over because although there is a decrease in the disqualified person levels (since holding are no longer treated as held by disqualified persons under section 4943(c)(4)(B)), a corresponding increase in the foundation levels occurs. For example, if a private foundation on May 26, 1969, held 10 percent of the voting stock in a corporation and disqualified persons held 40 percent of the voting stock, both the disqualified person voting level and the substituted combined voting level equal 50 percent (10%+40%). Assuming no transactions during the first phase, on May 26, 1979, the disqualified person voting level would be decreased to 40 percent (50%−10%), but the foundation voting level would be increased to 10 percent so that the substituted combined voting level would remain at 50 percent. In addition, the downward ratchet rule of paragraph (d)(4) of this section shall continue to apply, to prevent the foundation and disqualified persons from purchasing any additional interest in the same enterprise until the substituted combined voting level decreases below 20 percent.

(ii) *25 percent maximum on foundation holdings.* If, or as soon as, the disqualified person voting level exceeds 2 percent after the expiration of the first phase, the permitted holdings shall not thereafter exceed 25 percent of the voting stock or 25 percent of the value of all outstanding shares of all classes of stock, even though the holdings of the foundation and all disqualified persons combined do not exceed the substituted level. Solely for purposes of determining whether the 25 percent limitation of this subdivision (ii) applies, the disqualified person voting level shall not be treated as exceeding 2 percent solely as a result of the holdings of a private foundation which are treated as held by a disqualified person by reason of section 4943(c)(5) or (6). For example, where under the constructive ownership rules for trusts in § 53.4943–8(b), a private foundation is deemed to own more than 2 percent of the voting stock of a business enterprise but such stock is treated as held by a disqualified person under section 4943(c)(5), the determination of the substituted percentage for permitted holdings in the second phase will be as if the foundation owned the stock held by the trust. Similarly, where a private foundation is the only remainder beneficiary of a trust that is a disqualified person under section 4946(a)(1)(H), the disqualified person voting level shall not be treated as exceeding 2 percent solely as a result of the holdings of such a trust.

(6) *Permitted holdings—Third phase.* For purposes of section 4943 and this section, the term "third phase" means the entire period following the second phase. During the third phase the manner of determining the permitted holdings of a private foundation to which section 4943(c)(4) applies shall be the same as applicable to the second phase under paragraph (d)(5) of this section (including the carryover of levels from the earlier phase). However, if the 25 percent limit of paragraph (d)(5)(ii) of this section never applied during the second phase, the substituted combined voting level and the substituted combined value level each shall not exceed 35 percent during the third phase.

(7) *Examples.* The provisions of this paragraph may be illustrated by the following examples:

Example (1). F, a private foundation, owns, on May 26, 1969, 30 shares of voting stock in corporation Z representing 30 percent of the voting power in Z and 15 percent of the value of all outstanding shares of all classes of stock in Z, and owns, on such date, 10 shares of nonvoting stock in Z representing 10 percent of the value of all outstanding shares of all classes of stock in Z. E and G, the only disqualified persons with respect to F, own, on such date, 5 shares each of nonvoting stock in Z. The 10 shares of nonvoting stock in Z owned by E and G together represent 10 percent of the value of all outstanding shares of all classes of stock in Z. Assume further that F cannot meet the requirements for the 35 percent test of section 4943(c)(2)(B). For purposes of applying section 4943(c)(4)(B) and this paragraph, F has excess business holdings in Z (determined without regard to section 4943(c)(4)), because under section 4943(c)(2)(A) F's permitted holdings are 20 percent (20%−0%) of the voting stock since disqualified persons have no holdings of voting stock. Therefore, section 4943(c)(4)(B) and this paragraph apply, and a disqualified person is treated as holding F's shares of both voting and nonvoting stock in Z for the 10-year period through May 25, 1979. Thus, since all holdings by F in Z are treated as held by a disqualified person during the first phase, F cannot be subject to tax under section 4943(a) on its May 26, 1969, holdings prior to the termination of the first phase, regardless of whether or not disqualified persons purchase additional shares of Z during the first phase.

Example (2). Assume the same facts as in Example (1), and further assume that there were no transactions in the stock of Z during the first phase (May 26, 1969 through May 25, 1979). During the first phase the permitted holdings by F in Z for both the voting stock and the value is zero. The disqualified person voting level and the substituted combined voting level are each 30 percent, and the disqualified person value level and the substituted combined value level are each 35 percent (15%+10%+10%). The substituted levels are carried over into the second phase. The disqualified person voting level on May 26, 1979, the beginning of the second phase, is zero, because the voting shares held by F are no longer treated as held by a disqualified person. Therefore, F's permitted holdings on such date are 30 percent of the voting stock, because such percentage is equal to the excess of the substituted combined voting level (30%) over the disqualified person voting level (0%). The disqualified person value level on May 26, 1979, is 10 percent, because the voting and nonvoting shares held by F are no longer treated as held by a disqualified person. Therefore, F's permitted holdings on such date are 25 percent of the value of Z stock, because such percentage is equal to the excess of the substituted combined value level (35%) over the disqualified person value level (10%) as of such date.

Example (3). Assume the facts as stated in Example (2), except that E and G acquire, on February 1, 1970, 10 shares of Z voting stock representing 10 percent of the voting power in Z and 5 percent of the value of all outstanding shares of all classes of stock in Z. During the first phase such permitted holdings remain zero, and prior to May 25, 1979, the substituted combined voting level and substituted combined value level remain 30 and 35 percent, respectively, because such levels may not be increased by acquisitions by disqualified persons. However, the disqualified person voting level and the disqualified person value level are each increased to 40 percent (30%+10%) and 40 percent (35%+5%) respectively. During the first phase the excess of the disqualified person voting level over the substituted combined voting level (40%−30%) and the excess of the disqualified person value level over the substituted combined value level (40%−35%) indicate how much stock F must dispose of during the first phase to avoid the initial tax when it expires. On May 25, 1979, the last day of the first phase, F disposes of 12 shares of Z voting stock, representing 12 percent of the voting power in Z and 6 percent of the value of all such outstanding shares. The disposition by F reduces the interest F owns to 18 percent (30%−12%) of the voting power, and 19 percent (25%−6%) of the value of all outstanding shares of all classes of stock, in Z. Since the disqualified person voting level decreases to 28 percent (40%−12%), the substituted combined voting level as of May 25, 1979, accordingly is decreased to 28 percent under the downward ratchet rule. Similarly, the substituted combined value level is decreased to 34 percent, as the disqualified person value level as of such date is 34 percent (40%−6%). On May 26, 1979, the disqualified person voting level is 10 percent (28%−18%), and the disqualified person value level is 15 percent (34%−19%), since the shares owned by F are no longer treated as held by a disqualified person as of such date. Accordingly, on May 26, 1979, the permitted holdings by F and Z are 18 percent of the voting power in Z, because such percentage is equal to the excess of the substituted combined voting level (28%) over the disqualified person voting level (10%) as of such date. Similarly, the permitted holdings of F in Z by value are 19 percent (34%−15%). If F had not disposed of the 12 shares, then on May 26, 1979, F's permitted holdings in voting power and value would be 20 percent (30%−10%) and 20 percent (35%−15%), respectively.

Example (4). F, a private foundation, owns on May 26, 1969, 35 shares of voting stock in corporation Y representing 35 percent of the voting stock in Y and 17.5 percent of the value of all classes of stock in Y, and owns on such date 45 shares of nonvoting stock representing 22.5 percent of the value of all outstanding shares of all classes of stock in Y. No disqualified person with respect to F owns, on such date, any stock in Y. Assume further that Y cannot meet the requirements of the 35 percent test of section 4943(c)(2)(B). For purposes of applying section 4943(c)(4)(B) and this paragraph, F has excess business holdings in Y (determined without regard to section 4943(c)(4)), because under section 4943(c)(2)(A) F's permitted holdings are 20 percent (20%−0%) of the voting stock since disqualified persons have no holdings of voting stock. Therefore, section 4943(c)(4)(B) and this paragraph apply, and a disqualified person is treated as holding F's shares of both voting and nonvoting stock in Y for the 10-year period through May 25, 1979. During the first phase the permitted holdings by F in Y of both the voting stock and of value are zero. The disqualified person voting level and the substituted combined value level are each 35 percent, and the disqualified person value level and the substituted combined value level are each 40 percent (17.5%+22.5%). The substituted levels are carried over into the second phase. The disqualified person voting level and value level on May 26, 1979, are both zero, because the shares held by F are no longer treated as held by a disqualified person. Therefore, F's permitted holdings on such date are 35 percent of the voting power (35%−0%) and 40 percent of the value (40%−0%). Assume that on February 1, 1981, A, a disqualified person, acquires 6 percent of the voting stock in Y representing 3 percent of the value of all outstanding shares of all classes of stock in Y. The permitted holdings by F in Z on February 1, 1981, are thus reduced to 25 percent of the voting stock (the lesser of the separate 25% second phase limitation or 29% (35% substituted combined voting level minus 6% disqualified person voting level)) and 25 percent of the value (the lesser of the separate 25% second phase limitation or 37% (40% substituted combined value level minus 3% disqualified person value level)). But see paragraph (d)(8) of this section for limitations on restrictions with respect to nonvoting stock.

Example (5). Assume the same facts as in Example (4) except that A does not acquire the 6 shares of voting stock until February 1, 1996 (in the third phase), rather than on February 1, 1981. Thus, F's permitted holdings in Y would remain at 35 percent of the voting stock and 40 percent of the value during the second phase, which expired on May 25, 1994. Assume that on May 25, 1994, the last day of the second phase, F disposes of 10 shares of nonvoting stock representing 5 percent of the value of all outstanding shares in Y to meet the 35 percent third phase limit. In accordance with the downward ratchet rule, the substituted combined value level and F's permitted holdings in Y would be reduced to 35 Percent of value. On February 1, 1996, F's permitted holdings in Y would be reduced to 25 percent of the voting stock (the lesser of the separate 25% third phase limitation or 29% (35% substituted combined voting level minus 6% disqualified person level)) and 25 percent of the value (the lesser of the separate 25% third phase limitation or 32% (35% substituted combined value level minus 3% disqualified person value level)). But see paragraph (d)(8) of this section for limitations on restrictions with respect to nonvoting stock.

(8) *Special rule where all holdings are permitted under section 4943(c)(2).* (i) Since section 4943(c)(4) and this paragraph provide transitional rules for foundations which would otherwise have had excess business holdings on May 26, 1969, no holdings shall cease to be permitted holdings under this paragraph where such holdings would be permitted holdings under section 4943(c)(2) and § 53.4943–3. Thus, for example, where the substituted combined voting level has been reduced to 20 percent, the provisions of § 53.4943–3(b)(2) concerning nonvoting stock as permitted holdings generally apply.

(ii) The provisions of this paragraph (d)(8) may be illustrated by the following example:

V 42 I 179 SEP 15 77 UMI

Example. (A) F, a private foundation, owns, on May 26, 1969, 40 shares of voting stock in corporation X representing 40 percent of the voting stock in X and 20 percent of the value of all outstanding shares of all classes of stock in X, and owns, on such date, 60 shares of nonvoting stock in X, representing 30 percent of the value of all outstanding shares of all classes of stock in X. A, the only disqualified person with respect to F, owns, on such date, 10 shares of voting stock in X, representing 10 percent of the voting stock in X and 5 percent of the value of all outstanding shares of all classes of stock in X. Under section 4943(c)(4)(B)(iii), a disqualified person is deemed the owner of all holdings by F in X for the 10-year period beginning on May 26, 1969.

(B) Assume that the only transaction in X stock during the first phase is the disposition of 30 shares of voting stock by F on May 1, 1975. The voting stock held by F is permitted holdings under § 53.4943-3 and under such section since all disqualified persons together do not own more than 20 percent of the voting stock in X, all nonvoting stock held by F shall also be treated as permitted holdings. Therefore, all the stock held by F is permitted holdings.

(C) Assume that on May 1, 1975, F had disposed of only 15 shares of voting stock and also had disposed of 35 shares of nonvoting stock. On May 26, 1979, at the beginning of the second phase, this paragraph (d)(8) would not apply since F would have excess business holdings under § 53.4943-3. Under the provisions of this section, the permitted holdings by F in X on such date are 25 percent of the voting stock (35% substituted combined voting level minus 10% disqualified person voting level) and 25 percent of the value (30% substituted combined value level minus 5% disqualified person value level)).

(9) *Special rule for certain private foundations.* In the case of a private foundation—

(i) Which was incorporated before January 1, 1951,

(ii) Substantially all of the assets of which on May 26, 1969, consisted of more than 90 percent of the stock of an incorporated business enterprise which is licensed and regulated, the sales or contracts of which are regulated, and the professional representatives of which are licensed, by State regulatory agencies in at least 10 States;

(iii) Which acquired such stock solely by gift, devise, or bequest;

(iv) Which does not purchase any stock or other interest in such enterprise after May 26, 1969, and does not acquire any stock or other interest in any other business enterprise which constitutes excess business holdings under § 53.4943-3; and

(v) Which, in the last 5 taxable years ending on or before December 31, 1970, expended substantially all of its adjusted net income (as defined in section 4942(f)) for the purpose or function for which it is organized and operated;

paragraph (d)(1) through (5) of this section (permitted holdings during the first and second phase) shall be applied with respect to the holdings of such foundation in such incorporated business enterprise by substituting "51 percent" for "50 percent," and section 4943(c)(4)(D) (third phase) shall not apply with respect to such holdings. For purposes of the preceding sentence, stock of such enterprise in a trust created before May 27, 1969, of which the foundation is the remainder beneficiary shall be deemed to be held by such foundation on May 26, 1969, if such foundation held (without reagrd to such trust) more than 20 percent of the stock of such enterprise on May 26, 1969.

§ 53.4943-5 Present holdings acquired by trust or a will.

(a) *Interests to which section 4943(c)(5) applies*—(1) *In general.* Section 4943(c)(5) provides that section 4943(c)(4) (other than the 20-year first phase holding period) applies to an interest in a business enterprise acquired after May 26, 1969 by a private foundation under the terms of a trust which was irrevocable on May 26, 1969, or under the terms of a will executed on or before May 26, 1969, which were in effect on May 26, 1969, and at all times thereafter, as if such interest were held on May 26, 1969. However the first phase holding period prescribed by § 53.4943-4(c)(1)(ii) or (iii) shall commence for such an interest on the date of distribution to the foundation. Unlike section 4943(c)(4) and § 53.4943-4, section 4943(c)(5) and this section treat only the interest so acquired (and not the entire interest held by the foundation in such enterprise on the date of distribution) as held by a disqualified person during a first phase holding period. (See, however, section 4943(c)(6) and paragraph (b)(2) of § 53.4943-6 for the treatment of other holdings of the foundation in the same enterprise if an interest to which section 4943(c)(5) applies is acquired from a person who was not a disqualified person prior to the acquisition.) In addition, section 4943(c)(5) and this section shall not apply if after the acquisition of such an interest the foundation would not have excess business holdings (determined without regard to section 4943(c)(4), (5), or (6)).

(2) *After-acquired interests.* Section 4943(c)(5) and this section shall not apply to any interest acquired after May 26, 1969, by an estate or trust, other than by reason of the death of the decedent. For example, where a foundation is a residuary beneficiary under the terms of a will executed before May 26, 1969, and the residue of the estate consists of cash, then stock subsequently purchased with this cash for distribution to the foundation will not be treated as an interest acquired under the terms of a will executed on or before May 26, 1969.

(3) *Certain revocable trusts.* If an interest in a business enterprise actually passes to a private foundation under a trust which would have met the tests referred to in paragraph (a)(1) of this section but for the fact that the trust was revocable (even though it was not in fact revoked) and such interest would have passed to such foundation under a will that meets those tests but for the fact that the grantor died without having revoked the trust, then for purposes of section 4943(c)(5) and this section, such an interest shall be treated as having been acquired by the foundation under the will.

(4) *Modification of will*—(i) *In general.* For purposes of section 4943(c)(5) and this section, an amendment or republication of a will which was executed on or before May 26, 1969, does not prevent any interest in a business enterprise which was to pass under the terms (which were in effect on May 26, 1969, and at all times thereafter) of such will from being treated as a present holding under section 4943(c)(4) or (5)—

(A) Solely because there is a reduction in the interest in the business enterprise which the foundation was to receive under the terms of the will (for example, if the foundation is to receive the residuary estate, and if one class of stock is disposed of by the decedent during his lifetime or by a subsequent codicil);

(B) Solely because such amendment or republication is necessary in order to comply with section 508(e) and the regulations thereunder;

(C) Solely because there is a change in the executor of the will; or

(D) Solely because of any other change which does not otherwise change the rights of the foundation with respect to such interest in the business enterprise.

However, if under such amendment or republication there is an increase in the interest in the business enterprise which the foundation was to receive under the terms of the will in effect on May 26, 1969, such increase shall not be treated as present holdings under section 4943(c)(4) or (5). Under such circumstances the interest which would have been acquired before such increase shall remain present holdings. See section 4943(c)(6) and § 53.4943-6 with respect to the treatment of such increase in holdings of a private foundation.

(ii) *Examples.* The provisions of this paragraph (a)(4) may be illustrated by the following examples:

Example (1). On May 9, 1985, A modifies by codicil his will which was in effect on May 26, 1969, and was unchanged until such modification. The purpose of the codicil was, in the event of A's death, to increase the number of shares in X Corporation that would pass to the W foundation from 70 percent of all the voting power and value to 80 percent. Under these facts, if A dies without further modifying the terms of the will which apply to W's interest in X, section 4943(c)(5) will apply to 70 percent of the X voting power and value and section 4943(c)(6) will apply to 10 percent of the X voting power and value, since 10 percent of the X voting power and value would not pass under a provision of the will which was in effect on May 26, 1969, and at all times thereafter. Accordingly, if the stock is distributed to W on July 6, 1988, then, assuming that on May 26, 1969, W and all disqualified persons owned less than 75% of the voting stock in X, an amount of such stock representing 70 percent of X voting power and value shall be treated as held by a disqualified person through July 5, 1998, and an amount of such stock representing 10 percent of X voting power and value shall be treated as held by a disqualified person through July 5, 1998.

Example (2). Assume the facts as stated in Example (1), except that the sole purpose of the codicil was to change the executor of the will. Under paragraph (a)(4)(i) of this section, such codicil will not prevent the X voting stock which was bequeathed to W from being treated as held by a disqualified person through July 5, 1998.

(b) *Holding periods*—(1) *In general.* An interest to which section 4943(c)(5) applies shall be entitled to a 15-year holding period starting on the date of distribution only if the interests actually or constructively owned by a private foundation and all disqualified persons on May 26, 1969, in a business enterprise exceed 75 percent of the voting stock (or of the profits or beneficial interest) or 75 percent of the value of all outstanding shares of all classes of stock (or of the profits and capital interest) in such enterprise. For purposes of the preceding sentence, interests held by the foundation on May 26, 1969, shall be deemed to include an interest to which section 4943(c)(5) applies and which has been acquired (on or before the date of distribution for the interest in question) from a person who was not a disqualified person on May 26, 1969. Therefore, if under the terms of a will in effect on May 26, 1969, and at all times thereafter, a private foundation is created on July 1, 1975, and receives 76 percent of the voting stock of a business enterprise on that date, such stock shall be treated as held by a disqualified person until June 30, 1990. Any interest to which section 4943(c)(5) applies but which is not entitled to a 15-year holding period shall be entitled to a 10-year holding period starting on the date of distribution. For purposes of this paragraph the date of distribution shall be deemed to occur no later than the date on which the trust or estate is considered to be terminated under § 1.641(b)-(3) of this chapter (Income Tax Regulations).

(2) *Constructive ownership prior to date of distribution.* To the extent that an interest to which section 4943(c)(5) applies is constructively held by a private foundation under section 4943(d)(1) and § 53.4943-8 prior to the date of distribution, it shall be treated as held by a disqualified person prior to such date by reason of section 4943(c)(5). In addition, in the case of a foundation's interest in a trust which was irrevocable on May 26, 1969, and to which both sections 4943(c)(4) and (c)(5) apply, the first phase holding period for such interest shall end with whichever such period under section 4943(c)(4) or (5) ends later. For example, if under the terms of such a trust, 96 percent of the voting stock in a business enterprise was constructively held by a private foundation on May 26, 1969, and was distributed to such foundation on June 30, 1970, such interest is entitled to a 20-year holding period beginning on May 26, 1969.

(c) *Permitted holdings*—(1) *In general.* The permitted holdings of a private foundation which has an interest in a business enterprise to which section 4943(c)(5) applies shall be determined in accordance with the rules of paragraph (d) of § 53.4943-4. The levels referred to in such paragraph shall be adjusted to take into account the acquisition of such an interest as if it were treated as held by a disqualified person from May 26, 1969, until the date of acquisition. See also § 53.4943-6(b)(2) for the special rule for interests held by a private foundation at the time it acquires a section 4943(c)(5) interest from a nondisqualified person. Thus, for example, if on June 30, 1975, the disqualified person voting level and the substituted combined voting level in corporation X with respect to foundation F are 45 percent, and a nondisqualified person's 10 percent voting interest in X is acquired by F on July 1, 1975, in a transaction to which section 4943(c)(5) applies, the above-mentioned levels shall be increased to 55 and 50 percent respectively, on July 1, 1975. However, if such interest had been acquired from a person who was a disqualified person on May 26, 1969, rather than from a nondisqualified person, no adjustments in such levels would have taken place on July 1, 1975. In such a case, though, at the beginning of the second phase on July 1, 1985, the foundation voting level would be increased by 10 percent, and the disqualified person voting level decreased by 10 percent (assuming that none of the acquired stock had been disposed of prior to such date).

(2) *Separate phases.* The phases for each interest to which section 4943(c)(5) applies start independently from those for any other interest of the foundation in the same enterprise to which section 4943(c)(4) or (5) applies. Therefore, until an interest enters its own second phase, the 25 percent limit described in paragraph (d)(5) of § 53.4943-4 shall not apply to such interest since such interest (and any subsequently acquired section 4943(c)(5) interest in the first phase) is still treated as held by a disqualified person for purposes of that 25 percent limit. In addition, if such an interest enters its second phase and at such time all disqualified persons together do not have holdings in excess of 2 percent of the voting stock in the same business enterprise, then the 25 percent limit of section 4943(c)(4)(D)(i) shall not then apply to such interest, even though such limit may have been applicable to an interest with an earlier second phase. Moreover, the 35 percent limit of section 4943(c)(4)(D)(ii) shall cause only interests which have entered the third phase to become excess business holdings, taking into account, however, interests in prior phases in determining the holdings subject to such limit.

(3) *Examples.* The provisions of this paragraph may be illustrated by the following examples: (After each example is a chart setting forth the chronological changes in the various levels referred to in paragraph (d) of § 53.4943-4.)

Example (1). On May 26, 1969, F, a private foundation, owns no stock in M Corporation, and A, a disqualified person owns 40 percent of the voting stock (voting power and value) in M. A dies on May 1, 1971, leaving 30 percent of the voting stock in M to F and leaving the other 10 percent to a disqualified person. Distribution is made on June 1, 1972, and assume that section 4943(c)(5) applies. No transactions in the stock of M, other than those described in this example, occur. On May 26, 1969, the substituted combined voting level is 40 percent, the disqualified person voting level is deemed to be 40 percent, and the permitted holdings by F in M is deemed to be 0 percent (40%—40%). On May 1, 1971 (the date that F acquired the M stock by reason of its constructive ownership of A's estate), the various levels remain unchanged. On May 1, 1971, the 30 percent interest is treated as held by a disqualified person for a period extending through May 31, 1982. On June 1, 1981, F disposes of 6 percent of the voting stock to a nondisqualified person. The substituted combined voting level and the disqualified person voting level thereby are reduced to 34 percent (40%—6%) each. On June 1, 1982, at the beginning of the second phase, the foundation voting level increases to 24 percent (30%—6%) and the disqualified person voting level is reduced to 10 percent (34%—10%). The substituted combined voting level as of June 1, 1982, remains at 34 percent. The permitted holdings as of such date are 24 percent (34%—10%). If F had not disposed of any holdings prior to June 1, 1982, F's permitted holdings would have been 25 percent, the lesser of 25 percent (the limitation of section 4943(c)(4)(D)(i)), or 30 percent (40%—10%). Since on such date the 30 percent interest would no longer have been treated as held by a disqualified person, F would have had excess business holdings of 5 percent (30%—25%).

Date	F owns (percent)	Interest treated as held by disqualified person (percent)	Disqualified persons own (percent)	Foundation voting level (percent)	Substituted combined voting level (percent)	Disqualified person voting level (percent)	Permitted holdings (percent)	Comments

SAFETY FILM KODAK
V 42 179 S SEP 15 77 UMI

Example (2). (i) On May 26, 1969, F, a private foundation, owns 30 percent of the voting stock of N Corporation (voting power and value) and disqualified persons own 20 percent of the voting stock of N Corporation. On May 1, 1971, B, a disqualified person, dies leaving 15 percent of the voting stock to F. Assume that distribution was made on June 1, 1972, and that section 4943(c)(5) applies. On May 26, 1969, the substituted combined voting level and the disqualified person voting levels are each 50 percent and the permitted holdings are 0 percent (50%−50%). On May 1, 1971, and June 1, 1972, these levels remain unchanged. On May 1, 1971, the 15 percent interest is treated as held by a disqualified person for a period extending through May 31, 1982.

(ii) On July 1, 1978, F sells 6 percent of the F stock to a nondisqualified person, thereby reducing the disqualified person voting level and the substituted combined voting level to 44 percent (50%−6%). On May 26, 1979, at the beginning of the second phase for F's 1969 holdings, the foundation voting level is 24 percent (30%−6%), the substituted combined voting level is still 44 percent, and the disqualified person voting level is 20 percent (44%−24%). The permitted holdings are 24 percent (44%−20%). In addition F's 24 percent holdings do not exceed the 25 percent limitation of section 4943(c)(4)(D)(1) and paragraph (d)(5)(ii) of § 53.4943-4.

(iii) On August 1, 1981, F sells 16 percent of the N stock to a nondisqualified person, thereby reducing the foundation voting level to 8 percent (24%−16%), and reducing the substituted combined voting level to 28 percent (44%−18%). The disqualified person voting level remains at 20 percent. On June 1, 1982, at the beginning of the second phase for F's holdings acquired by will, the substituted combined voting level is still 28 percent, the foundation voting level is 23 percent (8%+15%), the disqualified person voting level is 5 percent (20%−15%), and the permitted holdings are 23 percent (28%−5%).

(iv) If F had not disposed of the 6 percent on July 1, 1978, then on May 26, 1979, at the beginning of the second phase for F's 1969 holdings, F's permitted holdings would have been 25 percent, the lesser of 25 percent (the limitation of section 4943(c)(4)(D)(1)), or 30 percent (50%−20%). Since F's 30 percent interest would no longer have been treated as held by a disqualified person on May 26, 1979, F would have had excess business holdings of 5 percent (30%−25%). Similarly, if F had not disposed of the 16 percent interest on August 1, 1981 (but had disposed of the 6 percent interest), on July 1, 1982, at the beginning of the second phase for F's holdings acquired by will, F's permitted holdings would have been 25 percent, the lesser of 25 percent (under section 4943(c)(4)(D)(1)), or 39 percent (44%−5%). Since as of such date F's entire holdings of 39 percent would no longer have been treated as held by a disqualified person, F would have had excess business holdings of 14 percent (39%−25%).

Date	F owns (percent)	F's interest 1969 (percent)	F's interest 1971 (percent)	Interest treated as held by disqualified person (percent)	Disqualified persons own (percent)	Foundation voting level (percent)	Substituted combined voting level (percent)	Disqualified person voting level (percent)	Permitted holdings (percent)	Comments

Example (3). (i) On May 26, 1969, F, a private foundation owns 5 percent of the voting stock of O Corporation (voting power and value), and disqualified persons own 45 percent of the voting stock. C, a disqualified person, dies on May 1, 1971, and leaves 41 percent of the voting stock of O to F. Assume that distribution is made on June 1, 1972, and that section 4943(c)(5) applies. On May 26, 1969, the substituted combined voting level and the disqualified person voting level are 50 percent and the permitted holdings are 0 percent (50%−50%). On May 1, 1971, and June 1, 1972, the various levels remain unchanged. On May 1, 1971, the 41 percent interest is treated as held by a disqualified person for a period extending through May 31, 1982. On May 26, 1979, at the beginning of the second phase for F's 1969 holdings of 5 percent, the 5 percent is no longer treated as held by a disqualified person, the foundation voting level is 5 percent, the disqualified person voting level is reduced to 45 percent (50%−5%), and the substituted combined voting level remains at 50 percent. On such date F's permitted holdings are 5 percent (50%−45%). Since the 41 percent interest is treated as held by a disqualified person, the interest treated as held by F (5%) does not exceed the 25 percent limitation of section 4943(c)(4)(D)(1).

(ii) On August 1, 1981, F sells 22 percent of the O stock to a nondisqualified person, thereby reducing the foundation voting level to 0 percent. Since the reductions are first applied to the 1969 holdings of 5 percent, 17 percent (22%−5%) applies to the 41 percent interest, reducing such interest to 24 percent (41%−17%), and reducing the disqualified person voting level to 28 percent (45%−17%). The substituted combined voting level is reduced to 28 percent (0%+28%). On June 1, 1982, at the beginning of the second phase for F's holdings acquired by will, the substituted combined voting level remains at 28 percent, the foundation voting level is 24 percent, the disqualified person voting level is reduced to 4 percent (28%−4%).

(iii) If F had not disposed of the 22 percent interest prior to June 1, 1982, F's permitted holdings would have been 25 percent, the lesser of 25 percent (under section 4943(c)(4)(D)(1)), or 46 percent (50%−4%). Since as of such date, F's entire holdings of 46 percent would no longer have been treated as held by a disqualified person, F would have had excess business holdings of 21 percent (46%−25%).

Date	F owns (percent)	F's interest 1969 (percent)	F's interest 1971 (percent)	Interest treated as held by disqualified person (percent)	Disqualified persons own (percent)	Foundation voting level (percent)	Substituted combined voting level (percent)	Disqualified person voting level (percent)	Permitted holdings (percent)	Comments

Example (4). (i) On May 26, 1969, F, a private foundation, owns 30 percent of the voting stock in F Corporation (voting power and value), and disqualified persons own 20 percent. On May 1, 1971, D, a disqualified person, dies leaving 18 percent of the voting stock to F. Assume that distribution was made on June 1, 1972, and that section 4943(c)(5) applies. On May 26, 1969, the substituted combined voting level and the disqualified person voting level are each 50 percent and the permitted holdings are 0 percent (50%−50%). On May 1, 1971, and June 1, 1972, these levels remain unchanged. On May 1, 1971, the 18 percent interest is treated as held by a disqualified person for a period extending through May 31, 1982. On May 26, 1979, the foundation voting level increases to 30 percent, the disqualified person voting level decreases to 20 percent (50%−30%), and the permitted holdings are 30 percent (50%−20%). On June 1, 1982, the foundation voting level increases to 48 percent, the disqualified person voting level decreases to 2 percent and the permitted holdings are 48 percent (50%−2%). Since at no time during the second phase for F's 1969 holdings did all disqualified persons together have holdings in excess of 2 percent of the voting stock of P, the 25 percent limitation of section 4943(c)(4)(D)(1) did not apply to F's 1969 holdings.

(ii) On July 1, 1993, F disposes of 16 percent of the stock in P, thereby reducing the substituted combined voting level to 34 percent (50%−16%), and reducing the permitted holdings to 32 percent (34%−2%). If F had not disposed of the 16 percent of the stock of P prior to May 26, 1994, on such date, under section 4943(c)(4)(D)(ii), F's substituted combined voting level for its 1969 holdings would have been 35 percent, and the permitted holdings would have been 33 percent (35%−2%). Since none of F's holdings of 48 percent would have been treated as held by a disqualified person on such date (the beginning of the third phase for F's 1969 holdings), F would have had excess business holdings of 15 percent, the lesser of 30 percent (F's 1969 holdings in the third phase), or 15 percent (the excess of F's 48 percent holdings over the permitted holdings of 33 percent).

Date	F owns (percent)	1969 F's interest (percent)	1971 F's interest (percent)	Interest treated as held by disqualified person (percent)	Disqualified persons own (percent)	Foundation voting level (percent)	Substituted combined voting level (percent)	Disqualified person voting level (percent)	Permitted holdings (percent)	Comments

Example (5). (i) On May 26, 1969, F, a private foundation, owns 5 percent of the voting stock in Q Corporation (voting power and value), and disqualified persons own 45 percent. On May 1, 1971, E, a disqualified person, dies leaving 43 percent of the voting stock to F. Assume that distribution was made on June 1, 1972, and that section 4943(c)(5) applies. On May 26, 1969, the substituted combined voting level and the disqualified person voting level are each 50 percent and the permitted holdings are 0 percent (50%−50%). On May 1, 1971, and June 1, 1972, these levels remain unchanged. On May 1, 1971, the 43 percent interest is treated as held by a disqualified person for a period extending through May 31, 1982. On May 26, 1979, the foundation voting level increases to 5 percent, the disqualified person voting level decreases to 45 percent, and the permitted holdings are 5 percent (50%−45%). On June 1, 1982, the foundation voting level increases to 48 percent, the disqualified person voting level decreases to 2 percent, and the permitted holdings are 48 percent (50%−2%). At no time during the second phase for F's 1969 holdings did all disqualified persons together have holdings in excess of 2 percent of the voting stock of Q. Therefore, the 25 percent limitation of section 4943(c)(4)(D)(i) did not apply.

(ii) On July 1, 1993, F sells 6 percent of the stock in Q to a nondisqualified person. This reduces the substituted combined voting level to 44 percent and reduces the permitted holdings to 42 percent (44%−2%). If F had

V 42 1 79 SEP 15 77 UMI

not disposed of the 6 percent of the stock in 1993, on May 26, 1994, at the beginning of the third phase for F's 1969 holdings, F would have had 5 percent excess business holdings. The excess business holdings are 5 percent because although the excess business holdings computed for the third phase are 15 percent (the excess of F's actual holdings (48%) over the permitted holdings of 33 percent (35%−2%)), only 5 percent of the holdings are in this phase and subject to the 35 percent combined holdings limitation.

(iii) On July 1, 1995, F sells 10 percent of the stock in Q, thereby reducing the substituted combined voting level to 34 percent and reducing the permitted holdings to 32 percent (34%−2%). If F had not disposed of the 10 percent of the stock, on June 1, 1997, at the beginning of the third phase for F's acquired holdings, F would have had 9 percent excess business holdings (the excess of F's total holdings in the third phase (42%) over the permitted holdings of 33 percent (35%−2%)).

Example (6). (i) On May 26, 1969, F, a private foundation, owns 30 percent of the voting stock in R Corporation (voting power and value), and disqualified persons own 20 percent. On August 1, 1978, F disposes of 6 percent of the stock to a nondisqualified person. On May 1, 1981, G, a disqualified person, dies leaving 15 percent of the voting stock to P. Assume that distribution was made one June 1, 1982, and that section 4943(c)(5) applies. On May 26, 1969, the substituted combined voting level and the disqualified person voting level are each 50 percent, and the permitted holdings are 0 percent (50%−50%). On August 1, 1978, these levels decrease to 44 percent (50%−6%). On May 26, 1979, the foundation voting level increases to 24 percent (30%−6%), the disqualified person voting level decreases to 20 percent (44%−24%), and the permitted holdings are 24 percent (44%−20%). If F had not disposed of the 6 percent of the stock prior to May 26, 1979, on May 26, 1979, the beginning of the second phase for F's 1969 holdings, F's permitted holdings would have been 25 percent, the lesser of 25 percent (under section 4943(c)(4)(D)(i)) or 30 percent (50%−20%). Since the 30 percent interest would no longer have been treated as held by a disqualified person on such date, F would have had excess business holdings of 5 percent (30%−25%).

(ii) On May 1, 1981, and June 1, 1982 (assuming F had disposed of the 6 percent holdings), the foundation voting level, the disqualified person voting level, the substituted combined voting level and permitted holdings remain respectively 24 percent, 20 percent, 44 percent and 24 percent. On May 1, 1981, the 15 percent interest is treated as held by a disqualified person for a period extending through May 31, 1992. On July 1, 1991, F sells 16 percent of the voting stock in R to a nondisqualified person, thereby reducing the substituted combined voting level to 26 percent (44%−16%), and reducing the foundation voting level to 8 percent (24%−16%). The disqualified person voting level remains at 20 percent. On June 1, 1992, at the beginning of the second phase for F's holdings acquired by will, the substituted combined voting level remains at 26 percent, the foundation voting level increases to 23 percent (8%+15%) and the disqualified person voting level decreases to 5 percent (20%−15%). The permitted holdings on such date are 23 percent (28%−5%). If F had not disposed of the 16 percent interest prior to June 1, 1992, F's permitted holdings would have been 25 percent, the lesser of 25 percent (under section 4943(c)(4)(D)(i)) or 39 percent (44%−5%). Since as of such date, F's entire holdings of 39 percent would no longer have been treated as held by a disqualified person, F would have had excess business holdings of 14 percent (39%−25%).

Date	F owns (percent)	1969 F's interest (percent)	1981 F's interest (percent)	Interest treated as held by disqualified person (percent)	Disqualified persons own (percent)	Foundation voting level (percent)	Substituted combined voting level (percent)	Disqualified person voting level (percent)	Permitted holdings (percent)	Comments

Example (7). On May 26, 1969, F, a private foundation, owns 5 percent of the voting stock in S Corporation (voting power and value), and disqualified persons own 45 percent. On May 1, 1980, H, a disqualified person, dies leaving 41 percent of the voting stock to F. Assume that distribution is made on June 1, 1981, and that section 4943(c)(5) applies. On May 26, 1969, the substituted combined voting level and disqualified person voting levels are each 50 percent. On May 26, 1979, the disqualified person voting level decreases to 45 percent, the foundation voting level increases to 5 percent, and the permitted holdings are 5 percent (50%−45%). On May 1, 1980, and June 1, 1981, the levels remain the same. Since the 41 percent holdings are treated as held by a disqualified person for the period beginning on May 1, 1980, and extending through May 31, 1991, F's remaining holdings of 5 percent do not exceed the 25 percent limitation of section 4943(c)(4)(D)(i).

(ii) On August 1, 1990, F sells 22 percent of the voting stock of S to a nondisqualified person, reducing the 5 percent foundation voting level to zero, leaving 17 percent (22%−5%) to reduce the disqualified person voting level to 28 percent (45%−17%) so that the substituted combined voting level equals 23 percent (50%−22%). On June 1, 1991, the beginning of the second phase for the remaining 24 percent (41%−17%) of F's holdings acquired by will, the foundation voting level increases from zero to 24 percent, the disqualified person voting level decreases to 4 percent (28%−24%), the substituted combined voting level remains at 28 percent, and the permitted holdings equal 24 percent (28%−4%).

(iii) If F had not disposed of the 22 percent holdings prior to June 1, 1991, F's permitted holdings would have been 25 percent, the lesser of 25 percent (under section 4943(c)(4)(D)(i)) or 46 percent (50%−4%). Since as of such date, F's entire holdings of 46 percent would no longer have been treated as held by a disqualified person, F would have had excess business holdings of 21 percent (46%−25%).

Date	F owns (percent)	1969 F's interest (percent)	1980 F's interest (percent)	Interest treated as held by disqualified person (percent)	Disqualified persons own (percent)	Foundation voting level (percent)	Substituted combined voting level (percent)	Disqualified person voting level (percent)	Permitted holdings (percent)	Comments

§ 53.4943–6 Five-year period to dispose of gifts, bequests, etc.

(a) *In general*—(1) *Application.* (i) Paragraph (6) of section 4943(c) prescribes transition rules for a private foundation, which, but for such paragraph, would have excess business holdings as a result of a change in the holdings in a business enterprise after May 26, 1969 (other than by purchase by such private foundation or by a disqualified person) to the extent that section 4943(c)(5) (relating to certain holdings acquired under a pre-May 27, 1969, will or trust) does not apply.

(ii) Subparagraph (A) of section 4943(c)(6) applies where, immediately prior to a change in holdings described in paragraph (a)(1)(i) of this section, the foundation has no excess business holdings in such enterprise (determined without regard to section 4943(c)(4), (5), or (6)). In such a case, the entire interest of the foundation in such enterprise (immediately after such change) shall (while held by the foundation) be treated as held by a disqualified person (rather than by the foundation) during the five-year period beginning on the date of such change.

(iii) Subparagraph (B) of section 4943(c)(6) applies where the foundation has excess business holdings in such enterprise (determined without regard to section 4943(c)(4), (5), or (6)) immediately prior to a change in holdings described in paragraph (a)(1)(i) of this section. In such a case, the interest of the foundation in such enterprise (immediately after such change) shall (while held by the foundation) be treated as held by a disqualified person (rather than the foundation) during the five-year period beginning on the date of such change, except that if and as soon as any holdings in such enterprise become excess business holdings during such period (determined without regard to such change (and the resulting application of section 4943(c)(6) to the foundation's interest in such enterprise)), such holdings shall no longer be treated as held by a disqualified person under this section, but shall constitute excess business holdings subject to the initial tax. In applying the preceding sentence, if holdings of the foundation which (but for such change in holdings (and the resulting application of section 4943(c)(6) to the foundation's interest in such enterprise)) would be subject to the 25 percent limit prescribed by section 4943(c)(4)(D) after the expiration of the first phase, such holdings shall be treated as subject to such percentage limitation for purposes of determining excess business holdings. For example, if a private foundation in 1978 has present holdings of 28 percent in a business enterprise to which section 4943(c)(4) applies, and such holdings would exceed the 25 percent limit of section 4943(c)(4)(D)(i) on May 26, 1979, a gift of 5 percent to the foundation in 1978 of an interest in such enterprise shall not prevent the 3 percent (28%−25%) excess over the 25 percent limit from constituting excess business holdings on May 26, 1979, if on such date disqualified persons hold more than a 2 percent interest in such enterprise (and no other transaction has taken place).

(2) *"Purchase" defined.* [Reserved]

(3) *Examples.* The provisions of paragraph (a) of this section may be illustrated by the following examples:

Example (1). On January 4, 1985, A, an individual, makes a contribution to F, a private foundation, of 200 shares of X Corporation common stock. Assume that F had no X stock before January 4, 1985, and under section 4943(c)(1) the receipt of the X stock by F would cause some or all of the 200 shares of the X stock to be classified as excess business holdings. Under the provisions of section 4943(c)(6)(A) and this paragraph (a), since the contribution of the X stock to F is a gift and not a purchase, the X stock in F's hands is treated as held by disqualified persons and not by F through January 3, 1990.

Example (2). Assume the facts as stated in Example (1) except that F receives the X stock as a bequest pursuant to the terms of A's will executed on April 1, 1980. A dies on June 3, 1984, and the stock is distributed to F on February 16, 1985. As in Example (1), the bequest of X to F is not a purchase under this paragraph (a). Consequently, the X stock in F's hands is treated as held by disqualified persons and not by F through February 15, 1990.

Example (3). On February 1, 1980, F, a private foundation, owns 15 percent of the voting stock of X Corporation, and disqualified persons own 4 percent of the voting stock of X Corporation. On February 2, 1980, B, a nondisqualified person, contributes 8 percent of the voting stock of X to F in a transaction to which section 4943(c)(5) does not apply. Assuming that the 35 percent limit of section 4943(c)(2)(B) does not apply, under the provisions of section 4943(c)(6)(A) and paragraph (a) of this section the 23 percent voting stock owned by F on such date is treated as held by a disqualified person through February 1, 1985, since F would have had excess business holdings of 7 percent as a result of the contribution (23% actual holdings less 16% (20%−4%) permitted holdings). On March 1, 1984, C, another nondisqualified person, contributes 6 percent of the voting stock of X Corporation to F. But for this second contribution and the resulting application of section 4943(c)(6) to F's interest in X, F would have excess business holdings of 7 percent (23%−16%) within the five-year period beginning on the date of such contribution. Accordingly, under section 4943(c)(6)(B) and paragraph (a) of this section, all 29 percent (6%+23%) of the stock held by F on March 1, 1984, will be treated as held by a disqualified person until March 1, 1989, except that 7 percent will cease to be so treated on February 2, 1985. If prior to February 2, 1985, no further transactions occurred in the stock of X, F would have excess business holdings of 7 percent subject to the initial tax, since the amount still treated as held by disqualified persons (29%−7%) plus the amount actually held by disqualified persons (4%) already exceed 20 percent.

(b) *Special rules for acquisitions by will or trust*—(1) *In general.* In the case of an acquisition of holdings in a business enterprise by a private foundation pursuant to the terms of a will or trust,

V 42 I 179 SEP 15 77 UMI

the five-year period described in section 4943(c)(6) in this section shall not commence until the date on which the distribution of such holdings from the estate or trust to the foundation occurs. See § 53.4943–5(b)(1) for rules relating to the determination of the date of distribution under the terms of a will or trust. To the extent that an interest to which 4943(c)(6) applies is constructively held by a private foundation under section 4943(d)(1) and § 53.4943–8 prior to the date of distribution, it shall be treated as held by a disqualified person prior to such date by reason of section 4943(c)(6). See § 53.4943–8 for rules relating to constructive ownership by a private foundation of business holdings held in an estate or trust for the benefit of the foundation.

(2) *Special rule for section 4943(c)(5) interests acquired from a nondisqualified person.* (i) In the case of holdings of a private foundation in a business enterprise to which section 4943(c)(5) (relating to certain holdings acquired under a pre-May 27, 1969, will or trust) applies which are acquired from a nondisqualified person, the interest of the foundation in such enterprise (immediately after such acquisition) shall (while held by the foundation) be treated as held by a disqualified person (rather than the foundation) under section 4943(c)(6)(B) and paragraph (a)(1)(iii) of this section from the date of acquisition until the end of the fifth year following the date of distribution of such holdings. Thereafter, only the holdings to which section 4943(c)(5) and § 53.4943–5(a)(1) apply shall continue to be treated as held by a disqualified person until the end of the first phase with respect thereto.

(ii) The provisions of paragraph (b)(2)(i) of this section may be illustrated by the following examples:

Example (1). On May 26, 1969, F, a private foundation, owns 5 percent of the voting stock of Corporation X and no disqualified persons own any stock in X. On June 30, 1977, a nondisqualified person bequeaths to F 33 percent of the voting stock in X to which section 4943(c)(5) applies. This 33 percent interest is distributed to F on August 17, 1978. Under section 4943(c)(6)(A) the entire 38 percent (5%+33%) of the X voting stock shall be treated as held by a disqualified person from June 30, 1977 (the date the 33 percent interest is constructively acquired by F) until August 17, 1983 (five years after the date of distribution of the 33 percent interest to F). However, assuming that the 35 percent limit of section 4943(c)(2)(B) does not apply, the substituted combined voting level on June 30, 1977 is only 33 percent because there was no interest to which section 4943(c)(4) or (5) applied immediately before that date and thus there was no substituted combined voting level at that time. In that case, since the 3-phase holding period is only available for the interest acquired by will (33%) under section 4943(c)(5), the substituted combined voting level on June 30, 1977 is only 33 percent, not 38 percent. Assuming that the substituted combined voting level remains 33 percent at all relevant times, and prior to August 17, 1983, no further transactions occur in the stock of X, F on that date would have excess business holdings of 5 percent subject to the initial tax. The amount treated as held by disqualified persons at that time (33%) would equal the substituted combined voting level at that time (33%), and thus permitted holdings would be zero. Under section 4943(c)(5) the 33 percent interest will continue to be treated as held by a disqualified person until August 17, 1988 (10 years after the date of distribution).

Example (2). On May 26, 1969, F, a private foundation, owns 29 percent of the stock (voting power and value) of Corporation X, and on June 30, 1977, a nondisqualified person bequeaths to F 23 percent of the stock (voting power and value) in X to which section 4943(c)(5) does apply. This 23 percent interest is distributed to F on August 17, 1978. Disqualified persons hold no stock of X. Although the substituted combined voting and value levels cannot exceed 50 percent on May 26, 1979 (at the start of the second phase with respect to the 29 percent interest), under section 4943(c)(6)(B) the entire 52 percent (29%+23%) of the X voting stock shall be treated as held by a disqualified person from June 30, 1977 (the date the 23% interest is constructively acquired by F) until August 17, 1983 (five years after the date of distribution of the 23% interest to F). On June 1, 1980, during such second phase, D, a disqualified person, purchases 3 percent of the X stock (voting power and value). On such date, but for the acquisition by F of the 23 percent interest, F would have had excess business holdings of 4 percent. The purchase by D of more than 2 percent of the voting stock of X causes the 25 percent limit of section 4943(c)(4)(D)(i) to apply to the 29 percent interest (29%−25%=4%). Thus, on June 1, 1980, 4 percent of the X voting stock held by F since May 27, 1969, shall cease to be treated as held by a disqualified person under section 4943(c)(6)(B) and become excess business holdings subject to the initial tax. See § 53.4943–2(a)(1)(ii) for the 90-day period in which to dispose of these excess business holdings resulting from the purchase by the disqualified person.

(c) *Exceptions.* (1) Section 4943(c)(6) and this section shall not apply to any transfer of holdings in a business enterprise by one private foundation to another private foundation which is related to the first foundation within the meaning of section 4946(a)(1)(H).

(2) Section 4943(c)(6) and this section shall not apply to an increase in the holdings of a private foundation in a business enterprise that is part of a plan whereby disqualified persons will purchase additional holdings in the same enterprise during the five-year period beginning on the date of such change, e.g., to maintain control of such enterprise, since such increase shall be treated as caused in part by the purchase of such additional holdings.

(3) The purchase of holdings by an entity whose holdings are treated as constructively owned by a foundation or a disqualified person under section 4943(d)(1) shall be treated as purchased by such foundation or disqualified person. Thus, if a foundation receives a specific bequest of 40 percent of the voting stock of a corporation and $20,000 in cash, and the estate uses the cash to purchase additional voting stock of the same corporation, the provisions of this section shall only apply to the 40 percent originally held by the estate, and the additional stock will be treated as if purchased by the foundation.

§ 53.4943–7 Special rules for corporate organizations, reorganizations, redemptions, and distributions. [Reserved]

§ 53.4943–8 Business holdings; constructive ownership.

(a) *Constructive ownership*—(1) *In general.* For purposes of section 4943, in computing the holdings in a business enterprise of a private foundation, or a disqualified person (as defined in section 4946), any stock or other interest owned, directly or indirectly, by or for a corporation, partnership, estate or trust shall be considered as being owned proportionately by or for its shareholders, partners, or beneficiaries except as otherwise provided in paragraphs (b), (c) and (d) of this section. Any interest in a business enterprise actually or constructively owned by a shareholder of a corporation, a partner of a partnership, or a beneficiary of an estate or trust shall not be considered as constructively held by the corporation, partnership, trust or estate. Further, if any corporation, partnership, estate or trust has a warrant or other option to acquire an interest in a business enterprise, such interest is not deemed to be constructively owned by such entity until the option is exercised. (See paragraph (b)(2) of § 53.4943–3 for rules that options are not stock for purposes of determining excess business holdings.)

(2) *Powers of appointment.* Any interest in business enterprise over which a foundation or a disqualified person has a power of appointment exercisable in favor of the foundation or a disqualified person shall be considered owned by the foundation or disqualified person holding such power of appointment.

(b) *Estates and trusts*—(1) *In general.* Any interest actually or constructively owned by an estate or trust is deemed constructively owned, in the case of an estate, by its beneficiaries or, in the case of a trust, by its remainder beneficiaries except as provided in paragraphs (b)(2), (3) and (4) of this section (relating to certain split-interest trusts described in section 4947(a)(2), to trusts of qualified pension, profit-sharing, and stock bonus plans described in section 401(a) and to revocable trusts). Thus, if a trust owns 100 percent of the stock of a corporation A, and if, on an actuarial basis, W's life interest in the trust is 15 percent, Y's life interest is 25 percent, and Z's remainder interest is 60 percent, under this paragraph (b), Z will be considered to be the owner of 100 percent of the stock of corporation A. See § 53.4943–4, § 53.4943–5 and § 53.4943–6 for rules relating to certain actual or constructive holdings of a foundation being treated as held by a disqualified person. For the treatment of certain property acquired by an estate or trust after May 26, 1969, see paragraph (a)(2) of § 53.4943–5.

(2) *Split-interest trusts*—(i) *Amounts transferred in trust after May 26, 1969.* In the case of an interest in a business enterprise which was transferred to a trust described in section 4947(a)(2) after May 26, 1969, for the benefit of a private foundation, no portion of such interest shall be considered as owned by the private foundation—

(A) If the foundation holds only an income interest in the trust, or

(B) If the foundation holds only a remainder interest in the trust (unless the foundation can exercise primary investment discretion with respect to such interest)

until such trust ceases to be so described. See section 4947(a)(2) and (b)(3) and the regulations thereunder for rules relating to such trusts. See also sections 4946(a)(1)(G) and (H) and the regulations thereunder for rules relating to when a trust described in this paragraph (b)(2) is itself a disqualified person.

(ii) *Amounts transferred in trust on or before May 26, 1969.* In the case of an interest in a business enterprise which was transferred to a trust described in section 4947(a)(2) (without regard to section 4947(a)(2)(C)) on or before May 26, 1969, for the benefit of a private foundation, no portion of such interest shall be considered as owned by the foundation until it is actually distributed to the foundation or until the trust ceases to be so described. See section 4943(c)(5) and § 53.4943–5 for rules relating to certain trusts which were irrevocable on May 26, 1969.

(3) *Employee benefit trusts.* An interest in a business enterprise owned by a trust described in section 401(a) (pension and profit-sharing plans) shall not be considered as owned by its beneficiaries, unless disqualified persons (within the meaning of section 4946) control the investment of the trust assets.

(4) *Revocable trusts.* An interest in a business enterprise owned by a revocable trust shall be treated as owned by the grantor of such trust.

(5) *Estates.* For purposes of applying section 4943(d)(1) to estates, the term "beneficiary" includes any person (including a private foundation) entitled to receive property of a decedent pursuant to a will or pursuant to laws of descent and distribution. However, a person shall no longer be considered a beneficiary of an estate when all the property to which he is entitled has been received by him, when he no longer has a claim against the estate and when there is only a remote possibility that it will be necessary for the estate to seek the return of property or to seek payment from him by contribution or otherwise to satisfy claims against the estate or expenses of administration. When pursuant to the preceding sentence, a person (including a private foundation) ceases to be a beneficiary, stock or another interest in a business enterprise owned by the estate shall not thereafter be considered owned by such person. If any person is the constructive owner of an interest in a business enterprise actually held by an estate, the date of death of the testator or decedent intestate shall be the first day on which such person shall be considered a constructive owner of such interest. See § 53.4943–5 for rules relating to wills executed on or before May 26, 1969.

(c) *Corporation actively engaged in a trade or business.* [Reserved]

(d) *Partnerships.* [Reserved]

(e) *Examples.* [Reserved]

§ 53.4943–9 Business holdings; certain periods.

(a) *Taxable period*—(1) *In general.* For purposes of section 4943, the term "taxable period" means, with respect to any excess business holdings of a private foundation in a business enterprise, the period beginning with the first day on which there are such excess business holdings and ending on whichever of the following is the earlier:

(i) The date of mailing of a notice of deficiency under section 6212 with respect to the tax imposed on such holdings by section 4943(a); or

(ii) The date on which such excess is eliminated.

For example, M, a private foundation, first has excess business holdings in X, a corporation, on February 5, 1972. A notice of deficiency is mailed under section 6212 to M on June 1, 1974. With respect to M's excess business holdings in X, the taxable period begins on February 5, 1972, and ends on June 1, 1974.

(2) *Special rule.* Where a notice of deficiency referred to in subparagraph (1)(i) of this paragraph is not mailed because there is a waiver of the restrictions on assessment and collection of a deficiency, or because the deficiency is paid, the date of filing of the waiver or the date of such payment, respectively, shall be treated as the end of the taxable period.

(3) *Suspension of taxable period for 90 days.* In any case in which a private foundation has excess business holdings solely because of the acquisition of an interest in a business enterprise to which paragraph (a)(1)(ii) or (iii) of § 53.4943–2 applies, the taxable period described in paragraph (a) of this section shall be suspended for the 90-day period (as extended) starting with the date on which the foundation knows or has reason to know of the acquisition, provided that at the end of such period the foundation has disposed of such excess holdings.

(b) *Correction period*—(1) *In general.* For purposes of section 4943, the correction period shall begin with the first day on which the private foundation has excess business holdings in a business enterprise and end 90 days after the date of mailing of a notice of deficiency under section 6212 with respect to the tax imposed by section 4943(b).

(2) *Extensions of correction period.* (i) The correction period referred to in subparagraph (1) of this paragraph shall be extended by any period in which a deficiency cannot be assessed under section 6213(a). In addition, the correction period shall be extended in accordance with subdivisions (ii), (iii), and (iv) of this subparagraph, except that such subdivision (iii) or (iv) shall not operate to extend a correction period with respect to which a taxpayer has filed a petition with the Tax Court for redetermination of a deficiency within the time prescribed by section 6213(a).

(ii) The correction period referred to in subparagraph (1) of this paragraph may be extended by any period which the Commissioner determines is reasonable and necessary to permit orderly disposition of excess business holdings. The Commissioner ordinarily will not extend the correction period pursuant to this subdivision unless the following factors are present:

(a) The foundation or an appropriate State officer (as defined in section 6104(c)(2)) is actively in good faith seeking to dispose of such holdings;

(b) Orderly disposition of such holdings cannot reasonably be expected to result during the unextended correction period; and

(c) The failure to divest appears to have been an isolated occurrence which is unlikely to recur in the future.

(iii) If, within the unextended correction period, the tax imposed by section 4943(a) is paid and is accompanied by a statement of the taxpayer's intent to file a claim for refund with respect to such tax, then the Commissioner shall extend the correction period to the later of—

(a) A period of 90 days after the payment of such tax, or

(b) The period determined without regard to this subdivision.

(iv) If prior to the expiration of the correction period (including extensions) a claim for refund with respect to a tax imposed by section 4943(a) is filed, the Commissioner shall extend the correction period during the pendency of the claim plus an additional 90 days. If within such time, a suit or proceeding referred to in section 7422(b) with respect to such claim is filed, the Commissioner shall extend the correction period during the pendency of such suit or proceeding. (See § 301.7422–1(d) of this chapter (Regulations on Procedure and Administration) for rules relating to pendency of such suit or proceeding.)

(c) *Correction.* For purposes of section 4943, correction shall be considered as made when no interest in the enterprise held by the foundation is classified as an excess business holding under section 4943(c)(1). In any case where the private foundation has excess business holdings which are constructively held for it under section 4943(c)(1), correction shall be considered made when either a corporation, partnership, estate, or trust in which holdings in such enterprise are constructively held for the foundation or a disqualified person; the foundation itself; or a disqualified person disposes of a sufficient interest in the enterprise so that no interest in the enterprise held by the foundation is classified as excess business holdings under section 4943(c)(1).

§ 53.4943–10 Business enterprise; definition.

(a) *In general.* (1) Except as provided in paragraph (b) or (c) of this section, under section 4943(d)(4) the term "busi-

V 42 179 SEP 15 77 UMI

ness enterprise" includes the active conduct of a trade or business, including any activity which is regularly carried on for the production of income from the sale of goods or the performance of services and which constitutes an unrelated trade or business under section 513. For purposes of the preceding sentence, where an activity carried on for profit constitutes an unrelated trade or business, no part of such trade or business shall be excluded from the classification of a business enterprise merely because it does not result in a profit.

(2) Notwithstanding paragraph (a)(1) of this section, a bond or other evidence of indebtedness does not constitute a holding in a business enterprise unless such bond or evidence of indebtedness is otherwise determined to be an equitable interest in such enterprise. Similarly, a lease-hold interest in real property does not constitute an interest in a business enterprise, even though rent payable under such lease is dependent, in whole or in part, upon the income or profits derived by another from such property, unless such leasehold interest constitutes an interest in the income or profits of an unrelated trade or business under section 513.

(b) *Certain program-related activities.* For purposes of section 4943(d)(4) the term "business enterprise" does not include a functionally related business as defined in section 4942(j)(5). See § 53.4942(a)-2(c)(3)(iii). In addition, business holdings do not include program-related investments (such as investments in small businesses in central cities or in corporations to assist in neighborhood renovation) as defined in section 4944(c) and the regulations thereunder.

(c) *Income derived from passive sources.*—(1) *In general.* For purposes of section 4943(d)(4), the term "business enterprise" does not include a trade or business at least 95 percent of the gross income of which is derived from passive sources; except that if in the taxable year in question less than 95 percent of the income of a trade or business is from passive sources, the foundation may, in applying this 95 percent test, substitute for the passive source gross income in such taxable year the average gross income from passive sources for the 10 taxable years immediately preceding the taxable year in question (or for such shorter period as the entity has been in existence). Thus, stock in a passive holding company is not to be considered a holding in a business enterprise even if the company is controlled by the foundation. Instead, the foundation is treated as owning its proportionate share of any interests in a business enterprise held by such company under section 4943(d)(1).

(2) *Gross income from passive sources.* Gross income from passive sources, for purposes of this paragraph, includes the items excluded by section 512(b)(1) (relating to dividends, interest, and annuities), 512(b)(2) relating to royalties), 512(b)(3) (relating to rent) and 512(b)(5) (relating to gains or losses from the disposition of certain property). Any income classified as passive under this paragraph does not lose its character merely because section 512(b)(4) or 514 (relating to unrelated debt-financed income) applies to such income. In addition, income from passive sources includes income from the sale of goods (including charges or costs passed on at cost to purchasers of such goods or income received in settlement of a dispute concerning or in lieu of the exercise of the right to sell such goods) if the seller does not manufacture, produce, physically receive or deliver, negotiate sales of, or maintain inventories in such goods. Thus, for example, where a corporation purchases a product under a contract with the manufacturer, resells it under contract at a uniform markup in price, and does not physically handle the product, the income derived from that markup meets the definition of passive income for purposes of this paragraph. On the other hand, income from individually negotiated sales, such as those made by a broker, would not meet such definition even if the broker did not physically handle the goods.

(d) *Application of section 4943(c)(6).*—(1) *Program related activities.* If a private foundation holds an interest which is not an interest in a business enterprise because of paragraph (b) of this section (relating to program related activities), and such interest later becomes an interest in a business enterprise solely by reason of failing to meet the requirements of such paragraph (b), such interest will then be subject to section 4943(c)(6) (regardless of when it was originally acquired) and will be treated as having been acquired other than by purchase for purposes of section 4943(c)(6).

(2) *Holding companies.* [Reserved]

(e) *Sole proprietorship.* For purposes of section 4943 and the regulations thereunder, the term "sole proprietorship" means any business enterprise (as defined in paragraphs (a), (b), and (c) of this section—

(1) Which is actually and directly owned by a private foundation,

(2) In which the foundation has a 100 percent equity interest, and

(3) Which is not held by a corporation, trust, or other business entity for such foundation.

A foundation may be considered to own a sole proprietorship even though the foundation is itself a corporation or a trust. However, a sole proprietorship which is owned by a foundation shall cease to be treated as a sole proprietorship when the foundation no longer has a 100-percent interest in the equity of the business enterprise. Thus, if and when a foundation sells a 10-percent interest in a sole proprietorship, such business enterprise shall be treated as a partnership under section 4943 and the regulations thereunder.

§ 53.4943–11 Effective date.

(a) *In general.* Section 4943 and §§ 53.4943–1 through 53.4943–11 shall take effect for taxable years beginning after December 31, 1969, except as otherwise provided by such sections.

(b) *Special transitional rule.* In the case of any acquisition of excess holdings prior to February 2, 1973, section 4943(a)(1) shall not apply if correction occurs (within the meaning of paragraph (c) of § 53.4943–9) within a period ending 90 days after July 5, 1977 extended (prior to the expiration of the original period) by any period which the Commissioner determines is reasonable and necessary (within the meaning of paragraph (b) of § 53.4943–9) to bring about such correction.

Title 33—Navigation and Navigable Waters

CHAPTER 1—COAST GUARD, DEPARTMENT OF TRANSPORTATION

[CGD 76–139a]

PART 117—DRAWBRIDGE OPERATION REGULATIONS

Dodge Island, Fla.

AGENCY: Coast Guard, DOT.

ACTION: Correction.

SUMMARY: In FR Doc. 77–16705 appearing at page 30178 of the June 13, 1977, issue of the FEDERAL REGISTER, the heading of § 117.446f is corrected by adding the words, "AIWW mile 1089.4, Miami, Florida", after the words, "Dodge Island bridges".

FOR FURTHER INFORMATION CONTACT:

Frank L. Teuton, Jr., Chief, Drawbridge Regulations Branch (G–WBR/73), Room 7300, Nassif Building, 400 Seventh Street SW., Washington, D.C. 20590 (202–426–0942).

(Sec. 5, 28 Stat. 362, as amended, sec. 6(g)(2), 80 Stat. 937; 33 U.S.C. 499, 49 U.S.C. 1655(g)(2); 49 CFR 1.46(c)(5))

Title 36—Parks, Forests, and Public Property

CHAPTER I—NATIONAL PARK SERVICE, DEPARTMENT OF THE INTERIOR

PART 17—CONVEYANCE OF FREEHOLD AND LEASEHOLD INTERESTS ON LANDS OF THE NATIONAL PARK SYSTEM

AGENCY: National Park Service.

ACTION: Final rule.

SUMMARY: This is to establish regulations governing the criteria for conveyance of freehold or leasehold interests in lands within units of the National Park System to private parties and the procedures under which such conveyances would be made.

EFFECTIVE DATE: September 15, 1977.

FOR FURTHER INFORMATION CONTACT:

C. Allen Harpine (202–523–5252).

SUPPLEMENTARY INFORMATION: On January 4, 1977 there was published

in the FEDERAL REGISTER (42 FR 814–815) a notice of proposed rulemaking setting forth the proposed regulations. Interested parties were given the opportunity to submit written comments, suggestions, or objections, on or before February 3, 1977. This date was later extended to April 3, 1977.

As a result of comments received there has been an addition in §§ 17.3 and 17.8 to assure that no conveyance is made without first complying with the requirements of Executive Order 11593, Section 2(b), and assuring that such land is surveyed for National Register properties and appropriate action taken.

Therefore, title 36 of the Code of Federal Regulations, Chapter I is amended by adding a new Part 17 to read as set forth below.

WILLIAM J. WHALEN,
Director, National
Park Service.

SEPTEMBER 2, 1977.

Sec.
17.1 Authority.
17.2 Definitions.
17.3 Lands subject to disposition.
17.4 Notice.
17.5 Bids.
17.6 Action at close of bidding.
17.7 Preference rights.
17.8 Conveyance.

AUTHORITY: Sec. 5(a) of the Act of July 15, 1968, 82 Stat. 354, 16 U.S.C. 4601–22(a).

§ 17.1 Authority.

Section 5(a) of the Act of July 15, 1968, 82 Stat. 354, 16 U.S.C. 4601–22(a), authorizes the Secretary of the Interior, under specified conditions, to convey a leasehold or freehold interest on Federally owned real property acquired by the Secretary from non-federal sources within any unit of the National Park System except national parks and those national monuments of scientific significance. This legislation is referred to as "the act" in regulations in this part.

§ 17.2 Definitions.

As used in the regulations in this part:

(a) "Secretary" shall mean Secretary of the Interior and his authorized representatives.

(b) "Authorized officer" shall mean an officer or employee of the National Park Service designated to conduct the sale or lease and delegated authority to execute all necessary documents, including deeds and leases.

(c) The term "unit" of the National Park System means any area of land or water administered by the Secretary of the Interior through the National Park Service for park, monument, historic, parkway, recreational, or other purposes.

(d) The term "national park" means any unit of the National Park System the organic act of which declares it to be a "national park."

(e) The term "national monument of scientific significance" means a unit of the National Park System designated as a national monument by statute or proclamation for the purpose of preserving landmarks, structures, or objects of scientific interest.

(f) The term "person" includes but is not necessarily limited to an individual, partnership, corporation, or association.

(g) The term "freehold interest" means an estate in real property of permanent or of indefinite duration.

(h) The term "leasehold interest" means an estate in real property for a fixed term of years or an estate from month-to-month or from year-to-year.

(i) The term "fair market value" means the appraised value as set forth in an approved appraisal made for the Secretary for the interest to be sold or leased.

§ 17.3 Lands subject to disposition.

The Act is applicable to any Federally owned real property acquired by the Secretary from non-federal sources within any unit of the National Park System other than national parks and those national monuments of scientific significance. No leasehold or freehold conveyance shall be made except as to lands which the General Management Plan for the particular unit of the National Park System has designated as a Special Use Zone for the uses that are permitted by the freehold or leasehold conveyance. No leasehold or freehold conveyance shall be made unless the lands have been surveyed for natural, historical, and cultural values and a determination made by the Secretary that such leasehold or freehold conveyance will not be inconsistent with any natural, historical, or cultural values found on the land.

§ 17.4 Notice.

(a) When the Secretary has determined in accordance with these regulations that a freehold or leasehold interest will be offered, he will have a notice published in the FEDERAL REGISTER and, subsequently, once weekly for five consecutive weeks in a newspaper of general circulation in the vicinity of the property. Publication of the notice shall be completed not less than 30 nor more than 120 days of the date for bid opening. The notice shall contain, at a minimum, (1) a legal description of the land by public lands subdivisions, metes-and-bounds, or other suitable method, (2) a statement of the interest to be conveyed, including restrictions to be placed on the use of the property, (3) a statement of the fair market value of the interest as determined by the Secretary below which the interest will not be conveyed, together with information as to where the Government's appraisal may be inspected, (4) information as to any preference rights of former owners to acquire the interest upon matching the highest bid, (5) an outline of bid procedure and a designation of the time and place for submitting bids, and (6) an outline of conveyance procedures, requirements, and time schedule.

(b) If the property has been in Federal ownership for less than two years, the last owner or owners of record shall be sent a notice by certified mail to their present or last known address providing the information in the published notice and advising them of their right under section 5(a) of the act to acquire the interest upon payment or agreement to pay an amount equal to the highest bid price.

§ 17.5 Bids.

Bids may be made by the principal or his agent, either personally or by mail. Bids will be considered only if received at the place and prior to the hour fixed in the notice. No particular form is specified for bids. However, a bid must be in writing, clearly identify the bidder, be signed by the bidder or his designated agent, state the amount of the bid, and refer to the notice. Bids conditioned in ways not provided for by the notice will not be considered. Bids must be accompanied by certified checks, post office money orders, bank drafts, or cashier's checks made payable to the United States of America for the amount of the bid in case of a freehold interest or for the amount of the first year's rent in the case of leasehold interest. This payment will be refunded to unsuccessful bidders. A separate nonrefundable payment of $100 to cover costs of publication and of processing of bids will also be included with the bid. The bid and payments must be enclosed in a sealed envelope upon which the prospective bidder shall write (a) bid on interest in land of the National Park System, and (b) the scheduled date the bids are to be opened. In the event two or more valid bids are received in the same amount, the determination of which is the highest will be by drawing. Bids will be opened at the time and place specified in the notice. Bidders, their agents or representatives, and any other persons may attend the bid opening. No bid in an amount less than the fair market value, as herein defined, shall be considered.

§ 17.6 Action at close of bidding.

The person who is declared by the authorized officer to be the high bidder shall be bound by his bid and the regulations in this part to complete the purchase in accordance therewith unless his bid is rejected or he is released therefrom by the authorized officer. The declared high bid on property for which a preference right exists will be conditionally accepted, subject to the exercise of the preference as described below.

§ 17.7 Preference rights.

On any property which has been in Federal ownership less than two years, the Secretary, in addition to the notice specified in § 17.4, shall inform the last owner or owners of record by certified mail at their present or last known address of the highest bid on the interest and advise them of their right to acquire the interest for an amount equal to the highest bid if within 30 days they notify the Secretary of their desire to do so and make payment or agree to make payment of an amount equal to that specified in § 17.5.

If within 30 days of mailing of such notification, the former owner or owners do not indicate a desire to acquire

V 42 179 SEP 15 77 UMI

the interest and make payment or agree to make payment for such interest in an amount equal to the declared high bid, or, if they do indicate such a desire but fail to consummate the transaction within the time period established for the conveyance, then the bid of the declared high bidder will be accepted. In the event that a former owner who indicates a desire to repurchase pursuant to this procedure fails to consummate the transaction within the established time period the declared high bidder shall be permitted, but not required, to consummate the transaction. If the declared high bidder does not choose to consummate the transaction in this circumstance, the entire transaction will be cancelled, and, if appropriate, a new bidding procedure instituted.

§ 17.8 Conveyance.

Conveyance of a leasehold or freehold interest shall be by lease or deed, as appropriate, at the highest bid price, but not less than fair market value. All conveyance of leasehold or freehold interests shall contain such terms and conditions as the Secretary deems necessary to assure use of the property in a manner consistent with the purpose for which the area was authorized by Congress. The conveyancing or leasing document shall contain such provisions and restrictions as may be determined by the Secretary to be necessary to protect the natural, historic, cultural or other values present on the lands. All conveyances shall be without warranty.

Title 40—Protection of Environment

CHAPTER I—ENVIRONMENTAL PROTECTION AGENCY

[FRL 790-4]

PART 60—STANDARDS OF PERFORMANCE FOR NEW STATIONARY SOURCES

Delegation of Authority to State of Wyoming

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: This rule will change the address to which reports and applications must be sent by owners and operators of new and modified sources in the State of Wyoming. The address change is the result of delegation of authority to the State of Wyoming for New Source Performance Standards (40 CFR Part 60).

ADDRESS: Any questions or comments should be sent to Director, Enforcement Division, Environmental Protection Agency, 1860 Lincoln Street, Denver, Colo. 80295.

FOR FURTHER INFORMATION CONTACT:

Mr. Irwin L. Dickstein, 303-837-3868.

SUPPLEMENTARY INFORMATION: The amendments below institute certain address changes for reports and applications required from operators of new and modified sources. EPA has delegated to the State of Wyoming authority to review new and modified sources. The delegated authority includes the review under 40 CFR Part 60 for the standards of performance for new stationary sources.

A notice announcing the delegation of authority is published today in the FEDERAL REGISTER (Notices Section). The amendments now provide that all reports, requests, applications, submittals, and communications previously required for the delegated reviews will now be sent to the Air Quality Division of the Wyoming Department of Environmental Quality instead of EPA's Region VIII.

The Regional Administrator finds good cause for foregoing prior public notice and for making this rulemaking effective immediately in that it is an administrative change and not one of substantive content. No additional substantive burdens are imposed on the parties affected. The delegation which is reflected by this administrative amendment was effective on August 2, 1977, and it serves no purpose to delay the technical change of this addition of the State address to the Code of Federal Regulations.

(Sec. 111, Clean Air Act, as amended (42 U.S.C. 1857, 1857c-5, 6, 7, 1857g).

Dated: August 25, 1977.

JOHN A. GREEN,
Regional Administrator.

Part 60 of Chapter I, Title 40 of the Code of Federal Regulations is amended as follows:

1. In § 60.4 paragraph (b) is amended by revising subparagraph (ZZ) to read as follows:

§ 60.4 Address.

* * * * * * *

(b) * * *

(ZZ) State of Wyoming, Air Quality Division of the Department of Environmental Quality, Hathaway Building, Cheyenne, Wyo. 82002.

* * * * * * *

SUBCHAPTER E—PESTICIDE PROGRAMS

[OPP-260023A; FRL 790-6]

PART 180—TOLERANCES AND EXEMPTIONS FROM TOLERANCES FOR PESTICIDE CHEMICALS IN OR ON RAW AGRICULTURAL COMMODITIES

Naled

AGENCY: Office of Pesticide Programs, Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This rule (1) corrects an error in the naled regulation, (2) updates the regulation, and (3) editorially revises the format. The amendment was proposed by the Agency. This rule will provide the public with more accurate information in an easier to read style.

EFFECTIVE DATE: September 15, 1977.

FOR FURTHER INFORMATION, CONTACT:

Mr. Edward Gross, Federal Register Section, Technical Services Division (WH-569), Office of Pesticide Programs, EPA, 401 M Street SW., Washington, D.C. (202-755-4854).

SUPPLEMENTARY INFORMATION: On July 8, 1977, the EPA published a notice of proposed rulemaking in the FEDERAL REGISTER (42 FR 35172) proposing that (1) section 180.215 be reformatted, (2) section 180.319 be amended to delete all interim tolerances for naled and (3) section 180.215 be amended to update and clarify the tolerances and to eliminate a contradiction in the tolerances. No comments or requests for referral to an advisory committee were received in response to this notice of proposed rulemaking.

It has been concluded, therefore, that the proposed amendments to 46 CFR 180.215 and 180.319 should be adopted without change, and it has been determined that these regulations will protect the public health.

Any person adversely affected by these regulations may, on or before October 17, 1977, file written objections with the Hearing Clerk, EPA, Room 1019, East Tower, 401 M St. SW., Washington D.C. 20460. Such objections should be submitted in quintuplicate and should specify both the provisions of the regulations deemed to be objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought.

Effective September 15, 1977, Part 180, Subpart C, §§ 180.215 and 180.319 are amended as set forth below.

(Section 408(e) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 346a(e)).)

Dated: September 8, 1977.

EDWIN L. JOHNSON,
Deputy Assistant Administrator for Pesticide Programs.

Section 180.215 is amended by revising the entire section to read as follows:

§ 180.215 Naled; tolerances for residues.

Tolerances are established for residues of the insecticide naled (1,2-dibromo-2, 2-dichloroethyl dimethyl phosphate) and its conversion product 2,2-dichlorovinyl dimethyl phosphate, expressed as naled, resulting from the application of the pesticide to growing crops or from direct application to livestock and poultry, in or on the following raw agricultural commodities:

Commodity:	Parts per million
Almonds (hulls)	0.5
Almonds (nuts)	0.5
Beans (dry)	0.5
Beans (succulent)	0.5
Beets, sugar, roots	0.5
Beets, sugar, tops	0.5

Commodity:	Parts per million
Broccoli	1
Brussels sprouts	1
Cabbage	1
Cattle, fat	0.05
Cattle, mbyp	0.05
Cattle, meat	0.05
Cauliflower	1
Celery	3
Collards	3
Cottonseed	0.5
Cucumbers	0.5
Eggplant	0.5
Eggs	0.05
Goats, fat	0.05
Goats, mbyp	0.05
Goats, meat	0.05
Grapefruit	3
Grapes	0.5
Grasses, forage	10
Hogs, fat	0.05
Hogs, mbyp	0.05
Hogs, meat	0.05
Hops	0.5
Horses, fat	0.05
Horses, mbyp	0.05
Horses, meat	0.05
Kale	3
Legumes, forage	10
Lemons	3
Lettuce	1
Melons	0.5
Milk	0.05
Mushrooms	0.5
Oranges	3
Peaches	0.5
Pears (succulent)	0.5
Peppers	0.5
Poultry, fat	0.05
Poultry, mbyp	0.05
Poultry, meat	0.05
Pumpkins	0.5
Rice	0.5
Safflower, seed	0.5
Sheep, fat	0.05
Sheep, mbyp	0.05
Sheep, meat	0.05
Spinach	3
Squash, summer	0.5
Squash, winter	0.5
Strawberries	1
Swiss chard	3
Tangerines	3
Tomatoes	0.5
Turnips, tops	3
Walnuts	0.5

A tolerance of 0.5 part per million is established for the pesticide naled in or on all raw agricultural commodities, except those otherwise listed in this section, from use of the pesticide for area pest (mosquito and fly) control.

§ 180.319 [Amended]

Section 180.319 is amended by deleting the substance naled and corresponding tabular material from the regulation.

Title 41—Public Contracts and Property Management

CHAPTER 101—FEDERAL PROPERTY MANAGEMENT REGULATIONS

SUBCHAPTER H—UTILIZATION AND DISPOSAL

[FPMR Amdt. H-104]

PART 101-47—UTILIZATION AND DISPOSAL OF REAL PROPERTY

Subpart 101-47.3—Surplus Real Property Disposal

PROPERTY FOR PUBLIC AIRPORTS

AGENCY: General Services Administration.

ACTION: Final rule.

SUMMARY: This rule sets forth the basis for approval of disposals of surplus real property for public airports. The basis has not previously been published. Publication is intended to clarify the basis for approval.

EFFECTIVE DATE: This rule is effective on September 15, 1977.

FOR FURTHER INFORMATION CONTACT:

James R. Bergdahl, Office of Real Property, Public Buildings Service, General Services Administration, Washington, D.C. 20405 (202-566-1339).

Section 101-47.308-2(e) is revised as follows:

§ 101-47.308-2 Property for public airports.

* * * * * *

(e) Upon receipt of such recommendation, the disposal agency may, with the approval of the head of the disposal agency or his designee, convey property recommended by the Federal Aviation Administration for disposal for a public airport to the eligible public agency, subject to the provisions of the Surplus Property Act of 1944, as amended. Approval for aviation areas shall be based on established FAA guidelines, criteria, and requirements for such areas. Approval for nonaviation revenue-producing areas shall be given only for such areas as are anticipated to generate net proceeds which do not exceed expected deficits for operation of the aviation areas applied for at the airport.

* * * * * *

(Sec. 205(c), 63 Stat. 390 (40 U.S.C. 486(c)).)

NOTE.—The General Services Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Orders 11821 and 11949 and OMB Circular A-107.

Dated: September 1, 1977.

ROBERT T. GRIFFIN,
Acting Administrator of General Services.

Title 47—Telecommunication

CHAPTER I—FEDERAL COMMUNICATIONS COMMISSION

[Docket No. 20878; RM-2680]

PART 73—RADIO BROADCAST SERVICES

Television Broadcast Stations in Burlington, Fort Madison, Keokuk, Keosauqua, Rock Rapids, and Sibley, Iowa, and in Winona, Minn.; Changes Made in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Report and order.

SUMMARY: In response to a petition for rule making filed by the State Educational Radio and Television Facility Board of the State of Iowa, the Federal Communications Commission assigns five UHF TV channels to be used on a reserved basis for noncommercial educational purposes at the communities of Fort Madison, Keokuk, Keosauqua, Rock Rapids, and Sibley, Iowa. This action will enable the Board to obtain TV translator stations to provide these communities and the area surrounding them with television coverage.

EFFECTIVE DATE: October 20, 1977.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Thomas L. McCrickard III, Broadcast Bureau, 202-632-9660.

SUPPLEMENTARY INFORMATION: In the matter of amendment of § 73.606 (b), Table of Assignments, Television Broadcast Stations (Fort Madison, Keokuk, Keosauqua, Rock Rapids, Sibley, Iowa), Docket No. 20878, RM-2680, report and order.

Adopted: September 6, 1977.

Released: September 8, 1977.

1. The Commission herein considers the Notice of Proposed Rule Making, adopted July 1, 1976 (41 FR 29869, July 20, 1976), in the above-captioned proceeding instituted in response to a petition filed by the State Educational Radio and Television Facility Board of the State of Iowa ("Board"). The petition proposed the

V 42 I 179 SEP 15 77 V UMI

amendment of Section 73.606(b) of the Commission's Rules, the Television Table of Assignments, by assigning and reserving for noncommercial educational use Channel *38 at Fort Madison, Iowa; Channel *44 at Keokuk, Iowa Channel *54 at Keosauqua, Iowa Channel *25 at Rock Rapids, Iowa and Channel *33 at Sibley, Iowa. Further, it was proposed that Channel *57 be assigned and the unoccupied and unapplied for Channel *58 be deleted at Burlington, Iowa, in order that the requested assignment at Keokuk can be made. Also, the assignment of Channel 44 to Keokuk would require a change in the offset designation of the unoccupied co-channel Winona, Minn., assignment (from plus to minus).

2. The Board is presently the licensee of four noncommercial educational television stations in Iowa,[1] and the permittee of four others,[2] all of which form the Iowa Educational Broadcasting Network. The proposed assignments were requested to enable the Board to extend noncommercial educational television service, by means of translators, to persons residing in and around the specified communities. The only comment received in response to the Notice was a reiteration of intentions by petitioner to submit applications for authority to construct television translator stations on these channels, and when such authority is granted, construct these stations.

3. The Notice indicated that the proposed assignments meet the Commission's separation requirements and other technical criteria. In view of the above, and the fact that it would make possible providing an educational TV service to significant populations not now having such service, the Commission believes that the public interest would be served by adopting the amendments proposed.

4. Accordingly, *It is ordered*, That effective October 20, 1977, the Television Table of Assignments (Section 73.606(b) of the Commission's Rules) is amended with regard to the following communities:

City	Channel No.
Burlington, Iowa	26—, *57—
Fort Madison, Iowa	*38+
Keokuk, Iowa	*44+
Keosauqua, Iowa	*54+
Rock Rapids, Iowa	*25+
Sibley, Iowa	*33
Winona, Minn	*35+, 44—

5. Authority for the action taken herein is found in Sections 4(i), 5(d)(1), 303 (g) and (r) and 307(b) of the Communications Act of 1934, as amended, and Section 0.281 of the Commission's Rules.

6. *It is further ordered*, That this proceeding is terminated.

[1] KDIN-TV, Des Moines, Iowa; KIIN-TV, Iowa City, Iowa; KRIN, Waterloo, Iowa; and KSIN, Sioux City, Iowa.

[2] KHIN, Red Oak, Iowa KBIN, Council Bluffs, Iowa; KTIN, Fort Dodge, Iowa; and KYIN-TV, Mason City, Iowa.

(Secs. 4, 5, 303, 48 Stat., as amended, 1066, 1068, 1082; 47 U.S.C. 154, 155, 303.)

FEDERAL COMMUNICATIONS COMMISSION,
MARTIN I. LEVY,
Acting Chief, Broadcast Bureau.

[FR Doc.77-26745 Filed 9-14-77;8:45 am]

Title 49—Transportation

SUBTITLE A—OFFICE OF THE SECRETARY OF TRANSPORTATION

[OST Docket No. 1; Amdts. 1-127, 1-128]

PART 1—ORGANIZATION AND DELEGATIONS OF POWERS AND DUTIES

Delegations to the Commandant of the U.S. Coast Guard

AGENCY: Department of Transportation.

ACTION: Delegations of Authority; Correction.

SUMMARY: This document corrects the delegation of authority to the Commandant of the U.S. Coast Guard which appeared in the FEDERAL REGISTER on May 3, 1977, page 22366.

EFFECTIVE DATE: September 15, 1977.

FOR FURTHER INFORMATION CONTACT:

B. T. Wade, Jr., Attorney-Adviser, Office of the General Counsel, Department of Transportation, 400 Seventh Street SW., Washington, D.C. 20590 (202-426-4723).

On March 3, 1977, the Secretary of Transportation delegated to the Commandant of the U.S. Coast Guard the authority vested in the Secretary by the Fishery Conservation and Management Act of 1976 (Pub. L. 94-265) (see 42 FR 12176). On May 3, 1977, the Secretary of Transportation also delegated to the Commandant of the United States Coast Guard the authority to develop, coordinate and issue wage schedules under the Federal Wage System. Both of the described delegations were published as 49 CFR 1.46(v). The latter delegation should have been published as 49 CFR 1.46(w). This document is to correct that error.

Since this amendment relates to Departmental management, procedures and practices, notice and public procedure thereon are unnecessary and it may be made effective immediately.

In consideration of the foregoing, § 1.46 of Part 1 of the Code of Federal Regulations is amended by sustituting paragraph "(w)", for paragraph "(v)" as it appeared in the May 3, 1977 issue of the FEDERAL REGISTER.

(49 U.S.C. 1657(e))

Issued in Washington, D.C., on Septemper 9, 1977.

WILLIAM J. DRISCOLL,
Assistant General Counsel for Operations and Legal Counsel.

[FR Doc.77-26789 Filed 9-14-77;8:45 am]

CHAPTER I—MATERIALS TRANSPORTATION BUREAU, DEPARTMENT OF TRANSPORTATION

[Docket No. HM-144; Amdt. Nos. 173-108, 179-19]

PART 173—SHIPPERS—GENERAL REQUIREMENTS FOR SHIPMENTS AND PACKAGINGS

PART 179—SPECIFICATIONS FOR TANK CARS

Shippers; Specification for Pressure Tank Car Tanks

AGENCY: Materials Transportation Bureau, DOT.

ACTION: Final rule.

SUMMARY: As a result of a series of serious railroad accidents involving certain uninsulated pressure tank cars transporting hazardous materials these amendments are issued in the interest of safety.

1. Existing and newly built specification 112 and 114 tank cars used to transport flammable gases such as propane, vinyl chloride and butane are required to have both thermal and tank head protection. Newly built cars are to be so equipped starting on January 1, 1978, while existing cars are to be retrofitted over a four-year period ending on December 31, 1981.

2. Existing and newly built specification 112 and 114 tank cars used to transport anhydrous ammonia are required to have tank head protection (such as a head shield) installed. Cars built after December 31, 1977, must be so equipped. Previously built cars are to be retrofitted with tank head protection over a four-year period ending on December 31, 1981.

3. All specification 112 and 114 tank cars, regardless of the hazardous lading being transported, are to be equipped with special couplers designed to resist coupler vertical disengagements. These couplers are to be installed on cars built after December 31, 1977 and retrofitted on all previously built cars by July 1, 1979.

EFFECTIVE DATE: These regulations become effective on October 19, 1977.

ADDRESS: All written comments received in this proceeding are available for examination during regular business hours in room 6500, Transpoint Building, 2100 Second Street, SW., Washington, D.C.

FOR FURTHER INFORMATION CONTACT:

William F. Black, Office of Safety, Federal Railroad Administration (202-426-2748).

SUPPLEMENTARY INFORMATION: These amendments are the result of the joint efforts of the Federal Railroad Administration (FRA) and the Materials Transportation Bureau (the Bureau). In accordance with internal DOT procedures, the FRA has developed the substantive provisions of these amendments

for review and issuance by the Bureau. Accordingly, further information concerning substantive provisions of these amendments may be obtained from the above contact.

BACKGROUND INFORMATION

On November 19, 1976, as a result of a series of serious railroad accidents involving uninsulated pressure tank cars (built to specifications 112 and 114) transporting hazardous materials, the Materials Transportation Bureau issued a Notice of Proposed Rulemaking, Docket No. HM-144; Notice No. 76-12 (41 FR 52324). The purpose of that Notice was to elicit public comment on a proposed rule to improve the design and construction of new and existing 112 and 114 tank cars. Specifically, the Notice proposed that a new Section 179.105 entitled "Special Requirements for Specification 112 and 114 Tank Cars" be added to Part 179 of the regulations. This section would prescribe new specifications for improving the safety of these cars. The Notice would have required that all newly built 112 and 114 tank cars, be equipped with "shelf couplers," a tank head puncture resistance system, a thermal protection system and a safety relief valve of adequate capacity to protect each thermally insulated tank.

Also, the Notice proposed that existing 112 and 114 tank cars be retrofitted according to the following schedule:

1. Either shelf couplers or a tank head puncture resistance system be installed within one year after the effective date of the rule;

2. Notwithstanding "1," shelf couplers be installed within two years after the effective date of the rule; and

3. Thermal protection and tank head puncture resistance systems with adequate safety relief valve capacity be installed within fours years after the effective date of the rule.

In order to assure compliance with the requirements for thermal protection and tank head puncture resistance within the four-year period, an annual completion schedule was also proposed.

The reasons for these proposals were discussed in considerable detail in the Notice. Interested persons were invited to participate in the rulemaking proceeding through the submission of written comments. Fifty-three submissions were received and have been fully considered by the Bureau in the development of this final rule.

Subsequent to the issuance of the Notice, three serious railroad accidents occurred involving 112 and 114 tank cars.

On November 26, 1976, at Belt, Montana, the Burlington Northern, Inc., had a train derailment. Two persons were killed, six persons were seriously injured and fifteen others were treated for injuries when twenty-four freight cars derailed. One of the derailed cars was CGTX 64226, a 112A tank car, loaded with approximately 31,000 gallons of propane. The tank sustained a tank head puncture, began to release its contents and subsequently ruptured. A second 112A tank car, CGTX 64141, loaded with butane was subjected to the fire environment. Approximately two hours after the accident this tank car ruptured from the heat exposure.

On February 20, 1977, in Dallas, Tex., an Atchison, Topeka and Santa Fe Railway freight train derailed. In the derailment, UTLX 38355, a 112A tank car loaded with 32,437 gallons of propane, sustained a tank head puncture near the base of the head. The escaping propane ignited and the resulting torching flame impinged upon and heated GATX 97359, another 112A tank car, which contained 30,321 gallons of isobutane. After about forty minutes of fire impingement, GATX 97359 exploded violently. The tank separated into three major parts. Fortunately, no injuries resulted from this accident, but the estimated third-party damage has been set at $3,500,000.

On March 16, 1977, at Love, Ariz., an Atchison, Topeka and Santa Fe Railway train derailed. Eight propane laden tank cars were involved:

ACFX 17359—112A340W.
ACFX 17355—112A340W.
RTMX 3515—105A300W.
ACFX 17358—112A340W.
RTMX 3487—105A300W.
RTMX 3526—105A300W.
RTMX 3532—105A300W.
RTMX 3492—105A300W.

All RTMX tank cars had ½-inch jacket heads and insulation.

ACFX 17359 sustained a puncture in the "belly" of the tank. The spilled contents burned. ACFX 17355 ruptured as a result of flame impingement. RTMX 3515 sustained a tank head puncture caused by a wheel cutting through the jacket head and the tank head. The contents ignited and burned. ACFX 17358 sustained a small head puncture. The contents spilled out through this hole and burned; also burning of contents occurred at the safety relief valves. RTMX 3487 which was exposed to fire impingement burned its contents at the safety relief valve. The tank did not rupture; the contents were released through the safety relief valve. The remaining three tank cars, RTMX 3526, 3532 and 3492, sustained no appreciable fire damage.

In the opinion of the Bureau, the tank head punctures sustained by CGTX 64226 at Belt, Montana, and UTLX 38355 at Dallas, Tex., would have been prevented had these cars been equipped with a tank head puncture resistance system. If neither tank car tank head had been punctured, there would have been no spill of product, no fire, and no resulting tank ruptures. No loss of life, nor serious injury would have occurred at Belt, Mont., and very little third-party property damage would have ensued at Dallas, Tex.

The Love, Ariz., accident is more difficult to analyze. The estimated speed at the time of the derailment was 48 miles per hour. The tank tear in ACFX 17359 occurred in the tank shell; tank head protection would not have prevented this tank puncture. ACFX 17355 ruptured due to heat exposure while RTMX 3487 did not rupture. It released its contents through its safety relief valve. Insulation appears to have assisted RTMX 3487 in resisting the adverse affects of fire exposure. Although RTMX 3515 was equipped with a ½-inch jacket head, it sustained a tank head puncture. The high derailing speed of 48 miles per hour appears to have given sufficient energy to a car wheel so that it could puncture both the ½-inch jacket head and the tank head. However, since much of the wheel's energy was dissipated in penetrating the jacket head, it is the Bureau's opinion that the ½-inch steel jacket kept the tank head hole to a minimum. This reduced the amount of fire in the area of this car.

As a result of analyzing comments received, two significant changes have been made in the final rule.

1. Specification 112 and 114 tank cars used to transport hazardous liquids (such as flammable or poisonous liquids) and nonflammable gases other than anhydrous ammonia (such as "fluorocarbon" gases), need only be equipped with shelf couplers. Such cars will continue to be designated as 112A/114A tank cars.

2. Specification 112 and 114 tank cars used to transport anhydrous ammonia need only be equipped (or retrofitted) with a tank head puncture resistance system and shelf couplers; thermal protection is not required. Such cars will be designated as 112S/114S tank cars. Several other changes have been made in the final rule. These changes and comments are discussed in the "Section by Section Analysis" which follows.

SECTION BY SECTION ANALYSIS

SECTION 173.31 QUALIFICATION, MAINTENANCE, AND USE OF TANK CARS

The purpose of amending paragraph (a)(3) is to authorize the use of classes DOT-112T and 112J tank cars having equal or higher marked test pressure when classes DOT-112A and 112S are prescribed, and similarly to authorize the use of classes DOT-114T and 114J tank cars having equal or higher marked test pressures when classes DOT-114A and 114S are prescribed. No specific comments on this change were received; the amendment is being adopted as proposed.

In the notice of proposed rulemaking, §§ 179.105-2(a) (4) and 179.105-3(a) (1) and (2) would require that each newly built 112 and 114 tank car be equipped and each previously built 112 and 114 be retrofitted, with a coupler restraint system. Furthermore, the Notice proposed that such a system be retrofitted within one year on cars not equipped with tank head puncture resistance systems and within two years on all other 112 and 114 cars. The requirement for retrofitting existing cars has been placed in a new paragraph (a)(5) of § 173.31 so as to clearly indicate that it applies to all 112 and 114 tank cars no matter how used, while newly built tank car requirements remain in § 179.105-2(a)(4).

V 42 179 SEP 15 77 UMI V

Several comments were received indicating that it appeared that under the proposal most 112 and 114 tank cars would have to be retrofitted with a coupler retraint system within one year and that it was doubtful that the application of approximately 40,000 shelf couplers (two per tank car) could be accomplished in one year. The Bureau agrees and the retrofit period has been extended to June 30, 1979.

SECTION 173.314 REQUIREMENTS FOR COMPRESSED GASES IN TANK CARS

Currently, note 23 to the table in paragraph (c) states:

Specification 112A or 114A tank cars used for transportation of compressed gases must be equipped with protective head shields after December 31, 1977. See § 179.100–23 for head shield specification.

Note 23 appears in the Table after specifications 112 and 114 for anhydrous ammonia and flammable gases (such as butadiene, LPG, vinyl chloride, etc.). The notice proposed to change this requirement to:

* * * either protective head shields or shelf couplers after (one year after effective date), shelf couplers after (two years after effective date); and thermal protection and tank head puncture resistance systems after (four years after effective date) * * *

The final rule separates the requirements for 112 and 114 tank cars used to transport flammable compressed gases from those used to transport anhydrous ammonia. These requirements are being placed in two notes. Note 23 requires specification 112 and 114 tank cars used for the transportation of flammable compressed gases to be equipped with thermal protection and tank head puncture resistance systems by January 1, 1982.

Note 24 covers anhydrous ammonia cars. Many commenters indicated thermal protection did not appear to be necessary to improve safety on 112 and 114 tank cars transporting nonflammable compressed gases such as "fluorocarbons" and anhydrous ammonia. The Bureau concurs, particularly since accident records maintained by the Federal Railroad Administration show no incidents of thermal rupture of a 112/114 tank car when transporting nonflammable compressed gases. However, due to the toxicity of anhydrous ammonia and the fact that FRA accident records show deaths and injuries caused by the tank head puncture of 112/114 tank cars transporting anhydrous ammonia, new Note 24 requires installation of tank head puncture resistance systems (such as headshields) by January 1, 1982, for 112/114 tank cars transporting anhydrous ammonia. However, tank head puncture resistance systems are not required on cars used to transport other nonflammable compressed gases.

SECTION 179.105 SPECIAL REQUIREMENTS FOR SPECIFICATION 112 AND 114 TANK CARS

This new section sets forth the new requirements for newly built and for retrofitting previously built 112 and 114 tank cars.

SECTION 179.105–1 GENERAL

This new section sets forth three requirements:

1. Tanks built under specification 112 and 114 must meet the requirements of §§ 179.100, 179.101 and when applicable §§ 179.102 and 179.103.

2. AAR approval is not required for changes in nor additions to specifications 112 and 114 tank cars necessary to comply with § 179.105.

3. 112 and 114 tank cars built to specifications promulgated by the Canadian Transport Commission that are not equipped as described in § 179.105 may not be used to transport compressed gases in the United States after December 31, 1981.

No comments were received pertaining to "1" or "3," but many comments were received regarding deletion of "AAR Approval ("2")."

Commenters requested that approval by the AAR Committee on Tank Cars be required for changes in or additions to 112/114 tank cars necessary to comply with § 179.105. It was stated that the railroad "Interchange Rules" require a "Certificate of Construction" before a tank car may move in interchange service. Modifications and additions would still be required to be approved by the Committee. In addition, many commenters expressed belief that the Committee's expertise is essential to assure that modifications to these tank cars are performed properly.

The Bureau recognizes that the existing car owner/rail carrier approval system which is set forth in the AAR "Interchange Rules" may be continued by the AAR Tank Car Committee and that its approval for interchange may, therefore, be required by industry for all additions, modifications and repairs performed to comply with § 179.105. However, the Bureau does not believe that this approval need be imposed by regulation. These standards adopted for improved tank car safety are augmented by specific design criteria (such as specified couplers, head shield designs and thermal protection system), thereby affording tank car owners sufficient guidance to perform the modifications and additions required by this rule. For these reasons, the Bureau has deleted the requirement for AAR Tank Car Committee approval in this rule.

SECTION 179.105–2 NEW CARS

The notice proposed that all 12 and 114 tank cars built after six months after the effective date be equipped with:

1. A thermal protection system (§ 179.105–4);

2. A tank head puncture resistance system § 179.105–5);

3. A safety relief valve meeting the requirements of § 179.105–7; and

4. A coupler restraint system (§ 179.105–6).

Based upon comments received, the Bureau has decided to establish three types of 112 and 114 tank cars. This decision has been alluded to earlier in this preamble. Accordingly, § 179.105–2 has been revised as follows:

1. Newly built 112A and 114A tank cars are authorized to transport hazardous liquids and nonflammable compressed gases, other than anhydrous ammonia. Each is required to be equipped with a coupler restraint system that meets the requirements of § 179.105–6.

2. Newly built 112S and 114S tank cars are authorized to transport anhydrous ammonia as well as commodities authorized to be transported in 112A/114A tank cars. Each is required to be equipped with a tank head puncture resistance system that meets the requirements of § 179.105–5 as well as a coupler restraint system that meets the requirements of § 179.105–6.

3. Newly built 112T, 112J, 114T and 114J tank cars are authorized to transport flammable and non-flammable compressed gases, including anhydrous ammonia, and hazardous liquids. Each is required to be equipped with all four safety measures: Thermal protective system (§ 179.105–4), tank head puncture resistance system (§ 179.105–5), coupler restraint system (§ 179.105–6) and a safety relief valve that meets the requirements of § 179.105–7.

Several commenters suggested that the use of a coupler restraint system such as "shelf couplers" and the perpetuation of FRA Emergency Order No. Five would obviate the need for installation of a tank head puncture resistance system FRA Emergency Order No. Five orders railroad carriers to handle 112 and 114 tank cars not equipped with head shields which are transporting flammable compressed gases in switch yards by "shoving to rest." It was issued as a result of three serious rail switching accidents in which tank cars not equipped with head shields sustained tank head punctures as a result of overspeed impacts. Release of the flammable gas lading and subsequent ignition caused deaths, injuries and substantial property damage. The intent of the Emergency Order was to provide an interim safety measure until all 112 and 114 tank cars transporting flammable gases were equipped with tank head shields (January 1, 1978), and not be applied permanently.

As a result of testing performed at the Transportation Test Center, Pueblo, Colo., it has been demonstrated that for some overspeed switching impacts, shelf couplers will prevent some tank head punctures. For other impacts under differing conditions, shelf couplers were not effective in preventing tank head puncture, but head shields were effective and did prevent punctures. And, under certain test impact conditions involving more than one tank car, a combination of both shelf couplers and head shields were needed to prevent tank head puncture. These test results were summarized at the FRA public briefing held on December 8, 1976.

Tank head punctures occur in train derailments as well as in switching mishaps. Emergency Order No. Five has no effect on train derailment conditions. Therefore, the Bureau has concluded that for tank cars carrying anhydrous ammonia and flammable gases, both a coupler restraint system and a tank head puncture resistance system are necessary to prevent tank puncture in derailments as well as in switch yard accidents. However, for tank cars carrying products having less volatility such as hazardous liquids, and gaseous products having non-toxic, nonflammable properties, the consequence of puncture and product release is not as serious. Therefore, the application of a coupler restraint system will afford adequate public safety. When both a tank head puncture resistance system and a coupler restraint system are applied to all 112 and 114 tank cars used to transport flammable gases, the need for Emergency Order No. Five will end.

179.105–3 PREVIOUSLY BUILT CARS

In the notice of proposed rulemaking, the Bureau proposed that previously built (existing) 112 and 114 tank cars be retrofitted in a four-year time period with a thermal protective system and a tank head puncture resistance system.

Based upon comments received, the Bureau has modified this requirement. The rule requires a tank head puncture resistance system to be retrofit installed on 112S, 112T, 112J, 114S, 114T and 114J tanks cars, but this system is not required on 112A and 114A tank cars. Likewise, thermal protection must be retrofit installed on 112T, 112J, 114T and 114J tank cars, but it is not required on 112A, 112S, 114A and 114S tank cars.

As proposed in the Notice, a coupler restraint system is required to be retrofit installed on all 112 and 114 tank cars by July 1, 1979; for clarity this requirement is stated in § 173.31(a)(5) as well as § 179.105–3(a).

Each car owner is required to install thermal protection and tank head puncture resistance systems in conformance to the following schedule:

1. "Lead time" until January 1, 1978.
2. Twenty percent of cars owned by January 1, 1979.
3. Fifty percent of cars owned by January 1, 1980.
4. Eighty percent of cars owned by January 1, 1981.
5. All cars owned by January 1, 1982.

Many commenters said that they believed that this schedule did not provide adequate time to perform a retrofit installation program of this magnitude. Several requested a six-month "lead time;" essentially this has been granted. Several requested a retrofit schedule of a five, or six-year time period, in lieu of the proposed four-year period. This extended retrofit time period was carefully considered by the Bureau. However, due to the serious catastrophic consequences which can result from a single accident involving uninsulated, nonhead shielded tank cars transporting flammable compressed gases, or involving non-head shielded tank cars transporting anhydrous ammonia, the Bureau believes that it is imperative to have retrofit installation completed as soon as is practicable.

Other factors evaluated by the Bureau in making this decision were:

1. Current regulations contained in § 173.314(c) require head shield installation by January 1, 1978. This requirement is now being phased in over an additional 4-year period.

2. Anhydrous ammonia cars (112S and 114S) will not require thermal protection, thus reducing the magnitude of the retrofit program.

3. Cars for "fluorocarbon gases" and hazardous liquids (112A and 114A) will not require thermal protection nor tank head protection, thus likewise reducing the magnitude of the retrofit program.

For these reasons, the 4-year schedule has been retained.

SECTION 179.105–4 THERMAL PROTECTION

The purpose of this section is to establish performance standards and also testing procedures to verify compliance with these performance standards for thermal protection systems to be applied to 112T, 112J, 114T and 114J tank cars. This section contains six paragraphs:

(a) Performance standard;
(b) Test verification;
(c) Simulated pool fire test;
(d) Simulated torch fire test;
(e) Analysis; and
(f) Exterior tank color.

Paragraph (a) in the Notice proposed a requirement that:

Each specification 112 and 114 tank car shall be equipped with a thermal protection system that prevents the release of any of the car's contents (except release through the safety relief valve) when subjected to:
(1) A pool fire for 100 minutes, and
(2) A torch fire for 30 minutes.

Several commenters suggested that the "performance standards" be replaced by "test requirements" or "qualification tests," or supplemented by "design specifications." These comments pertained not only to thermal protection but also to tank head puncture resistance (§ 179.105–5) and, to a lesser extent, to "coupler restraint" (§ 179.105–6). The Bureau has considered those options but still believes that the performance standards are the best approach because they provide incentives for innovation. Also, the requirement that tank cars covered by these specifications retain the level of protection specified throughout their service life, eliminates the need for detailed maintenance procedures.

The performance standards prescribed are individual requirements which must be demonstrated under simulated pool and torch fire environments. It is not intended that an undamaged tank car be capable of withstanding a 100-minute pool fire and a 30-minute torch fire; and, to satisfy these requirements, one insulated test plate need not be subjected to both tests. Compliance may be achieved by subjecting an insulated test plate to the pool fire test and a similar test plate equipped with the same thermal protection system to the torch fire test. A tank car having an acceptable thermal system which is involved in a severe accident in which the tank and the system sustain considerable physical damage may not be capable of surviving a 100-minute pool fire and a 30-minute torch fire. The thermal protection system may not eliminate all tank car ruptures, but when properly maintained most thermal ruptures will be prevented. Damaged or deteriorated systems must be repaired or replaced before the cars is again used.

Several commenters recommended that additional fire testing and in-service testing of thermal protection systems be conducted before final rulemaking. The Bureau recognizes that additional testing can always be said to provide additional data, but it does not concur in the need for additional testing in this case. The Bureau believes that the extensive series of fire tests conducted by FRA and RPI/AAR demonstrate not only the utility and practicality of a thermal shield system, but also provide sufficient data for reliable cost projections. Furthermore, the Bureau believes that the successful in-service use of thermal shields to protect aerospace hardware and stationary compressed gas tanks, in addition to considerable railroad tank car experience, demonstrate the reliability of several competitive types of thermal shields. The Accelerated Life Test (ALT) program, being conducted by FRA, RUI/AAR, and several shippers, has provided adequate evidence that at least four reliable thermal shield systems are readily available (see discussion below). The Bureau has sought to achieve a condition of adequate protection at minimum cost and sees no reason why additional thermal shield systems cannot be developed.

Most commenters indicated that the extensive testing programs conducted by FRA with the assistance of the RPI/AAR were beneficial in analyzing the problems encountered with uninsulated pressure tank cars and developing solutions to these problems. However, one commenter offered the opinion that DOT sponsored tank car tests were not run to gather information regarding a wreck environment, but were designed to make the tank car look bad in support of some preconceived theories. This commenter used as an example the White Sands Missile Range fire tests which were purported to be "about as far from a wreck environment as could be devised." The Bureau does not agree with this assessment and believes that the tests conducted were reasonable (although not necessarily conservative) simulations of tank car accident scenarios. It should be noted that the time to rupture of an uninsulated tank car in a White Sands test was 24 minutes, whereas in analyzing rail accidents, the RPI/AAR has found that in at least twenty-three instances, the times required to rupture tank cars engulfed in accidental fire were less than 24 minutes. The Bureau, therefore, feels that these fire tests were reasonable simulations of wreck environments.

SEP 15 77 V
UMI

A similar comment was that the two full-scale fire tests conducted at White Sands were run under controlled conditions and yet variables were not controlled. Several instances were cited. The commenter stated that in the non-insulated test the car contained 3,200 gallons more propane than the car in the thermally coated test and that the initial propane temperature was lower in the thermally coated test than in the uninsulated test. The Bureau has analyzed these differences and has concluded that they did not significantly affect the test results and that the differences were partially compensating. For example, a greater initial volume of propane in the thermally coated test would have increased the time to rupture and conversely, a higher initial propane temperature would have decreased the time to rupture. The commenter noted that the propane composition was not reported for the thermally coated test. On the basis of the temperature-pressure data at the start of each test, the Bureau has concluded that there was no significant difference in the propane used in the two tests. Also, the "commercial propane" used in both tests was supplied from the same source. The commenter noted that in the uninsulated test, the temperatures and pressures reported do not match the temperatures and pressures expected. The Bureau has reviewed the temperature-pressure data from the uninsulated test and has concluded that the experimental pressure-temperature data correlate reasonably well with theoretical data. The commenter mentioned that in both tests pure propane temperature-pressure relationships were used to estimate missing data ignoring important factors of superheat, supercooling, compressibility, and the influence of impurities. The Bureau has reviewed the effects mentioned and has concluded that the procedures used in both tests were adequate.

One commenter criticized the quality of some of the reports listed in Appendix A of Notice No. HM-144. To support his position, the commenter used several quotes from "Reference 9" of the Notice. The Bureau does not concur with the assessment of this commenter and believes that the quotes used are taken out of context. For example, the commenter used the following quote from "Reference 9," page 39, first paragraph under B: "Unfortunately, no useful liquid level data were recorded." This quote only referred to direct liquid level measurements. This report also described an indirect method that was used to measure liquid level. Another misleading quote was from "Reference 9," page 39, third paragraph under VI.A: "One or more sign reversals occurred in the recorded emf values during the test, indicating that the data recorded are not reliable." This latter quote was only in reference to a particular, small group of thermocouples. The majority of thermocouples did not experience any sign reversals and were reliable.

Paragraph (b) in the Notice established the method of verifying by testing that the thermal protection system meets the performance standard. Several commenters noted that the Bureau did not identify thermal systems which are deemed acceptable and do not require further testing. The commenters recommended that either a list of approved thermal systems be presented or sufficient time be allowed for the testing of new systems. The Bureau believes there is merit to these comments. Accordingly, the following list specifies thermal protection systems that do not require test verifications under § 179.105-4(b) based upon successful simulation testing conducted by FRA. This list is not intended to be all inclusive, and systems that may be submitted to the Bureau in the future and which are shown to meet the test specifications in § 179.105-4 will also be excepted from the test verification. Information concerning the systems listed below as well as any which may be excepted from verification in the future, is available for inspection in the Docket Section, Room 6500, Transpoint Building, 2100 Second Street, SW., Washington, D.C. 20590.

1. One inch minimum thickness Deltaboard (12 pounds per cubic foot, 15 pounds per cubic foot) encased in an 11-gauge steel jacket. Manufacturer, (Deltaboard) Rockwell Manufacturing Company, Leeds, Alabama.

2. The tank car external surface is prepared by sandblasting to remove all existing paint, primer, grease and loose material. 2 mils (dry) of Thermolag primer-351 are applied to the clean surface. 165 mils (dry) of Thermolag 330-1 subliming compound is next applied to the primed surface. 5 mils (dry) of Thermolag topcoat 350 is applied to the subliming coating. Manufacturer TSI-Inc., St. Louis, Missouri.

3. The tank car external surface is prepared by sandblasting to remove all existing paint, primer, oil, grease, and loose materials. 3 mils (dry) of primer (Military Standard MIL-P-52192B) are applied to the clean surface. Chicken wire (1" hexagonal, 22 gauge) is next attached to the primed surface. 180 mils (dry) of Chartek 59 thermal coating is then applied. 3 mils (dry) of a topcoat (AMBERCOAT 75) is then applied. Manufacturer (Topcoat)-Ameron, Brea, California. Manufacturer (Chartek 59), Avco, Lowell, Massachusetts.
